

The image shows the front cover of the 'CUBOT Quick Start Guide'. The cover has a dark, textured background. At the top, there is a faint, stylized illustration of a person using a laptop. The title 'QUICK START GUIDE' is prominently displayed in the center in a large, bold, red, sans-serif font, with each word on a new line. Below the title, the 'CUBOT' logo is visible in a smaller, red, sans-serif font. At the bottom of the cover, the text 'ReHS CE 2' is printed in a small, white, sans-serif font.

封面

A large, empty rectangular box with a thin black border, intended for a drawing or illustration.

The diagram illustrates the J5 smartphone with its main components labeled. On the left, a front view shows the screen, earpiece, front camera, and home button. On the right, a back view shows the rear camera, flash, and fingerprint sensor. A side view is also shown. The labels include: Front camera, Rear camera, Earpiece, Microphone, Loudspeaker, Volume up/down, Power on/off, Home button, and Fingerprint sensor.

Messaging

Apple and Google both have their own messaging services and have been working to make it easier to use them together. In the past, you had to use a specific app to send a message to a specific person. Now, you can use a single app to send a message to anyone. This is a big improvement in the user experience.

Apple's iMessage is a messaging service that is built into the iPhone. It allows you to send text, photos, and videos to other iPhone users. Google's iMessage is a messaging service that is built into the Android phone. It allows you to send text, photos, and videos to other Android users.

Both Apple and Google have made it easier to use their messaging services together. Now, you can use a single app to send a message to anyone. This is a big improvement in the user experience.
