Installing the SIM cards and battery

- Remove the back cover and insert the SIM cards.

Do not bend or twist the back cover excessively. Doing so may damage the cover.

- Insert the battery and replace the back cover.

Charging the battery

To AC power outlet

- Plug a charger into the multipurpose jack.
- Unplug the charger when charging is complete.

- Use only Samsung-approved chargers, batteries, and cables. Unapproved chargers or cables can cause batteries to explode or damage your device.
- Do not remove the battery before removing the charger. This may damage the device

- To save energy, unplug the charger when not in use. The charger does not have a power switch, so you must unplug the charger from the electric socket when not in use to avoid wasting power. The device should remain close to the electric socket while charging.

Installing a memory card

Your device accepts memory cards with maximum capacities of 4 GB. Depending on the memory card manufacturer and type, some memory cards may not be compatible with your device.

Memory card

Insert the memory card as shown in the drawing.

- The device supports only the FAT file system for memory cards. When inserting a card formatted in a different file system, the device asks to reformat the memory card.
- Frequent writing and erasing of data shortens the lifespan of memory cards.
- Do not use sharp tools to remove the memory card from the device.
