Disposal of Old Electrical and Electronic Equipment

This symbol indicates that within the countries in the European Union, this product, and any enhancements marked with this symbol, can not be disposed as unsorted waste but must be taken to separate collection at their end- of-life.

Disposal of Battery

Please check local regulations for disposal of batteries. The battery should never be placed in municipal waste. Use a battery disposal facility if available.

Guideline for Headphone and Earphone

To prevent possible hearing damage, please do not listen at high volume levels for long periods.

COMPREHENSIVE 3-YEAR WARRANTY

- Please register your phone at www.sonimtech.com/register, to receive product information and updates.
Sonim devices are covered by a 3-Year comprehensive warranty. The embedded battery is covered by a 1-Year limited warranty. For more information related to the warranty, please refer to the warranty section “Comprehensive 3 Year Warranty” on page 88.

Congratulations on the purchase of a Sonim XP6 mobile phone. This phone is an LTE smartphone enabled handset with quad-band capabilities and has an intuitive, feature-rich user interface, which allows you to make the best use of the offered functions.

Phone Models Covered

This user guide covers Sonim XP6 phone with the model number XP6700. The model name can be read on the phone label under the battery.

Sonim Support Information

For additional product and support information, visit www.sonimtech.com.

Use the Guide Effectively

Familiarize yourself with the terminology and symbols used in the guide to help you use your phone effectively.

HOME SCREEN

This is the screen displayed when the phone is in idle condition or when you tap the Home icon () on the keypad.

TOUCH & HOLD

Touch and hold an item on the screen by touching it and not lifting your finger until an action occurs.

DRAG

Touch and hold an item for a moment and then, without lifting your finger, move your finger on the screen until you reach the target position.

SWIPE OR SLIDE

Quickly move your finger across the surface of the screen, without pausing when you first touch. For example, you can slide a home screen left or right to view the other home screens.

DOUBLE TAP

Tap quickly twice on a map or other screen to zoom. For example, double-tap a location in the map to zoom in, and double-tap again to zoom out.

Signifies a Note.

Options Commonly Used across Menu Items

The following are common actions used across various menu items:

OK	Confirms an action. Use the Center key to perform this function.
BACK	Use this key to display the previous screen.
HOME	Moves the current working application to the recent applications list/background and displays home screen.
RECENT	Displays the thumbnails of the applications that you have worked on recently. To remove any application from this list, swipe the application to left or right.

Please read and understand the following safety guidelines before you use the phone. These guidelines provide details to enable you to operate your phone safely and conform to any legal requirements regarding the use of cellular phones.

Do not to use the phone at a refueling point. Observe restrictions when using radio equipment at fuel depots, chemical plants or where blasting operations are in progress.

Electrical interference may obstruct the use of your phone. Observe restrictions in hospitals and near medical equipment.

Switch off your cellular phone when in an aircraft. Wireless phones can cause interference or danger to an aircraft. In an aircraft, the phone can be used in flight mode.

Do not expose the battery to high temperatures (in excess of 55°C).

Adhere to road safety laws. Do not hold/use a phone while you are driving; find a safe place to stop first. Use hands-free microphone while you are driving.

Avoid using the phone in close proximity to personal medical devices, such as pacemakers and hearing aids.

Use only Sonim XP6 approved charging equipment to charge your phone and avoid damage to your phone.

The symbol of the crossed-out wheeled bin indicates that this product, and any enhancements marked with this symbol, cannot be disposed as unsorted waste but must be taken to separate collection at their end-of-life.

Ensure that only qualified person install or repair your phone.

The Sonim XP6 is water-proof and can be submerged to 2 meters for 1 hour.

- Ensure to properly close the rubber cover of the charging connector and audio connector, to avoid deposits of water drops on these connectors, when the phone is immersed in water.
- Water droplets may condense under the display cover if the phone is immersed in water with significant drop in temperature. This does not indicate water leakage. The droplets disappear at room temperature.

The Sonim XP6 is dust-resistant, rugged and shock-resistant. However, it is not dust-proof or unbreakable if subjected to overwhelming impact. For best results and long product life, one should protect the Sonim XP6 from salt water, dust and strong impacts.

SAR Information

The Sonim XP6 has been certified in compliance with the Government's requirements for exposure to Radio Waves.

When communicating over the wireless network, the mobile phone emits via the radio frequency waves low levels of radio energy. The Specific Absorption Rate, or SAR, is the amount of RF energy absorbed by the body while using the phone and is expressed in watts/kilogram (W/kg).

Governments around the world have adopted comprehensive international safety guidelines, developed by scientific organizations, for example, ICNIRP (International Commission on Non-Ionizing Radiation Protection) and IEEE (The Institute of Electrical and Electronics Engineers Inc.). These guidelines establish permitted levels of radio wave exposure for the general population.

Tests for SAR are conducted using standardized methods with the phone transmitting at its highest certified power level in all used frequency bands.

SAR Data Information for residents in the United States and Canada

The limit recommended by ICNIRP is 1.6 W/kg averaged over one (1) gram of tissue.

The highest SAR value for the Sonim XP6700 phones when tested by Sonim for use:

- By the ear is 0.93 W/1g.
- Worn on the body is 1.29 W/1g provided that the phone is used with a non-metallic accessory with the handset at least 1 cm from the body, or with the original Sonim accessory intended for this phone

and worn on the body.

HAC Rating

The FCC has created a rating system for cellular phones regarding their HAC-related performance. This rating helps consumers with hearing disabilities to find phones that work well with their hearing aid devices. The HAC rating and measurement procedure are described in the American National Standards Institute (ANSI) C63.19:2011.

ANSI C63.19 contains two rating standards: an "M" rating from 1 to 4 for hearing aids operating in microphone mode, and a "T" rating from 1 to 4 for hearing aids operating in telecoil mode.

M-Rating stands for Microphone rating and indicates the amount of reduction of RF interference between the telephone and the hearing aid in acoustic coupling mode (also called microphone mode).

Phones rated M3 or M4 meet FCC requirements and generate less interference to hearing devices set in microphone mode. T-Rating stands for Telecoil rating and represents inductive coupling with hearing aids that are operating in telecoil mode. A telecoil is a small piece of tightly wrapped wire, built into some hearing aids. While the microphone of a hearing aid picks up all sounds, the telecoil only picks up an electromagnetic signal from the telephone. Thus, users of telecoil-equipped hearing aids are able to communicate over the telephone without the amplification of unwanted background noise.

Phones rated T3 or T4 meet FCC requirements and generate less interference to hearing devices set in telecoil mode.

A combination of M-rating and T-rating defines the final HAC rating and is a deciding factor in selecting

cellular phones for people with hearing problems. A HAC compliant phone could be rated:

- M3/T3
- M3/T4
- M4/T3
- M4/T4

These ratings assist hearing device users to find phones that are compatible with their hearing devices. Ratings are shown on the phone's box or label. The ratings are not guaranteed for suitability. The results vary depending on the individual's hearing loss and the immunity characteristics of the used hearing device, i.e. its resistance to interference. The best way to evaluate the suitability of the phone is to try it with the intended hearing aid device.

Sonim XP6 has been tested for hearing aid device compatibility and complies with the Federal Communications Commission (FCC) requirements. Sonim XP6 is rated M3/T4.

Avoid High Temperatures

Leaving the device in hot or cold places, such as in a closed car in summer or winter conditions, reduces the capacity and lifetime of the battery. For the best results, try to keep the device between -20°C and +55°C (-4°F and 131°F). A device with a hot or cold battery may not work temporarily, even when the battery is fully charged. Battery performance is particularly limited in temperatures well below freezing.

Battery Disposal

Do not dispose of batteries in a fire as they may explode.

Batteries may also explode if damaged. Dispose of batteries according to local regulations and recycle when possible. Do not dispose as household waste. Do not dismantle, open or shred cells or batteries. In the event of a battery leak, do not allow the liquid to come in contact with the skin or eyes. In the event of leak or a hazard seek medical help immediately.

Personal Medical Devices

Mobile phones may affect the operation of cardiac pacemakers and other implanted equipment. Please avoid placing the mobile phone over the pacemaker, for example in your breast pocket. When using the mobile phone, place it at the ear opposite the pacemaker. If a minimum distance of 15 cm (6 inches) is kept between the mobile phone and the pacemaker, the risk of interference is limited. If you suspect that interference is taking place, immediately turn off your mobile phone. Contact your cardiologist for more information. For other medical devices, consult your physician and the manufacturer of the device. Comply with instructions to switch off the device or deactivate the RF transmitter when required, especially when posted in hospitals and aeroplanes. Equipment used in these places may be sensitive to radio waves emitted from the device and adversely affect their operation. Also, observe restrictions at gas stations or other areas with flammable atmosphere or when close to electro-explosive devices.

Child Safety

Do not allow children to play with your mobile phone or its accessories. Keep it out of their reach. They could hurt themselves or others, or could accidentally damage the mobile phone or accessories. Your mobile phone and its accessories may contain small parts, which could be

detached and create a choking hazard.

Emergency Calls

Mobile phones operate using radio signals, which cannot guarantee connection under all conditions. Therefore you should never rely solely upon any mobile phone for essential communications (e.g. medical emergencies). Emergency calls may not be possible in all areas, on all cellular networks, or when certain network services and/or mobile phone features are in use. Check with your local service provider.

To dial emergency calls, when the phone is not connected to any network, tap **Emergency calls** on the home screen. Dial the emergency call number provided by your service provider.

Battery Usage

Sonim XP6 phone comes with a built-in battery. For any battery related queries contact Sonim customer support.

Charging the Battery

We recommend that you charge your mobile phone for 4 hours before using for the first time.

There is a risk of explosion while charging if the battery has been replaced by an incorrect type.

1

Insert Charger

Insert the charger plug into a power outlet

2

Connect to Phone

The charging port is located in lower side of the phone, below the back cover. Insert the charger connector to the charging port.

3

Charging Animation/Icon

If the battery is being charged when the phone is switched off, a battery charging animation with charged percentage is displayed.

If the battery is being charged while the phone is switched on, the battery charge icon on the home screen shows animation indicating that the battery is being charged. After the phone is fully charged the charging animation stops and you can disconnect the charger from the phone.

Verifying and Optimizing Battery Usage

You can check the battery usage status and also close some applications to save battery power. In the home screen, select **Settings** () > **Device** > **Battery** ().

The current battery charge status (charging or discharging) and the charge level details are displayed on the top of the screen.

The discharge graph on the top of the screen shows the battery level over time since you last charged the device, and how long you have been running on battery power.

The list at the bottom of the screen shows the breakdown of battery usage for individual apps and services. Touch a graph for more details. The details screen for some apps includes buttons that allow you to adjust settings affecting power usage, or stop the app completely.

If you stop some system apps or services such as Google service, your device may not work correctly.

Tips to extend the battery life

Follow these tips to extend your phone's battery life.

- If you are not using Wi-Fi, Bluetooth, or GPS, use the **Settings** to turn them off. The GPS setting is located in **Settings > Personal > Location**.
- Terminate or close Google Maps or Navigation apps to background when you are not using them. They use GPS (and thus more power) only when they're running.
- Set screen brightness to **Auto** and set a shorter Sleep timeout (1 minute). The display settings are located in **Settings > Device > Display**.
- If you are travelling and do not have access to mobile or Wi-Fi network, switch to Airplane mode: Press and hold the power switch until the Phone options dialog appears. Then touch **Airplane Mode**.

What Is In the Box?

The list of items in the Sonim XP6 phone box are:

- Sonim XP6 phone with rechargeable built-in battery
- Quick Start Guide
- Factory Installed SIM Card
- USB Data Cable
- Multi-tool (for SIM removal)
- Wall charger

Phone Specifications

Feature	Description
Camera	Rear camera - 5 MP (Auto focus)
Memory	8 GB
Wireless	Wi-Fi - 802.11 a/b/g/n/r with hotspot function(Max. 5 connections) Bluetooth 4 + LE
Connectivity	Charger port name: 5pins water-proof magnetic USB2.0 3.5 mm headphone jack
Battery	4800mAh (4 pins) embedded Standby: up to 250 hours Talk time: up to 10 hours Music playback: up to 40 hours Video playback: up to 8 hours Web browsing: up to 7 hours

Feature	Description
Operating system	Android Kitkat (4.4.2)

Your SIM Card

The SIM card associates your network services (for example, phone number, data services, and so on) with your phone.

Your Sonim XP6 comes with a SIM card installed at the factory. Please contact your operator to activate your SIM prior to use.

Replacing the SIM Card

1. Remove screw A using the screwdriver in the multi-tool and remove the headset port cover.

2. Remove screw B using the screwdriver in the multi-tool and remove SIM cover.

3. Insert the pin into the pinhole and press inside. The SIM card tray will pop-up. Use the pin to hook into the loop on top of the SIM card tray and remove the tray completely.

4. Insert the SIM card in the tray and return the tray into the slot by pushing it in, make sure the pinhole is aligned next to the headset port.

5. Refix both the covers and screws in place using the screwdriver in the multi-tool.

* Multi-Tool

Sonim XP6 Phone

* Requires a subscription. Please go to www.sonimprotect.com for more information.

Switching On

Press and hold the **Power ON/OFF** key located in the top corner in the left hand side for 2 seconds to Power ON the phone.

When the phone is switched on, it tries to register with the network. After successful registration, the name of the service provider is displayed.

Ensure that a valid SIM card is inserted in your phone.

Setting Up Your Phone

For instructions on using your phone's buttons, charger, battery, and other hardware features, check the printed **Quick Start Guide** provided along with your phone.

When you power ON the phone for the first time, Welcome screen is displayed.

- To choose the language, touch the **Menu**.
- To set up your phone, touch **Start** and follow the instructions.

Setting up Google Touch Keyboard

A series of screens takes you through the setup process. Your XP6 default input method is set to T9. Refer to "**T9 Text Input Method**" on page 25.

Once you have completed the set up process and wish to turn OFF T9 and use the Google touch keyboard, go to **Settings > Language & Input >** scroll down and tap **Default >** slide **Hardware Physical keyboard** to the **OFF** position > tap **Default again > Choose English**

(US) Google Keyboard > Back Key (to return to main settings). The **Settings** menu will display a *light gray check* next to **Google Keyboard** and T9 is still selected. This is for specific applications that use T9.

If you already have Gmail account, use your Gmail address and password or else, create a Gmail account.

If you want to, you can skip some of the setup steps such as mobile network configuration and Wi-Fi configuration during this setup process. Refer to the user guide to configure later.

Need for a Google+™ Account

Your Google Account lets you organize and access your personal information from any computer or mobile device:

- When you sign in to your phone with your Google account, all the contacts you associate with that account in the People app are automatically backed up. As a result, they are always accessible through your Gmail account from any computer. The contacts are also not lost.
- Synchronize and back up your e-mails, multimedia files, contact details and events created in your phone to your Google account. You can use the download backed up information to any other computer or mobile device when you login to the same Google account from that device.
- Protect your personal information as Google accounts are secure, accessible and password protected.
- You can use all the Google services such as Google Maps, Google Play™, Google Now™, Google+ and Chrome bookmarks with a single sign-on user name

and password.

Touch and Type Operations

Sonim XP6 is a touch phone. You can use your fingers to manipulate icons, buttons, menus, and other items on the touchscreen. To select or activate a feature or application, touch it.

Other common touch gestures are:

- **Touch & hold:** Touch & hold an item on the screen by touching it and not lifting your finger until an action occurs.
- **Drag:** Touch and hold an icon for a moment and then, without lifting your finger, move your finger on the screen until you reach the target position. For example, you can drag to reposition shortcuts on the Home screen.
- **Swipe or slide:** Quickly move your finger across the surface of the screen, without pausing when you first touch (so you don't drag something instead). For example, you can slide a Home screen left or right to view the other Home screens.

Managing Home Screen

After you complete the phone setup, the home screen is displayed. The home screen is the beginning point to access all the device's features. The home screen can have multiple panels. To move between the home panels, press the navigation keys.

The navigation keys are located below the display screen.

Keys	Description
	Back - Opens the previous screens in the working sequence till the home screen is displayed. Once the home screen is displayed, it remains there even when you press the back key.
	Home - moves the current working application to the recent applications list/ background and displays home screen.

Keys	Description
	Recent - displays the thumbnails of the applications that you have worked on recently. To remove any application from this list, swipe the application to left or right. Tap the Home key twice to view the recent applications list.

The **Application menu or grid** is located above the navigation buttons in the home screen. The app icons you keep in the tray remain visible on every Home screen panel.

The **Applications Tray** () is always positioned in the center of the favorites tray. Touch it to view all the installed applications and widgets.

The **Display icons** on the top of the display screen provides details about various notifications such as missed calls, new messages and Email messages.

- To view the notifications, swipe your finger down from the top of the screen to view the notification panel settings.

The **System icons** on the right display the current device status such as wireless and network connection strength, battery level and time.

The **Google Search bar**, just below the status and system icons, lets you search your phone or the Internet. Touch Google search bar to type your search terms, or to speak and give a voice input.

You can save folders, application and widget icons in the middle of your home screen panel.

Adding an Application Icon to Home Screen

1. On the home screen, tap **App Tray** ().
2. Swipe left or right to locate the application for which you require a shortcut on the home screen.
3. Touch and hold the application icon and drag it to the home screen.
 - To open an app, folder, or widget, touch its icon.
 - To view other Home screens, swipe your finger quickly left or right.

Creating a Folder on the Home Screen

Folders help you to keep the icons in an organized fashion. To create folders,

1. Touch and hold an icon on the home screen or Applications.
2. Drag and position it on another icon that should be included in the same folder.
3. Hold for a about 2 seconds. Both the icons are grouped together in an unnamed folder.
4. Tap the folder. Tap on the name area and give a suitable name.

Moving an Icon/Folder from the Home Screen

1. Tap and hold the application icon and drag it to the new location.
2. To move it to another panel, drag it to the side of the screen.

Removing an Icon/Folder from the Home Screen

1. Tap and hold the application icon. A **Remove** icon is displayed on the top of the home screen.
2. Drag the icon and position it on the **Remove** icon till it turns red.
3. Drop the icon and it is deleted from the home screen.

Deleting an application icon from the home screen does not delete the application. You must go to the Applications panel and select the application to uninstall it.

Home Screen Indicators

The icons displayed at the top of the screen provides information about the status of the device. Details such as date and time, battery charge status, and data service and Wi-Fi connectivity are displayed when the phone is in standby mode. Other indicators such as Bluetooth connectivity status, airplane mode, alarm and call forward (only if **Always forward** is enabled) are displayed, if the feature is activated.

Icons	Description
	Battery level indicator
	Battery charging in progress

Icons	Description
	No signal
	Signal strength
	No SIM card
	Roaming
	4G LTE network connected
	HSPA or UMTS network connected
	GPRS network connected
	EDGE network connected
	Wi-Fi connected

Icons	Description

	Missed call
	New SMS or MMS
	Alarm activated
	Silent mode activated
	Vibration mode activated
	Airplane mode activated
	Error/information notification - attention required

Icons	Description
	Synced with the associated account such as Google
	Screenshot captured
	Music is played
	Device storage space is running out

Phone Operations Without SIM Card

You can perform the following operations without inserting a SIM card in your phone.

- Make emergency calls.
- View and modify all settings except Data usage and mobile network related settings.
- Activate and share files through Bluetooth.
- Activate and access the Internet, and all your synced accounts using Wi-Fi connectivity.
- Access your phonebook, my files, multimedia files, all tools and applications.
- View and modify your profile settings.

Setting up and Using Lock Screen

You must lock your phone to protect it from unauthorized access.

1. From the **Home** screen or **Notification Panel**, tap **Settings** ().
2. Scroll down and tap **Security**, located under **Personal** settings.
3. Tap **Screen lock** and select one of the following options to configure phone:
 - **None:** Disables the phone lock.
 - **Slide:** When the phone is locked, press and hold * key or swipe to unlock.
 - **PIN:** When enabled, enter you own PIN value. When the phone is locked, unlock it using the PIN.
 - **Password:** When enabled, enter your own password. When the phone is locked, unlock it using the password.

When the phone is locked, you can answer an incoming call, without unlocking the phone. Touch the white phone icon and slide over one of these icons:

Icons	Description
	To answer the call, either press green key on the keypad or swipe towards right on the touch screen.
	To reject the call, either press red key on the keypad or swipe towards left on the touch screen.

Disconnect the call and respond with a default text message from a list of response text messages.

Changing the Wallpaper

You can set an image or a photo stored in your phone as your home sceen wall paper. To change the wallpaper,

1. Tap and hold on the Home screen. Home screen actions is displayed.
1. Tap change wallpaper. "Choose wallpaper from" popup is displayed.
2. Select from one of the following Wallpaper collections
 - **Gallery:** includes photos and screenshots taken using the phone's camera.
 - **Live Wallpapers:** includes animated wallpapers.
 - **Photos:** includes photos taken from the phone camera and the photos from the Google account.
 - **Wallpapers:** includes images that are pre-bundled with the phone.

Taking a Screenshot

You can take the screenshot of the current screen and it is stored in your phone's gallery. To take a screenshot:

1. Ensure that the image to be captured is displayed in the current screen.

2. Press the **Power** and **Volume** down button simultaneously. The screenshot is captured and stored in the gallery. A screenshot captured icon () is also displayed in the home screen top bar.

Voice Input for Text Entry

You can use voice input to enter text by speaking. This feature uses Google's speech-recognition service. It is necessary to have data connection on a mobile or Wi-Fi network to use it.

T9 Text Input Method

To turn **T9 ON**, go to **Settings > Language & Input > scroll down and tap Default > slide Hardware Physical Keyboard to the ON position > Tap Default again > select T9 Text Input > tap the Back Key** to finish set up.

To Enter a Word:

1. Start by pressing the numeric keys from **2** through **9** only once for the required letter.

Ex 1: To enter the word Good, press 4-6-6-3. The word displays on the screen as you type.

Ex 2: To enter the word Hello, press 4-3-5-5-6. The word displays on the screen as you type.

2. If the word does not display correctly, press right navigation key to scroll through alternative word choices. Press either the center **navigation key** or **0** key to accept the word.

To Insert a Number:

1. Press the key labeled with the number you want and use the navigation key to scroll to that number as above.
2. To insert a symbol, press and hold the numeric key **1** and use the **navigation key** to scroll and select a symbol.

You can switch between T9 and multi-tap text entry option by pressing the **#** key until it corresponds to your chosen entry method appearing in the notification bar at the top of your phone display.

The different methods to enter the text:

- T9EN: Enter the text based on the T9 dictionary. All the letters is in upper case (capitalized).
- T9En: Enter the text based on the T9 dictionary. Only the first letter of the paragraph is in upper case (capitalized).

- T9en: Enter the text based on the T9 dictionary. All the letters are in lower case.

To quickly change the input method while typing in an application (like SMS or email), slide down the notification panel, and tap **Choose Input Method** to select **Google Keyboard**.

Keypad Functions

The following table displays the various keys and the corresponding functions they perform:

Keypad key	Operations
 RED PHONE HANDLE/END CALL	• Press to end a call. • Press to return to home screen. • Press to wake up display. • Press to reject an incoming call.
 CALL/ACCEPT/SEND	• Press to answer an incoming call. • After entering a phone number, press to make a call. • Press while in Standby mode to access last received or dialed call list.
 BACK	Present above the Call accept key. Press this key to go back to the previous screen. You can press till you reach the Home screen.
 MENU KEY (CENTER)	Press to perform a specific operation on a selected application.
 NAVIGATION KEYS	Press to navigate in up, down, left and right directions.

ALPHA-NUMERIC KEYS	• Press the required keys (0-9) to enter the desired phone number and press  to make a call. • Enter text while in the text editor.
	• Press and hold in standby mode to access your Voicemail.
	• Press and hold to display '+' used for dialing an international number, while in standby mode. • On editor screen, press 0 to get a blank space in T9 or normal mode.
	• Press and hold to lock/unlock the keypad.
	• Press and hold in standby mode to switch between Meeting on/off modes. To set from keypad, press # key to set the option Silent > Vibrate > General mode. • When entering text, press to switch between lower case, upper case or numeric. • Press and hold to enable/disable T9 mode. • Press and hold to change the language, when entering text.
	• Press and hold to turn on the Torch. • Press again to turn it off.

Time and Date Settings

You can set and display the date and time on the phone. You can also select the display format.

1. From the **Home** screen or **Apps Tray**, tap **Settings** ().
2. Scroll down and tap **Date & Time** () , located under **Personal** settings.
3. Select one of the following options to configure phone:
 - To synchronize the date and time with the network provided time enable **Automatic date and time**.
 - To synchronize the time zone with the network provided time enable **Automatic time zone**.
 - To set the date manually, tap **Set date**. Scroll and select the date, month and year. Tap **Done**.
 - To set the time manually, tap **Select time**. Scroll and select the hour and minute. Tap **Done**.
 - To set the time zone, tap **Select time zone**. Scroll and select your time zone.
 - To set the clock to 24-hour format enable **Use 24-hour format**. By default, the phone is set to 24-hour format.
 - To set your preferred date format, tap **Choose date format**. The date formats supported are Regional (the standard format supported by that country or region, **MM DD YYYY, DD MM YYYY, YYYY MM DD** with / as the date separator).

Language and Input Settings

You can set the phone's language to either US Spanish or English.

1. From the **Home** screen or **Apps Tray**, tap **Settings** ().
2. Scroll down and tap **Language & input** () , located under **Personal** settings.
3. Select **English** or **Espanol** as your preferred language.

All the menu items, user feedback messages and text entry language are displayed in the set language.

Spell Checker Settings

Enable Spell checker, to verify and change the spellings when you type your text message or mail.

Personal Dictionary Settings

The default keyboard input language is set to **English (US)/Spanish (United States) - T9 format**. This cannot be modified.

Speech Settings

- Tap **Speech rate**, to set the Speech input rate to a comfortable speed.
- Tap **Text-to-speech output** to access speech rate
- Tap **Listen to an example** to verify the set speech rate.
- Tap **Default language status**, to view the default language for speech input.
- Tap **Text-to-speech output** to access speech rate.

Mouse/Pointer Settings

Tap **Pointer speed** to set your phone's touch pointer sensitivity to a comfortable level.

Display Settings

1. From the **Home** screen or **Apps Tray**, tap **Settings** ().
2. Scroll down and tap **Display**, located under **Device** settings.
3. Set one of the following options to configure your phone's display:
 - **Brightness:** Set the brightness of the phone display. It is recommended to set to **Auto** so that the display brightness is adjusted automatically based on the brightness of the surroundings. This also optimizes the battery power consumed.
 - **Wallpaper:** Set the wallpaper for your home screen. You can select from one of the following wallpaper collections:
 - **Gallery:** includes photos and screenshots taken using the phone's camera.
 - **Live Wallpapers:** includes animated wallpapers.
 - **Photos:** includes photos stored in your Google photos.
 - **Wallpapers:** includes images that are pre-bundled with the phone.
 - **Sleep:** Set the sleep time so that the screen brightness is turned down after specified time

of phone inactivity. This setting also optimizes the battery power.

- **Daydream:** Enable this to activate the screen saver after specified time of phone inactivity. You can set the screen saver to one of the following options. Tap the **Settings** icon () next to each option, to customize the screen saver.
 - **Clock:** Displays the current system clock.
 - **Colors:** Displays the seven colors of spectrum with various transition effects.
 - **Photo Frame:** Displays the photos present in the gallery and screenshots as full screen images.
 - **Photo Table:** Displays the photos present in the gallery and screenshots as assorted images.
 - **Google Photos:** Displays a photo collage of Google + account.
- **Font size:** Set the font size of the text displayed in the screen.

Power Saving Settings

Viewing Battery Life

To view the battery life when all the apps are running,

1. From the **Home** screen or **Apps Tray**, tap **Settings** ().
2. Scroll down and tap **Battery**, located under **Device** settings.

The battery life and list of running applications is displayed.

Force Stopping an Application

1. From the **Home** screen or **Apps Tray**, tap **Settings** (.
2. Scroll down and tap **Apps**, located under **Device** settings.
3. Tap **All** to view all the applications.
4. Tap the application to be force stopped.
5. Tap **Force stop** to stop an application.

If you force stop an app, it may misbehave.

Reporting an Issue with Application

1. From the **Home** screen or **Apps Tray**, tap **Settings** (.
2. Scroll down and tap **Apps**, located under **Device** settings.
3. Tap **Running** to view all the running applications.
4. Tap the application to be force stopped.
5. Tap **Report** to report an issue.

Connecting a Wireless Display Device

You can utilize the wireless display feature and stream videos and audio to other displays that support cast screen feature. You can perform screen cast from your

phone either using a standard wireless router or even without it.

1. From the **Home** screen or **Apps Tray**, tap **Settings** (.
2. Scroll down and tap **Display**, located under **Device** settings.

Connecting a PC Using USB Connection

You can connect your phone to PC as a Media device (MTP) using USB cable. When the phone is connected to the computer via a USB cable, the following two options are displayed:

- **Media device (MTP):** Select this to use the phone as Media device (MTP) device to transfer data such as music, pictures, and videos between your Sonim phone and your computer.
- **Camera (PTP):** Select this to transfer photos and files that do not support MTP. This transfer method is commonly used for MAC.

USB Tethering

To perform USB Tethering,

Select **Settings > More > Tethering and Portable Hotspot > Enable USB Tethering**.

The user should activate mobile data or get connected to Wi-Fi network.

When the phone is connected to the computer via USB cable, you can select only to charge the phone by pressing the Back button. You need not select the Media device (MTP) or Camera (PTP) option.

When the phone is connected to the computer via USB cable in Media device (MTP) mode phone memory is displayed in the computer.

Viewing Device Details

To view the device details such as system update status, model number, Android version, Kernel and baseband versions,

1. From the **Home** screen or **Apps Tray**, tap **Settings** ().
2. Scroll down and tap **About Phone**, located under **System** settings.

Managing Memory Utilized by Applications

The Apps screen allows you to optimize memory usage for all the applications. To view these settings,

1. From the Home or **Apps Tray**, tap **Settings** ().
2. Scroll down and tap **Apps**, located under **Device** settings. The following tabs are displayed:
 - **Downloaded:** Displays all applications downloaded on Google Play™ or other sources.
 - **Running:** Displays all applications, processes, and services that are currently running or that

have cached processes, and the details about the RAM utilized by each application.

- The graph at the bottom of the **Running** tab shows the total RAM in use and the amount free. Touch **SHOW CACHED PROCESSES** or **SHOW RUNNING SERVICES** to switch back and forth.
- **All:** Displays all applications that are pre-bundled with Android and downloaded on Google Play™ or other sources.

Optimizing Memory Usage

You can optimize your phone's memory by performing the following tasks:

- Uninstall apps that are not required.
- Delete unwanted files that are downloaded or created.
- Transfer files that would be required later to your computer.
- Delete offline content from Google Play™ and stream it via a Wi-Fi or mobile network.

Connecting to Wi-Fi Network

Wi-Fi is a wireless network technology that can provide Internet access at distance up to 100 Feet, depending on the Wi-Fi router and surroundings, when you connect your mobile device to the wireless router.

You can access Internet when you connect your XP6 to a Wi-Fi network. To connect your phone to a Wi-Fi network,

1. From the **Home** screen or **Apps Tray**, tap **Settings** ().
2. Enable **Wi-Fi**, located under **Wireless & Networks** settings.
3. Tap **Wi-Fi**. A list of Wi-Fi routers present within your phone's accessible range are displayed.
4. Tap your preferred network. Enter the WEP/ WPS/ WPA key (if it is a secured network) and tap **Connect**. To verify the password before connecting, enable **Show password**.

It is always recommended to make your Wi-Fi router secure and also to connect your phone to a secure network.

Adding a New Network

To add a new Wi-Fi network

1. In the Wi-Fi settings screen, Tap **Add Network** button (.
2. Enter the following details:
 - **Network SSID:** The wireless network ID.
 - **Security:** Set the security type to None, WEP, WPA/WPA2 PSK, 802.1x EAP.

3. Enable **Advanced Settings** to set the **Proxy details** and **IP settings**.

Editing a Network

1. Tap and hold your preferred network.
2. Select **Modify Network**. The network setting details such as connection status, signal strength, connection speed, security type, IP address and password are displayed.
3. Tap **Save** to save the settings or **Cancel** to exit to the previous screen.

Forgetting a Network

1. Press and hold your preferred network.
2. Select **Forget Network**. The selected network is removed from the list.

Enabling WPS For your Router

To setup a secure Wi-Fi network, press **WPS Push button** () in the **Wi-Fi network Settings** and press the **WPS button** in your router, when prompted.

Enhanced PTT Users Advanced Setting

For EPTT users who do not have a data plan, an additional option allows you to not check for Internet access when connected to Wi-Fi.

Go to **Settings > Wi-Fi > Tap Menu key > Advanced > uncheck the box marked Check internet access**

For more information on EPTT, "Activating EPTT Using Wi-Fi" on page 56.

Connecting to Bluetooth Devices

Bluetooth is short-range wireless communication technology used to communicate between the devices over a distance of about 8 meters (26.25 ft).

You can perform the following tasks using Bluetooth paired devices.

- Transfer media files and contacts between mobile devices connected using Bluetooth.
- Access Internet through a Bluetooth device that is connected to a Wi-Fi router.
- Use Bluetooth connected headphones for playing media file

Pairing a Bluetooth Device

To activate Bluetooth and pair your XP6 phone with other Bluetooth devices:

1. From the **Home** screen or **Apps Tray**, tap **Settings** ().
2. Enable **Bluetooth** located under **Wireless & Networks** settings.
A list of accessible Bluetooth devices are displayed.

Ensure that Bluetooth is activated in the other device too.
3. Select and tap your preferred device.
4. Confirm the pass key in the other device and tap **Pair** in your phone.

The device is displayed in the Paired device list.

Editing Bluetooth Device Settings

1. Tap **Settings** icon () located next to the preferred paired Bluetooth device.
2. Tap **Rename** to rename the display name of the device .
3. Tap **Unpair** to remove the device from your paired list.
4. Enable **Media Audio** to connect the Bluetooth device for listening to media files.
5. Enable **Internet access** to use the paired Bluetooth device to access the Internet.

Optimizing Data Usage

- Data usage refers to the amount of data utilized by your phone during data transfers through Internet. The data usage charges are dependent of the wireless plan provided by your service provider.

To monitor your data usage, adjust your data usage settings.

1. From the **Home** screen or **Apps Tray**, tap **Settings** ().
2. Enable **Data Usage** located under **Data usage** settings.
3. Enable **Mobile Data** to access Internet using your mobile network.
4. Enable **Set mobile data** limit to preset your data usage limit and to set an alert before reaching the preset limit.
5. Drag the red bar to set the **Data usage limit**.

Mobile data access is disconnected automatically as soon as you reach this limit. You cannot access the Internet and related phone features do not work. You receive a notification once you reach the set data usage limit.

6. Drag the yellow bar to set data usage warning so that you receive an alert before reaching your set data usage limit.

Activating Airplane Mode

When your phone is set in airplane mode, network connectivity or mobile data connectivity is disabled. But you can access your camera, medial files and other features that do not require mobile connectivity. To activate airplane mode

1. From the **Home** screen or **Apps Tray**, tap **Settings** ().
2. Tap **More** located under **Wireless & Networks** settings.
3. Enable **Airplane mode**.

Setting Up Tethering & Portable Hotspot

Using tethering and portable hotspot you can share your device's network connection with a computer or with up to other devices, via USB, Wi-Fi, or Bluetooth. To activate USB Tethering,

1. Tap **More** located under **Wireless & Networks** settings.
2. Tap **Tethering & Portable hotspot**.
3. Enable **USB tethering**.

Setting Up Wi-Fi Hotspot

When you setup your phone as a Wi-Fi hotspot you can connect other devices to this phone through Wi-Fi and access Internet.

1. Tap **More** located under **Wireless & Networks** settings.
2. Tap **Tethering & Portable hotspot**.
3. Tap **Set up Wi-Fi Hotspot**.
4. Enter **Network SSID**, **Security details** and **password** and tap **Save**.

Activating Wi-Fi Hotspot

1. From the **Home** screen or **Apps Tray**, tap **Settings** ().
2. Tap **More** located under **Wireless & Networks** settings.
3. Tap **Tethering & Portable hotspot**.

Activating Bluetooth Tethering

When you activate Bluetooth tethering, you can share your phone's Internet connection with other Bluetooth paired devices.

1. Tap **More** located under **Wireless & Networks** settings.
2. Tap **Tethering & Portable hotspot**.
3. Enable **Bluetooth tethering**.

Managing Mobile Network

You can view and modify your mobile service provider

settings. To view and modify your mobile network settings,

1. From the **Home** screen or **Apps Tray**, tap **Settings** ().
2. Tap **More** located under **Wireless & Networks** settings.
3. Tap **Mobile network** settings.
4. Enable **Data enabled** to access the Internet using your mobile network.
5. Enable **Data roaming** to have network connectivity when you are in a roaming network.
6. Select the preferred **Network type**.
7. Tap **Access Point Names** to view and edit the network access points. Tap **Add network** icon () to add a new access point.
8. Tap **Network operator** to view and modify your network operator from the list of available networks.

4. Enable **Turn on notification** to receive notifications when alerts are sent to your phone.
5. Set the **Alert reminder**.

Managing Emergency Alerts

You can activate emergency alerts to get emergency and important broadcast messages from your service provider.

1. From the **Home** screen or **Apps Tray**, tap **Settings** ().
2. Tap **More** located under **Wireless & Networks** settings.
3. Tap **Emergency Alert**. Enable the emergency alert message types such as extreme threats, severe threats and amber alerts, that you would wish to receive.

About Android Security

Android provides a multi-layered approach to the security.

- **Prevent:** Apps on Google Play™ are scanned continuously to block harmful apps and policy violators. You can also choose to have apps installed from other sources verified.
- **Control:** App sandboxes prevent apps from accessing other parts of your device's operating system, or each other, unless you give permission during installation. Screen lock and encryption prevent unauthorized access to the entire device.
- **Defend:** Once identified, dangerous apps can be removed remotely.

For more information about protecting your phone, refer to the topics below.

Managing Security Settings

You can activate and protect your phone from unauthorized by configuring the security settings.

1. From the **Home** screen or **Apps Tray**, tap **Settings** ().
2. Tap **Security** located under **Personal** settings. Enable and modify required security settings.

Locking your Screen

1. Tap **Screen lock** and select one of the following options to configure phone:
 - **None:** Disables the phone lock.
 - **Slide:** When the phone is locked slide to your

right or long press * **key** to unlock the phone.

- **PIN:** When enabled, enter you own PIN value. When the phone is locked, unlock it using the PIN.
- **Password:** When enabled, enter you own password. When the phone is locked, unlock it using the password.

When the phone is locked, you can answer an incoming call, without unlocking the phone. Touch the white phone icon and slide over one of these icons:

Icons	Description
	To answer the call, either press green key on the keypad or swipe towards right on the touch screen
	To reject the call, either press red key on the keypad or swipe towards left on the touch screen.
	Disconnect the call and respond with a quick response from a list of response text messages.

2. Check **Enable Widgets** to view the selected widget shortcuts in the lock screen.
3. Enable **Owner Info** to display your specific owner info in the lock screen. You can modify this detail whenever required.

Encrypting Phone Data

You can encrypt your accounts, phone settings, downloaded applications, contacts, messages data and media files.

Tap **Encrypt phone** to encrypt your phone data. You require a numeric PIN or password to decrypt the data whenever you power ON the phone.

Encryption takes atleast an hour depending on the amount of data to be encrypted. Hence, ensure that your phone is fully charged before you encrypt it.

If data encryption is interrupted, you might lose your phone data.

Locking Your SIM Card

You can activate and set a SIM lock to unlock your SIM, whenever you power ON the phone.

1. Tap **Settings > Security > Setup SIM/RUIM card lock**.
2. Enable **Lock SIM card**.

To disable this option you must enter your SIM lock PIN.

3. Tap **Change SIM PIN**. Enter the old pin and tap **OK**.
4. Enter the new PIN and re-enter the same value when asked. Tap **OK**.

Managing Credential Certificates

You can view, install, verify and manage the certificates installed in your phone.

- Tap **Trusted Credentials** to view and verify the system and user certificates.
- Tap **Install from Storage** to view and install new user certificates.

Protecting your Phone from Harmful Applications

Some applications can harm your device. It is recommended to verify apps in order to help prevent harmful software from being installed on your device.

To prevent installation of application from unknown sources, disable the option **Unknown sources**.

If you want to install applications from unknown sources, enable **Verify apps** under **Settings > Security**, to verify if the application is safe for installation.

Location Access

If you enable Location services, your location is displayed in all your accounts.

3. From the **Home** screen or **App Tray**, tap on **Settings** ().
4. Tap **Location** located under **Personal** settings. Enable and modify required security settings.
5. Enable **Location**.
6. Set the **Location mode** to one of the following options:
 - **High accuracy:** uses AGPS, Wi-Fi, mobile networks, and other sensors to get the highest-accuracy location for your device. It uses Google location services to help estimate your location faster and more accurately.
 - **Battery saving:** allows your device to estimate your location using low battery-intensive location sources, such as Wi-Fi and mobile networks. It uses Google location services to help estimate your location faster and more accurately.
 - **Device only:** allows your device to estimate your location using GPS only. It use the satellite information to provide location information. This mode may use more battery power and take longer to determine your location.

Apps Accessing Your Location

You can view and force stop the apps that are accessing or have recently accessed your location.

1. In the **Location** screen, view the list of applications

that are accessing or recently accessed the Location data of your phone, under **Recent location** request.

2. Tap an application to view the application page. You can stop the application or uninstall it. The following applications are system applications that access the location services by default.
 - **High battery use:** This app receives location information from sources that may use more battery power.
 - **Low battery use:** This app receives location information from only low battery-intensive sources.

Selecting an app brings you to its App info page, where you can view app permissions and uninstall an app.

Backup and Restore Data

You can backup your phone data to one or more of your Google accounts using Android backup services. If you need to replace your device or erase its data, you can restore your data for any accounts that were previously backed up.

To backup your data,

1. From the **Home** screen or **App Tray**, tap on **Settings** ().
2. Tap **Backup & reset** located under **Personal** settings.
3. Enable the option **Back up my data**.

Managing Accounts

You can link an existing Google account to your phone to organize and access your personal information from any

computer or mobile device.

Configure Auto-Sync for all Apps

To control auto-sync for all apps that use it, open **Settings > Wireless & Networks > Data usage > Menu** and check or uncheck Auto-sync data.

If this option is not checked, you may be able to use an app's tools to sync data manually. You can also sync manually to collect messages, e-mail, and other recent information. Leaving auto-sync off can help extend your battery life, but will prevent your from receiving notifications when updates occur.

Adding an Account

1. From the **Home** screen or **App Tray**, tap on **Settings** ().
2. Tap **Accounts** located under **Account** settings.
3. Select the type of account. You can create a **Corporate account** or an **IMAP account**.
4. Complete the on-screen instructions.
The account is displayed under one of the following list:
 - Google accounts shown under **Settings > Accounts > Google**.
 - Other accounts shown under **Settings > Accounts**.

Deleting an Account

You can remove any account and all the information associated with it from your device, including e-mail, contacts, settings, and other data backed up in that account.

1. To remove a Google account , tap the name in **Settings > Accounts** or **Settings > Accounts > Google**.

2. Tap **Menu > Remove account**.

To remove any other type of account, tap **Settings > Accounts > Tap on the account you have to remove > Options > Remove account**.

If you do not have a backup account on your device, you can touch Backup account to add an account.

Syncing Your Account

To view and modify the sync settings for Google accounts,

1. From the **Home** screen or **App Tray**, tap on **Settings** ().
2. Tap **Accounts** located under **Account** settings.
3. Tap **Google account**.

Adding an Account

To enable auto-sync for all apps that are linked with your account,

1. From the **Home** screen or **App Tray**, tap on **Settings** ().
2. Tap **Wireless & Networks** located under **Account** settings.
3. Tap **Data usage > Menu > enable Auto-sync data**.

If this option is not checked, you can only sync the sync data manually. You can also sync manually to collect messages, e-mail, and other recent information.

If auto-sync is disabled, it extends your phone's battery life. But it prevents your from receiving notifications when updates occur.

Configure Google Account Sync Settings

To modify a single Google account's sync settings:

1. From the **Home** screen or **App Tray**, tap on **Settings** ().
2. Tap **Accounts** located under **Account** settings.
3. Tap **Google account**.
 - Indicates that some or all of an account's information is configured to sync automatically.
 - Indicates that none of an account's information is configured to sync automatically
4. Tap the specific account, to change the sync settings.
5. If auto-sync is enabled, you can check or uncheck items to be synced automatically for that account. If auto-sync is off, touch an item to manually sync its data.

Sync a Google Account Manually

1. In the Google settings screen, touch the account whose data has to be synced.
 - Tap **Menu > Sync now**.

You can use the phonebook to maintain phone numbers of your contacts. This feature enables you to add, delete, dial phone numbers, send SMS and MMS messages.

To access the contacts,

From Home or All apps screen, tap **People** (). The contacts saved in the phonebook are displayed.

You can touch and drag the scroll bar on the screen to scroll through the contacts.

Add a New Contact

- To add a new contact, tap **People > Add new contact** (). Enter the contact details and tap **Done** to save the contact.
- You can also enter a number using the dial pad and tap **Add to contacts** to add a new contact.

View the Contact Details

1. From **Home** screen or **Apps Tray**, tap **People** ().
2. Scroll to the required contact and tap the contact, to view the contact details.

Sending a Message from Contacts

You can send SMS and MMS messages to the contacts.

Sending SMS/MMS

1. From **Home** screen or **Apps Tray**, tap **People** ().
2. Scroll to the required contact and tap the **Message** icon (), to open the message screen.

3. (Optional). Tap **Attachment** (), to attach a multimedia file.
4. Type the message and tap **Send** ().

If you attach a media file or a contact to your SMS message it is converted to an MMS message automatically.

Dialing a Number from Contacts

1. From **Home** screen or **Apps Tray**, tap **People** ().
2. Scroll to the required contact and tap the contact to view the contact details.
3. Tap the required phone number to dial the contact or press the **OK** key to dial the default number.

Editing the Contact Details

1. From **Home** screen or **Apps Tray**, tap **People** ().
2. Scroll to the required contact and tap the contact, tap the contact to view the contact details.
3. Press **Menu > Edit**.
4. Edit the required details and tap **Done**.

Importing SIM Card Contacts to Phone

1. From **Home** screen or **Apps Tray**, tap **People** ().
2. Press **Menu > Import/export**.
3. Tap **Manage SIM card contacts**.
The list of contacts stored in your SIM card is displayed.

4. Tap the contact to be moved to the phone.
The contact is imported to the phone address book.

Exporting Phone Contacts to SIM Card

1. From **Home** screen or **Apps Tray**, tap **People** ().
2. Scroll to the required contact and tap the contact, tap the contact to view the contact details.
3. Press **Menu > Import/export**.
4. Tap **Export to SIM card**.
The list of contacts stored in your phone address book is displayed.
5. Check the contacts to be moved to the phone.

The contacts are exported to the SIM card.

Exporting Phone Contacts to Storage

1. From **Home** screen or **Apps Tray**, tap **People** ().
2. Scroll to the required contact and tap the contact, tap the contact to view the contact details.
3. Press **Menu > Import/export**.
4. Tap **Export to storage**.

All the contacts are exported to your computer as .VCF file.

Sharing Contacts via MMS, Bluetooth, Drive and E-mail

You can send contact information by MMS, e-mail or Bluetooth.

1. From **Home** screen or **Apps Tray**, tap **People** ().
2. Scroll to the required contact and tap the contact, tap the contact to view the contact details.
3. Press **Menu > Import/export**.
4. Tap **Export to storage**.
5. Tap **Share visible contacts**.
6. Select one of the following options to share the required contact and tap **Just Once** to select the transfer mode every time or **Always** to send the contact using the same method:
 - **Bluetooth:** Send the contact details to a Bluetooth device paired with your phone. Select the Bluetooth device to share the contact.
 - **E-mail:** Send the contact details as an e-mail message. Ensure to setup your e-mail account before sending e-mail messages. Else you are requested to setup the e-mail account.
 - **Messaging:** Send the contact details as a multimedia message to any mobile phone.
 - **Gmail:** Send the contact details as an e-mail using your configured Gmail account.
 - **Drive:** Save and share the contact details through Google Drive.

You can also share a single contact.

1. Scroll to the required contact and tap the contact, tap the contact to view the contact details.
2. Press **Menu > Share**.
3. Select the sharing option from **Menu** and select

Bluetooth, E-mail or Messaging and share the contact.

Managing Contact Settings

You can edit and modify ringtone and call receiving settings for individual contacts.

1. From **Home** screen or **Apps Tray**, tap **People** ().
2. Scroll to the required contact and tap the contact, tap the contact to view the contact details.
3. Press **Menu** and select one of the following options:
 - **Set ringtone** to set a specific ringtone for that contact.
 - Enable **All calls to voicemail** to forward all incoming calls from that contact to your voice-mail box.
 - Select **Place on Home screen** to copy the contact widget to the Home screen for easy access.

Managing Phonebook Settings

You can set the sort list to view the contacts and also the first or last name of the contact to be displayed first.

1. From **Home** screen or **Apps Tray**, tap **People** ().
2. Press **Menu** and tap **Settings**. Set the following options:
 - **Sort list by:** Sort the contact names by first name or last name.
 - **View Contact names:** Set the contact display name to first name or last name.

- **Activate address book :** Activate the address book if it is not active..

Searching Contacts

1. From **Home** screen or **Apps Tray**, tap **People** ().
2. Tap **Search** () and enter the first few letters/ numbers of the contact name/phone number to be searched.
All the contacts containing the search text are displayed.

Deleting a Contact

1. From **Home** screen or **Apps Tray**, tap **People** ().
2. Scroll to the required contact and tap the contact, tap the contact to view the contact details.
3. Press **Menu** and select **Delete**.
The contact is deleted after confirmation.

Making a Call

- From **Home** screen or **Apps Tray**, tap **Phone** ().

The Phone screen with last dialed number, frequently called contacts, Call history (), dial pad () and call options () is displayed.

To dial a number use one of the following options:

- Call history:** Tap the call history icon (). Tap the contact/number and tap the **phone** icon () located next to the specific phone number/contact.
- Dial pad:** Tap the dial pad. The numeric touch keypad is displayed. Dial the phone number and tap the phone icon to make a call.

To dial an international number, prefix the phone number with the respective country code.

- Frequently called contacts/numbers:** Tap the specific contact/number from the frequently called numbers to make a call.

Dialing a Number via People

- From **Home** screen or **Apps Tray**, tap **People** ().
- Scroll to the contact and tap the contact. The contact details are displayed.
- Tap the required phone number to call the contact.

Answering an Incoming Call

To answer/reject an incoming call, tap the green phone icon and slide to the right over one of these icons:

Icons	Description
	To answer the call, either press green key on the keypad or swipe towards right on the touch screen.
	To reject the call, either press red key on the keypad or swipe towards left on the touch screen.
	Disconnect the call and respond with a quick response from a list of response text messages.

Adding a Contact from Phone Screen

- From **Home** screen or **Apps Tray**, tap **Phone** ().
- Tap **Add contact** (). You can also press **Menu** key.
- Tap **New Contact**.
- Enter the contact details and tap **Done**.

45

Viewing All Contacts from Phone Screen

- From **Home** screen or **Apps Tray**, tap **Phone** ().
- Tap **RSK**.
- Tap **All Contacts**.

Viewing Call History

- From **Home** screen or **Apps Tray**, tap **Phone** ().
- Tap the **Call history** icon ().

3. Tap **All** to view all the incoming, outgoing and missed calls.
4. Tap **Missed** to view only the missed calls.

Deleting Call History

1. From **Home** screen or **Apps Tray**, tap **Phone** ().
2. Tap the **Call history** icon ().
3. Press the **Menu** key.
4. Tap **Clear call log** to delete the call history.

Deleting Frequently Called Contacts List

1. From **Home** screen or **Apps Tray**, tap **Phone** ().
2. Tap **RSK** or the **Menu** key.
3. Tap **Clear Frequents**.

Managing Call Settings

You can change the incoming call ring tone, enable vibrate during call and also activate voice-mail and dial pad touch tones using call settings.

To view and modify call settings,

1. From **Home** screen or **App Tray**, tap **Phone** ().
2. Tap **RSK** or the **Menu** key.
3. Tap **Settings**.

Changing Ringtones and Master Volume

1. From **Home** screen or **App Tray**, tap **Settings** ().
2. Tap **Sound** located under **Device settings**.

3. Tap **Volumes** to set the master volume separately for music, ringtones & notifications, and alarms.

You can also use the physical volume control on the phone to raise or lower volume of whatever sound is currently playing.

4. In the **Call settings** screen, tap **Phone ringtone**.
5. Select the ringtone from the ringtones list and tap **Ok**.

Editing Quick Responses

When you are not able to answer an incoming call, you can send quick response to the caller.

To view and edit quick responses, in the **Call settings** screen, tap **Quick responses**, tap the specific response message to edit. Edit the message and tap **OK**.

Activating Vibrate Mode

In the **Call settings** screen, enable **Vibrate when ringing** to receive both ring and vibrate alert for an incoming call.

To turn off the vibration mode, disable the **Vibrate when ringing** option.

Activating Touch Tones

In the **Call settings** screen, enable **Audible touch tones** to activate touch tones when you press a number on the dial pad.

Changing to Loudspeaker Mode

You can change an incoming and outgoing active call from ear piece to loudspeaker.

1. Touch the **Speaker** icon () on the screen during an active call to enable the loudspeaker.

2. A confirmation message is displayed to **Enable Loud Speaker**.

3. Select **Yes** to enable the call on loudspeaker and **No** to continue the call on ear piece.

When the loud speaker is enabled, the speaker icon is highlighted on the screen.

Managing Fixed Dial Numbers

FDN (fixed dialing numbers) is a SIM card-enabled feature. When activated, this feature restricts outgoing calls only to phone numbers listed in the FDN list. This feature can be activated only if PIN2 is entered. Contact your network operator if you do not have a PIN2.

47

Monitoring Incoming and Outgoing Calls

The Call screening options helps you to monitor and regulate your incoming and outgoing calls.

Screening Outgoing Calls

In the call settings screen, enable **Screening outgoing calls** to call only numbers stored in the FDN list.

Turn on proximity sensor

You can save battery power by switching off the display when you are in a call. Enable Turn on proximity sensor to switch off the display, when you answer a call.

- In the call settings screen, enable **Proximity sensor**.
- To wake up the display, while in call or idle state, a quick press of the **Power** key, **PTT** key or **End** key (on the physical keypad) will light the display.

Setting TTY Mode

If you enable TTY mode, hearing-impaired individuals can send and receive phone calls as text over the phone.

1. In the call settings screen, tap **TTY mode** to view and modify TTY mode settings.
2. Set one of the following options:
 - **TTY Off:** disables TTY mode.
 - **TTY Full:** enables TTY mode for both incoming and outgoing calls. Set this for both hearing and voice assistance.
 - **TTY HCO:** enables TTY mode only for incoming calls. Set this for only hearing assistance.
 - **TTY VCO:** enables TTY mode only for outgoing calls. Set this for only voice assistance.

Call Forwarding

You can forward your incoming calls to a number in the contacts or a new number, provided your network operator supports this service.

To access call forward settings in the call settings screen, tap **Call forwarding**. Select one of the following call forward options:

Options	Function
Always forward	Forward all incoming calls to a pre-designated number.
Forward when busy	Forward calls when your phone is busy.
Forward when unanswered	Forward calls when you do not answer incoming calls.
Forward when unreachable	Forward calls when your phone is switched off or is out of coverage area.

Call Waiting

When call waiting is enabled and the phone is in conversation, the incoming number is displayed when you receive a call.

To activate call waiting in the call settings screen, tap **Additional settings**. Enable **Call waiting**.

Internet Call Settings

You can make calls and receive calls over Internet when connected to Wi-Fi network, rather than over your mobile network.

To place a call over Internet, phone must be configured to use an Internet calling account.

After you set up the account, placing an Internet call is not different than placing any other call. However, you must be connected to a Wi-Fi network. When you are making an Internet call, the phone displays Internet Call near the top of the screen.

SIP Accounts

Internet calling is based on the Session Initiation Protocol (SIP) for voice calls on Internet Protocol (IP) network.

To add a SIP account and configure your incoming and outgoing preferences:

1. In the call settings screen, tap **SIP Accounts**.
2. Enable **Receive incoming calls**, to answer incoming Internet calls.

This might reduce your phone's battery life.

3. Tap **Add account**, to configure a new SIP account.
4. Enter the following details and tap **Save**.
 - **Username:** Username to login to SIP account.
 - **Password:** Password to login to SIP account.
 - **Server:** SIP server details.
 - **Set as primary account:** Enable to set this SIP account as the primary account.
 - **Optional Settings:** Tap to view/modify or hide optional details such as authentication username, display name, outbound proxy address, port number, transport type and Send keep alive options.

Use Internet Calling

1. In the call settings screen, tap **Use Internet Calling** located under **Internet call Settings**.
2. Select one of the following options:
 - **For all calls when data network is available:**

If this option is selected and when the phone is connected to Wi-Fi network or mobile Internet, each dialed call becomes an Internet call.

- **Only for Internet calls:** If this option is selected, only Internet call can be dialed.
- **Ask for each call:** If this option is selected, when a number is selected to dial, a dialog is displayed to select either Cell phone call or Internet call.

Optimizing Power During a Call

- You can save battery power by switching off the display when you are in a call. Enable **Turn on proximity sensor** to switch off the display, when you answer a call.
- To wake up the display, while in a call or idle state, a quick press of the **power** key, **PTT** Key or **End** Key (on the physical keypad) will light the display

SMS and MMS are convenient and inexpensive means of communication. You can send a text message to other people via SMS service. MMS allows you to send messages by including multimedia content such as pictures, audio files, video files, and so on.

You can use the **Messages** in your phone to send an SMS and MMS message to other mobile phones or any other equipment that can receive SMS and MMS.

The MMS feature is available only if you subscribe it from your network operator.

To access the messages function, from the **Home** screen or **App Tray**, tap **Messages** ().

Sending SMS/MMS Message

1. To create a SMS message, from the **Home** screen or **App Tray**, tap **Messages** ().
2. Tap **New message** ().
3. Enter the contact name or the phone number in the **To** field.
If you enter an alphabet, all the contact names starting with that alphabet is displayed as a list. Scroll down to select the contact.
4. Enter the message and tap **Send** ().

When you add a multimedia attachment, the message is automatically converted to a multimedia message. MMS charges are applied based on the operator.

5. You can add any multimedia attachment upto the

size of ≤ 1 Mb. To add an attachment, tap **Attach** (). Select the attachment type from the following options:

6. Browse **My files** or specific folder and select the multimedia file to be attached.

Attachment Type	Description
Pictures	Attach a photo from the phone memory.
Capture picture	Take a new photo using the mobile camera and attach.
Videos	Attach a video from the phone memory.
Capture Video	Take a new photo using the mobile camera and attach.
Audio	Attach an audio file from the phone memory.
Record audio	Record a new audio file using the voice recorder and attach.
Slideshow	Create new slideshow or edit the existing slides and attach.
Vcalendar	Attach a calendar event.

Managing Message Settings

You can customize the way you want to view and filter the messages. You can also set the default messaging application.

To view and modify the message settings,

1. To edit message settings, from the **Home** screen or **App Tray**, tap **Messages** ().
2. Tap **RSK** or the **Menu** key.
3. View and edit the following settings:

Settings	Description
SMS enabled	Set the default messaging application.
Delete old messages	Delete the old messages automatically when the storage limit is reached.
Text message limit	Set the maximum number of SMS messages to be stored.
Multimedia message limit	Set the maximum number of MMS messages to be stored.
Notification	Enable notification alert for incoming messages
Sound	Set the default alert tone for incoming messages
Vibrate	Enable vibrate alert for incoming messages
Manage SIM card messages	Enable to view the messages stored in the SIM card.
Group messaging	Send a single message as MMS message when multiple recipients are selected

Creation mode

Sets the MMS message creation mode to one of the following:

- **Restricted** - the phone will only create and send messages with content belonging to the Core MM Content Domain
- **Warning** - the phone guides you to create and submit only messages with content belonging to the Core MM Content Domain. This guidance is implemented through warning dialog
- **Free** - you can add any content to the message. -

Deleting Messages

To delete all the message threads,

1. From the **Home** screen or **Apps Tray** screen, tap **Messages** ().
2. Tap **RSK** or the **Menu** key.
3. Tap **Delete all threads**. All the message thread are deleted after confirmation.

Emergency Alerts

You receive active alerts and emergency alerts from the service provider.

Setting Up E-mail Accounts

You have to configure and create an e-mail account to

access the e-mail functionalities.

1. To create an E-mail account, from the **Home** screen or **App Tray**, tap **Settings** ().
2. Tap **Add account** () which is located under Accounts.
3. Select the type of account: **Corporate, Google, or POP3/IMAP**.
4. Enter the e-mail address and password. Tap Next for a private email account, such as Google Mail, or tap Manual setup for a company email account. After that, follow on-screen instructions to complete the setup.
5. To setup another e-mail account, follow the same procedure.

Sending an E-mail

1. From **Home** or **App Tray** screen, tap **E-mail** ().
1. Enter the mail recipient in **To field** or select the contact from **People**, subject, and message in the Compose screen.
2. Enter the message in **Compose** and tap on **Send** ().
3. To add an attachment, tap **Menu**. The following are the options:

Option	Description
Attach file	Attach a photo or any other file from the phone memory.

Attach video	Attach a video from the phone memory.
Add Cc/Bcc	Add other recipients.
Save draft	Save the composed mail as a draft.
Discard	Delete the mail.
Settings	Set the general settings.
Insert quick response	Send the required quick responses from the list.
Add reply to	Include a reply to email ID if you want to receive the reply in a different email ID.
Set priority	Set the email priority based on its importance.

Reading an E-mail

1. Select an e-mail account to use, and new e-mails are retrieved.
2. To manually retrieve a new e-mail, tap on **Menu >** to get the **Sync** option.
3. Tap a message to read. The following options are available when a message is opened:
 - Reply to the message
 - Forward the message
 - Open attachment

This section refers to the virtual keyboard using the touch screen. You can view and modify the keyboard, language and dictionary setting using the Phone Settings. If T9 is enabled, for more information, refer “**T9 Text Input Method**” on page 25.

Text Entry Options

When you enter the text message, you can change the text entry options by pressing the # key. The current text entry options are displayed in the top bar.

The various text entry options are

- **ABC:** Enter all the text in upper case.
- **Abc:** Enter the first letter of the paragraph in upper case.
- **abc:** Enter all the text in lower case.
- **123:** Enter the numbers.
- **T9ENG:** Enter the text based on the T9 dictionary. All the letters are in upper case (capitalized).
- **T9eng:** Enter the text based on the T9 dictionary. All the letters are in lower case.

Enter and Edit Text

You can use the virtual Keyboard to enter text quickly and easily. Type faster and more accurately on your device with Keyboard’s word recognition and next-word predictions.

The key features are:

- Personalized suggestions, corrections, and completions
- Keypress popup animations

- Emoji entry point and layouts (Android 4.4+)
- Gesture Typing with dynamic floating preview
- Space-aware Gesture Typing
- Voice typing
- Advanced keyboard layouts

Gesture Typing

Touch the location where you want to type to open the keyboard.

Slide your finger slowly across the letters of the word you want to input.

Release your finger when the word you want is displayed in the floating preview or in the middle of the suggestion strip. To select one of the words in the suggestion strip, tap on it.

53

Use Gesture Typing without the space bar

When you use Gesture Typing, there is no need to use the space bar—just continue to slide your finger across the letters you want to input, then lift your finger to start the next word.

Keyboard Dictionaries

To manage keyboard dictionaries,

1. From the **Home** screen or **App Tray**, tap on **Settings** ().
2. Tap **Language & Input** located under **Personal settings**.

Personal Dictionary

You can add your own words to your personal dictionary so that your device remembers them.

1. To add a word or phrase, including an optional shortcut,
2. Tap **Language & Input** located under **Personal settings**.
3. Tap on **Personal dictionary** and then **Add** ().
4. Add a required word and respective shortcut which is optional.

Add-on Dictionary

1. From the **Home** screen or **App Tray**, tap on **Settings** ().
2. Tap **Language & Input** located under **Personal settings**.
3. Tap **Settings** () icon next to Android Keyboard.
4. Tap **Add-on dictionaries**.

The dictionaries for other languages that you can download to your device are displayed on your XP6 phone.

Sonim supports **Virtual Pre-Load (VPL)** mechanism which is also known as **Stub** to install the EPTT application.

Enhanced Push-To-Talk (EPTT) requires a subscription to work. Additional charges may apply. Contact your representative for more information.

1. The device displays **EPTT application** icon (stub).
2. Tap **EPTT application** icon.
3. **Enhanced EPTT** application starts downloading from **Google Play** and downloads the latest version of the EPTT client.

Placing EPTT Icon on the Home Screen

1. From the application menu, press and hold the EPTT icon.

2. A square box appears that represents the home screen.

3. Drop the **Push To Talk** icon, and it appears on the home screen.

Launching EPTT Application

To launch the **Enhanced PTT** application, click on the **EPTT** icon from Home/Application screen.

1. **Accept** the License agreement.

2. Click **Yes** to activate the **Enhanced Push to Talk** service. The activation can also be processed using Wi-Fi connection or mobile data.

Once the service is activated, the contacts and groups are retrieved from the server.

3. Familiarize yourself with the in-application tutorial to use the EPTT service.

Activating EPTT Using Wi-Fi

1. A screen is displayed prompting to activate **EPTT** service using the Wi-Fi network as a cellular data network.

2. The screen prompts to enter the activation code

provided by the corporate administrator in the specified text box. Enter the activation code and click **Yes** to activate the EPTT over Wifi network.

Enhanced PTT Users Advanced Setting

For EPTT users who do not have a data plan, an additional option allows you to not check for internet access when connected to Wi-Fi.

Go to **Settings > Wi-Fi > Tap Menu key > Advanced > uncheck the box marked Check internet access.**

From the handset's Home screen/Application screen, select the EPTT icon and launch the application. The following EPTT menu icons are displayed:

Home: Displays your EPTT calls and conversation history. You can also change your presence status here.

Contacts: Displays your contacts and allows you to start a EPTT call, and send an alert.

Groups: Displays your groups and allows you to create/edit a group or initiate a group call.

Favorites: Displays your favorite contacts and groups. You can easily start a EPTT call to your favorite.

The EPTT contacts directory is different from the phone's native contacts directory. There are two ways to add EPTT contacts:

- **Add from Native Phonebook:** Select **Native Phone Book** from **+ New Contact**. It opens phone's native contact list, and the user can select the contact from contact list and can modify the selected contact or save the same contact as it is.
- **Add by Manual Input:** Select **Manual Input** from **+ New Contact**, It opens screen to add the contacts. User can create contact manually by typing phone number, name, set favorite and save.

Adding Contacts from Native Phonebook

1. Go to **Contacts** and tap on **+ New Contact**. The following screen is displayed.

2. Tap on the **Native Phonebook**. The following screen is displayed.

3. To modify the contact imported from the native book manually, edit the contact's name and phone number, then select **Save**.

4. If you want a contact to be added as a favorite, then check **Set as Favorite** before pressing **Save**.

5. Once the contact is saved, it is added to the EPTT contact list.

Adding Contacts by Manual Input

1. Go to the contacts and tap on + **New Contact**.
2. Select **Manual Input**.

3. To enter a contact manually, type the contact's name and phone number, and then select **Save**.

4. If you want a contact to be added as a favorite, then check **Set as Favorite** before pressing **Save**.

5. Once you save a contact's information, it is added to the EPTT contact list. The contact is added successfully.

Groups can be added by creating manually or can be pushed to the phone by the corporate administrator. The groups pushed by the corporate administrator (Corporate groups) cannot be changed or deleted from the handset.

1. Go to the **Groups** screen and select **+ New Group** to add a new group.
2. The **New Group Details** screen is displayed.

Enter the group name, scroll down and press **+Add members**. The **Group Members** list is displayed. Select the desired contacts as group members. Go back to the **New Group Details** screen by using the **Return** key. Press **Save** to add the group.

You can assign a group as a favorite by selecting **Set as favorite**.

3. A new group is added successfully.

Deselecting the member(s) from a **Group** screen, removes those member(s) from the **Group**.

Making a EPTT Call to an Individual

1. Go to the **Contacts** screen and select the contact you desire to call.
A call to an individual can also be initiated from **Call** option present in the **Menu** on the phone.

2. Press the **EPTT** button to initiate a call Or go to the **Contacts** screen and long press on the contact you desire to call. Choose **Call** from the **Option** menu. The screen with **Call Ready** status is displayed.
3. Press and hold the EPTT button or press and hold the on screen EPTT call button to start the call. Start speaking after you hear the chirp.

4. When you finish speaking, release the **EPTT** button.
5. When no one has the floor, the **EPTT touch button** turns grey in color.

- When the other person is speaking, the **EPTT touch button** turns red. Unless the other person releases the floor (you will hear a release tone), you cannot start speaking.

- Press the **Menu** option and tap on **End Call** option to end the call.

Making a EPTT Call to a Group

- Go to the **Groups** screen and select the group you desire to call. Press the **EPTT** button to initiate a group call or select a call option from **Menu/Context** menu to initiate a group call.

- Select **Menu** to get the options. Select **Call** from the **Options**.

You may need to touch the screen to scroll through additional menu options as not all items can be displayed in one screen.

3. An on-screen EPTT call button appears.

4. Press and hold the **EPTT** button or press and hold the on-screen button. Start speaking after you hear the chirp. All the available group members receive the call.

5. Press the **Menu** key and tap on **End call** option to end the call.

Making a Quick Group Call

1. Go to the **Contacts** screen and mark the contacts you would like to include in your quick group EPTT call.

2. Press the **EPTT** button or select **Call** from **Menu** option to initiate the call to the selected members.

3. An on-screen **EPTT** call button appears.

4. Press and hold the **EPTT** button or hold the on-screen EPTT call button to start the call. The call is initiated to all the selected contacts. Start speaking after you hear the chirp.

- Press the **Menu** key and tap on **End call** option to end the call.

- Tap on **Menu** option or long press on the contact and select **Edit Contact**.

Editing EPTT Contact

- Select a **Contact** from the list.

- Edit the contact name and favorite setting if required and press **Save**.

The contact modifications are updated.

Deleting EPTT Contact

1. Select a **Contact** from the list.

2. Tap on **Menu** option or long press on the contact and select **Delete Contact**.

3. A confirmation message is displayed. Select **Yes** to delete the selected contact. The selected contact is deleted from the contact list.

Editing EPTT Group

1. Select a group from the list and tap on the **Menu** option.

2. Select **Edit Group** to edit the **Group Name**, **Favorite**. The user can add members and remove members.

The other ways to edit the group are:

- Long press on the **Group** and select **Edit Group** from the **Menu** options.
- Tap on **Menu** option and select **Edit Group**.

The selected group details are edited and modified successfully.

2. A confirmation message is displayed. Select **Yes** to delete the group.

Deleting EPTT Group

1. Press and hold a selected group name which has to be deleted. Select **Menu** option to select **Delete Group**.

3. A pop-up message is displayed confirming that the selected group is getting deleted.

4. The selected group is deleted and a message is displayed **Group successfully deleted.**

Adding a Favorite Contact

The user can add contacts as favorites. The favorite contacts are listed under Favorite tab.

1. **To set a Contact as Favorite:** Go to favorites contact tab and select + **Add Contact**. The contact list is displayed. Select the desired contact/contacts.

2. The selected contacts gets added as a favorite and is displayed under the favorite contacts tab.

3. Selected contact is added to **Favorite** successfully.

Adding a Favorite Group

The user can add groups as favorites. The favorite groups are listed under **Favorite** tab.

1. **To set a group as favorite:** Go to **Favorites Groups** tab and select **+ Add Group**. The group list is displayed. Select the desired **Group/Groups**.

2. The selected groups gets added as a favorite and is displayed under the favorite groups tab.

3. Selected group is added to **Favorite** successfully.

EPTT Presence Status Change

The **EPTT Presence** can be set in two ways:

1. Select **Menu > My Presence**.

2. **My Presence** status can be changed from **Available** to **Do Not Disturb** and vice versa.

3. Select **My Status** from Conversation history screen.

- Available ()
- Do Not Disturb ()

Select one of the following options:

- **Available:** You are available to accept calls and can send or receive alerts.

- **Do Not Disturb:** You are not available to accept calls, but alerts can be received.

Sending Personal Alert

Select the desired contact from the contact list and select **Send Alert** from the menu.

The **personal alert** is sent to the selected contact by pressing * or #.

The personal alert can also be sent using the * or # keys:

1. On **EPTT** homescreen, select **Menu** option.
2. Select **Settings > Actions > Configure Alert Options** to choose either * or # to send the personal alerts.

Receiving Personal Alert

When a personal alert is received, the user is notified with the sender's details such as **Name**, **Date** and **Time**.

Touch the **Call** button or press **EPTT** Hard key to initiate EPTT call with the sender.

When the user is in **Do Not Disturb mode**, still personal alerts can be received.

Missed call Alert

If a EPTT call comes in while you are on a regular phone call or another EPTT call, you will receive a **Missed call alert**. You can press the **Call Soft** button or press **EPTT Hard** key to make a call

To view the EPTT call history screen, go to the Home screen and see a list of the most recent EPTT calls. You can make a call to a contact and group from the conversation history. Also send and receive alert from the conversation history.

1. Available Status:

When the EPTT service is available, **My Status** is in **Available** status and the icon is displayed green in color.

2. Do Not Disturb Status:

When the EPTT service is set to **Do Not Disturb**, **My Status** is in **Do Not Disturb** status and the icon is displayed red in color.

3. Offline Status:

- When the EPTT service is not connected or in offline status, the EPTT notification icon is displayed in the status bar.

- When there is a network error while connecting to the EPTT service and in offline status, and the EPTT icon is displayed grey () in color.

You can customize the application through the **Settings** tab. The following are the most commonly used settings options.

1. The **Settings** option can be found at the last from the menu options.
2. **Alerts and Sounds:** Notification alert tones can be set to vibrate or audible tones.

To view the following options, go to **Options (RSK) > Settings > ALERTS and SOUNDS.**

- **Use Bluetooth for EPTT calls:** Using bluetooth for EPTT calls after pairing with other devices.
- **Vibrate Alert:** Vibrate when new alert is received.
- **Audible Alert:** Play a tone when new alert is received.

- **Alert Repeat:** Choose how often you want alert to repeat, like once, Repeat and continuous.
- **Speaker:** The speaker can be turned **ON** by checking the checkbox and uncheck the checkbox to turn **OFF** the speaker.

By default, the speaker is **ON** and the user gets a call on the speaker.

- **Privacy Mode:** Determine whether to mute the incoming call or use handset earpiece when handset is in silent mode.
3. **Notification Control:** The notifications can be controlled.

To view the following options, go to **Options (RSK) > Settings > NOTIFICATION CONTROL.**

- **Instant Personal Alert:** Alert when Instant personal Alert is received.
- **Missed Call Alert:** Alert for missed calls is received.
- **Call Reconnect Tone:** Determine whether the handset plays the Call Reconnect Tone.
- **Volume:** To increase or decrease the volume from level 0 to level 20.

4. **Information:** The information such as Display name and EPTT Number are displayed.

To view the following options, go to **Options (RSK) > Settings > Information**.

- **Contact Sorting:** Set contact sorting to alphabetical or by availability.

- **Display name:** Your username is displayed.
- **My EPTT Number:** It displays the activated EPTT number.
- **Capacity:** Show available capacity to store Contacts and Groups.
- **About:** Displays information about EPTT application.

5. **Actions:** The actions such as **Configure Alert Options**, **Show Tutorial**, and **Restore Default Settings** can be performed from the following screen.

To view the following options, go to **Options (RSK) > Settings > Actions**.

- **Configure Alert Options:** Use * or # key to send personal alerts.
- **Show Tutorial:** User can view the tutorial of EPTT application.
- **Restore Default Settings:** Restore all application settings to their default values.
- **Logout:** Logout from EPTT application.
- **Auto Start:** Start the EPTT application automatically every time, when handset is turned **ON**.
- **Notification Tone:** To set the Alert tones like Alert1, Alert2, Alert3 & Alert4.
- **Wi-Fi:** Allow EPTT to use Wi-Fi connection when available.
- **Talkgroup Locking:** Enable/Disable Talkgroup Setting.

1. To logout of the EPTT application, go to EPTT setting and select **Logout** option.

2. Confirm the logout screen by selecting **Yes** on the confirmation screen.

The EPTT application is logged out and goes to the homescreen.

Google Play™ Store

Google Play™ store is a one stop application to access all your favorite media content such as games, TV shows, books, music, magazines, and much more.

Downloading Android Applications and Media Files

You can download and install/view your Android applications/media files, when your phone is connected to the Internet through Wi-Fi or mobile data connection. You can also download files from Gmail or other sources.

Managing Downloaded Application

To manage application downloads, select **Settings > Apps > Downloaded**.

Managing Downloaded Media Files

Downloaded movies and other media files such as documents, videos and applications are not listed in the Downloads screen.

Use the **Downloads** screen to view, reopen, or delete the downloaded files.

- Tap the file to open it.
- Touch file headings for earlier downloads to view them.
- Long tap on the downloaded file and check the items you want to share. Then touch the Share icon and choose a sharing method from the list.
- Long tap on the downloaded file and check the item you want to delete. Then touch the **Trash** icon.
- At the top of the screen, touch the 3 horizontal lines

to sort your downloads by name, by date modified, or by size.

Accessing Gmail

Gmail application is used to read and write e-mail from any mobile device.

Gmail account can be used to sign in to all Google applications and services which includes;

- Google Now - Locate the right information at the right time.
- Calendar - View, add and sync the calendar events with the phone
- People - View, add and sync contacts stored in the phone
- Google Drive™ - Access documents on the go.

While reading a message,

- Touch the icons and menus along the top of the screen to archive, label or perform other actions on that message.
- Swipe left or right to delete the message and undo the action.

Camera

The Sonim XP6 has a back camera with 5MP fixed focus for taking pictures. The pictures are saved in the **Gallery** () in your phone memory. You can access gallery from All Apps screen.

- To take a picture, press the **Camera** button (yellow button located on the left side of your phone) or tap the **Camera** icon () present in the All Apps

screen.

The camera screen with touch controls () is displayed.

- Tap **Camera mode** (), to set one of the following modes :
 - **Normal** - () : To shoot a picture in normal mode. Tap the **Capture** icon () to capture the picture. Do two finger pinch on Camera preview screen for Zoom in and Zoom out, to take a clear picture.

Google Calendar™

The Google Calendar helps you to set appointments, schedule reminders and alerts and repeat them if required. You can also view your saved tasks on a daily or weekly basis.

When you first set up your phone and configure it to use a Google Account (such as Gmail), you can link your

Google Calendar also. All the appointments and tasks stored in the Google Calendar will also be synced to your phone.

To access calendar,

1. Tap **Calendar** icon () on the **All Apps** screen.
2. To change the calendar view, choose Day, Week, Month, Agenda from the top of the screen in a drop-down list.
3. Select **Menu** to view the list of following available options:
 - **Today:** Access current date events.
 - **Switch view:** The calendar view can be switched from different view such as **Day, Week, Month, and Agenda.**
 - **New event:** When Google Calendar is synced with you Google account, new event can be added using the Google account.
 - **Refresh:** Refresh the calendar for the updates.
 - **Search:** You can search for a particular event.
 - **Calendars to display:** Displays the calendar which is synced with your Google account.
 - **Settings:** Displays the General settings of the calendar.
 - **Help:** Access the website to view the tutorial.

From any of the calendar views,

- **Read or edit event details:** Tap on the event to view the details.
- **Manage events and calendar:** Touch icons across the menu to search or create events, return to today,

or adjust settings.

Alarm

You can set an alarm for a particular time.

1. Tap the **Clock** icon () located in the All Apps screen.
2. Tap the Alarm activation icon () on the top of the screen.
 - To set a simple alarm, tap Add Alarm () icon. Enter the time and tap Done.
 - To set a reoccurring alarm, enable **Repeat**. Select the days for repeating the alarm.
 - To set the alarm tone, select the type of alarm from the Ringtone list. Tap the selected ringtone and select **OK**.

The alarm will work even when the phone is set in silent mode.

Clock

You can view the time of major cities in different time zones using this function. You also have the option to use Daylight Saving Time (DST).

- The local time in the home city is displayed in the upper half of the screen.
- Tap **World clock** icon () located at the bottom of the screen, to view the list of cities and the current time.
The world cities are listed in the alphabetical order.

- To set the home city, tap the required city from the list. It is added to the **Selected Cities** list. The selected city is set as the home city.

Calculator

The default calculator in this phone is designed to perform simple mathematical calculations. press **Menu** to perform advanced calculations.

To access calculator, tap **Calculator** () located in **All Apps** screen.

- To enter the numbers, tap the numeric keys.
- To use mathematical operators, touch the respective operation keys on the keypad.
- Tap = for the final results.

Sound Recorder

You can record voice memos using the sound recorder. To access the sound recorder, tap **Sound recorder** () located in All Apps screen.

- To record an audio file, tap **Record** ().
- To stop the recording, tap **Stop** ().
- To save the voice memo, tap **Save** ().
- To exit without saving, select Options and **Discard**.
- To play the recorded file instantly tap **Play** ().

Music Player

You can play music files and voice memos stored in your phone using the music application. The music files are by default stored in the music folder in File explorer.

To play music files, tap **Music** () located in **All Apps** screen.

- Tap **Playlist** to access the default playlists in the music folder.
- Tap **Recently Added** playlist to view the music files that are recently added to the music folder.
- Tap **My recordings** playlist to access all your voice memo files.
- Tap **Artist** to view the music files sorted based on the artists.
- Tap **Album** to view the music files sorted based on the albums.
- Tap **Songs** to view the complete list of songs stored in your phone.
- Tap the required song/memo to play.

About Google Search™ and Google Now™

Google Now gives you the right information at the right time. right information at just the right time. Google now does not require any elaborate setting. The information is at your fingertips.

It gives the information about the weather and traffic update before you start your day.

When Google now is activated, it also activates the **Location reporting and Location history**.

- **Location Reporting:** allows Google to periodically store and use your device's most recent location data in connection with your Google Account. Location Reporting is a per-device setting.
- **Location History:** allows Google to store a history of your location data from all devices where you are logged into your Google Account and have enabled location reporting.

Activate Google Now

Google Now can be setup on your phone when you switch On the phone for the first time. You can turn it On and Off at any time.

1. Tap the **Google Search bar** on a home screen.
2. Touch Get it now if you don't have already. To access menu for the next step, perform a Google search.
3. Select **Options > Stop** to turn off Google now.

Use Google Now

To use Google Now, swipe up from the bottom of the

screen or, press and hold the Home button.

Voice Search and Action

You can speak to your phone to search, get directions, send messages and perform other tasks.

To initiate the voice search or voice action, on the Google home screen, say **OK Google** or tap on the microphone () icon.

After you touch the Microphone icon or say **OK Google**, Google listens as you speak and initiates the search or action you describe. If voice search does not understand you, it lists some suggestions. Select the one you want from the list.

Spoken answers are supported for English language only.

87

Voice Actions

Voice Actions are supported only in English, French, German, Spanish, and Italian languages.

You can use Voice Actions to perform common tasks, such as sending an email or opening an application.

After touching the () Microphone icon or saying **OK Google**, speak the voice action you want to use.

License

This wireless device, (the “Device”) contains software owned by Sonim Technologies, Inc. (“Sonim”) and its third party suppliers and licensors (collectively, the “Software”). As user of this Device, Sonim grants you a non-exclusive, non-transferable, non-assignable license to use the software solely in conjunction with the Device on which it is installed and/or delivered with. Nothing herein shall be construed as a sale of the Software to a user of this Device.

You shall not reproduce, modify, distribute, reverse engineer, decompile, otherwise alter or use any other means to discover the source code of the Software or any component of the Software. For avoidance of doubt, you are at all times entitled to transfer all rights and obligations to the Software to a third party, solely together with the Device with which you received the Software, provided always that such third party agrees in writing to be bound by these rules.

You are granted this license for a term of the useful life of this Device. You can terminate this license by transferring all your rights to the Device on which you have received the Software to a third party in writing. If you fail to comply with any of the terms and conditions set out in this license, it will terminate with immediate effect Sonim and its third party suppliers and licensors are the sole and exclusive owner of and retain all rights, title and interest in and to the Software. Sonim, and, to the extent that the Software contains material or code of a third party, such third party, shall be entitled third party beneficiaries of these terms. The laws of Delaware, United States shall govern the validity, construction and performance of this license.

Comprehensive 3 Year Warranty

- Sonim provides this Comprehensive 3-year warranty for your mobile phone (hereinafter referred to as “Product”).
- To activate the 3-Year comprehensive warranty, register your phone within 30 days at www.sonimtech.com/register or use the warranty registration application.
- Should your Product need service, please contact your local Sonim Customer Service Center. The online support and country specific contact information can be found at: www.sonimtech.com/support or email to: support@sonimtech.com

Warranty Registration Application (Only available on Smart phones)

- You can register your phone using the Warranty Registration Application on your device
- This application initiates automatically after first boot up and prompts to register the handset now or later.
- All the mandatory fields have to be filled, some fields such as IMEI and model number are auto populated.
- State and Zip code fields are same as Province and Postal code.
- Once all the mandatory details are submitted, an e-mail confirmation will be sent
- If not registered, the application will remind the user to register every two days. After ten reminders the user has to register online.

Our Warranty

Subject to the conditions of this Comprehensive 3 year Warranty Sonim warrants this product to be free from major defects in design, material and workmanship at the time of its original purchase by a consumer, and for a subsequent period of Three (3) years.

What We Will Do

If during the guarantee period, this product fails to operate under normal use and service, due to defects in design, material or workmanship, Sonim's authorized distributors or service partners, in the country/region where you purchased the product, will repair or replace at the sole discretion of Sonim, with the same or better model in the same or better condition.

Sonim and its service partners reserve the right to charge a handling fee if a returned product is found not to be under warranty according to the conditions below.

Please note that some of your personal settings, downloads or other information may be lost when your Sonim Product is repaired or replaced. Sonim does not take any responsibility for any lost information of any kind and will not reimburse you for any such loss.

You should always make backup copies of all the information stored on your Sonim Product such as downloads, pictures, video's, music, calendar and contacts before handing in your Sonim Product for repair or replacement.

You should always remove SIM cards and MicroSD cards before handing in your Sonim Product for repair or replacement. Depending on local law and legislations we will, in order to protect your data and privacy, destroy any received SIM cards and MicroSD cards.

Phone Care

Each Sonim Phone has a designated IP class for dust and water protection, according to the IEC Ingress Protection (IP) Standard 60529. This means that the phone is dust protected and can be submerged into 6.5 feet/2 m deep water for up to 30 minutes. Immersion in deeper water can damage it and must be avoided.

Sonim phones are built for heavy duty use. Its design protects against disassembly or mechanical damage when subjected to forces equal to free fall from the height of 6.5 feet/2 meters. Subjecting the phone to stronger impact and forces can damage it and must be avoided.

Conditions

1. The warranty is valid whether or not the product has been registered.
2. The warranty is valid only if the original proof of purchase issued to the original purchaser by an authorized service provider, specifying the date of purchase and serial number for this Product, is presented with the Product to be repaired or replaced. Sonim reserves the right to refuse warranty service if the device is found to be out of warranty under the conditions as set forth herein.
3. If Sonim repairs or replaces the Product, the repaired or replaced Product shall be warranted for the remaining time of the original warranty period or for ninety (90) days from the date of repair, whichever is longer. Repair or replacement may involve the use of functionally equivalent reconditioned units. Replaced parts or components will become the property of Sonim.
4. This warranty does not cover any failure of the

Product due to normal wear and tear, or due to misuse or abuse, including but not limited to use in other than the normal and customary manner, in accordance with the Sonim device specifications and instructions for use and maintenance of the Product. Nor does this warranty cover any failure of the Product due to software or hardware modification or adjustment, acts of good or damage resulting from liquid interacting with the product beyond what is described as acceptable in the user guide for the product. A rechargeable battery can be charged and discharged hundreds of times. However, it will eventually wear out - this is not a defect. When the talk-time or standby time is noticeably shorter, it is time to replace your battery. Sonim recommends that you use only batteries and chargers approved by Sonim. Minor variations in display brightness and color may occur between phones. There may be tiny bright or dark dots on the display. These are called defective pixels and occur when individual dots have malfunctioned and cannot be adjusted. Up to three defective pixels are deemed acceptable.

5. This warranty does not cover Product failures caused by installations, modifications, or repair or opening of the Product performed by a any person other than a Sonim-authorized person. Tampering with any of the seals on the Product will void the warranty.
6. The warranty does not cover Product failures which have been caused by use of accessories or other peripheral devices which are not Sonim-branded original accessories intended for use with the Product.
7. The 3-year warranty does not cover 3rd party

accessories or any 3rd party software applications, which are instead covered to the extent provided by the original vendor guarantee for these products.

8. THERE ARE NO EXPRESS WARRANTIES, WHETHER WRITTEN OR ORAL, OTHER THAN THIS PRINTED LIMITED WARRANTY. ALL IMPLIED WARRANTIES, INCLUDING WITHOUT LIMITATION THE IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, ARE LIMITED TO THE DURATION OF THIS LIMITED WARRANTY. IN NO EVENT SHALL SONIM OR ITS LICENSORS BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES OF ANY NATURE WHATSOEVER, INCLUDING BUT NOT LIMITED TO LOST PROFITS OR COMMERCIAL LOSS; TO THE FULL EXTENT THOSE DAMAGES CAN BE DISCLAIMED BY LAW.

Accessories

Sonim accessories are warranted as follows:

Sonim Branded

- All Sonim branded accessories, in-box as well as optional, are warranted for a period of one (1) year under Sonim's 1-Year limited warranty.
- For a detailed list of Sonim branded accessories, please go to: www.sonimtech.com/accessories.

Battery

All device batteries both embedded and removable are warranted for a period of one (1) year under Sonim's 1-Year limited warranty.

1-Year limited warranty

Sonim provides a limited 1-year warranty for this accessory (hereinafter referred to as “Product”). Subject to the conditions of this limited 1-year Warranty Sonim warrants this product to be free from major defects in design, material and workmanship at the time of its original purchase by a consumer, and for a

original purchase by a consumer, and for a subsequent period of one (1) year.

Conditions:

1. This warranty does not cover any failure of the Product due to normal wear and tear, or due to misuse or abuse, including but not limited to use in other than the normal and customary manner, in accordance with the Sonim Product specifications and instructions for use and maintenance of the Product. Nor does this warranty cover any failure of the Product due to software or hardware modification or adjustment, acts of good or damage resulting from liquid interacting with the Product beyond what is described as acceptable in the user guide for the Product.
2. This warranty does not cover Product failures caused by installations, modifications, or repair or opening of the Product performed by any person other than a Sonim-authorized person. Tampering with any of the seals on the Product will void the warranty.
3. The warranty does not cover Product failures, which have been caused by use of other peripheral devices, which are not Sonim certified and intended for use with the Product.
4. THERE ARE NO EXPRESS WARRANTIES,

WHETHER WRITTEN OR ORAL, OTHER THAN THIS PRINTED LIMITED WARRANTY. ALL IMPLIED WARRANTIES, INCLUDING WITHOUT LIMITATION THE IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, ARE LIMITED TO THE DURATION OF THIS LIMITED WARRANTY. IN NO EVENT SHALL SONIM OR ITS LICENSORS BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES OF ANY NATURE WHATSOEVER, INCLUDING BUT NOT LIMITED TO LOST PROFITS OR COMMERCIAL LOSS; TO THE FULL EXTENT THOSE DAMAGES CAN BE DISCLAIMED BY LAW.

Sonim XPand

- All Sonim branded accessories, in-box as well as optional, are warrantied for a period of three (3) years under Sonim’s 3-Year comprehensive warranty.
- For a detailed list of Sonim XPand accessories, please go to: www.sonimtech.com/accessories.

WARNING: Changes or modifications made to this equipment not expressly approved by Sonim Technologies, Inc. for compliance could void the user's authority to operate the equipment.

FCC Statement

- This device complies with part 15 of the FCC rules (**FCC ID: WYPL11V011AA**). Operation is subject to the following two conditions:
 - This device may not cause harmful interference.
 - This device must accept any interference received, including interference that may cause undesired operation.
- This device has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
 - Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and receiver.
 - Connect the equipment into an outlet on a

circuit different from that to which the receiver is connected.

- Consult the dealer or an experienced radio/TV technician for help.

FCC Caution

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The antenna(s) used for this transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

IC Statement

This device complies with RSS-310 of Industry Canada (**IC ID: 8090A-L11V012AA**). Operation is subject to the following two conditions:

1. This device does not cause harmful interference.
2. This device must accept any interference, including interference that may cause undesired operation of the device.

**FOR PORTABLE DEVICE DEVICE USAGE (<20cm from body/SAR)
Radiation Exposure Statement:**

The product comply with the Canada portable RF exposure limit set forth for an uncontrolled environment and are safe for intended operation as described in this manual. The further RF exposure reduction can be achieved if the product can be kept as far as possible from the user body or set the device to lower output power if such function is available.

- The device for operation in the band 5150-5250 MHz is only for indoor use to reduce the potential for harmful interference to co-channel mobile satellite systems.
- High-power radars are allocated as primary users (i.e. priority users) of the bands 5250-5350 MHz and 5650-5850 MHz and that these radars could cause interference and/or damage to LE-LAN devices.FOR MOBILE DEVICE USAGE (>20cm/low power).
