

MOTOROLA EX232

LIFE. M. POWERED.

SAR The product meets the applicable SAR limits of 1.8 W/kg (PCED) and 2.0 W/kg (ICNIRP). The limits and guidelines include a substantial safety margin designed to ensure the safety of all persons, regardless of age and health. The highest SAR value measured for this device and listed in this label and safety information packaging with your product.

Note: When carrying the product or using a while worn on and body, never use an approved accessory such as a holder or car cradle. Maintain a distance of 5.0 cm (2 in) from the body to ensure compliance with RF exposure requirements. Note that the product may be transmitting even if you are not making a phone call.

8801014-0001

WELCOME

Whether you're a talker, a texter or just love listening to music on the move, EX232 does it all.

Your phone is splash and dust-resistant, because life happens fast, be ready for whatever it throws at you.

Note: Always make sure that the battery door cover and connector cover are closed and secure. Damage caused by failing to properly secure the phone's splash resistant covers is not covered by the warranty.

If you'd like even more information about how to use your new EX232 visit www.motorola.com/vpppt. So, let's go.

Note: Certain apps and features may not be available in all countries.

Caution: Before assembling, charging or using your phone for the first time, please read the important safety, regulatory and legal information in this guide.

YOUR PHONE

MESSAGES

Send an SMS or MMS

- Touch > **Messaging** > **New message**.
- Enter your message.
- Add pictures, videos and more using options at the bottom of the screen.
- Touch > **Add recipient** > select a contact.
- Touch > **Send**.

Read messages

When you receive a message, your phone plays an alert and shows the new message indicator at the top of the screen.

To read the new message, touch **View**. To read messages stored in your inbox, touch > **Messaging** > **Inbox**.

CALLS

Make calls

From the home screen, touch then enter a number and touch .

Answer calls

When your phone rings or vibrates, touch **Answer**.

End a call

Touch .

In-call options

During a call, touch **Loudspeaker**, **Keypad**, **Mute**, **New call**, **Contacts** or **Hold**.

Redial number

- Touch > **Call log**.
- Touch and hold the contact you want to call, then touch **Call**.

Emergency calls

To call an emergency number, enter the emergency number and touch **Call**.

Your mobile operator programs one or more emergency phone numbers that you can call under any circumstances, even when your phone is locked. Emergency numbers vary by country. Your pre-programmed emergency number(s) may not work in all locations, and sometimes an emergency call cannot be placed due to network, environmental or interference issues.

TIPS & TRICKS

Recent calls

To see your **Missed**, **Received** and **Dialled** calls, touch > **Call Log**.

Voicemail

From the home screen, touch , then touch and hold **1**. If your voicemail number is preset, you will connect.

Backlight time

To set how long your backlight stays on, touch > **Settings** > **Display** > **Backlight time-out**.

Battery tips

Want to extend your battery life? Try these:

- Turn off Bluetooth™ power: Touch > **Bluetooth** > **Off**.
- Turn off the screen saver: Touch > **Settings** > **Display** > **Screen saver** > **Off**.

MUSIC

To use the music player, insert a microSD memory card (optional). The music player supports MP3, MIDI, AAC, AMR and WAV music formats.

Play music

Touch > **Music player**.

controls	
function	
play/pause	Touch
next/previous song	Touch
volume	Press the side volume keys up or down .

Tip: To access music stored on your microSD memory card, touch > **Gallery** > **Memory Card**. To transfer music to/from your memory card, plug your USB cable into your phone & computer, then drag & drop files.

MENU MAP

- **Call log**
 - All
 - Missed
 - Received
 - Dialled
 - Delete All
 - **Active mode**
 - Music
 - Radio
 - Camera
 - Video
 - Stopwatch
 - **Organiser**
 - **Email**
 - **World clock**
 - **Contacts**
 - **Settings**
 - **Music player**
 - **Radio**
 - **Recorder**
 - **Photos**
 - **Camera**
- This is a standard menu layout. Your phone's menu may be a little different.

LET'S GO

BASICS

Turn it on & off

Press and hold (on top of the phone) for a few seconds to turn the phone on/off.

Touch tips

- **Touch:** To choose an icon or option.
- **Touch & hold:** To open special options.
- **Drag/Flick:** Scroll/move slowly (drag) or quickly (flick).

Menu navigation

Touch to open the main menu.

Press Home to close any menu or app and return to the home screen.

Touch Back to go back.

PERSONALISE

Profiles

Your phone has different profiles. You can customise ringtones, alerts and volumes for each profile.

Touch > **Settings** > **Profiles**, then select from these profiles:

- **General:** Standard profile default setting.
- **Silent:** Ringtone is off, vibrate is off.
- **Meeting:** Vibrate is off, ringtone is in low volume.
- **Outdoor:** Ringtone and key tone volume set to maximum.
- **Flight:** Turn off all wireless connections.

Display settings

To set display settings such as wallpaper and screen saver, touch > **Settings** > **Display**.

Date & time

Set date, time, time zone and formats: touch > **Settings** > **Date and time**.

CONTACTS

Create contacts

Touch > **Contacts** > , enter the contact name and details, then touch **Save**.

Tip: Touch > **More** > **Memory in use** to choose where to save your contacts: **Phone memory**, **SIM Card** or **Phone and SIM Card**.

Call contacts

Touch and hold a contact, then touch **Call**.

BLUETOOTH™

Turn on or off

Touch > **Bluetooth** > **On** or **Off**.

When Bluetooth power is on, the Bluetooth indicator appears in the home screen.

Connect new devices

To connect with a new device, you need to pair with it. You only need to do this once for each device.

- Touch > **Bluetooth** > **Paired devices** > **New**.
- Your phone lists the devices it finds within range. Select a device to connect.
- If necessary, enter the device passkey (like 0000) to connect to the device.

MEDIA

Photos & videos

- **Photos:** Touch > **Camera**. To take the photo, press **Camera key**.
- **Videos:** Touch > **Camera**, then drag down. Press **Camera key** to start/stop.

After you've taken the photo:

- To send in a message, email or via bluetooth, touch .
- To delete the photo or video and return to the viewfinder, touch .
- To assign to a contact, touch > **Attach to contact**.

To see the photos and videos you've taken, touch > **Gallery** > **Images** or **Video Clips**.

WEB

Use your phone's browser to surf your favourite web sites, upload videos and download apps. Log onto your Internet-based email account to check your email.

Touch > **Mobile net**.

- To go to a Web page, touch **URL bar** to input site address.
- To bookmark a Web page, touch **More** > **Bookmarks** > **Add bookmark**.
- To change display settings like **Font Size** and **View Mode**, touch **More** > **Setting**.
- To go to a link on a Web page, touch it.

Note: If you can't connect, contact your mobile operator.

HOME SCREEN

SAFETY, REGULATORY & LEGAL

Battery Use & Safety

Important: Handle and store batteries properly to avoid injury or damage. Misuse may cause fires from improper handling of batteries, and particularly from the continued use of damaged batteries.

DO NOT:

- **Don't disassemble, crush, puncture, chew, or otherwise attempt to change the form of your battery.**
- **Don't let the mobile device charge, battery, device, or otherwise attempt to charge the form of your battery.**
- **Don't let the mobile device charge, battery, device, or otherwise attempt to charge the form of your battery.**
- **Don't allow the battery to touch metal objects.** If metal objects, such as jewelry, stay in contact with the battery contact points, the battery could become very hot.
- **Don't take your mobile device or battery near a heat source.** **High temperatures can cause the battery to overheat or catch fire.
- **Don't lay wet or damp battery with an applied or heat source.** such as a hair dryer.

DO:

- **Do avoid leaving your mobile device in your car in high temperatures.** **
- **Do avoid dropping the mobile device or battery.** Dropping items, especially in a wet surface, can potentially cause damage.
- **Do contact your service provider or Motorola if your mobile device or battery has been damaged by dropping, liquids, or high temperatures.**

Note: Always make sure that the battery compartment and any connector covers are closed and secure to avoid direct exposure of the battery to any of these conditions, even if your product information states that your mobile device can resist damage from these conditions.

Important: Motorola recommends you always use Motorola-branded batteries and chargers for quality assurance and safe use. Motorola's warranty does not extend to the mobile device caused by non-Motorola batteries and/or chargers. To help identify authentic Motorola batteries from counterfeit or counterfeit batteries that may not have adequate safety protection, Motorola provides logos on its batteries. You should confirm the battery you purchase has a Motorola Original logo.

Unusable or Charge:

- Remove the battery and inspect it to confirm that it has a Motorola Original logo.
- If there is no logo, the battery is not a Motorola battery.
- If there is a logo, remove the battery and its charging agent.

Warning: Use of a non-Motorola battery or charger may present a risk of fire, explosion, leakage, or other harm.

Warning: Use of a non-Motorola battery or charger may present a risk of fire, explosion, leakage, or other harm.

Warning: Never dispose of batteries in a fire because they may explode.

While driving, NEVER:

- Type or text while driving.
- Enter or review written information.
- Surf the web.
- Perform any other functions that divert your attention from driving.

While driving, ALWAYS:

- Keep your eyes on the road.
- Use a handheld device if available or required by law in your area.
- Enter destination information into a navigation device before driving.
- Use voice activated features such as voice dial and speaking features such as audible directions if available.
- Only use cell phone when you are stopped or in a safe location.
- Only use cell phone when you are stopped or in a safe location.
- Only use cell phone when you are stopped or in a safe location.

Remember to follow the "Smart Practices While Driving" in this guide and at [www.motorola.com/smartpractices](#) in English only.

Seizures/Blackouts

Some people may be susceptible to epileptic seizures or blackouts when exposed to flashing lights, such as when driving vehicles or games. These may occur even if a person has never had a previous seizure or blackout.

Note: Always make sure that the battery compartment and any connector covers are closed and secure to avoid direct exposure of the battery to any of these conditions, even if your product information states that your mobile device can resist damage from these conditions.

Important: Motorola recommends you always use Motorola-branded batteries and chargers for quality assurance and safe use. Motorola's warranty does not extend to the mobile device caused by non-Motorola batteries and/or chargers. To help identify authentic Motorola batteries from counterfeit or counterfeit batteries that may not have adequate safety protection, Motorola provides logos on its batteries. You should confirm the battery you purchase has a Motorola Original logo.

Unusable or Charge:

- Remove the battery and inspect it to confirm that it has a Motorola Original logo.
- If there is no logo, the battery is not a Motorola battery.
- If there is a logo, remove the battery and its charging agent.

Symbol Key

Your battery, charger, or mobile device may contain symbols, defined as follows:

Symbol	Definition
	Important safety information follows.
	Do not dispose of your battery or mobile device in a fire.
	Your battery or mobile device may require recycling in accordance with local laws. Contact your local regulatory authorities for more information.
	Do not dispose of your battery or mobile device with your household waste. See "Recycling" for more information.
	Do not use tools.
	For indoor use only.

Radio Frequency (RF) Energy

Exposure to RF Energy

Your mobile device contains a transmitter and receiver. When in ON, it receives and transmits radio frequency (RF) energy. When you communicate with your mobile device, the system handling your call controls the power level at which your mobile device transmits.

Your mobile device is designed to comply with local regulatory requirements in your country concerning exposure to radio frequency RF energy.

RF Energy Operational Precautions

For optimal mobile device performance, and to be sure that human exposure to RF energy does not exceed the guidelines set forth in the relevant standards, always follow these instructions and precautions:

- When placing or receiving a phone call, hold your mobile device as close to your body as you can.

Important: If you wear the mobile device on your body, always place the mobile device in a Motorola-supplied or approved clip, holder, holster, case, or body harness.

Warning: If you do not use a body-worn accessory supplied or approved by Motorola, keep the mobile device and its antenna at least 2.5 cm (1 in.) away from your body when transmitting.

Warning: If you do not use a body-worn accessory supplied or approved by Motorola, keep the mobile device and its antenna at least 2.5 cm (1 in.) away from your body when transmitting.

Warning: If you do not use a body-worn accessory supplied or approved by Motorola, keep the mobile device and its antenna at least 2.5 cm (1 in.) away from your body when transmitting.

Warning: If you do not use a body-worn accessory supplied or approved by Motorola, keep the mobile device and its antenna at least 2.5 cm (1 in.) away from your body when transmitting.

Warning: If you do not use a body-worn accessory supplied or approved by Motorola, keep the mobile device and its antenna at least 2.5 cm (1 in.) away from your body when transmitting.

Warning: If you do not use a body-worn accessory supplied or approved by Motorola, keep the mobile device and its antenna at least 2.5 cm (1 in.) away from your body when transmitting.

Warning: If you do not use a body-worn accessory supplied or approved by Motorola, keep the mobile device and its antenna at least 2.5 cm (1 in.) away from your body when transmitting.

Warning: If you do not use a body-worn accessory supplied or approved by Motorola, keep the mobile device and its antenna at least 2.5 cm (1 in.) away from your body when transmitting.

Warning: If you do not use a body-worn accessory supplied or approved by Motorola, keep the mobile device and its antenna at least 2.5 cm (1 in.) away from your body when transmitting.

Warning: If you do not use a body-worn accessory supplied or approved by Motorola, keep the mobile device and its antenna at least 2.5 cm (1 in.) away from your body when transmitting.

Warning: If you do not use a body-worn accessory supplied or approved by Motorola, keep the mobile device and its antenna at least 2.5 cm (1 in.) away from your body when transmitting.

Warning: If you do not use a body-worn accessory supplied or approved by Motorola, keep the mobile device and its antenna at least 2.5 cm (1 in.) away from your body when transmitting.

Warning: If you do not use a body-worn accessory supplied or approved by Motorola, keep the mobile device and its antenna at least 2.5 cm (1 in.) away from your body when transmitting.

Warning: If you do not use a body-worn accessory supplied or approved by Motorola, keep the mobile device and its antenna at least 2.5 cm (1 in.) away from your body when transmitting.

Warning: If you do not use a body-worn accessory supplied or approved by Motorola, keep the mobile device and its antenna at least 2.5 cm (1 in.) away from your body when transmitting.

Warning: If you do not use a body-worn accessory supplied or approved by Motorola, keep the mobile device and its antenna at least 2.5 cm (1 in.) away from your body when transmitting.

Warning: If you do not use a body-worn accessory supplied or approved by Motorola, keep the mobile device and its antenna at least 2.5 cm (1 in.) away from your body when transmitting.

Warning: If you do not use a body-worn accessory supplied or approved by Motorola, keep the mobile device and its antenna at least 2.5 cm (1 in.) away from your body when transmitting.

Warning: If you do not use a body-worn accessory supplied or approved by Motorola, keep the mobile device and its antenna at least 2.5 cm (1 in.) away from your body when transmitting.

Warning: If you do not use a body-worn accessory supplied or approved by Motorola, keep the mobile device and its antenna at least 2.5 cm (1 in.) away from your body when transmitting.

Warning: If you do not use a body-worn accessory supplied or approved by Motorola, keep the mobile device and its antenna at least 2.5 cm (1 in.) away from your body when transmitting.

Warning: If you do not use a body-worn accessory supplied or approved by Motorola, keep the mobile device and its antenna at least 2.5 cm (1 in.) away from your body when transmitting.

Warning: If you do not use a body-worn accessory supplied or approved by Motorola, keep the mobile device and its antenna at least 2.5 cm (1 in.) away from your body when transmitting.

Warning: If you do not use a body-worn accessory supplied or approved by Motorola, keep the mobile device and its antenna at least 2.5 cm (1 in.) away from your body when transmitting.

Warning: If you do not use a body-worn accessory supplied or approved by Motorola, keep the mobile device and its antenna at least 2.5 cm (1 in.) away from your body when transmitting.

Warning: If you do not use a body-worn accessory supplied or approved by Motorola, keep the mobile device and its antenna at least 2.5 cm (1 in.) away from your body when transmitting.

Warning: If you do not use a body-worn accessory supplied or approved by Motorola, keep the mobile device and its antenna at least 2.5 cm (1 in.) away from your body when transmitting.

Warning: If you do not use a body-worn accessory supplied or approved by Motorola, keep the mobile device and its antenna at least 2.5 cm (1 in.) away from your body when transmitting.

Warning: If you do not use a body-worn accessory supplied or approved by Motorola, keep the mobile device and its antenna at least 2.5 cm (1 in.) away from your body when transmitting.

Warning: If you do not use a body-worn accessory supplied or approved by Motorola, keep the mobile device and its antenna at least 2.5 cm (1 in.) away from your body when transmitting.

Warning: If you do not use a body-worn accessory supplied or approved by Motorola, keep the mobile device and its antenna at least 2.5 cm (1 in.) away from your body when transmitting.

Warning: If you do not use a body-worn accessory supplied or approved by Motorola, keep the mobile device and its antenna at least 2.5 cm (1 in.) away from your body when transmitting.

Read and follow the directions from the manufacturer of your implantable medical device. If it has any questions about using your mobile device with your implantable medical device, consult your healthcare provider.

Specific Absorption Rate (SAR)

YOUR MOBILE DEVICE MEETS INTERNATIONAL GUIDELINES FOR EXPOSURE TO RADIO WAVES.

Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves (radio frequency electromagnetic fields) recommended by international guidelines. The guidelines were developed by an independent scientific organization (ICNIRP) and include a substantial safety margin designed to ensure the safety of all persons, regardless of age and health.

The radio waves exposure procedure is a part of measurement known as the Specific Absorption Rate, or SAR. The SAR limit for mobile devices is 2 W/kg (head) and 1 W/kg (body).

Below are SAR values for the highest certified power level in all tested frequency bands. The highest SAR values under the ICNIRP guidelines for your device model are listed below.

Head SAR	GSM	0.793 W/kg
Body SAR	GSM	0.457 W/kg

During use, the actual SAR values for your device are usually well below the values listed. This is because, for purposes of system efficiency and to minimize interference on the network, the power/output of your mobile device is automatically decreased when full power is not required for the call.

The lower the power/output of the device, the lower the SAR value. Below are SAR values for the highest certified power level in all tested frequency bands.

Below are SAR values for the highest certified power level in all tested frequency bands. The highest SAR values under the ICNIRP guidelines for your device model are listed below.
