

t-zones Menu 5

t-zones provide information such as news, weather forecast, information on sports or traffic whenever you need it. In addition, t-zones provides superior multimedia services such as the latest music or ring tones, wallpapers or games for you to download.

Note: Additional charges may occur when using this service.

Call history Menu 6

You can check the record of missed, received, and dialled calls only if the network supports Caller Line Identification (CLI) within the service area. The number and name/photo (if available) are displayed together with the date and time at which the call was made. You can also view call durations.

Settings Menu 9 (Continued)

Call	› Call waiting: Allows to display requesting message and animation when activating the service. › Minute minder: Determines whether to sound a 1 minute tone every one minute when you are on the phone. › Auto redial: Allows you to set auto redial function when a call attempt has failed. › Send DTMF tones: You can send DTMF tones when using banking service and so on. › DTMF: Dual Tones Multiple Frequency
Security	This menu allows you to protect your phone from unauthorized use. › PIN code request: You can set the phone to ask for the PIN code of your SIM card when the phone is switched on. › Auto key lock: This menu allows to set the time of Auto key lock. › Phone lock: You can use a security code to avoid unauthorized use of the phone. › Change codes: You can change the access codes such as PIN, PIN2 code, security code.
Flight mode	If set to On, the connection between the phone and network service will be cut off.
Power save	This function saves battery power by keeping the backlight brightness to max 40%. (Off/ Night only/ Always on)
Reset	You can initialise all factory defaults. You will need the Security code to activate this function. Note: The security code is a password to reset the phone. The default number is "0000".
Memory status	You can check the capacity of free memory.

Guidelines for Safe and Efficient Use (Continued)

In aircraft

Wireless devices can cause interference in aircraft.
› Turn off your mobile phone before boarding any aircraft.

Children

Keep the phone in a safe place out of children's reach. It includes small parts which if detached may cause a choking hazard.

Emergency calls

Emergency calls may not be available under all mobile networks. Therefore, you should never depend solely on the phone for emergency calls. Check with your local service provider.

Sound profiles Menu 7

You can select ringtone or vibration for an incoming call and configure the sound and volume of the ringtone, key tone, and sound effect, according to a profile. The profiles provided include [General], [Silent], [Vibrate only], [Outdoor], [Headset].

Guidelines for Safe and Efficient Use

Please read these simple guidelines. Ignoring them may be dangerous or illegal. Further detailed information is given in this manual.

Warning

- › For your safety, use ONLY specified ORIGINAL batteries and chargers.
- › Switch off the phone in any area where required by special regulations, e.g. in a hospital where it may affect medical equipment.
- › Batteries should be disposed of in accordance with relevant legislation.
- › Do not charge the phone when it is on soft furnishings. The phone should be charged in a well ventilated area.

Product care and maintenance

WARNING! Only use batteries, chargers and accessories approved for use with this particular phone model. The use of any other types may invalidate any approval or warranty applying to the phone, and may be dangerous.

- › Do not disassemble this unit. Take it to a qualified service technician when repair work is required.
- › The unit should be kept away from heat sources such as radiators or cookers.
- › Use a dry cloth to clean the exterior of the unit. (Do not use any solvents.)
- › Do not keep the phone next to credit cards or transport tickets; it can affect the information on the magnetic strips.

Guidelines for Safe and Efficient Use (Continued)

Battery information and care

- › You do not need to completely discharge the battery before recharging. Unlike other battery systems, there is no memory effect that could compromise the battery's performance.
- › Use only LG batteries and chargers. LG chargers are designed to maximize the battery life.
- › Do not disassemble or short-circuit the battery pack.
- › Replace the battery when it no longer provides acceptable performance. The battery pack may be recharged hundreds of times before it needs to be replaced.
- › Do not expose the battery charger to direct sunlight or use it in high humidity, such as the bathroom.
- › Risk of explosion if battery is replaced by an incorrect type.
- › Dispose of used batteries according to the manufacturer's instructions.

Contacts Menu 8

Search	You can Search for contacts in Phonebook. Note: Instant searching is available by inputting the initial letter of the name you want to search.
New contact	You can add phonebook entries by using this menu.
Speed dials	Assign contacts to any of the keys between and .
Groups	You can add members to each group, with up to a maximum of 7 groups in total. You can copy all entries from the SIM card memory to Phone memory.
Copy all	You can copy all entries from the SIM card memory to Phone memory.
Delete all	You can delete all entries from the SIM card memory or Phone memory.
Settings	You can set the Contact display option.
Information	› Service dial numbers: Access the list of service numbers assigned by your service provider. › Own numbers: You can save and check your own numbers in the SIM card. › My Business card: This option allows you to create your own business card featuring your name, mobile phone number and so on.

Guidelines for Safe and Efficient Use (Continued)

Electronic devices

All mobile phones may get interference, which could affect performance.
Do not use your mobile phone near medical equipment without requesting permission. Avoid placing the phone over a pacemaker, i.e. in your breast pocket.

Guidelines for Safe and Efficient Use (Continued)

Exposure to radio frequency energy

Radio wave exposure and Specific Absorption Rate (SAR) information

This mobile phone model KP130 has been designed to comply with applicable safety requirement for exposure to radio waves. This requirement is based on scientific guidelines that include safety margins designed to ensure safety of all persons, regardless of age and health.

- › The radio wave exposure guidelines employ a unit of measurement known as the Specific Absorption Rate, or SAR. Tests for SAR are conducted using standardised methods with the phone transmitting at its highest certified power level in all used frequency bands.
- › While there may be differences between the SAR levels of various LG phone models, they are all designed to meet the relevant guidelines for exposure to radio waves.
- › The SAR limit recommended by the International Commission on Non-ionizing Radiation Protection (ICNIRP) is 2W/kg averaged over ten (10) gram of tissue.
- › The highest SAR value for this model phone tested by DASY4 for use at the ear is 0.902 W/kg (10g) and when worn on the body is 0.746 W/kg (10g).
- › SAR data information for residents in countries/regions that have adopted the SAR limit recommended by the Institute of Electrical and Electronics Engineers (IEEE) is 1.6 W/kg averaged over one (1) gram of tissue.

Settings Menu 9

Date & Time	You can set functions relating to the date and time.
Language	You can change the language for the display texts in your phone.
Display	You can change the settings for the phone display.
Connectivity	You can configure the network setting and data access profiles in this menu. › Network selection: You can set the method of searching network automatically, manually or preferred list. › GPBS attach: You can set GPBS service depending on various situations such as Power on or When needed. › Access point: This menu shows thw access point list. You can create new profiles, delete or edit them by using Option menu.
Call	› Call divert: You can divert a call when you do not receive a call. › Call barring: The Call barring service prevents your phone from making or receiving a certain category of calls. This function requires the call barring password. › Fixed dial number (SIM dependent): You can restrict your outgoing calls to selected phone numbers. The numbers are protected by your PIN2 code. The numbers you wish to allow access to once this service has been enabled, must be added to the contacts after enabling Fixed dial number. › Answer mode: Allows you to set the answering method (Any key/ Send key only) › Send my number: You can configure to send my phone number when making a call.

Guidelines for Safe and Efficient Use (Continued)

Road safety

Check the laws and regulations on the use of mobile phones in the areas when you drive.

- › Do not use a hand-held phone while driving.
- › Use a hands-free kit, if available.
- › Pull off the road and park before making or answering a call if driving conditions so require.

Blasting area

Do not use the phone where blasting is in progress. Observe restrictions, and follow any regulations or rules.

Potentially explosive atmospheres

Do not use the phone at a refueling point. Do not use near fuel or chemicals.
