4

Insert a memory card.

5

Insert the battery into the battery compartment.

6

Put the rear panel back.

- The use of incompatible SIM cards, manually cut SIM cards, or SIM card adapters may damage the cards or the device, and it may corrupt the data stored on the cards.
- Scratching or bending of the SIM cards may result in the loss of contacts and information, so be careful when handling, inserting, or removing the cards.

Frequent writing and erasing of data shortens the lifespan of memory cards.

Dual SIM standby

The device supports two SIM cards for voice calls and data connection. During a voice call or data transfer via one SIM card, the other SIM card becomes inactive (not registered with your mobile network operator). This means that you cannot receive incoming calls or use data connection via the inactive SIM card. When the call or data transfer ends, both SIM cards will become active and show on the list of registered networks.

Power on your phone

7

Press and hold the power button for a few seconds.

When turning on the device for the first time, follow the on-screen instructions to set up your device.

To turn off your phone, press and hold the power key, and drag the lock screen down.

Start screen

Start screen is the heart of your phone - it is where you open apps, see what your friends are doing, and get to your favourite websites. The tiles on the Start screen show info, such as missed calls, received messages, the latest news, weather forecasts, and more. To go to the start screen, press .

Your phone's start screen consists of the following:

Personalise your wallpaper

Pick your favourite photo as your Start wallpaper. Choose from the available wallpapers, or use any photo you have taken with the camera.

1. On the list menu, tap  **Settings** > **start+theme**.
2. Tap **choose photo**.
3. Select an image from the albums or capture a photo by the camera, and then tap .

Add a tile to the start screen

On the start screen, swipe left to open the list menu. Tap and hold a tile, and then select **pin to start** on the pop-up window.

Resize or unpin a tile

- To resize the tile, tap and hold it, and then tap the arrow icon.
- To unpin the tile, tap and hold it, and then tap .

Charge the battery

A new battery is partially charged. The battery icon at the upper-right corner shows the level of charging status.

1. Plug the small end of the charger into the micro USB port of the device, and plug the large end of the charger into an electric socket.
2. After being fully charged, disconnect the device from the charger. First unplug the charger from the device, and then unplug it from the electric socket.

Always use authentic accessories to optimise your battery performance. Non-authentic accessories (eg. chargers) can damage your battery and even your phone.

Optimise your battery performance

Here are some tips to help you optimise your battery performance.

- Always ensure that your phone profile is appropriately set to meet your actual usage.
- If you are not using Bluetooth, Wi-Fi, GPS or other applications, turn them off.
- Adjust the intensity of your display screen's backlight to low or medium level and for the shortest duration.
- Avoid using or placing your phone near magnetic objects (eg. a radio or television) or on metal surfaces, which will impact the network connection and ultimately drain power from your battery.

Connect to your PC

You may need to connect your phone to a PC in order to complete activation. Your phone's micro USB port allows you to exchange media and other files with a PC.

Load files from your PC

1. Connect your phone to the PC with the included USB cable.
2. Open the notifications panel, and then tap **Connected as a media device > Media device (MTP)**.
3. Transfer files between your phone and the PC.

Rotate the screen

For many screens, you can automatically change the screen orientation from portrait to landscape by turning your phone sideways. When entering text, you can turn your phone sideways to bring up a bigger keyboard.

To prevent the display from rotating automatically, open the notifications panel and deselect **Auto rotation**.

- Some applications do not allow screen rotation.
- Some applications display a different screen depending on the orientation.

Make an emergency call

In some regions, you can make emergency calls even if you do not have a SIM card installed or your SIM card has been blocked.

1. On the Start screen or list menu, tap  **Phone**.
2. Tap  to open the dial pad.
3. Dial the emergency number for your location, and then tap **call**.

If you are out of base station coverage, you will not be able to make an emergency call.

In Europe, the standard emergency number is 112; in the UK, it is 999.

Contacts

Contacts are stored in one of the two available phone books: SIM phone book (located on your SIM card) or the Smart phone book (located on your phone).

- To view your contacts, tap **People** on the start screen or list menu.

Search for a contact

1. Scroll up or down the contact list.
2. Tap  and enter the first few letters of the name in the search bar.
3. Select the contact from the option list.

Add a new contact

Method one:

1. On the Start screen or list menu, tap  **Phone**.
2. Tap  to open the dial pad.
3. Enter a number, tap **save**.
4. Add details as desired.
5. Tap  to finish and save.

Method two:

1. Go to **People** to view the contact list.
2. Tap  to add a new contact.

You can connect your phone to the Internet and browse a web page.

Connect to the Internet

Your phone connects to the Internet whenever necessary, using a Wi-Fi connection (if available) or your mobile operator's data connection.

Data connection

You can use your mobile operator's data connection.

Turn on data connection

1. Go to  **Settings** > **Mobile + SIM**.
2. Switch **Data connection** to **On** .

Some apps and services may transfer data over your mobile operator's cellular network, which may result in additional fees. Contact your mobile operator for details.

Turn on data roaming

Connect to your mobile operator's partner networks and access data services when you are out of your mobile operator's coverage area.

1. Go to  **Settings** > **Mobile + SIM**.
2. Switch **Data roaming options** to **roam**.

Using data services while roaming may be costly. Check with your mobile operator for data roaming rates before you use data roaming.

Use your phone as a wireless router

Share your data connection with other devices by turning your phone into a wireless router.

1. Go to  **Settings** > **internet sharing**.
2. Switch **Sharing** to **On** .
3. To change the name of your connection, tap  **setup** > **Broadcast name**, and write a name.

The other device uses data from your data plan, which may result in data traffic costs. For info on availability and costs, contact your network service provider.

The phone does not switch on

Remove/reinstall the battery. Then charge the phone until the battery icon stops scrolling. Unplug the charger and try to switch the phone on.

The display shows IMSI failure

This problem is related to your subscription. Contact your operator.

The network symbol is not displayed

The network connection is lost. Either you are in a radio shadow (in a tunnel or between tall buildings) or you are outside the network coverage area. Try from another place, try to reconnect to the network (especially when abroad), or contact your network operator for assistance/information.

The touch screen responds slowly or improperly

If your device has a touch screen and the touch screen is not responding properly, try the following:

- Remove any protective covers from the touch screen. Protective covers may prevent the device from recognizing your inputs and are not recommended for touch screen devices.
- Ensure that your hands are clean and dry when tapping the touch screen.
- Restart your device to clear any temporary

software bugs.

- Ensure that your device software is upgraded to the latest version.
- If the touch screen is scratched or damaged, take it to your local dealer.

Your battery seems to over heat

You might be using a charger that was not intended for use with your phone. Make sure you always use the authentic accessory shipped with your phone.

You can not send text messages

Some networks do not allow message exchanges with other networks. First check that you have entered the number of your SMS centre, or contact your operator for detailed information on this subject.

You feel that you have missed some calls

Check your call divert options.

The display shows SIM failure

Check that the SIM card has been inserted correctly. If the problem persists, your SIM card may be damaged. Contact your operator.

**Your phone is not charging**

If the battery is completely flat, it might take several minutes of precharge (up to 5 minutes in some cases) before the charging icon is displayed on the screen.

The picture captured with the phone camera is not clear

Make sure that the camera lens on both sides is clean.

Your device freezes or has fatal errors

If your device freezes or hangs, you may need to close programs or reset the device to regain functionality. If your device is frozen and unresponsive, remove the battery and try to switch the phone on. The device reboots automatically. If this does not solve the problem, perform a factory data reset. On the list menu, tap **Settings > about > reset**.

Others cannot hear you speaking on a call

- Ensure that you are not covering the built-in microphone.
- Ensure that the microphone is close to your mouth.
- If using a headset, ensure that it is properly

connected.

Another Bluetooth device is not located

- Ensure that the Bluetooth wireless feature is activated on your device.
- Ensure that the Bluetooth wireless feature is activated on the device you wish to connect to, if necessary.
- Ensure that your device and the other Bluetooth device are within the maximum Bluetooth range (10 m).
