Dynamic Noise Suppression from Audience

Your phone is equipped with an advanced voice processing chip that delivers clear mobile calls by suppressing background noise, intermittent sounds (like a siren or nearby conversation), and echoes, allowing you to hear and be heard nearly anywhere.

How Does It Work?

Based on the intelligence of the human hearing system, the technology:

- Captures, evaluates and distinguishes all the sound signals surrounding your phone, and the person you're speaking with.
- Then isolates the primary voice in conversation and filters out the background noise - so the person you're calling hears only your voice, without disturbing background noise.
- Dynamically equalizes and adjusts voice volume to optimize your calling experience, so you can hear clearly and don't need to speak louder to overcome surrounding noise.

The noise suppression technology is built-in and already enabled in your new mobile phone. So it's ready to provide unsurpassed voice clarity with every call.

Section 1: Getting Started

This section explains how to get started with your phone by installing and charging the battery, installing the SIM card and optional memory card, and setting up your voice mail.

Before using your phone for the first time, you'll need to install and charge the battery and install the SIM card. The SIM card is loaded with your subscription details, such as your PIN, available optional services, and many other features. If desired, you can also install an SD card to store media for use with your phone.

Understanding this User Manual

The sections of this manual generally follow the features of your phone. A robust index for features begins on page 174.

Also included is important safety information that you should know before using your phone. This information is available near the back of the guide, beginning on page 164.

This manual provides navigation instructions according to the default display settings. If you select other settings, navigation may be different.

Unless otherwise specified, all instructions in this manual assume you are starting from the Home screen and using the available keys.

Note: Instructions in this manual are based on default settings, and may vary from your phone, depending on the software version on your phone, and any changes to the phone's Settings.

Unless stated otherwise, instructions in this User Manual start with the phone unlocked, at the Home screen.

All screen images in this manual are simulated. Actual displays may vary, depending on the software version of your phone and any changes to the phone's Settings.

Special Text

Throughout this manual, you'll find text that is set apart from the rest. These are intended to point out important information, share quick methods for activating features, to define terms, and more. The definitions for these methods are as follows:

- **Notes:** Presents alternative options for the current feature, menu, or sub-menu.
- **Tips:** Provides quick or innovative methods, or useful shortcuts.
- **Important:** Points out important information about the current feature that could affect performance.
- **Warning:** Brings to your attention important information to prevent loss of data or functionality, or even prevent damage to your phone.

Text Conventions

This manual provides condensed information about how to use your phone. To make this possible, the following text conventions are used to represent often-used steps:

- Arrows are used to represent the sequence of selecting successive options in longer, or repetitive, procedures.

Example: From the Home screen, press  (Menu) → **Settings** → **Wireless and networks** → **Bluetooth settings**.

Battery Cover

The battery, SIM card and SD card are installed under the battery cover.

Important!: Before removing or replacing the battery cover, make sure the phone is switched off. To turn the phone off, hold down the  until the power-off image displays, then tap **Power off**.

To remove the battery cover:

1. Hold the device firmly and locate the cover release latch.
2. Place your fingernail in the opening and firmly “pop” the cover off the device.

To replace the battery cover:

1. Position the battery cover over the battery compartment and press down until you hear a click.
2. Press down along the edges of the cover to verify it is secured.

SIM Card Overview

Important!: Before removing or replacing the battery cover, make sure the phone is switched off. To turn the phone off, hold down the  key until the power-off image displays, then tap **Power off**.

The SIM card is loaded with your subscription details such as your telephone number, PIN, available optional services, and many other features.

Important!: The SIM card and its information can be easily damaged by scratching or bending, so be careful when handling, inserting, or removing the card. Keep all SIM cards out of reach of small children.

Installing and Removing the SIM card

To install the SIM card:

1. Confirm the battery is not currently installed within the battery compartment. The battery blocks the proper installation of the SIM card into the slot.

2. Carefully slide the SIM card into the SIM card socket until the card is secured into place. Make sure that the card's gold contacts face down and that the upper-left angled corner of the card is positioned as shown.

To remove the SIM card:

1. If installed, remove the battery from its compartment (1). The battery will block the proper removal of the SIM card from the slot.
2. Carefully slide the SIM card out of the SIM card socket (2).

Note: If the card is not inserted correctly, the phone will not detect it and no service will be available. If this happens, turn off the phone, remove the card, and reinstall the card in the correct orientation.

Installing the microSD Memory Card

Your phone accepts an optional microSD™ or microSDHC™ memory card for storage of media such as music, pictures, video and other files.

Note: microSD memory cards include capacities of up to 2GB; microSDHC™ memory cards range from 4GB to 16GB.

Note: This device supports up to a 16GB microSDHC memory card.

1. Remove the battery cover.
2. Orient the card with the gold contacts facing down.

3. Firmly press the card into the slot until it locks into place. For more information on how to use the SD card see “Using the SD Card” on page 39.

Important!: Be sure to align the gold contact pins on the card with the phone's contacts.

Removing the microSD Memory Card

1. Remove the battery cover.
2. Firmly press the card into the slot and release it. The card should pop partially out of the slot.
3. Remove the card from the slot.

Battery

Before its initial use, install the battery and charge it fully.

Important!: Before removing or replacing the battery cover, make sure the phone is switched off. To turn the phone off, hold down the  key until the power-off image displays, then tap **Power off**.

Installing the Battery

1. Slide the battery into the compartment (1) so that the tabs on the end align with the slots at the bottom of the phone, making sure the connectors align.
2. Gently press down to secure the battery (2).

Removing the Battery

1. Place your finger into the battery groove (1).
2. Grip the battery at the top end (2) and lift it up and out of the battery compartment (3).

Charging the Battery

Your phone is powered by a rechargeable Li-ion battery. A wall charger, which is used for charging the battery, is included with your phone. Use only approved batteries and chargers. Ask your local Samsung dealer for further details. Before using your phone for the first time, you must fully charge the battery. A discharged battery recharges fully in approximately 4 hours.

Note: Verify that the battery is installed prior to connecting the wall charger. If the wall charger is connected and the battery is not installed, the handset will power cycle continuously and prevent proper operation. Failure to unplug the wall charger before you remove the battery can damage the phone.

Important!: Although the battery comes partially charged, it is recommended that you fully charge the battery before its initial use.

1. Slide open the Charger/Accessory jack cover (1).
2. Insert the USB cable into the device's Charger/Accessory jack.

3. Plug the charger into a standard AC power outlet. The device turns on with the screen locked and indicates both its charge state and percent of charge.

Note: This illustration displays both the **correct** and **incorrect** orientation for connecting the charger. If the charger is incorrectly connected, damage to the accessory port will occur, voiding the phone's warranty.

4. When charging is finished, first unplug the charger's power plug from the AC wall outlet, then disconnect the charger's connector from the phone.

Important!: The touch screen responds best to a light touch from the pad of your finger or a non-metallic stylus. Using excessive force or a metallic object when pressing on the touch screen may damage the tempered glass surface and void the warranty. For more information, refer to “*Warranty Information*” on page 170.

Low Battery Indicator

When the battery level is low and only a few minutes of talk time remain, a warning tone sounds and the “Low battery” message repeats at regular intervals on the display. In this condition, your phone conserves its remaining battery power, by dimming the backlight. When the battery level becomes too low, the phone automatically turns off.

Note: Some applications which serve the purpose of showing battery life may not display an accurate battery percentage.

Accessing the QWERTY Keyboard

Your phone has a full, slide-out QWERTY keyboard. The keyboard is located beneath the display screen and is accessed by sliding it open. This orients the phone's display to Landscape (widescreen) mode. With the QWERTY keyboard, you can easily type letters,

numbers, punctuation, and other special characters into text entry fields and other applications.

1. Rotate the phone 90 degrees counter-clockwise.
2. Slide the top section of the phone up to open, as shown in the illustration. When you slide it open, the display rotates from a vertical viewing mode (Portrait) to a horizontal viewing mode (Landscape).

Extending Your Battery Life

Active applications, light levels, Bluetooth usage, and GPS functionality all act to drain your battery. The following is a list of helpful tips that can help conserve your battery power:

- Use the Power Control shortcut bar.
- Reduce your backlight on time.
- Turn Bluetooth off when not in use.
- Turn Wi-Fi off when not in use.
- Deactivate the GPS when not needed. Most applications using this function will periodically query the GPS satellites for your current location; each query drains your battery.
- Do not wait until your battery is completely depleted before charging your device. Repeating this process of a complete discharge and recharge can over time reduce the storage capacity of any battery.
- Turn off Automatic application sync.
- Use the Power Control Widget to deactivate hardware functions such as Wi-Fi, Bluetooth, GPS, Synchronization, or LCD brightness setting.
- Check the Battery use screen to review what features or functions have been consuming your battery resources.
- Check the Running Services and close any unnecessary applications.
- Use the Task Manager feature to end/shutdown background applications that are still running. These minimized applications can, over time, cause your device to “slow down”.

- Animated wallpapers use processing power, memory, and more power. Change your Live Wallpaper to a non-animated Wallpaper gallery or Gallery image.

Power Control

Active applications, Wi-Fi, Bluetooth, GPS, Synchronization, Location consent, and the LCD Brightness functionality all act to drain your battery.

The Power Control shortcut bar allows you to quickly activate (turn on), or deactivate (turn off) those functions or applications that use the most battery power.

1. From the Home screen, touch and hold an empty area until the **Add to Home screen** menu displays.
2. Tap **Widgets → Power control**. The Power Control shortcut is added to the current screen.
3. Tap any of the icons on the Power Control shortcut bar to activate/deactivate the feature.

Note: A green bar displayed beneath the icon means the application is active (turned on). The green bar is removed from beneath the icon when the feature is deactivated (turned off).

Switching the Phone On or Off

If you do not have a SIM card installed the first time you turn on the device, the **Insert SIM card to make calls** message displays and an animated tutorial shows you how to install the SIM card.

At this point you can make an emergency call with the phone but normal cell phone service is not available.

Dialing Options Without a SIM card installed

1. Press  and then tap .
2. Enter the phone number to dial then press .
3. If you enter a non-emergency number, you are notified there is no network available.

– or –

If you enter an emergency number, your call is passed along to emergency services.

Dialing Options With a SIM card installed

1. Press and hold  until the phone switches on.
The phone searches for your network and after finding it, you can make or receive calls.
2. Press  and then tap .
3. Enter the phone number to dial then press .

Note: The display language is preset to English at the factory. To change the language, use the Language menu. For more information, refer to “*Locale and Text Settings*” on page 158.

Locking and Unlocking the Phone

By default, the phone screen locks when the backlight turns off.

- To display the lock screen when the display is turned off, press  or .

To unlock your phone from this lock screen:

- Touch and drag the screen lock icon  to the right.
– or –

Slide the QWERTY keyboard out.

Creating a New Google Account

You should create a Google™ Account when you first use your device in order to fully utilize the functionality. This account provides access to several device features such as Gmail, Google Maps, Google Search, and the Android Market applications. Before you are able to access Google applications, you must enter your account information. These applications sync between your device and your online Google account.

To create a new Google Account from your phone:

1. From the Home screen, tap  (Market).
2. Read the introduction and tap **Next** → **Create** to begin.
3. Follow the on-screen instructions to create a Google Account.

Note: If you already have a Google account, you only need to sign in.

Note: You can choose to configure lock settings to prevent unauthorized use of your phone. For more information, refer to “*Setting up SIM Card Lock*” on page 152.

To create a new Google Account from the Web:

1. From a computer, launch a Web browser and navigate to www.google.com.
2. On the main page, click **Sign-in → Create an account now**.
3. Follow the on-screen prompts to create your free account.
4. Look for an email from Google in the email box you provided, and respond to the email to confirm and activate your new account.

Signing into Your Google Account

1. Launch an application that requires a Google account (such as Android Market or Gmail).
2. Click **Next → Sign in**.
3. Tap the **Username** and **Password** fields and enter your information.
4. Tap **Sign in**. Your device communicates with the Google servers to confirm your information.
5. If prompted, create a new Gmail username by entering a prefix for your **@gmail.com** email address.

Retrieving your Google Account Password

A Google account password is required for Google applications. If you misplace or forget your Google Account password, use an Internet browser to navigate to <http://google.com/accounts> and follow the onscreen instructions to retrieve it:

Voice Mail

Setting Up Your Voice Mail

Your device automatically transfers all unanswered calls to voicemail, even if your device is in use or turned off. As soon as your battery is charged and the SIM card inserted, activate your voicemail account.

Important!: Always use a password to protect against unauthorized access.

For new users, follow the instructions below to set up voice mail:

Note: Voicemail setup may be different depending on your network.

1. From the Home screen, tap  and then touch and hold the  key until the phone dials voice mail.
You may be prompted to enter a password.
2. Follow the tutorial to create a password, a greeting, and a display name.

Accessing Your Voice Mail

To access your Voice Mail:

1. From the Home screen, tap  and then touch  or touch and hold  until the phone dials voice mail.
2. When connected, follow the voice prompts from the voice mail center.

Accessing Your Voice Mail From Another Phone

1. Dial your wireless phone number.
2. When you hear your voicemail greeting, press the asterisk key on the phone you are using.
3. Enter your passcode.

Task Manager

Your phone can run applications simultaneously, with some applications running in the background.

Sometimes your device might seem to slow down over time, and the biggest reason for this is background applications. These are applications that have not been closed or shutdown and are still active but minimized. The Task Manager not only lets you see which of these applications are still active in the background but also easily lets you choose which applications are left running and which are closed.

Note: The greater the number of applications running on your phone, the greater the energy drain on your battery.

Task Manager Overview

- From the Home screen, tap  (Applications) → Task Manager ().

– or –

Press and hold  (Home) then tap **Task manager**. This screen contains the following tabs:

- **Active applications** display those currently active applications running on your phone.

- **Package** displays any installed packages or applications from the Market that are taking up memory space. Tap **Uninstall** to remove them from your phone.
- **RAM**, which displays the amount of RAM (Random Access Memory) currently being used and allows you to **Clear memory**.
- **Summary** displays a visual graph indicating the available and used space within the Random Access Memory (RAM), Program, and External SD card.
- **Help** provides additional battery saving techniques.

Shutting Down a Currently Active Application

1. From the Home screen, tap  → **Task Manager** ().
2. From the **Active applications** tab, tap **End** to close selected applications or tap **End all** to close all background running applications.

Section 2: Understanding Your Phone

This section outlines key features of your phone. It also describes the phone's keys, screen and the icons that display when the phone is in use.

Features of Your Phone

Your phone is lightweight, easy-to-use and offers many significant features. The following list outlines a few of the features included in your phone.

- Touch screen with virtual (on-screen) QWERTY keyboard
- 4-row QWERTY keyboard
- Android 2.2, Froyo
- Supports social networking applications such as Facebook[®] (pre-loaded), Twitter[®] and MySpace[®]
- Support for photo management applications such as Picasa[®]
- Compatible with Adobe[®] Flash[®]
- Wi-Fi[®] Capability
- USB Tethering-capable
- Bluetooth enabled
- Full integration with Google applications (Gmail, YouTube, Google Maps)
- Multiple Messaging Options: Email, Instant Messaging, Picture Messaging, Google Talk, Google Search, Text Messaging
- Supports synchronizing with a corporate email account
- 3.0 Megapixel camera and video with autofocus, multi shot, and digital zoom
- Pre-loaded games
- MP3 player with Multitasking features
- Assisted GPS
- Full HTML browser
- Downloadable applications from Android Market
- Up to 32GB expandable memory slot
- Mobile Hotspot Capability

Front View

The following illustrations show the main elements of your phone:

The following list correlates to the illustrations.

1. **Receiver** allows you to hear a caller and the different ring tones or sounds offered by your phone.
2. **Strap holder** is used to connect a carrying strap to the phone.
3. **Volume key** allows you to adjust the ringer volume in standby mode (with the phone open) or adjust the voice volume during a call. When receiving an incoming call:
 - Pressing the volume key down mutes the ring tone.
 - Pressing and holding the volume key rejects the call.
4. **microSD Card Slot** (internal) allows you use a microSD card to expand the memory of your phone.
5. **Menu key** displays a list of options available for the current screen. From the Home screen it displays Add, Wallpaper, Search, Notifications, Edit, and Settings options.
6. **Home key** displays the Home screen when pressed. View recently used apps and access Task manager by holding down the key.

7. **Microphone** is used during phone calls and allows other callers to hear you clearly when you are speaking to them. It is also used to make voice note recordings.
8. **Quick search** is used to search the device for applications or contact information, or searches the internet for information.
9. **Back key** redisplay the previous screen or clears entries.
10. **Display** shows all the information needed to operate your phone, such as the connection status, received signal strength, phone battery level, and time.
11. **Power/End key** ends a call or switches the phone off and on. Press and hold for two seconds to turn off Silent, initiate Flight mode, or to turn the phone on or off.
12. **USB Power/Accessory connector** allows you to connect a power cable or optional accessories such as a USB/data cable.
13. **Light Sensor** lets you use the ambient light level to adjust the screen brightness/contrast.
 - In a bright light condition (outdoors), the sensors cause the device to increase the brightness and contrast for better viewing.
- In dim light conditions, the device reduces the screen brightness to compensate.
14. **Headset jack** allows you to connect a hands-free headset so you can listen to music.
15. **Proximity Sensor** detects how close an object is to the surface of the screen. This is typically used to detect when your face is pressed up against the screen, such as during a phone call.
 - While talking on the phone, the sensor detects talk activity and locks the keypad to prevent accidental key presses.

Back View of Your Phone

The following illustration shows the rear elements of your phone:

1. **Camera lens** is used to take photos.
2. **Flash**, as part of the built-in camera, provides an additional light source for pictures during low-light conditions.
3. **External speaker** allows you to hear ringers, music, and other sounds provided by your phone.

Phone Display

Your phone's display provides information about the phone's status, and is the interface to the features of your phone. The display indicates your connection status, signal strength, battery status and time. Icons display at the top of the phone when an incoming call or message is received and also alerts you at a specified time when an alarm was set. The screen also displays notifications, and an Application (or shortcut) bar with four icons: Phone, Contacts, Messaging, and Applications.

Display settings

In this menu, you can change various settings for the for the wallpaper, cube, brightness or backlight.

- From the Home screen, tap  (**Applications**) →  (**Settings**) → **Display**. For more information, refer to “*Display Settings*” on page 149.

Status Bar

The Status Bar shows information about the connection status, signal strength, phone battery level, and time, and displays notifications about incoming messages and calls and other actions.

The following list identifies the icons you see on your phone's display screen:

Indicator Icons

This list identifies the symbols you'll see on your phone's display and Indicator area:

Displays your current signal strength. The greater the number of bars, the stronger the signal.

Indicates that the Flight Mode is active. You cannot send or receive any calls or access online information.

Indicates there is no signal available.

Displays when there is no SIM card in the phone.

Displays when there is a system error or alert.

Displays when a call is in progress.

Displays when an active call has been muted.

Displays when a call is on hold.

Displays when you have missed an incoming call.

Displays when the speakerphone is on.

Displays when Call forwarding is set to Always forward. For more information, refer to “*Configuring Call Forwarding*” on page 147.

Displays your current battery charge level. Icon shown is fully charged.

Displays your current battery charge level is very low.

Shows your current battery only has three percent power remaining and will immediately shutdown. Represented as a blinking icon.

Displays when connected to the EDGE network.

Displays when your phone is communicating with the EDGE network.

Displays when connected to the 3G network.

Displays when your phone is communicating with the 3G network.

Displays when the phone is connected to a computer using a supported USB cable connection.

Displays when there is a new text message.

Displays when an outgoing text message has failed to be delivered.

Displays when there is a new voicemail message.

Displays in the notifications window when there is a new Email message.

Displays when an alarm is set.
For more information, refer to *“Setting an Alarm”* on page 138.

Displays when the Sound profile is set to Silent mode and Vibrate is set to Always or Only in silent mode.

Displays when data synchronization and application sync is active and synchronization is in progress for Gmail, Calendar, and Contacts.

Displays when the Sound profile is set to Silent mode and Vibrate is set to Never or Only when not in silent mode.

Displays when Bluetooth technology is active and enabled.

Displays when the Bluetooth technology is active and communicating with an external device.

Displays when Wi-Fi is connected, active, and communicating with a Wireless Access Point (WAP).

Notification Bar

The Notification area indicates new message events (data sync status, new messages, calendar events, call status, etc). You can expand this area to provide more detailed information about the current on-screen notification icons.

1. Tap and hold the Status bar to reveal the Notifications tab, and then drag the tab to the bottom of the screen to open the Notifications panel (1).
2. Tap a notification entry to open the associated application (2).

Note: The Notifications panel can also be opened on the Home screen by pressing  and then tapping **Notifications**.

Clearing Notifications

To clear all notifications from the Notification panel:

1. Tap the status bar to reveal the Notifications tab, and then drag the tab to the bottom of the screen to open the Notifications panel
2. Tap **Clear**. The notifications are cleared from the panel.

Accessing Additional Panel Functions

In addition to notifications, this panel also provides quick and ready access to five device functions. These can be quickly activated or deactivated.

The following functions can either be activated (green) or deactivated (white): **Wi-Fi**, **Bluetooth**, **GPS**, **Silent**, or **Auto rotation**.

Function Keys

Your phone comes equipped with four main function keys that can be used from any screen: **Menu**, **Home**, **Back**, and **Search**.

Menu Key

The **Menu** key () activates an available menu function for the current screen or application. When on the Home screen, the following menu options are available:

- **Add** () lets you add one of the following functions to a selected screen: Widgets, Shortcuts, Folders or Wallpapers.
- **Wallpaper** () lets you to customize the current screen's wallpaper image by choosing from either Gallery, Live wallpapers or Wallpaper gallery).
- **Search** () displays the Google Search box that you can use to search for a key term both on the phone and online.
- **Notifications** () expands the popup notifications area to provide more detailed information about the current on-screen notification icons.

- **Edit** () allows you to add or remove extended screens from your device. You can have up to eight extended screens.
- **Settings** () provides quick access to the device's settings menu.
 - The Settings menu can also be accessed by pressing  (**Home**) and then tapping  → **Settings**.

Home Key

The **Home** key () takes you back to your Home screen (initially #3 of the 5 available screens).

- ▶ Press and hold to launch the Task Manager. For more information, refer to “*Accessing Recently-Used Applications*” on page 30.

Back Key

The **Back** key () returns you to the previously active screen. If the on-screen keyboard is currently open, this key closes the keyboard.

Search Key

The **Search** key () displays the Google Search box that can be used to search for either a key term both on the phone and online. In some instances, this key opens a search box specific only to the current application.

Using Google Search

Use the Google Search box to manually search for a term on both your device and on the Web.

1. Press  to launch the Google Search box.

– or –

Press  and tap  → .

2. Tap  to select a search area:

- **All** searches your device, the Web, and the Android Market for your search term.

- **Web** searches for your term only on the Web using the Google search engine.
- **Apps** searches for your term only within the Android Market.
- **Contacts** searches for your term only within your current Contacts entries.

3. Enter a search term and tap a match from the list of suggestions, phone search results, or previously chosen search matches. Once touched, the item opens in the appropriate application.

– or –

Tapping **Voice Search** () lets you speak into your device's microphone to enter a search term.

Using Additional Voice Search Functions

Voice actions (such as: [your query]) allow you to perform various phone functions by speaking the parameters. For more information, refer to:

<http://www.google.com/mobile/voice-actions/>.

From an open Voice Search dialog, speak the following words to access additional features:

- **listen to [artist/song/album]** plays the selected song.
- **send text to [recipient] [message]** opens the Messaging screen.
- **navigate to [address/city/business name]** provides directions via Google Maps™. Use either an Address name, Business name, business type, or other navigation information to get the desired directions.
- **call [name]** opens the phone and automatically dials the contact.
- **send email to [recipient] [subject]** opens your email account ready to compose a new email message to the recipient.
- **map of [location]** provides a map of an area via Google maps. Use either an Address name, Business name, zip code, or other navigation information.
- **go to [website]** opens the browser and navigates to the chosen website.
- **note to self [message]** allows you to save a note to your Memo Pad.
- **directions to [location]** provides directions from your current location to a selected destination.

Home Screen

The Home screen is the starting point for using the applications on your phone. There are seven panels available, some populated with default shortcuts or applications. You can customize each of these panels.

- **Notification area** displays icons associated with end-user notifications, such as: new email, calls (missed, call in progress), new voicemail, upcoming event, USB connection, and new Text/MMS messages.
 - These notifications appear at the top-left of the screen (within the Status bar area) and display important user information.
 - More information can be accessed by either swiping down from the Status bar (page 21) or by accessing the Notifications panel [ > **Notifications** ()].
- **Status area** displays icons associated with the status of the device, such as communication, coverage, Bluetooth, 3G and Wi-Fi communication, battery levels, GPS, etc.
- **Home Screen** is a customizable screen that provides information about notifications and device status, and allows access to application Widgets.
- **Extended Home Screens** extend beyond the current visible screen width to provide more space for adding icons, widgets, and other customization features.
 - The default is five screens with Home occupying the third screen.
 - The maximum number of screens is seven.
 - All screens share the use of the four Primary Shortcuts.
 - The current screen is indicated at the top by a number in a circle.

Note: Both the status bar and primary shortcuts are visible across all screens.

- **Google search** is an on-screen Internet search engine powered by Google™. Enter a search term or access the Voice Search feature where you can verbally enter a search term and initiate an online search.
- **Widgets** are self-contained on-screen applications (not shortcuts). These can be placed onto any of the available screens (Home or extended).
- **Shortcuts** are icons that launch available device applications such as Camera, YouTube, Voicemail, Contacts, Phone, Email, Market, etc. Shortcuts can be removed from a screen and added to a screen any number of times (see “Customizing the Screens” on page 34).
- **Primary Shortcuts:** are four shortcuts present throughout all of the available screens that can be used to launch the following functions:
 - **Phone** () accesses phone-related functions (Keypad, Call Log, Favourites, and Contacts).
 - **Contacts** () accesses the Contacts-related functions (Contacts, Groups, History, and Updates).
 - **Messaging** () launches the Messaging menu (create new messages or open an existing message string).
 - **Applications/Home** toggles opening of the Home and Application screens.
 - Tap  (**Applications**) to access the Application screens that allow access to every available local application.

- While in the Applications screens, tap the **Home** icon () to return to the Home screen.

As you transition between home screens, the screen counter (located at the top) displays the current panel number in a circle.

Screen Navigation

Using the touch screen display and the keys, you can navigate the features of your phone and enter characters. The following conventions are used in this manual to describe the navigation action in the procedures.

Navigating Through the Screens

The following terms describe the most common hardware and on-screen actions.

Press and hold

Tap

Touch and hold

- **Press and hold:** Pressing relates to use of the hardware keys and buttons to select or activate an item. Some buttons and keys require you to press and hold them to perform a function, for example, you press and hold the Lock key to turn the phone on and off.
- **Tap:** Use a brief touch to select items on the display or to enter text on the virtual QWERTY keyboard. For example: touch an Application icon to open the application. A light touch works best.
- **Touch and hold:** Touch and hold an icon or key to open the available options, or to access a pop-up menu. For example: press and hold the Home screen to access a menu of customization options.
- **Drag:** Press your finger on the screen and move it vertically or horizontally across the screen. Do not release your finger until you have reached the target position.
- **Swipe or slide:** Quickly drag your finger vertically or horizontally across the screen. This allows you to move the area of focus or to scroll through a list. For example: slide your finger left or right on the Home screen to scroll among the seven panels.
- **Flick:** Move your finger in lighter, quicker strokes than swiping. This finger gesture is always used in a vertical motion, such as when flicking through contacts or a message list.

- **Rotate:** Automatically change the screen orientation from portrait to landscape by turning the device sideways. For example: rotate to landscape orientation when entering text, to provide a larger keyboard, or when viewing web content to minimize scrolling.

- **Pinch:** Place your thumb and forefinger on the screen and “pinch” the screen (move fingers together) to zoom out when viewing a picture or a Web page.
- **Spread:** Place your thumb and forefinger on the screen and “spread” them apart to zoom in when viewing a picture or a Web page.

Pinch (Zoom Out)

Spread (Zoom In)

Menu Navigation

You can tailor the phone's range of functions to fit your needs using both menus and applications. Menus, sub-menus, and features are accessed by scrolling through the available on-screen menus.

Navigating Through the Application Menus

There are four default Application Menus available. As you add more applications from the Android Marketplace, more screens are created to house these new apps.

1. Press  and then tap  (**Applications**). The first Application Menu displays.
 - To close the Applications screen, tap  or press .
2. Sweep the screen to access the other menus.
3. Tap any of the on-screen icons to launch the associated application.

Using Sub-Menus

Sub-menus are available from within most screens and applications.

1. Press . A sub-menu displays at the bottom of the phone screen.
2. Tap an option.

Sub-Menu items

Using Context Menus

Context menus (also called pop-up menus) contain options that apply to a specific item on the screen. They function similarly to menu options that appear when you right click the mouse on a desktop computer.

- Touch and hold an item on-screen to open its context menu.

Accessing Recently-Used Applications

1. Press and hold  to open the recently-used applications window.

Note: This recent applications screen also provides access to the **Task manager**.

2. A pop-up displays the six most recently used applications.
3. Tap an icon to open the recent application.

Applications

The Application menu provides quick access to all applications. Applications display on each of the three panels on the Applications screens.

The following table contains a description of applications available via both the Primary shortcuts area and via the Applications screens. If the application is already described in another section of this user manual, then a cross reference to that particular section is provided. For information on navigating through the Applications icons, see *“Navigating Through the Application Menus”* on page 28.

Note: Depending on your service provider, your phone may include additional applications not described in this list.

AllShare

Allows you to share your on-device media content with other external devices using DLNA (Digital Living Network Alliance) and built-in AllShare™ technology. Samsung's AllShare makes staying connected easy.

For more information, refer to *“AllShare”* on page 108.

Calculator

Settings

Accesses the device’s built-in Settings menu. For more information, refer to “*Changing Your Settings*” on page 140.

Talk

Launches a Web-based Google Talk application that lets you chat with family and friends over the Internet for free. For more information, refer to “*Google Talk*” on page 95.

Task Manager

Use Task Manager to see which applications are running on your phone, and to end running applications to extend battery life.

For more information, refer to “*Task Manager*” on page 120.

Voice Recorder

Allows you to record an audio file up to one minute long and then immediately send it as a message. For more information, refer to “*Voice Recorder*” on page 121.

Voice Search

Launches your phone's built-in voice recognition software and initiates a Google search based on the recognized text. For more information, refer to “*Voice Search*” on page 121.

YouTube

Launches the YouTube webpage via the browser. For more information, refer to “*YouTube*” on page 107.

Customizing the Screens

You can customize the Home screens (panels) to display various Widgets, Shortcuts, Folders, or Wallpapers. For example, one screen could contain the Music Player shortcut and other forms of media, while another screen might contain communication apps such as Gmail and IM.

You can customize your Home screen by doing the following:

- **Adding, Deleting, and Rearranging screens**
- **Adding and Removing Shortcuts**
- **Adding and Removing Widgets**
- **Creating Folders**
- **Changing the Background (Wallpapers)**

Adding and Deleting Screens

Your phone can display up to seven screens. You can add, delete and rearrange these screens at any time.

Important!: Your phone can provide up to seven screens and the minimum number is one screen.

To delete a screen:

1. Press → and then tap (**Edit**).
2. Touch and hold, then drag the undesired screen down to the **Remove** tab ().
3. Press to return to the main Home screen.

To add a screen:

1. Press → and then tap (**Edit**).
2. Tap the **Add** icon (). The newly added screen appears as the last page.
3. Press to return to the main Home screen.

Rearranging the Screens

1. Press → and then tap (**Edit**).
2. Touch and hold a screen and then drag it into its new location.

Adding and Removing Primary Shortcuts

By default, the device provides four Primary shortcuts: Phone, Contacts, Messaging, and Applications/Home. As long as the menu is displayed in a **Customizable grid**, you can replace these shortcuts with other applications that you use most frequently.

1. Press and then tap (**Applications**).
2. Press and then tap **View type** → **Customizable grid**.
3. Press and then tap **Edit**. A box outline then appears around the application icons.
4. Scroll through the list and locate the desired application.
5. Touch and hold the on-screen icon, then drag it over one of the four primary shortcuts to replace it.
 - The new primary shortcut displays at the bottom of the screen. The previous primary shortcuts switches places with your selected icon.
6. Press and then tap **Save**.
7. Tap to return to the Home screen.

Managing Shortcuts

Note: To move a shortcut from one screen to another, carefully touch and hold the shortcut and slowly drag it to the edge of the screen. As the shortcut turns light blue, you can begin to move it to the adjacent screen. Alternatively, delete it from its current screen. Activate the new screen and then add the selected shortcut.

To add a shortcut from the Applications screen:

1. Press  to go to the Home screen.
2. Select a location (screen) for your new shortcut by scrolling through your available screens.
3. Tap  (**Applications**) to reveal all your current available applications. By default, applications are displayed as an Alphabetical grid.
4. Scroll across the screens and locate your desired application.
5. Touch and hold the on-screen icon. The new shortcut then appears to hover over the current screen.
6. While still holding the on-screen icon, position it on the current screen. Once complete, release the screen to lock the shortcut into its new position.

To add a shortcut via the Add to Home screen:

1. Press  to go to the Home screen.
2. Touch and hold an empty area of the screen.
3. From the **Add to Home screen** window tap **Shortcuts**.
4. Tap a selection from the available list.

To delete a shortcut:

1. Press  to go to the Home screen.
2. Touch and hold the desired shortcut. This unlocks it from its location on the current screen.
3. Drag the shortcut over the **Remove** tab () and release it.

Adding and Removing Widgets

Widgets are self-contained applications that can be placed on any screen. Unlike shortcuts, widgets appear as applications.

To add a Widget:

1. Press  to go to the Home screen.
2. Touch and hold an empty area of the screen.
3. From the **Add to Home screen** window tap **Widgets**.
4. Tap an available Widget to place it on your current screen.

To remove a Widget:

1. Touch and hold a Widget until it unlocks from the current screen.
2. Drag the widget over the **Remove** tab () and release it.
 - As you place the Widget into the Trash, both items turn red.
 - This action doesn't delete the Widget, it just removes it from the current screen.

Creating and Managing a Folder

Folders hold items that you want to organize and store together on the workspace.

To create a new on-screen folder:

1. Press  to go to the Home screen.
2. Touch and hold an empty area of the screen.
3. From the **Add to Home screen** window tap **Folders**.
4. Tap an available folder type and place it on the current screen.

To rename a folder:

1. Tap the desired folder you want to rename.
2. With the folder open, touch and hold the Folder title bar (top of the Folder window) until the **Rename folder** pop-up displays.
3. Tap the folder name field, enter a new title for this folder and tap **OK**.

To delete a folder:

1. Touch and hold a desired folder. This unlocks it from its location on the current screen.

To place a widget onto a different screen:

1. Touch and hold the widget until it becomes transparent.
2. Drag it to the edge of your screen.
3. Slowly drag it past the edge of the screen until it turns light blue.
4. Drag the widget to its desired position on the new screen.
5. Repeat these steps to continue moving it to other screens.

2. Drag the folder over the **Remove** tab () and release it.

Managing Wallpapers

Wallpapers (screen background images) can be chosen from Gallery images (user taken), Live wallpapers (animated backgrounds), or Wallpaper gallery (default phone wallpapers).

Note: The use of animated Live wallpapers will require additional battery power.

To change the current wallpaper:

1. Press  to go to the Home screen.
2. Touch and hold an empty area of the screen.
3. From the **Add to Home screen** window tap **Wallpapers**.
4. Select a Wallpaper:
 - Tap **Gallery** to select from a user image stored in the camera image gallery, crop the image, and tap **Save**.
 - Tap **Live wallpapers** to select from a list of animated backgrounds, once done tap **Set wallpaper**.
 - Tap **Wallpaper gallery**, scroll through the images, tap a wallpaper image, then tap **Set wallpaper**.

Section 3: Memory Card

Your phone lets you use a microSD™ or microSDHC™ card (also referred to as a memory card) to expand available memory space. This secure digital card enables you to exchange images, music, and data between SD-compatible devices. This section addresses the features and options of your device's SD functionality.

- microSD card storage: up to 2GB in size
- microSDHC card storage: up to 32GB in size

Using the SD Card

There are two main uses for an SD card:

1. Connecting to your PC to store files (such as music, videos, or other types of files and media).
2. To activate the camera, video, music player, and other dependant media or applications.

Important!: Camera, Music Player, and Video functionality require a mounted SD card.

microSD Icon Indicators

The following icons show your microSD card connection status at a glance:

- the card has been unmounted (released from use).

- the card is being prepared for use and for mounting.

- the card has been improperly removed.

Important!: **DO NOT** remove a microSD card while the device is accessing or transferring files. Doing so will result in loss or damage of data. Make sure your battery is fully charged before using the microSD card. Your data may become damaged or lost if the battery runs out while you are using the microSD card.

Mounting an SD Card

An SD card must be mounted before it can be used with your phone. An inserted SD card is automatically mounted for use in

the phone. A card that has been unmounted but not removed from the phone must be remounted before it can be used.

To manually mount an SD card:

1. Press  →  and then tap  (**Settings**) → **SD card and phone storage**.
2. Tap **Mount SD card**.

Unmounting an SD card

Unmounting the SD card prevents corruption and damage to the SD card while removing it from the slot.

1. Press  →  and then tap  (**Settings**) → **SD card and phone storage**.
2. Tap **Unmount SD card** → **OK**.
3. When the “**SD card will be unmounted**” message displays and the **Mount SD card** now appears in the menu list, open the phone and remove the SD card. For more information, refer to “*Installing the microSD Memory Card*” on page 4.

PC Connection to an SD card

Important!: If access to the external SD card is not available, download and install the appropriate USB drivers on the computer.

1. Insert the SD card into the SD card slot (For more information, refer to “*Installing the microSD Memory Card*” on page 4.)
2. Connect the USB cable to the phone and connect the cable to the computer. The “**USB Mass Storage**” screen is displayed.
3. Tap **Turn on USB storage** → **OK**. Both the phone and computer display icons to show that the device is mounted. As soon as the connection is established the computer assigns a drive letter the phone’s storage device.
4. You can now use the computer to move files between the card and computer.
5. To close the connection between the phone and your computer, tap **Turn Off USB storage**.

SD card Memory Status

To view the memory allocation for your SD card:

- ▶ Press  →  and then tap  (**Settings**) → **SD card and phone storage**. The available memory displays under the Total space and Available space headings.

Format an SD card

You can erase all files from an SD card by reformatting the card.

1. Press  →  and then tap  (**Settings**) → **SD card and phone storage** → **Unmount SD card** → **OK**.
2. Tap **Format SD card** → **Format SD card** → **Erase everything**.
The SD card is formatted, erasing all the data stored on it.

Section 4: Call Functions

This section describes features and functionality associated with making or answering calls.

Displaying Your Phone Number

- ▶ Press  →  and then tap  (**Settings**) → **About phone** → **Status**. Your phone number displays in the **TELEPHONE** field.

Note: The phone's **Settings** menu can also be activated by pressing  and then tapping  →  (**Settings**).

Making a Call

1. Press  and then tap .
 2. Enter the phone number to dial then press .
- ▶ If you make a mistake while dialing, touch  to clear the last digit. Touch and hold  to clear the entire sequence.

Ending a Call

- ▶ Briefly tap  key to end the call.

Note: To redial a recent number, slide the number from the Call Log list to the right.

If you exit the current call screen and return to the Home screen, You are visually notified that you are still on an active call by the phone icon within the Status bar.

- ▶ Slide the status bar down to access the phone features.

Answering a Call

When somebody calls you, the phone rings and displays the incoming call image.

The caller's phone number, picture, or name if stored in Contacts List, displays.

- ▶ At the incoming call screen:
 - Touch and slide  to the right to answer the call.
 - Touch and slide  to the left to reject the call.

Pressing the Volume down button mutes the ringer.

If the incoming call is from a number stored in your Contacts, the contact's name is displayed. You may also see the caller's phone number, if available. For more information, refer to “Contacts” on page 67.

Dialing Options

When you enter numbers on the Keypad, you will see three on-screen options.

From the keypad screen, use one of the following options:

- **Call** () to call the entered number.
- **Delete** () to delete digits from the current number.
- **Voice Dialer** () to launch the voice recognition application.
- **Voice Mail** () to access your Voice Mail service.

To view additional dialing options:

- ▶ Tap  and select one of the following:
 - **Add to Contacts** to add the current number to either a new or existing Contacts entry.

- **Speed dial setting** to access the Speed Dialing menu where you can assign a speed dial location to a current Contacts entry.
- **Send message** to send a message (SMS/MMS) to the current phone number.
- **Add 3 sec pause** to insert a three-second delay within a number string (the phone continues dialing after 3 seconds without any additional keys being pressed).
- **Add wait** to insert a hard pause within the number string (the phone waits for your input). A wait requires that any consecutive numbers be manually sent by tapping **Send**.

International Calls

1. From the Home screen, tap , then touch and hold . The + symbol displays.
2. Use the on-screen keypad to enter the country code, area code, and phone number.
 - If you make a mistake, tap  once to delete a single digit.
 - Touch and hold  to delete all digits.
3. Tap .

Pause Dialing

You can dial or save phone numbers with pauses for use with automated systems, such as voicemail or financial phone numbers.

- **3-Second Pause** automatically sends the next set of numbers after a three-second pause. This is indicated in the number string as a comma (,).
1. From the Home screen, tap  and use the on-screen keypad to enter the phone number.
 2. Press  and then tap **Add 3 sec pause**. This feature adds an automatic three-second pause.
 3. Use the keypad to enter the additional numbers that will be dialed automatically after the second pause.

Tip: You can create pauses longer than three seconds by entering multiple 3-sec pauses.

4. Tap .

Wait Dialing

Inserting a Wait (;) into your dialing sequence means that the phone waits until you tap **Send** before proceeding with the next sequence of numbers.

1. From the Home screen, tap  and use the on-screen keypad to enter the phone number.
2. Press  and then tap **Add wait**. This feature causes the phone to require your acceptance before sending the next set of entered digits.
3. Tap .
4. Once prompted, tap **Send** to dial the remaining digits.

Redialing the Last Number

The phone stores the numbers of the calls you've dialed, received, or missed if the caller is identified.

To recall any of these numbers:

1. From the Home screen, tap .
2. Tap the **Call Log** tab to display the list of recent calls.
3. Tap the name/number and tap **Call**.

Speed Dialing

Once you have stored phone numbers to your Contacts List, you can set up to eight speed dial entries and then dial them easily whenever you want, simply by touching the associated numeric key.

Setting Up Speed Dial Entries

Important!: Speed dial location #1 is reserved for Voicemail. No other number can be assigned to this slot.

1. From the Home screen, tap .
2. Press  and then tap **Speed dial setting**. The **Speed dial** screen displays a virtual keypad with the numbers 1 through 9.
3. Tap an unassigned number. The **Contacts** screen displays.

4. Tap a contact and select a number to assign to the speed dial location. The selected contact number/image is then displayed in the speed dial number box.

Changing a Speed Dial Entry

1. From the Home screen, tap .
2. Press  and then tap **Speed dial setting**.

Important!: The number 1 is reserved for Voicemail and another number cannot be assigned to this slot.

3. Press  and then tap **Change order**.
4. In a single motion, touch and drag an entry over another location on the virtual keypad.
5. Tap **Save** to store the new assignment.
6. Press  to return to the previous screen.

Removing a Speed Dial Entry

– or –

Press  and then tap **Remove**. Tap an entry and select **Remove**.

4. Press  to return to the previous screen.

Making a Call Using Speed Dial

1. From the Home screen, tap .
2. Touch and hold a speed dial location (numbers 2-9, or 1 if you are dialing voice mail) until the number begins to dial.
3. If you are not certain of the speed dial location, tap  →  → **Speed dial setting** and touch a speed dial number to view the assigned phone number.

In Call Options

Your phone provides a number of features that are available for use during a call.

Adjusting the Call Volume

During a call, use the Volume keys on the left side of the phone to adjust the earpiece volume.

- ▶ Press the **Up** volume key to increase the volume level and the **Down** volume key to decrease the level.

– or –

From the screen during a call, press the **Up** Volume key.

From the Home screen, you can also adjust the ring volume using these keys.

Placing a Call on Hold

You can place the current call on hold whenever you want. If your network supports this service, you can also make another call while a call is in progress.

To place a call on hold:

1. Tap **Hold** to place the current call on hold.
2. Tap **Unhold** to activate the call that is on hold.

To make a new call while a call is in progress:

1. Enter the new phone number that you wish to dial or look it up in Call history.
2. Tap **Add call** to dial the second call.
3. Dial the new phone number and tap 

To switch between the two calls:

- ▶ Tap **Swap**.
The active call number appears large on screen. The caller on hold appears smaller and to the side reads “On hold”.

Turning the Speakerphone on and off

While on a call, you can use your Speakerphone by following these steps:

1. Tap  (**Speaker off**) to turn the speakerphone on.
2. Tap  (**Speaker on**) to turn the speakerphone off.

Tip: When the speaker is turned **On**, a green bar appears in the speakerphone key. When the speaker is turned **Off**, the color of the bar is gray.

Muting a Call

1. Tap  (**Mute off**) to active mute so the other participant cannot hear you speaking.
2. Tap  (**Mute on**) to turn mute off and resume your conversation.

Switching to Bluetooth Headset

1. While on a call, switch to the Bluetooth headset instead of speaker by tapping **Headset**.
2. At the prompt, tap **Yes** to enable Bluetooth if it is not already activated.

More In-call Options

During a call you can search for information in the Contacts list, or create a Memo.

Viewing the Contacts List

During a call you can look up a number in the Contacts list.

1. Press  and then tap **Contacts**.
2. Browse the Contacts list for the information you need.
3. Press  to return to the active call.

Multi-Party calls

Making a Multi-Party Call

A multi-party call is a network service that allows up to six people to participate in a multi-party or conference call.

For further details about subscribing to this service, contact T-Mobile customer service.

Setting up a Multi-Party Call

1. From the Home screen, tap .
2. Dial the number for the first participant and tap . Wait for the call to be answered.
3. Tap **Add call**, enter the second phone number and tap . The first caller is placed on hold.
4. Wait for the second caller to answer the incoming call and tap **Merge calls**. The two calls are now joined into a multi-party call and display in the order in which they were called.

Important!: A maximum of two callers can be joined to a single multi-party line at a time. Additional callers will participate in a new Multiparty session and held in conjunction with the previous multiparty call. You can swap or place each multi-party call on hold.

Having a Private Conversation With One Participant

When you have two or more participants in a multi-party session, it might be necessary to place those participants on hold so that a private conversation can be held with a single caller. While you are in a multi-party call:

1. Tap **Manage**.
2. Tap  adjacent to the participants you would like to split from the current call. The list displays the callers in the order they were dialed.

3. Tap the number for the participant you want to speak to privately.
You can now talk privately to that person while the other participants can continue to converse with each other. If there is only one other participant, that person is placed on hold.
4. To return to the multi-party call, tap **Merge calls**. All of the multi-party call participants can now hear each other.

Dropping One Participant

1. Tap **Manage** →  to the right of the number to drop a caller. The participant is disconnected and you can continue the call with the remaining participant.
2. Tap  to end the current call.

Call Waiting

You can answer an incoming call while you have a call in progress, if this service is supported by the network and you have previously set the Call waiting option to **Activate**.

You are notified of an incoming call by a call waiting tone. For more information, refer to “*Configuring Additional Call Settings*” on page 147.

To answer a new call while you have a call in progress:

1. In a single motion, touch  and slide it to the right to answer the new incoming call.
2. Select **Hold XXX** if you wish to place the previous caller on Hold. You can also choose to end your previous call and start a new one (**End XXX**).

Note: The new caller appears at the top of the list. The previous caller is placed on hold and appears at the bottom of the list.

3. Tap **Swap** to switch between the two calls. This places the new caller on hold and activates the previous call. The active call displays with a green background.
4. Tap **Swap** again to switch back.

Call Log Tab

The Call Log tab provides a list of the phone numbers (or Contacts entries) for calls you placed, accepted, or missed. The Call Log tab makes redialing a number fast and easy. It is continually updated as your device automatically adds new numbers to the beginning of the list and removes the oldest entries from the bottom of the list.

The Notification area of the Home screen (upper-left) displays phone notifications, status, or alerts such as:

Displays when a call is in progress.

Displays when a call was missed.

Accessing the Call Log Tab

1. From the Home screen, tap  → **Call logs** tab.
2. Tap an entry to view available options.

Note: The Call logs tab only records calls that occur while the phone is turned on. If a call is received while the phone is turned off, it will not be included in your calling history.

Each entry contains the phone number (if it is available) and Contacts entry name (if the number is in your Contacts).

Indicates outgoing call made from your device.

Indicates received call that was answered.

Indicates a missed call.

Accessing Call Logs from The Notifications Area

1. Touch the Status bar to reveal the Notifications tab, and then drag the tab to the bottom of the screen to open the Notifications panel (1).
2. Tap the Missed call entry to open the Call Log screen (2).

Tip: Press  and tap **Notifications** to open the panel.

This list provides easy access to redial an entry, send a message, or add the number to Contacts.

Call Log - Caller Overview

Call options (tap)

Call Log screen

- **Send message** allows you to create a new text message to the selected entry.
- **Send email** allows you to create a new email that is then addressed to the entry's available email address.
- **Time** provides the time and date of the call and its duration.
- **Add to Contacts** to save the number if it is not already in your Contacts.

- Touch and hold an entry to display the entry-specific context menu:

- **Call [Number]** to redial the current phone number.
- **Send message** allows you to create a new text message to the selected entry.
- **Edit number before call** to make alterations to the current phone number prior to redial.
- **Add to Contacts** to save the number if it is not already in your Contacts.
- **View contact** to view the information for the currently stored Contacts entry.
- **Send contact information** to send the Log entry information via text message.
- **Delete** to delete the entry from the Logs list.

Altering Numbers from the Call Log

If you need to make a call from the Call logs screen and you need to alter the number prior to dialing, you can add the appropriate prefix by prepending the number.

1. Tap  → **Call Log** tab.
2. Touch and hold an entry to access the entry-specific context menu.
3. Tap **Edit number before call**.
4. Edit the number using the on-screen dialpad or delete digits by pressing  to erase the numbers.
5. Tap  once the number has been changed.

Quick Dialing a Number from the Call Log

The Call Log can also be used to quickly call back a selected number by simply sliding the number across the entry.

1. Locate the desired number from the Call Log list.
2. In a single motion, touch and slide your finger over the number from left to right. This action places a call to the current recipient.

Quick Messaging a Number from the Call Log

The Call Log can also be used to quickly text message a selected number by simply sliding the number across the entry.

1. Locate the desired number from the Call Log list.
2. In a single motion, touch and slide your finger over the number by going to the left. This action addresses a new text message to the recipient.

Quick Messaging

Erasing the Call Log

You can delete either an individual call log entry or all current entries from the Call logs list.

To clear a single entry from the list:

1. Tap  → **Call Log** tab.
2. Touch and hold an entry and select **Delete**.

To clear all entries from the list:

1. Tap  → **Call Log** tab.
2. Press  → **Delete**.
3. Tap **Select all** → **Delete** → **OK**.

Section 5: Entering Text

This section describes how to select the desired text input method when entering characters into your phone. This section also describes the predictive text entry system that reduces the number of key strokes associated with entering text. Your phone is equipped with an orientation detector that can tell if the phone is being held in an upright (Portrait) or sideways (Landscape) position and adjusts the screen orientation to suit.

Text Input Methods

There are three text input methods available:

- **Samsung keypad:** an on-screen QWERTY keypad that can be used in both portrait and landscape orientation.
- **Swype** (default): a new way to enter text on touch screens. Instead of tapping each key, use your finger to trace over each letter of a word.
- **QWERTY keyboard:** located below the screen, can be used at any time to enter text and override the current text input method. For more information, refer to “*Locale and Text Settings*” on page 158.

The on-screen QWERTY keypad works the same in both portrait and landscape mode.

Selecting the Text Input Method

The Text Input Method can be assigned from two different locations:

Selecting from the Settings Menu:

- Press  →  and then tap  (**Settings**) → **Locale and text** → **Select input method**.

Selecting from the Text Input field:

1. From a screen where you can enter text, touch and hold the text input field to open the context menu and select **Input method**.
2. Select an input method (**Swype** or **Samsung keypad**).

Important!: At any time, you can access the QWERTY keyboard and directly enter text.

Using the Swype Keyboard

Swype™ is the default on-screen text input method that allows you to enter a word by sliding your finger from letter to letter, lifting your finger between words. SWYPE uses error correcting algorithms and a language model to predict the next word. SWYPE also includes a touch predictive text system.

The onscreen keyboard options are different between the Android keyboard and Swype onscreen input methods.

Enabling and Configuring SWYPE

If you configure another text input method (Samsung keypad) you must re-enable SWYPE before using the SWYPE keyboard.

Even when SWYPE is enabled, you can still use both the physical and on-screen keyboard functionality.

1. Press  →  and then tap  (**Settings**) → **Locale and text**.
2. Tap **Select input method** → **Swype**.

SWYPE Settings

1. Press  →  and then tap  → **Locale and text** → **Swype**.
2. Locate the **Preferences** section to alter these settings:
 - **Language:** allows you to select the current text input language. Default language is US English.
 - **Word prediction:** predicts words as you are typing.
 - **Audio feedback:** turns on sounds generated by the Swype application.
 - **Enable tip indicator:** turns on a flashing indicator for quick help.
3. Locate the **Swype Advanced Settings** section to alter these settings:
 - **Auto-spacing:** automatically inserts a space between words. When you finish a word, just lift your finger and start the next word.
 - **Auto-capitalization:** automatically capitalizes the first letter of a sentence.
 - **Show complete trace:** sets whether the word trace line remains on-screen as you swipe across the screen.

- **Word choice window:** sets the amount of times the word choice selection window displays on screen. Move the slider between Never or Always and tap **OK**.
 - **Speed vs. accuracy:** sets how quickly Swype responds to on-screen input. Move the slider between Fast Response (speed) or Error Tolerant (accuracy) and tap **OK**.
4. Locate the **Help** section to view more information on using Swype:
 - **Swype help:** provides access to the on-line Swype Help information.
 - **Tutorial:** a short tutorial that helps you to get started using Swype.
 5. Locate the **About** section to review the Swype application information:
 - **Version:** displays the current software version.

Swype Text Entry Tips

You can access the Swype Tips application and watch a video or tutorial on using Swype. You can also use the following Swype text entry tips.

- Create a squiggle (like an S shape) to create a double letter (such as **pp** in apple).
- Touch and hold a key to view the punctuation menu then make a selection.
- Move your finger over the apostrophe to enter contractions.
- Double-touch on the word you want to change to correct a misspelled word, then touch the delete key to erase one character. Touch and hold the delete key to erase an entire word.

Swype Tips

Selecting a Text Input Mode in Swype

1. From a screen where you can enter text, tap the text input field to reveal the on-screen keyboard.
2. With Swype as your text entry method, select one of the following text mode options:
 - **123 ABC**  to use Swype with alphanumeric characters from the onscreen keyboard.
 - **SYM** (Symbol)  to enter symbols from the onscreen keyboard.

Note: After typing an initial uppercase character, the  key changes to  and all letters that follow in the same sentence are in lower case. The first letter of every new sentence is entered as uppercase.

Swype Keyboard Overview

- **Text Input field:** a field where text, number, or other characters can be entered.
- **Additional Functions:** provides additional message options.
- **CAPS/ALT key:** When in 123ABC mode, this key changes the capitalization of the subsequent entered characters. When in SYM mode, this key can show additional symbol characters.
- **Text Input mode:** There are two available modes: **123ABC** and **SYM**.

- 123ABC mode contains alphanumeric characters and a few common punctuation marks. Text mode button indicates **SYM**.
- SYM mode contains only symbols and numbers. Text mode button indicates **123ABC**.
- **SWYPE tips:** Tapping this button displays the Swype tips and tutorial screen.

Using 123ABC Mode in SWYPE

In **123ABC** mode, you can enter letters and a few common punctuation marks from the onscreen keyboard. The text mode key shows .

1. From a screen where you can enter text, tap the text input field to reveal the on-screen keyboard.

Note: An on-screen landscape keyboard is not available since in this orientation you can use the QWERTY keyboard found below the screen.

2. If necessary, tap  to configure the keyboard for 123ABC mode (showing letters and numbers on the onscreen keys). Once in this mode, the text input type shows .

Note: After typing an initial uppercase character, the  key changes to  and all letters that follow in the same sentence are in lower case. The first letter of every new sentence is displayed as all uppercase.

3. Swipe your finger continuously over the letters to form a word, then lift your finger from the screen.
 - If you make a mistake, tap  to erase a single character. Touch and hold  to erase an entire word.

Repeat as required to enter each additional word.

- By default, the first letter of an entry is capitalized and the following letters are lower case.
- After a word is entered and you lift your finger, the cursor automatically adds a space after the word.

4. Tap  to send the message.

All lowercase

Initial Uppercase

Displays when the first character of a word is entered as uppercase but all subsequent characters are lowercase.

All Uppercase

Displays when all characters will be entered as uppercase characters.

To enter text via Swype:

This example shows a user entering the word “there”. Put your finger down on the “t”, and without lifting, glide it to the “h”, and then to the “e”, and then over to the “r”, and back to the “e”. When

complete, lift your finger off the screen to allow the device to determine the closest word match.

Note: If multiple word choices exist for your Swype entry, an on-screen popup appears to provide additional word choices.

Entering Numbers and Symbols in SWYPE

When using the onscreen keyboard in portrait mode, some symbols are not available (such as Emoticons or Smileys). In SYM mode using Swype, you can only enter symbols and numbers from the onscreen keyboard. Once in SYM mode, the text mode key shows .

1. From a screen where you can enter text, tap the text input field to reveal the on-screen keyboard.
2. If necessary, tap  to configure the keyboard for SYM mode. Once in this mode, the text input type shows .
3. Tap the on-screen key for the number or symbol you want to enter. To enter the secondary symbol (above the main one on the same key), touch and hold the key or trace a circle around the key with your finger.
4. Tap  to choose from additional symbols.

For example:

- To enter &: tap **SYM** and select the & key.
- To enter ~: tap **SYM** and tap and hold the & key until the character appears, or trace a circle around the key.

Using the Samsung Keypad

This on-screen keypad can be used to enter text while in portrait orientation.

Configuring Samsung Keypad Settings

1. Press  →  and then tap  → **Locale and text** → **Samsung keypad**.

– or –

From within an active text entry screen, tap  from the bottom of the screen to reveal the Samsung keypad settings screen.

2. Set any of the following options:
 - **Keypad types** allows you to choose a keypad configuration (Qwerty Keypad [default], 3x4 Keypad), Handwriting box 1, Handwriting box 2.
 - **Writing language** sets the input language. Tap a language from the available list. The keyboard is updated to the selected language.
 - **XT9** enables predictive text entry mode. This must be enabled to gain access to the advanced settings.
 - **XT9** configuration of more advanced XT9 features. For more information, refer to “Using XT9 Predictive Text” on page 63.
 - **Keypad sweeping** automatically moves the screen in the direction your finger moves along the screen.
 - **Auto-capitalization** automatically capitalizes the first letter of the first word in each sentence (standard English style).

- **Handwriting settings:** lets you select the Recognition time and view details of the handwriting recognition software. Higher recognition time increases accuracy but slows down operation.
- **Voice input** activates the Voice input feature. This is an experimental feature that uses Google's networked speech recognition application.
- **Auto-full stop** automatically inserts a full stop by tapping the space bar twice.
- **Tutorial** launches a brief onscreen tutorial covering the main concepts related to the Samsung keypad.

Using XT9 Predictive Text

XT9 is a predictive text system that has next-letter prediction and regional error correction, which compensates for users pressing the wrong keys on QWERTY keyboards.

Note: XT9 is only available when ABC mode is selected. XT9 advanced settings are available only if the XT9 field has been selected.

1. Press  →  and then tap  → **Locale and text** → **Samsung keypad**.

– or –

From within an active text entry screen, tap  at the bottom of the screen to access the **Samsung keypad settings** screen.

2. Tap the **XT9** field. A checkmark indicates activation.
3. Tap **XT9** and configure any of the following advanced options:
 - **Word completion** tells your device to attempt to predict how to complete the word you have started. (A green check mark indicates the feature is enabled.)
 - **Word completion point** sets how many letters have to be entered before a word prediction is made. Choose from 2 letters, 3 letters, 4 letters, or 5 letters.
 - **Spell correction** enables the automatic correction of typographical errors by selecting from a list of possible words that reflect both the characters of the keys you touched, and those of nearby characters. (A green check mark indicates the feature is enabled.)
 - **Next word prediction** predicts the next word you are like to enter. (A green check mark indicates the feature is enabled.)
 - **Auto-append** automatically adds predictions to the word you are typing. (A green check mark indicates the feature is enabled.)
 - **Auto-substitution** allows the device to automatically replace misspelled or miskeyed words. This option reduce "typos." (A green check mark indicates the feature is enabled.)
 - **Regional correction** automatically tries to correct errors caused when you tap keys adjacent to the correct keys. (A green check mark indicates the feature is enabled.)

- **Recapture** sets the device to redisplay the word suggestion list after selecting the wrong word from the list.
 - **XT9 my words** allows you to add new words to the built-in XT9 dictionary.
 - Tap **Add word**.
 - Use the **Register to XT9 my words** field to enter the new word.
 - Tap **Done** to store the new word.
 - **XT9 auto-substitution** allows you create a word rule by adding words for automatic substitution during text entry (for example youve becomes you've).
 - Tap the XT9 auto-substitution field. Flick up or down to review the current list of word substitutions.
 - Press  and tap **Add**.
 - Enter the original word that will be replaced in the **Shortcut** field (for example, youve).
 - Enter the substitute word that will be used in the **Substitution** field (for example, you've).
 - Tap **Done** to save the substitution rule.
4. Press  to return to the previous screen.

Entering Text Using the QWERTY Keyboard

Your phone has a full, slide-out QWERTY keyboard. The keyboard is located beneath the display screen and is accessed by sliding it open. This orients the phone's display to Landscape (widescreen) mode. With the QWERTY keyboard, you can type letters,

numbers, punctuation, and other special characters into text entry fields or other applications as easily as on your computer.

To open the device and access the keyboard:

1. Rotate the phone 90 degrees counter-clockwise.
2. Slide the top section of the phone up to open, as shown in the illustration. When you slide it open, the display rotates to a horizontal viewing mode (Landscape).

To reveal additional QWERTY text editing options:

1. Touch and hold an active text entry field.

2. From the Edit text context menu, tap an available function:

- **Select all** highlights all characters in the text message field.
- **Select text/Stop selecting text** lets you manually highlight characters in the text message field.
- **Cut** cuts all characters in the current text message field.
- **Copy** copies selected characters in the current text message field.
- **Cut all** cuts all characters in the current text message field.
- **Copy all** copies all characters in the current text message field.
- **Paste** inserts the previously cut or copied text into the message field.
- **Input method** provides additional text input methods (Swype or Samsung keypad). (When the QWERTY keyboard is open, Swype and Samsung keypad are disabled.)

Using the QWERTY Keyboard

In this section we'll cover the steps necessary to enter text using the QWERTY keyboard. Using your phone's QWERTY keyboard is just like using any standard computer keyboard. The following keys perform special functions when entering text:

Alt: Allows you to use the alternate characters displayed at the top of the QWERTY keys. Examples: +, @, #.

Shift: Changes the text input mode between Upper/Lower/Mixed case mode.

Up/Go to: Press to move up. Press **Alt** and this key to open the browser and access the chosen homepage. For more information, refer to “*Browser Options*” on page 124.

Sym: Allows you to insert a symbol by providing you with an on-screen page of available symbols.

Space: Inserts an empty space.

OK: Press to confirm a highlighted selection.

Enter: Moves the insertion point to the next line in a message.

Left/Messaging: Press to move left. Press **Alt** and this key to launch the Messaging screen (by default). It can also be configured to launch other messaging applications.

Down/Search: Press to move down. Press **Alt** and this key to display the Quick Search box that can be used to search for a key term both on the phone or online.

Right/Emoticons: Press to move right. Press **Alt** and this key to launch the Emotions page. Scroll down and tap an entry from the extensive list of emotions.

Delete: Deletes the previous character, similar to the backspace key on a computer keyboard.

Entering Symbols and Smileys

Most symbols and punctuation marks appear as alternate characters above the primary letters and numbers on the QWERTY keyboard. To enter a symbol, press  and then press the appropriate key. To enter a series of symbols, press   , press the appropriate keys, then press  again.

Emoticons (Smileys) are accessed by pressing   and selecting an image from the Emoticons page that is then inserted at your current cursor position.

To enter symbols:

1. Position the cursor where you want the symbol to appear within your message.
2. Press  and then press the key corresponding to the symbol you want to insert.
 - For example, to enter “#1,” you could use the keyboard sequences shown below.

To enter “smileys” (emoticons):

1. Position the cursor where you want the emoticon to appear within your message.
2. Press  and  to open the onscreen Emoticons page.
3. Scroll through the list and select a smiley by touching the onscreen icon.

Section 6: Contacts

This section explains how to use and manage your Contacts List. You can save phone numbers to your phone's memory.

Contacts List

Creating a Contact

The default storage location for saving phone numbers to your Contacts List is your phone's built-in memory.

If existing Google and Corporate email accounts have been synchronized to your phone, these will be made available to your device during the creation of new entries. These new Contacts entries can be assigned or saved to synced accounts such as Phone, SIM, Google, or Microsoft Exchange Activesync.

- Your phone automatically sorts the Contacts entries alphabetically.
- **Phone** contacts are stored locally on the device.

Note: If the phone is ever reset to its factory default parameters, contacts stored on the phone can be lost.

- **SIM** contacts are stored within the SIM Card.
-

Note: SIM contacts only store the Name and Phone number for an entry.

- **Google** contacts are shared with your existing Google account and can also be imported to your phone after you have created a Google Mail account.
 - **Microsoft Exchange ActiveSync** (also known as Work or Outlook) contacts are those contacts that are intended to be shared with either an Exchange Server or from within Microsoft® Outlook®.
-

Note: When storing an entry into your SIM card, note that only the Name, and Number are saved. To save additional information for a particular contact, such as notes, email, dates, etc., it is important to save that Contact into your phone's onboard memory.

1. From the Home screen, tap  (**Contacts**).
2. Tap  to create a contact.

Note: You can also add a new contact by entering a number from the keypad and pressing  and then tap **Add to Contacts** →  (**Create contact**). Continue with step 3.

3. Tap a destination type (**Phone**, **SIM**, **Google**, or **Microsoft Exchange ActiveSync**) (depending on where you want to save the new contact information).

Note: These labels can change and are dependant on the selected destination type (for example: Google does not offer Callback as an option).

7. Tap **Save** to complete and store the new entry.

Note: For further details about how to enter characters, see “*Text Input Methods*” on page 55.

Finding a Contact

You can store phone numbers and their corresponding names on your SIM card, in your phone’s built-in memory, or in an external location (such as Google or Exchange). They are all physically separate but are used as a single entity, called Contacts.

Depending on the storage size of the particular SIM card, the maximum number of phone numbers the card can store may differ.

1. From the Home screen, tap  (**Contacts**).
2. Swipe up or down until you see the contact displayed.

– or –

Tap the **Search contacts** field and begin entering the contact’s name. Matching entries are then displayed. This process filters through all of your current account Contact entries to only show you the matching entries.

– or –

In a single motion, touch and hold the letter tab area (on the right) until on-screen letters appear, then scroll through the list. You are then taken to that section of the Contacts list. Touch the contact entry.

Editing Contact Information

1. From the Home screen, tap .
2. Tap a contact name from the list.
3. Press  and select **Edit**.

Note: You can also access an entry's context menu by touching and holding an entry then tapping **Edit**.

4. Edit the contact information then tap **Save**.

Adding a Number to an Existing Contact

1. From the Home screen, tap .
2. Touch and hold an entry and select **Edit** to reveal the Contact entry's details screen (page 73).
3. Touch a phone number field and enter a phone number.
 - Tap  on the QWERTY keyboard to remove a previously entered phone number.
 - Tap  to enter an additional phone number
 - Tap  to remove a previously entered phone number.
4. Enter additional information such as: **Email, IM, Ringtone, Postal address, Organization** or **More** fields to input additional category information.

Contact Details Screen

- The **More** field provides options such as: Notes, Nickname, Website, Birthday and Anniversary.
 - Use your finger to slide the page up or down to see additional fields and categories.
5. Tap **Save** to complete and store the new entry.

Deleting Contacts

This option allows you to delete your contacts. You can delete all your entries from your phone's memory, your SIM card, or All.

Important!: Once Contacts List entries are deleted, they cannot be recovered.

1. From the Home screen, tap .
2. Touch and hold a contact name from the list and select **Delete → OK**.

Contact List Options

3. Press  to reveal the context menu specific to this entry.
4. Tap an available option.

Contact Overview Screen

Joining Contact Information

Most people now maintain multiple email accounts, social networking logins, and other similar account information. For example, a Facebook account login name might differ from a corporate email account login because they are maintained separately and for different groups of people.

This device can synchronize with multiple accounts (such as Facebook, Twitter, MySpace, Microsoft Exchange, or Google). When you synchronize your phone with those accounts, each account creates a separate contact entry in the Contacts list.

If one of your contacts (Amy Smith) has a regular email account that you maintain in Gmail, but also has a Facebook account under her maiden and married name, when you merge those accounts into your Contacts list you can join all of her entries and view the information in one record.

Joining contact information makes sending messages easy. You can select any account email address or information all from one screen, versus searching multiple, individual screens to locate the desired account information.

Next time you synchronize your phone with your accounts, any updates made to email account names, email addresses, etc. automatically update in your contacts list.

For more information about synchronizing accounts, see “*Get Friends*” on page 78.

To link contact entries:

1. From the Home screen, tap .
2. Tap a contact name (the name you want to link to another entry).

Note: Typically this is the same contact with a different name or account information.

3. Press  and then tap **Join contact**.
4. Tap the second contact entry. The second contact is now linked with the first and the account information is merged into one screen.

Note: The information is still maintained in both entries, but displays in one record for easier viewing when you link the contacts.

Important!: The second contact image that is displayed for both, but the first contact's name is used.
For example: If Amy (original entry) is joined with Julie (second entry), one entry appears under the name Amy. Tap the Amy entry (showing the Julie image) to view information from both.

5. Tap the main linked contact to view the contact information you linked. The contacts and information displays with an icon next to the contact name to indicate what type of account information is contained in the entry.

Unjoining a Contact

1. From the Home screen, tap .
2. Tap a contact name (the account name from which you want to unjoin an entry). This reveals the details for the entry.
3. Tap the **Joined contacts** area.
4. Tap  next to the entry you want to unjoin. The contacts are “unjoined” or separated and no longer display in the merged record screen. Both contacts return to being separately displayed.

Marking a Contact as Default

When you use applications such as the Voice Dialer or other messaging type applications, the application needs to know which information is primary (default) in a contact entry list. For example, when you say “Call John Smith”, if you have three phone records for John Smith, the Voice dialer is looking for the “default” number or entry.

The **Mark as default** option marks one entry in a contact record to use as the default.

1. From the Home screen, tap .
2. Tap a Contact entry.
3. Press  and then tap **Mark as default**. The Mark as default screen displays radio buttons next to the contact name, phone number, or other contact information.
4. Tap the radio button next to the entry information you want to be the primary information (such as name, phone number, or email) and select **Save**.

Sending a Namecard

A Namecard contains contact information, and can be sent to recipients as a Virtual Business Card (V-card) attachment using Bluetooth, Google Mail, or as a message.

1. From the Home screen, tap .
2. Tap a Contact entry.
3. Press  and then tap **Send via** and select a delivery method: **Bluetooth**, **Email**, **Gmail**, or **Messaging**.

The Namecard attaches to the selected message type and is delivered when you send the message.

Sending All Current Namecards

Rather than selecting once Contact entry at a time, you can send all of your current entries at once.

1. From the Home screen, tap .
2. Press  and then tap **Import/Export → Send namecard via**.
3. Tap **Select all** to place a check mark alongside all currently displayed Contact entries.
4. Tap **Send** and select a delivery method:

- **Bluetooth** to transmit this contact to another bluetooth-compatible device.
- **Email** to attach the contact card to a new outgoing email (Exchange or Internet).
- **Gmail** to attach the contact card to a new outgoing Internet-based email.
- **Messaging** to attach the contact card to a new outgoing text message.

Sending a namecard using Bluetooth

You must create a Contact prior to sending a namecard to a recipient. For more information, refer to “*Creating a Contact*” on page 67.

1. From the Home screen, tap .
2. Touch and hold the entry to reveal the on-screen context menu.
3. Tap **Send namecard via → Bluetooth**.

Important!: You must activate Bluetooth to use this feature.

4. Tap the Bluetooth device to receive this name card. Bluetooth forwards the namecard to the recipient.

Copying Contact Information

Copying Contact Information to the SIM Card

The default storage location for saving phone numbers to your Contacts list is your phone’s built-in memory. This procedure allows you to copy numbers saved to the phone’s memory onto the SIM card.

Note: These must be contacts stored on the phone. External entries (Google, Exchange, etc...) can not be transferred in this manner.

1. From the Home screen, tap .
2. From the Contacts List, press  and then tap **Import/Export → Export to SIM card**.
3. Tap **Select all** to choose all current phone contact entries.
— or —
Select a specific entry by touching an entry. A check mark indicates a selection.
4. Tap **Export**. The name and phone number for the selected contacts are copied to the SIM.

Copying Contact Information to the microSD Card

This procedure allows you to copy entry information saved in the phone's memory onto the SIM card.

1. Verify you have a properly mounted SD located within the microSD card slot.

Note: If your SD card is not properly mounted, you will not receive an option to export contacts to the SD card.

2. From the Home screen, tap .
3. From the Contacts List, press  and then tap **Import/Export → Export to SD card**.
4. Tap **Yes** to choose all current phone contact entries.

Synchronizing Contacts

Syncing data from your managed accounts allows you to add and manage a new or existing contact from your online or remote accounts to your phone. Prior to syncing, you must first have an active Google or Microsoft Exchange account with current Contact entries, and be signed into your account via the phone.

With syncing, any Contacts entries (with phone numbers, email addresses, pictures, etc.) are updated and synced with your phone. For more information about syncing existing managed accounts, see “Accounts and Synchronization” on page 155.

1. Press  →  and then tap  → **Accounts and sync**.
2. Locate the email account containing the contacts you wish to synchronize.
3. Tap  within the adjacent account field to reveal the account's synchronization settings screen.
4. To synchronize Contacts, tap **Sync Contacts**. A green checkmark indicates the feature is enabled.

Note: The process of updating your Contacts can take several minutes. If after 10-20 minutes, your list has not been updated, repeat step 2-3.

5. Your **Contacts** tab then reflects any updated Contact information.

Note: Syncing of contacts requires you are logged into your Gmail and Corporate accounts via the device.

Display Options

The Display options menu allows you to choose whether to display contacts saved from the Phone, SIM, external source, or all. You can also choose to display only contacts that have phone numbers.

1. From the Home screen, tap .
2. Press  and then tap **More → Display options**. Configure any of the following options:
 - **Only contacts with phones** allows you to display only those contacts containing phone numbers.
 - **Sort by** defines how the current list of Contacts are sorted: **Given name** or **Family name**.
 - **Display contacts by** defines how the current list of Contacts are listed: **Given name first** (ex: Steve Smith) or **Family name first** (Smith, Steve).
3. Tap **Done**.

Get Friends

When you synchronize applications such as Facebook, Twitter, MySpace, a corporate email account, or Google, using the Get Friends option synchronizes the data from the selected account type with your Contacts list.

1. From the Home screen, tap .

2. Press  and then tap **Get friends → Add account → Add account**.
3. Determine which type of account information you want to synchronize with your Contact list. Selections are: **Facebook, Twitter, MySpace, Microsoft Exchange ActiveSync, or Google**.
4. Tap an account type to add.
5. Follow the prompts. The selected account type synchronizes with your Contacts list.
6. After synchronizing accounts you may want to link contact information. For more information, refer to “*Joining Contact Information*” on page 73.

To add Facebook content to your Contacts list:

You can now add your Facebook contact information, such as pictures, email, and phone numbers, directly to your Contacts list. All of their current contact information is then migrated over to your phone. If a Contacts entry already exists with a slightly different name, separate entries are created and can later be linked (joined) together into a single entry.

Important!: Along with your contact information, this process also synchronizes your status, events, and more.

1. From the Home screen, tap .
2. From the Contacts tab, press  and then tap **Get friends** → **Add account** → **Add account**.
3. Tap **Facebook** from the **Integrated contact accounts** section of the **Add an account** screen.
 - This process adds your Facebook account to the list of managed and synchronized accounts. In this case, your Facebook contacts are synchronized with your phone's Contacts list.
4. Tap **Next** and enter your account's **Email** and **Password** information.
5. Tap **Log in** to begin the synchronization process.
6. Select a sync interval (from **None** to **Once a day**) and tap **Next**.
7. Tap those settings you wish to synchronize (all are enabled by default). A green checkmark indicates the feature is enabled.
 - Choose from: **Sync contacts**, **Add all friends**, or **Sync calendar**.

8. Tap **Done** to save these settings and return to Accounts and sync screen.
9. Tap  to confirm your Facebook contacts are now synchronized and appear in your Contacts list.

My Profile

You can send this Virtual Business Card (V-card) to other contacts as an attachment. My Profile is the first Contact listed in the Contacts list.

Note: As with any profile, your profile can be associated with a group.

To create My Profile:

1. From the Home screen, tap .
2. Press  and then tap **My profile**.
3. Enter information into the various fields.
4. Tap **Save** to store the new entry.

To edit My Profile:

1. With My profile displayed, press  and then tap **Edit**.
2. Modify any of the information contained in My Profile, then tap **Save**.

Note: You must log in to an SNS account (Facebook, Myspace or Twitter) before you can view the Updates.

2. Tap the **Updates** tab. The updates display.

Section 7: Messages

This section describes how to send or receive different types of messages. It also explains the features and functionality associated with messaging.

Types of Messages

Your phone provides the following message types:

- Text Messages
- Multimedia (Picture, Video, and Audio) Messages
- Audio Postcards
- IM Messages
- Email and Gmail Messages
- Google Talk

Message Icons on the Status Bar

Icons are displayed on the Status Bar at the top of the display when new messages are received. For more information, refer to “Status Bar” on page 18.

Creating and Sending Messages

The Short Message Service (SMS) lets you send and receive text messages to and from other mobile phones or email addresses. To use this feature, you may need to subscribe to your service provider’s message service.

The Multimedia Messaging Service (MMS) lets you send and receive multimedia messages (such as picture, video, and audio messages) to and from other mobile phones or email addresses. To use this feature, you may need to subscribe to your service provider’s multimedia message service.

Important!: When creating a message, adding an image, a sound file, or a video clip to a text message changes the message from a text message to a multimedia message.

Messaging icons are displayed at the top of the screen and indicate when messages are received and their type. For more information, refer to “Indicator Icons” on page 18.

1. From the Home screen, tap  (Messaging) → **New message**.
2. Tap on the **To** field to manually enter a recipient or select one of the following:
 - **Recent:** to select a recipient from a list of recently sent messages.
 - **Contacts:** to select a recipient from your Contacts list (valid entries must have a wireless phone number or email address).
 - **Group:** to select a recipient from the Group list.

3. If adding a recipient from either Recent, Contacts, or Group, touch the contact to place a checkmark then tap **Add**. The contact displays in the recipient field.

Note: For the Group option, if the number of recipients is less than 10, all members in the group are added. Delete any unnecessary members in the list by selecting the trash can icon and deleting unwanted entries.

4. Tap the **Tap to compose** field and enter a message. For more information, refer to “Text Input Methods” on page 55.
5. Review your message and tap **Send**.

Note: If you exit a message before you touch Send, the message is automatically saved in Drafts.

Messaging Key

When using the QWERTY keyboard, the left/messaging key  provides you with quick access to messaging functionality without having to go into Applications menu.

- Press   to access the messaging function.

Applications

The Applications list provides quick access to all the available applications on the phone.

Refer to the application table on page 30 for a description of each Application, its function, and how to navigate through that particular application. If the application is already described in another section of this user manual, then a cross reference to that particular section is provided.

AllShare

This application wirelessly synchronizes your Samsung mobile phone with your TV, streams content and even keeps tabs on who calls or sends text messages with real-time, on-screen monitoring. Samsung's AllShare makes staying connected easy.

Allows users to share their in-device media content with other external devices using DLNA certified™ (Digital Living Network Alliance) Devices. These external devices must also be DLNA-compliant. Wi-Fi capability can be provided to TVs via a digital multimedia streamer.

Important!: You must activate Wi-Fi to use this application. For more information, refer to “*Wi-Fi settings*” on page 140.

1. From the Home screen, tap  (Applications) →  (AllShare).
2. Follow the on-screen prompts.

The application contains two streaming media options:

- **Play file from my phone on another player** allows you to play local device content on a Wi-Fi capable TV or playback device. The phone can then be used as a remote to control playback.
- **Play file from server on another player via my phone** allows you to “piggy-back” content playback on an external Wi-Fi TV/receiver. Your phone retrieves content from an external wireless source (e.g., server) and pushes it through to an external wireless destination (e.g., TV). The phone acts to both route the media and control its playback (as a remote).

Configuring AllShare Settings

The AllShare™ application must first be configured prior to its initial use. You must setup parameters such as connected Wi-Fi, Items to share, source server address, and external device acceptance rights.

1. From the Home screen, tap  (Applications) →

2. Tap **Settings** and configure the following settings as desired:
 - **Media server name** allows you to enter the name of the server transmitting the media files. ex., MyServer. Once you enter the name tap **Save**.
 - **Share media** allows you to configure which media types will be shared. Choose from Share video, Share audio, or Share picture.
 - **Access point network** allows you to turn on your Wi-Fi functionality and connect to an available Wi-Fi Access Point.
 - **Upload from other devices** allows you to setup an acceptance rule of incoming media from other external devices. Choose from Always accept, Always ask, or Always reject and tap **OK**.
3. Press  to return to the previous page.

Transmitting Media via AllShare

1. From the Home screen, tap  (**Applications**) →  (**AllShare**).
2. Tap  adjacent to **Play file from my phone on another player**.
3. Scroll through your microSD card folders to locate the file(s) you wish to transmit. Tap each file to place a check mark indicating the file has been selected.

4. Tap **Add to playlist**. Your phone then begins to search for compatible Wi-Fi devices.
5. Tap a destination device from the on-screen list. If you desired device does not appear, tap **Refresh**.

Playing Files from a Server to Another device via the Phone

1. From the Home screen, tap  (**Applications**) →  (**AllShare**).
2. Tap  adjacent to the **Play file from server on another player via my phone**. (This procedure uses the phone as a bridge between your server and another AllShare-capable device).
3. Tap a source media server from the on-screen list. If your source does not appear, tap **Refresh**.
4. Search for the media files you wish to add to a playlist. Once the files are selected, tap **Add to playlist**. Complete this step for all media (Videos, Audio, Pictures).
5. Select an available device on which to play the selected media files.
6. Follow the remaining on-screen instructions.

Calculator

Using this feature you can use the phone as a calculator. The calculator provides the basic arithmetic functions; addition, subtraction, multiplication, and division. You can also use this as a scientific calculator.

1. From the Home screen, tap  (Applications) →  (Calculator).
2. Enter the first number using the numeric keys.
3. Enter the operation for your calculation by touching the **Plus**, **Minus**, **Multiplication**, or **Division** key.
4. Enter the next number.
5. To view the result, tap the = (**equals**) key.
6. Repeat steps 1 to 4 as many times as required.
7. Press  and tap **Advanced panel** to reveal additional scientific functions.

Calendar

With the Calendar feature, you can consult the calendar by day, week, or month; create events; and set alarms to act as reminders. Google Calendar is built into the phone and synchronizes both new and existing entries between your phone and your online Google account.

Important!: You must have previously added an account (Facebook, Microsoft Exchange ActiveSync, or Google) prior to using the Calendar.

1. From the Home screen, tap  (Applications) →  (Calendar).
2. Press  and select one of the following options:
 - **Day:** displays the Day view.
 - **Week:** displays the Week view.
 - **Month:** displays the Month view (default view).
 - **Agenda:** displays events for the selected Month, Week, or Day.
 - **Today:** displays the current date highlighted with a Blue box.
 - **More:** allows you to select additional options such as: Create, Go to, Calendars, and Settings.
 - **Create:** creates a new Event.
 - **Go to:** displays a specific date.
 - **Calendars:** accesses the My calendars feature, where you can select which calendars are synced.
 - **Settings:** displays a list of configurable settings.

To manually sync calendar events:

1. Press  →  and then tap  → **Accounts and sync**.

2. Locate the account containing the events you wish to synchronize.
3. Tap  within the adjacent account field to reveal the account's synchronization settings screen.
4. Tap **Sync Calendar** to activate the synchronization of calendar events between your device and the remote server. A green checkmark indicates the feature is enabled.

Camera

Use your 3.0 megapixel camera feature to produce photos in a JPEG format.

Note: An SD card must be inserted before the Camera will take and store photos.

- From the Home screen, tap  (**Applications**) →  (**Camera**).

For more information, refer to “*Using the Camera*” on page 96.

Clock

Here you can set alarms, configure and view the World clock, use a stopwatch, or set a timer. The applications display in a tabular format and are quickly accessed with the touch of a finger. For more information, refer to “*Clock*” on page 138.

- From the Home screen, tap  (**Applications**) →  (**Clock**).

Contacts

The default storage location for saving phone numbers to your Contacts List is your phone's built-in memory.

For more information, refer to “*Contacts List*” on page 67.

Email

Email enables you to review and create email using most email services. The device alerts you when you receive an email message.

- From the Home screen, tap  (**Applications**) →  (**Email**).

For more information, refer to “*Email*” on page 88.

Gallery

The Gallery is where you view photos and play back videos. For photos, you can also perform basic editing tasks, view a slideshow, set photos as wallpaper or caller image, and share as a picture message.

- From the Home screen, tap  (**Applications**) →  (**Gallery**).

For more information, refer to “*The Gallery*” on page 104.

Gmail

Gmail (Google Mail) is a web-based email service. Gmail is configured when you first set up your phone. Depending on your synchronization settings, Gmail can automatically synchronize with your Gmail account on the web.

For more information, refer to “*Using Gmail*” on page 93.

Google Search

Google Search is a web-based search engine that uses text-based queries to search for content on web pages.

- ▶ From the Home screen, tap  (Applications) →  (Google Search) and enter the search text.

– or –

Touch the microphone on the Google Search bar and say the search information. For more information, refer to “*Search Key*” on page 23. For more information, refer to “*Using Google Search*” on page 23.

Internet

Opens the browser to start surfing the web. The browser is fully optimized and provides advanced functionality to enhance the Internet browsing feature on your phone.

- ▶ From the Home screen, tap  (Applications) →

(Internet).

For more information, refer to “*Internet*” on page 124.

Latitude

Google Latitude allows you and your friends share locations and status messages with each other. It also lets you send instant messages and emails, make phone calls, and get directions to your friends’ locations.

Important!: You must sign in to your Google account, enable Wi-Fi, and enable the Location feature before you can use this application. For more information, refer to “*Wi-Fi settings*” on page 140.

1. From the Home screen, tap  (Applications) →  (Latitude).
2. If GPS or Wi-Fi are currently disabled, tap **Settings** → **Location and security** and tap **Use wireless networks** and **Use GPS satellites** to turn these functions on (indicated by a green check mark). Press  to return to the previous screen.
3. Press  and tap **Settings** to configure your location reporting and history. The following options are available:
 - **Detect your location** to use your GPS to detect your current location and update it on your map.

- **Set your location** to manually set a location for yourself on the map. This does not have to be your actual location.
- **Do not detect your location** so friends can not see your current location.
- **Enable location history**: track your location history.
- **Sign out of Latitude** to exit.

Share your location

To share your location:

1. Press  and tap **Add friends** and select an option.
2. Select the friends that you want to add or enter an email address and select **Add friends → Yes**.

When your friend accepts your invitation, you can share locations.

See locations of your friends

To view the marks that indicate the locations of your friends, press  and tap **See map**.

Maps

Google Maps allow you to track your current location, view real-time traffic issues, and view detailed destination directions. There is also a search tool included to help you locate places of interest or a specific address. You can view locations on a vector or aerial map, or you can view locations at the street level.

Important!: Before using Google Maps you must have an active data (3G) or Wi-Fi connection.

Note: The Maps application does not cover every country or city.

- From the Home screen, tap  (Applications) →  (Maps).

Enabling a Location source

Before you use Google Maps to find your location or search for places of interest, you must enable a location source. To enable the location source you must enable connection to a wireless network and/or GPS satellites.

Important!: The more location determining functions are enabled, the more accurate the determination of your position.

1. Press  →  and then tap  (**Settings**) → **Location and security**.
2. Tap **Use wireless networks** to enable location determination using nearby cell towers.
3. Tap **Use GPS satellites** to enable location determination using GPS satellites.

Tip: Location determination using GPS satellites is more accurate than using cellular towers but requires a clear view of the sky and uses more battery power.

Opening Maps

1. From the Home screen, tap  (Applications) →

(Maps).

2. Icons in the top row of the application access the following options:

- **Search Maps:** allows you to search for a place of interest.

- **My Location:** when touched, shows your current location on the map with a blinking blue dot.

3. Press  and select one of the following options:

- **Search:** allows you to search for a place of interest.
- **Directions:** displays navigation directions to a location from a starting point.
- **Starred Places:** lets you mark favorite locations on the map. These items are automatically synchronized with maps.
- **Clear Map:** after viewing or following directions, this option resets the map.
- **Latitude:** lets you and your friends share locations and status messages with each other. It also lets you send instant messages and emails, make phone calls, and get directions to your friends' locations. For more information, refer to “Latitude” on page 112.
- **More:**
 - **Labs:** a testing ground for experimental features that are not ready to use publically.
 - **Cache Settings:** lets you configure Prefetch on mobile and Clear map tile cache.

- **Help:** uses the browser to display a searchable Google Mobile Help screen.
- **Terms, Privacy & Notices:** displays the Terms and Conditions, Privacy Policy, Legal Notices, and Web History. Select the desired information from the pop-up menu.
- **About:** displays general information about Google maps such as Version, Platform, Locale, Total data sent, Total data received, Free memory, etc.

Market

Android Market provides access to downloadable applications and games to install on your phone. Android Market also allows you to provide feedback and comments about an application, or flag an application that might be incompatible with your phone.

Accessing the Market

1. From the Home screen, tap  (Applications) →  (Market).
2. If not already logged in with your Google account, tap **Next**, Tap **Sign in** and enter your Google account information.
3. Tap **Accept** to agree to the Android Market terms of service.

Downloading a New Google Application

Android Market provides several ways to find applications. The home page provides a list of applications (Apps) by category, a list

of games, a link to search, and a link to My apps (applications already downloaded to your phone).

1. From the Home screen, tap  (Applications) →  (Market).
2. Browse through the categories, find an application you're interested in, and tap the name to view the description.
3. Tap **Install**.

Important!: If the selected application requires access to data or control of a function on your phone, Market displays the information the application will access.

Touch **OK** if you agree to the conditions of the application. Once you touch **OK** you are responsible for using this application on the phone and the amount of data it uses. Use with caution.

Note: Use caution with applications that request access to any personal data, functions, or significant amounts of data usage times.

4. If prompted, follow the on-screen instructions to pay for the application.
5. Check the progress of the current download by opening the Notifications panel.

6. After the item is downloaded and installed on your phone, the content download icon  appears in the notification area of the status bar.

The newly downloaded application displays on the Home screen or other selected panel.

Note: A data plan is required to use this feature. Charges may apply. Please contact your service provider for further details.

Launching an Installed Google Application

1. From the Home screen, tap  (**Applications**).
2. Tap the newly installed application. This application is typically located on the last Applications page.

Unknown sources

This feature allows the installation of non-Market applications and is typically used for Android application development.

Press  →  and then tap  (**Settings**) → **Applications** → **Unknown sources**.

A green check mark indicates that apps can be downloaded from sources other than Android Market.

Memo

This feature allows you to create memos that can be retrieved at a later time.

1. From the Home screen, tap  (**Applications**) →  (**Memo**).
2. Tap **Create memo**.

Emptying the Cookies

A cookie is a small file placed on your phone by a visited website. In addition to containing some site-specific information, a cookie can also contain some personal information (such as a username and password) which might pose a security risk if not properly managed. You can clear cookies from your phone at any time.

1. On the browser screen, press  and then tap **More → Settings → Clear all cookie data**.
2. Tap **OK** to delete the cookies or tap **Cancel** to exit.

Using Internet History

The History list displays a list of the most recently viewed websites. These entries can be used to return to previously unmarked web pages.

1. On the browser screen, tap  → **History** tab.
A list of the most recently viewed websites displays.
2. Tap an entry to display the webpage.
– or –
Press  and then tap **Clear history** to delete the current History list.

Using Most Visited

The Most visited list provides you with a list of the most visited websites. These entries can be used to return to previously unmarked web pages.

1. From the Home webpage, tap  → **Most visited** tab.

A list of your most frequently visited webpages displays, starting with the most frequently visited site.

Tap any entry to display the selected webpage.

Browser Settings

To configure browser settings:

1. From the Home screen, tap  (**Applications**) →  (**Internet**).
2. Press  and then tap **More → Settings**.
3. Choose from the following on-screen options:
 - **Default zoom:** Adjusts the zoom feature. Set to Far, Medium, or Close.
 - **Open pages in overview:** Displays an overview of newly opened web pages.
 - **Text encoding:** Adjusts the current text encoding.

- **Block pop-up windows:** Prevents popup advertisements or windows from appearing on-screen. Remove the check mark to disable this function.
- **Load images:** Allows web page images to load along with the text components of a website.
- **Auto-fit pages:** Allows web pages to be resized to fit as much of the screen as possible.
- **Landscape view only:** Displays the browser in only the horizontal position.
- **Enable JavaScript:** Enables javascript for the current Internet page. Without this feature, some pages may not display properly. Remove the checkmark to disable this function.
- **Enable plug-ins:** Allows the download of plug-ins such as Adobe Flash.
- **Open in background:** New pages are launched in a separate page and displayed behind the current one. Remove the checkmark to disable this function.
- **Set home page:** Sets the current home page for the Internet browser.
- **Clear cache:** Deletes all currently cached data. Tap **OK** to complete the process.
- **Clear history:** Clears the browser navigation history. Tap **OK** to complete the process.
- **Accept cookies:** Allows sites to save and read cookies from your device.

- **Clear all cookie data:** Deletes all current browser cookie files.
- **Remember form data:** Allows the device to store data from any previously filled out forms. Remove the checkmark to disable this function.
- **Clear form data:** Deletes any stored data from previously filled out forms. Tap **OK** to complete the process.
- **Enable location:** Allows websites to request access to your location.
- **Clear location access:** Clears location access for all websites. Tap **OK** to complete the process.
- **Remember passwords:** Stores usernames and passwords for visited sites. Remove the checkmark to disable this function.
- **Clear passwords:** Deletes any previously stored usernames or passwords. Tap **OK** to complete the process.
- **Show security warnings:** Notifies you if there is a security issue with the current website. Remove the checkmark to disable this function.
- **Select search engine:** Allows you to choose a default search engine for your phone. Choose from: **Google**, **Yahoo!**, or **Bing**.
- **Website settings:** View advanced settings for individual websites.
- **Reset to default:** Clears all browser data and resets all settings to default.

Bluetooth

About Bluetooth

Bluetooth is a short-range communications technology that allows you to connect wirelessly to a number of Bluetooth devices, such as headsets and hands-free car kits, and Bluetooth-enabled handhelds, computers, printers, and wireless devices. The Bluetooth communication range is usually up to approximately 30 feet.

Turning Bluetooth On and Off

To turn Bluetooth on:

1. Press  →  and then tap  (**Settings**) → **Wireless and networks** → **Bluetooth settings**.
2. Tap the **Bluetooth** field to activate the feature (checkmark indicates active). When active,  displays in the Status area.

To turn Bluetooth off:

1. Press  →  and then tap  (**Settings**) → **Wireless and networks** → **Bluetooth settings**.
2. Tap the **Bluetooth** field to deactivate the feature (remove checkmark).

Bluetooth Status Indicators

The following icons show your Bluetooth connection status at a glance:

Displays when Bluetooth is active.

Displays when Bluetooth is connected (paired) and communicating.

Bluetooth Settings

The Bluetooth settings menu allows you to set up many of the characteristics of your device's Bluetooth service, including:

- Entering or changing the name your device uses for Bluetooth communication and description
- Setting your device's visibility (or "discoverability") for other Bluetooth devices
- Displaying your device's Bluetooth address

To access the Bluetooth Settings menu:

1. Press  →  and then tap  (**Settings**) → **Wireless and networks** → **Bluetooth settings**.
2. Verify Bluetooth is active. Indicated by a green check mark in the Bluetooth field.

To change your Bluetooth name:

1. Verify Bluetooth is active.
2. From the Bluetooth settings page, tap **Device name**.
3. Enter a new name.
4. Tap **OK** to complete the rename process.

To set visibility:

1. Verify your Bluetooth is active.
2. From the Bluetooth settings page, tap **Visible**.

Making your device visible allows other devices to pair and communicate.

Note: Your device is visible for up to 120 seconds (2 minutes). This value appears as a countdown within this field.

To scan for Bluetooth devices:

1. Verify Bluetooth is active.
2. From the Bluetooth settings page, tap **Scan devices** to search for visible external Bluetooth-compatible devices such as headsets, devices, printers, and computers.

Pairing Bluetooth Devices

The Bluetooth pairing process allows you to establish trusted connections between your device and another Bluetooth device. When you pair devices, they share a passkey, allowing for fast, secure connections while bypassing the discovery and authentication process.

Note: Pairing between two Bluetooth devices is a one-time process. Once pairing is established the devices continue to recognize their partnership and exchange information without entering a passcode.

To pair your device with another Bluetooth device:

1. Verify Bluetooth is active.
2. From the Bluetooth settings page, tap **Visible**.

Your device must be visible to successfully pair with an external device.
3. Tap **Scan devices**. Your device displays a list of discovered in-range Bluetooth devices.
4. Tap a device from the list to initiate pairing.
5. Enter the passkey or PIN code, if needed, and tap **OK**.
6. The external device must accept the connection and enter your device's PIN code.

Once successfully paired to an external device,  displays in the Status area.

Note: Due to different specifications and features of other Bluetooth-compatible devices, display and operations may be different, and functions such as transfer or exchange may not be possible with all Bluetooth-compatible devices.

Disconnecting a Paired Bluetooth Device

Disconnecting a paired device breaks the connection between the device and your phone, but retains the knowledge of the pairing. At a later point when you wish to reconnect the device, there is no need to setup the connection information again.

1. Verify your Bluetooth is active.
2. From the Bluetooth settings page, touch the previously paired device (from the bottom of the page).
3. Tap **OK** to confirm disconnection.
— or —

From the Bluetooth settings page, touch and hold the name of the previously paired device, and select **Disconnect**.

Note: Disconnections are manually done but often occur automatically if the paired device goes out of range of your phone or it is powered off.

Deleting a Paired Bluetooth Device

Deleting or “unpairing” a device from your list removes its connection record and reconnection will require that you re-enter all the previous pairing information.

1. Verify Bluetooth is active.
2. From the Bluetooth settings page, touch and hold the name of the previously paired device (from the bottom of the page). This opens the connected device’s menu options.
3. Tap **Unpair** to delete the paired device.

Sending Contacts via Bluetooth

Depending on your paired devices’ settings and capabilities, you may be able to send pictures, contact information, or other items using a Bluetooth connection.

Note: Prior to using this feature, Bluetooth must first be enabled on both your phone and the external device, and the recipient’s device must be visible.

Only a Contact’s information can be sent via Bluetooth. No other file type (video, image, or audio) can be sent using Bluetooth.

1. Verify your Bluetooth is active and your phone is visible.
2. From the Home screen, tap  (**Contacts**).

3. Touch and hold the entry from the list to display the on-screen context menu.
4. Tap **Send namecard via → Bluetooth** and select a paired external Bluetooth device.

Note: The external Bluetooth device must be visible and communicating for the pairing to be successful.

5. A Bluetooth share notification displays in your notifications list.

Enable Downloading for Internet Applications

Important!: Before you can download a web application you must insert a microSD card into the phone and enable the **Unknown sources** feature (enables downloading). For more information, refer to *"Installing the microSD Memory Card"* on page 4. Also, see *"Mounting an SD Card"* on page 39.

1. Press  →  and then tap  (**Settings**) → **Applications**.
2. Tap the **Unknown sources** check box.
3. Tap **OK** to allow install of non-Market applications.
Tap again to remove the checkmark and disable the installation of non-market applications.

Warning!: Not all web applications are safe to download. In order to protect your phone and data, use Android Market to install web applications. For more information, refer to *"Downloading a New Google Application"* on page 115.

PC Connections

You can connect your device to a PC using an optional PC data cable using various USB connection modes. Mass storage is the default connection method.

Mass storage: allows you to use the onboard storage capacity of the phone to store and upload files. This option allows your computer to detect the phone as a removable storage drive.

Connecting as a Mass Storage Device

You can connect your device to a PC as a removable disk and access the file directory. If you insert a memory card in the device, you can also access the files directory from the memory card by using the device as a memory card reader.

Note: The file directory of the memory card displays as a removable disk, separate from the internal memory.

1. Insert a memory card into the device to transfer files from or to the memory card.
2. Press  to return to Idle mode.

3. Connect the multifunction jack on your device to a PC using an optional PC data cable.
A pop-up window displays on the PC when connected.
4. Open the folder to view files.
5. Copy files from the PC to the memory card.

Enabling USB Debugging

USB debugging is intended for development purposes.

1. Press  →  and then tap  (**Settings**) → **Applications** → **Development**.
2. Tap the **USB debugging** field to place a check mark in the selection box.

Wi-Fi

About Wi-Fi

Wi-Fi (short for "wireless fidelity") is a term used for certain types of Wireless Local Area Networks (WLAN). Wi-Fi communication requires access to an existing and accessible Wireless Access Point (WAP). A WAP can either be Open (unsecured) or Secured (requiring knowledge of the router name and password).

Activating Wi-Fi

By default, your device's Wi-Fi feature is turned off (deactivated). Activating Wi-Fi allows your device to discover and connect to compatible in-range WAPs (Wireless Access Points).

1. Press  →  and then tap  (**Settings**) → **Wireless and networks** → **Wi-Fi settings**.
2. Tap **Wi-Fi** to activate the feature. A checkmark indicates that Wi-Fi is active. The device scans for available in-range wireless networks and displays them under Wi-Fi networks on the same screen.

Connecting to a Wi-Fi Network

1. Press  →  and then tap  (**Settings**) → **Wireless and networks** → **Wi-Fi settings**.

The network names and security settings of detected Wi-Fi networks display in the Wi-Fi networks section.

2. Tap the network you wish to connect to.

Note: When you select an open network you are automatically connected.

3. Enter a wireless password (if necessary).

Manually Add a New Network Connection

1. Tap **Add Wi-Fi network**.
2. Enter the Network SSID (the name of your Wireless Access Point).
3. Tap the **Security** field and select a security option. This must match the current security setting on your target WAP.
4. Enter your WAP's password if the WAP is secure.
5. Tap **Save** to store the new information and connect to the target WAP.

Note: No prompt to enter the WAP key displays if you have previously connected to the wireless network. The WAP key is required when the device is reset using factory default settings.

Deactivating Wi-Fi

1. Press  →  and then tap  (**Settings**) → **Wireless and networks** → **Wi-Fi settings**.
2. Tap the **Wi-Fi** field to deactivate the feature. The checkmark grays.

Note: Use of wireless data connections such as Wi-Fi and Bluetooth can reduce battery life and use times.

Manually Scan for a Wi-Fi Network

1. Press  →  and then tap  (**Settings**) → **Wireless and networks** → **Wi-Fi settings**.
2. Press  and then tap **Scan**.

Wi-Fi Status Indicators

The following icons indicate the Wi-Fi connection status:

Displays when Wi-Fi is connected, active, and communicating with a Wireless Access Point (WAP).

Displays when Wi-Fi is active and there are open networks available.

Wi-Fi Advanced Settings

The Wi-Fi settings - Advanced menu allows you to set up many of the device's Wi-Fi services, including:

- Setting the Wi-Fi sleep policy
- Viewing the device's MAC Address
- Configuring use of either a DHCP or Static IP

To access the Wi-Fi Advanced Settings menu:

1. Press  →  and then tap  (**Settings**) → **Wireless and networks** → **Wi-Fi settings**.

2. Press  and then tap **Advanced**.

Mobile AP

This feature allows you to turn your phone into a Wi-Fi hotspot. The feature works best when used in conjunction with 3G data services.

Important!: The Mobile AP service can not be active at the same time as Wi-Fi. Close your Wi-Fi connection prior to launching the Mobile AP service.

To activate the Mobile AP service:

1. Press  →  and then tap  (**Settings**) → **Wireless and networks** → **Tethering and portable hotspot**.
2. Tap **Mobile AP settings** → **Mobile AP** to activate the service (indicated by a green checkmark in the selection field).
3. Tap **Configure mobile AP** to continue with the setup process.
4. Enter a Network SSID name. The default is **AndroidAP**.
5. Select a security option (Open or WPA2 PSK)
6. Confirm the Mobile AP service icon  appears at the top of the screen.

Note: By default, the connection is open and not secured. It is recommended that you access the Mobile AP settings and create a secure connection by using a password for communication.

Note: Using your 3G service and Mobile AP Hotspot drains your phone's battery at a much faster rate than when using any other feature combination. The best way to keep using the phone as a hotspot is to have it connected to a power supply.

To connect to the Hotspot:

1. Enable Wi-Fi (wireless) functionality on your target device (laptop, media device, etc.).
2. Scan for Wi-Fi networks from the device and select your phone hotspot from the network list.
 - The default name for your phone's hotspot is **AndroidAP**.
3. Select this Hotspot and follow your on-screen instructions to complete the connection.
4. Launch your Internet browser to confirm you have an Internet connection.

To secure the Mobile AP service:

The use of a secure Wi-Fi connection is recommended in order to prevent unauthorized access to your hotspot. To enable security (WPA2 PSK) and set a password:

1. Press  →  and then tap  (**Settings**) → **Wireless and networks** → **Tethering and portable hotspot** → **Mobile AP settings** → **Configure mobile AP**.
2. Tap the **Security** field and select **WPA2 PSK**.
3. Enter a password into the **Password** field.
 - To see the password characters as you type them, tap **Show password**. This is beneficial as you will not be able to match an incorrectly entered password on the connecting devices.

Important!: The more complex the password, the harder it will be for intruders to break your security. It is recommended that you not use names, birthdays, or other personal information.

4. Tap **Save** to store the new settings.

Section 11: Time Management

This section describes how you can manage time using time-related applications such as the Calendar, Alarm Clock, Analog or Digital clock, and the World clock.

Calendar

With the Calendar feature, you can consult the calendar by day, week, or month; create events; and set alarms.

1. From the Home screen, tap  (Applications) →  (Calendar).
2. Press  and select one of the following options:
 - **Day**: displays the Day view.
 - **Week**: displays the Week view.
 - **Month**: displays the Month view.
 - **Agenda**: displays events in List view. This view allows you to search for events for the selected Month, Week, or Day or you can look for events for a future date.
 - **Today**: displays events for the current date.
 - **More**: provides access to additional calendar functions:
 - **Create**: creates a new Event.
 - **Go to**: displays a specific date.
 - **Calendars**: provides access to various calendar accounts.

– **Settings**: displays a list of configurable settings.

Creating a Calendar Event

1. From the Home screen, tap  (Applications) →  (Calendar).
2. Press  → **More** → **Create**.
 - or –
 - Touch and hold an on-screen calendar day and select **Create**.

Calendar Settings

Using the Calendar settings you can select the day of the week you want the calendar to begin. You also select the default view (Month, Week, or Day), and manage events, notifications, sounds, and reminders.

1. From the Home screen, tap  (Applications) → .
2. Press  → **More** → **Settings**.
3. Tap **Hide declined events** to activate this option. A check mark indicates selection.
4. Tap **First day of week** and select either **Sunday** or **Monday**.

5. Tap **Set alerts and notifications** to adjust the event notification method. Choose from: **Alert**, **Status bar notification**, and **Off**.
6. Tap **Select ringtone** to assign a ringtone to a calendar event notification.
7. Tap **Vibrate** to activate this notification option. Selections are: **Always**, **Only in Silent mode**, or **Never**.
8. Tap **Default reminder time** to activate this event reminder time value. Choose from: **None**, **1minute**, **5minutes**, **10 minutes**, **15 minutes**, **20 minutes**, **25 minutes**, **30 minutes**, **45 minutes**, **1 hour**, **2 hours**, **3 hours**, **12 hours**, **24 hours**, **2 days**, or **1 week**.
9. The **Build version** displays the calendar software version.

Clock

This feature allows you to create an alarm to ring at a specified time, track time in other parts of the world, use a stopwatch, or set a timer.

- From the Home screen, tap  (**Applications**) →  (**Clock**).

Setting an Alarm

1. From the Home screen, tap  (**Applications**) →  (**Clock**).
2. Tap  (**Alarm**) →  (**Add alarm**).
3. Use the plus and minus symbols to enter the hour and minutes, if necessary tap **AM** or **PM** to toggle the setting, and select **Set**.
4. Tap the **Repeat** field and select the days you want this alarm to activate. Select **Never** (alarm sounds once only) or tap each day of the week that you want this alarm to repeat (indicated by green check mark), then tap **OK**.

5. Tap the **Ringtone** field and select an audio ringtone for this alarm. This can be used to differentiate between various alarm events.
6. Tap the **Vibrate** field to activate a vibration function to this alarm event.
7. Tap the **Label** field and enter a new name for the alarm and tap **OK**.
8. Tap **Done** to save the new alarm event.

To disable an alarm:

- From the Alarms listing page, tap the alarm clock icon to remove the green bar below it. This green bar indicates the alarm event is active.

To enable an existing alarm:

- From the Alarms listing page, tap the alarm clock icon to activate the green bar below it. This green bar indicates the alarm event is active.

Section 12: Changing Your Settings

This section explains the various settings for your phone, such as: sound, display, security, and memory.

Wireless and networks

Using Flight mode

Flight mode allows you to use many of your phone's features, such as Camera and Games, when you are in an airplane or in any other area where making or receiving calls or data is prohibited.

Important!: When your phone is in Flight mode, it cannot send or receive any calls or access online information or applications.

1. Press  →  and then tap  (**Settings**) → **Wireless and networks**.
2. Tap **Flight mode**. A check mark displayed next to the feature indicates Flight mode is active.

Activating Wi-Fi

1. Press  →  and then tap  (**Settings**) → **Wireless and networks** → **Wi-Fi settings**.
2. Tap **Wi-Fi**. A check mark displayed indicates Wi-Fi is active.

Wi-Fi settings

Once set up for Wi-Fi connectivity, your phone automatically uses Wi-Fi, when available, for all your mobile phone services.

1. Press  →  and then tap  (**Settings**) → **Wireless and networks** → **Wi-Fi settings**.
2. Configure the settings as desired.

The available connection types displayed with a security type displayed next to them.

Network Notification

By default, when Wi-Fi is on, you receive notifications in the Status bar any time your phone detects an available Wi-Fi network. You can deactivate this feature if you do not want to receive notifications.

1. Press  →  and then tap  (**Settings**) → **Wireless and networks** → **Wi-Fi settings**.
2. Tap **Network notification**. A check mark displayed next to the feature indicates Network notification is active.
3. Tap **Network notification** again to remove the check mark and deactivate this feature.

Manually Adding a Wi-Fi Network

1. Press  →  and then tap  (**Settings**) → **Wireless and networks** → **Wi-Fi settings**.
2. Tap **Wi-Fi** to turn it on (indicated by green check mark).
3. Tap **Add Wi-Fi network**.
4. Enter the SSID (Service Set Identifier) and Security settings then tap **Save**.

Note: An SSID is a unique key which identifies a wireless LAN. Its purpose is to stop other wireless equipment from accessing your LAN — whether accidentally or intentionally. To communicate, wireless devices must be configured with the same SSID.

Bluetooth settings

In this menu you can activate Bluetooth, view or assign a device name, activate your phone so other Bluetooth devices can discover it, or scan for other, available Bluetooth devices with which to pair.

Activating Bluetooth

- ▶ Press  →  and then tap  (**Settings**) → **Wireless and networks** → **Bluetooth settings** and tap **Bluetooth** to turn it on.

Note: Bluetooth must be enabled prior to use.

Changing the Device Name

1. Activate Bluetooth.
2. Press  →  and then tap  (**Settings**) → **Wireless and networks** → **Bluetooth settings** → **Device name**. The assigned device name displays.
3. Press  to erase the current device name and enter a new name for this device using the keyboard.
4. Tap **OK** to confirm your setting.

Activating Visibility

- ▶ Press  →  and then tap  (**Settings**) → **Wireless and networks** → **Bluetooth settings** → **Visible**.
The phone is now activated for discovery for 119 seconds so you can pair with another device. After 119 seconds the phone becomes undiscoverable again.

Scanning for Devices

This option allows you to scan for active Bluetooth devices so you can pair with them.

1. Press  →  and then tap  (**Settings**) → **Wireless and networks** → **Bluetooth settings** → **Scan devices**.

Your phone begins scanning and lists any discovered devices in the Bluetooth devices section.

2. Tap a device name to pair with the device.

Important!: Some Bluetooth devices are secured and require a PIN number to confirm and pair with them.

3. Enter a PIN to pair with the device, if one is required, and tap **OK**.

Tethering

This option allows you to share your phone's mobile data connection via a direct USB connection between your phone and computer. The Mobile AP feature provides a wireless version of this same functionality.

Note: You can not mount your phone's microSD card to your computer while using the USB tethering feature.

Note: If additional software or USB drivers are required, navigate to:
<http://www.samsung.ca>.

1. Plug in the USB cable between your computer and your phone.
2. When prompted for a USB mode, press  to exit the menu.
3. Press  →  and then tap  (**Settings**) → **Wireless and networks** → **Tethering and portable hotspot** → **USB tethering**. This places a green check mark next to the entry and activates the feature. A Tethering or Hotspot active notification briefly appears on the screen. Look for the Tethering active icon  in the Status bar area of the screen.

To disconnect tethering:

1. Press  →  and then tap  (**Settings**) → **Wireless and networks** → **Tethering and portable hotspot**.
2. Tap **USB tethering** from the Tethering menu to remove the check mark and deactivate the feature.
3. Remove the USB cable from the phone.

Mobile AP

For more information, refer to “*Mobile AP*” on page 135.

VPN settings

The VPN settings menu allows you to set up and manage Virtual Private Networks (VPNs).

Important!: Before you can use a VPN you must establish and configure one.

Adding a VPN

Before you add a VPN you must determine which VPN protocol to use: PPTP (Point-to-Point Tunneling Protocol), L2TP (Layer 2 Tunneling Protocol), L2TP/IPSec PSK (Pre-shared key based L2TP/IPSec), or L2TP/IPSec CRT (Certificate based L2TP/IPSec).

1. Press  →  and then tap  (**Settings**) → **Wireless and networks** → **VPN settings**.
2. Tap **Add VPN**.

To establish a PPTP (Point-to-Point Tunneling Protocol):

1. Establish a VPN name (a name for this connection).
2. Set the VPN server.
3. Enable encryption (if desired).
4. Set the DNS search domains.

To establish a L2TP (Layer 2 Tunneling Protocol):

1. Establish a VPN name (a name for this connection).
2. Set the VPN server.
3. Enable L2TP secret.
4. Set L2TP secret.
5. Set the DNS search domains.

To establish a L2TP/IPSec PSK (Pre-shared key based L2TP/IPSec):

1. Establish a VPN name (a name for this connection).
2. Set the VPN server.
3. Set IPSEc pre-shared key.
4. Enable L2TP secret.
5. Set L2TP secret.
6. Set the DNS search domains.

To establish a L2TP/IPSec CRT (Certificate based L2TP/IPSec):

1. Establish a VPN name (a name for this connection).
2. Set the VPN server.
3. Enable L2TP secret.
4. Set L2TP secret.

5. Set user certificate.

Note: A user certificate must be installed to use this setting.

6. Set CA certificate.

Note: A CA certificate must be installed to use this setting.

7. Set the DNS search domains.

Mobile networks

Before you use applications such as Google Maps and find your location or search for places of interest, you must enable the Mobile networks options.

- ▶ Press  →  and then tap  (Settings) → **Wireless and networks** → **Mobile networks**.

The following options display:

Use packet data

Allows you to activate or deactivate data usage on your phone.

- ▶ Press  →  and then tap  (Settings) → **Wireless and networks** → **Mobile networks** → **Use packet data**.

Data Roaming

Data roaming allows you to connect to your service provider's partner networks and access data services when you are out of your service providers area of coverage.

1. Press  →  and then tap  (Settings) → **Wireless and networks** → **Mobile networks**.
2. Tap **Data roaming**.

Access Point Names

- ▶ Press  →  and then tap  (Settings) → **Wireless and networks** → **Mobile networks** → **Access Point Names**. A list of wireless Access point names displays. The active access point is indicated by a green button to the right of the name.

Using the 2G (EDGE) Network

If you are not using applications that require the 3G network speed (any application that accesses the network or uses a browser), using the 2G network saves battery life.

By default the phone is configured to use 3G networks.

1. Press  →  and then tap  (Settings) → **Wireless and networks** → **Mobile networks**.

2. Tap **Use only 2G networks**. A check mark displays next to this option to indicate that it is active.

Note: Connecting to 2G networks slows the data transfer speed and time.

Using the 3G Network

If you are using applications that require the 3G network speed, follow these instructions to reactivate your 3G network connection.

Note: By default, your phone uses 3G communication.

1. Press  →  and then tap  (**Settings**) → **Wireless and networks** → **Mobile networks**.
2. Remove the checkmark from the **Use only 2G networks** field. Deactivating this feature resumes 3G communication.

Network Operators

Using this feature you can view the current network connection. You can also scan and select a network operator manually, or set the network selection to Automatic.

Important!: You must deactivate data service prior to searching for an available network.

Note: Connecting to 2G networks slows the data transfer speed and time.

Your phone default is set to Automatic (to automatically search for an available network. You can set this option to Manual to select a network each time you connect.

1. Press  →  and then tap  (**Settings**) → **Wireless and networks** → **Mobile networks** → **Network operators**.
2. Tap **Default setup**.
3. Tap **Manual** to locate and connect to a network manually.
– or –
Tap **Automatic** to allow the device to automatically select a network.

Call Settings

To access the Call settings menu:

- Press  →  and then tap  (**Settings**) → **Call settings**.
– or –
From the Home screen, tap  → **Settings** → **Call settings**.

Fixed Dialing Numbers

Fixed Dial Number (FDN), allows you to restrict outgoing calls to a limited set of phone numbers.

Enabling FDN

1. Press  →  and then tap  (**Settings**) → **Call settings** → **Fixed Dialing Numbers**.
2. Tap **Enable FDN**.
3. At the prompt, enter your PIN2 code and tap **OK**.

Important!: Not all SIM cards use a PIN2 code. If your SIM card does not, this menu does not display.

The PIN2 code is provided by your carrier. Entering an incorrect PIN2 code multiple times can cause the phone to lock. Contact customer service for assistance.

Changing the PIN2 Code

1. Press  →  and then tap  (**Settings**) → **Call settings** → **Fixed Dialing Numbers** → **Change PIN2**.
2. At the prompt, enter your old PIN2 code.
3. At the prompt, enter a new PIN2 code.
4. Confirm your PIN2 code.

Important!: Not all SIM cards use a PIN2 code. If your SIM card does not, this menu does not display.

The PIN2 code is provided by your carrier. Entering an incorrect PIN2 code multiple times can cause the phone to lock. Contact customer service for assistance.

Managing the FDN List

When this feature is enabled, you can make calls only to phone numbers stored in the FDN list on the SIM card.

1. Press  →  and then tap  (**Settings**) → **Call settings** → **Fixed Dialing Numbers** → **Enable FDN**.
2. At the prompt, enter your PIN2 code and tap **OK**.
FDN is enabled.
3. Tap **FDN list** then press  and then tap **Add contact** or edit the contacts that were stored.

Important!: Not all SIM cards use a PIN2 code. If your SIM card does not, this menu does not display.

The PIN2 code is provided by your carrier. Entering an incorrect PIN2 code multiple times can cause the phone to lock. Contact customer service for assistance.

Voicemail

You can view your voicemail number from this menu.

1. Press  →  and then tap  (**Settings**) → **Call settings** → **Voicemail service**.
2. Select **My carrier**.
3. Tap **Voicemail number** to now view your number within the Voicemail number field.

Configuring Call Forwarding

Call forwarding re-routes incoming calls to a secondary number that you specify.

1. From the Home screen, tap  → **Settings** → **Call settings** → **Call forwarding**. Select the condition for the call forwarding option:
 - **Always forward**: all incoming calls are re-routed to a secondary number that you specify.
 - **Forward when busy**: forward all incoming calls to another number or voicemail when your phone is busy.
 - **Forward when unanswered**: automatically forwards incoming calls to another number when the phone is not answered.
 - **Forward when unreachable**: automatically forwards incoming calls when the phone is not in service, or is turned off.

Configuring Additional Call Settings

Configure the general call settings using this option.

1. From the Home screen, tap  → **Settings** → **Call settings** → **Additional settings**.
2. Tap one of the following options:
 - **Caller ID**: configures the way your outgoing calls are displayed. Choose from Network default, Hide number, or Show number.
 - **Call waiting**: enables call waiting functionality (notifies you of incoming calls while on a call). When deactivated, all incoming calls are directed to your voicemail if you are already on an active call.

Sound Settings

From this menu you can control the sounds on the phone.

- ▶ Press  →  and then tap  (**Settings**) → **Sound**.

The following options display:

Silent mode

Silent mode is convenient when you wish to stop the phone from making any noise, in a theater for example. In Silent Mode the speaker is muted and the phone does not notify you of incoming calls or vibrates only.

1. Press  →  and then tap  (**Settings**) → **Sound**.
2. Tap **Silent mode**.

– or –

From the Home screen, press and hold the **Lock** key until **Phone options** displays then tap **Silent mode** to activate or deactivate this mode (the current mode displays).

Setup Phone Vibration

1. Press  →  and then tap  (**Settings**) → **Sound**
2. Tap **Vibrate** and select a vibration mode. Choose from:
Always, Never, Only in Silent mode, or Only when not in Silent mode.

Note: The Phone vibrate setting is independent of other call sounds settings. For example, if you have Silent mode enabled with Phone vibrate, your phone won't play a ringtone, but will vibrate for an incoming call.

Adjusting the Volume Settings

The Volume menu provides access to various volume settings within one on-screen popup menu.

1. Press  →  and then tap  (**Settings**) → **Sound** → **Volume**.
2. Touch and drag the on-screen slider to assign the volume setting for any of the following volume levels.
 - **Ringtone, Media, Alarm, System volume, or Notification.**

3. Tap **OK** to assign the volume levels.

Setup the Voice Call Ringtone

1. Press  →  and then tap  (**Settings**) → **Sound**.
2. Tap **Phone ringtone**.
3. Tap a ringtone from the available list. The ringtone briefly plays when selected.
4. Tap **OK** to assign a ringer.

Setting a Notification Ringtone

1. Press  →  and then tap  (**Settings**) → **Sound** → **Notification ringtone**.
2. Tap one of the ringtones and tap **OK**.

Audible Tone Settings

The Audible touch tones and Audible selection options are used when you use the dialing pad or making a screen selection. Each time you press a key or make a selection the selected tone sounds.

1. Press  →  and then tap  (**Settings**) → **Sound**.
2. Tap **Audible touch tones** or **Audible selection**. A check mark displayed next to these features indicates active status.

Screen Lock Sounds

The screen lock sounds option is used to activate/deactivate sounds when locking and unlocking the screen.

1. Press  →  and then tap  (**Settings**) → **Sound**.
2. Tap **Screen lock sounds**. A check mark displayed next to these features indicates active status.

Display Settings

In this menu, you can change various settings for the display such as the font, orientation, pop-up notifications, puzzle lock feature, animation, brightness, screen timeout, power saving mode, and tv out settings.

- Press  →  and then tap  (**Settings**) → **Display**. The following options display:
- **Wallpapers**: assigns the Home screen and Lock screen wallpaper images.
 - **Font style**: sets the fonts used on the LCD display. The default selection is: Default font. Tap **Get fonts online** to download additional fonts.
 - **Brightness**: configures the LCD Brightness levels.
 - **Auto-rotate screen**: when enabled, the phone automatically switches from portrait to landscape orientation and vice versa. When this setting is disabled, the phone displays in portrait mode only.

- **Animation**: determines whether some or all of the window elements animate. Selections are: No animations, Some animations, or All animations.
- **Screen timeout**: adjusts the delay time before the screen automatically turns off. Selections are: 15 seconds, 30 seconds, 1 minute, 2 minutes, 10 minutes, and 30 minutes.
- **Horizontal calibration**: uses the accelerometer to calibrate the phone when held in a horizontal position.

Horizontal Calibration

Calibrate your phone by using the built-in accelerometer.

1. Press  →  and then tap  (**Settings**) → **Display** → **Horizontal calibration**.
2. Place the phone on a level surface and tap **Calibrate**. The phone adjusts the level of the accelerometer. During the calibration process a green circle appears on-screen and the center circle adjusts to the center position.

Location and Security

The Location and Security settings allow you to configure phone location and security settings.

Use Wireless Networks

Before you use applications such as Google Maps to find your location or search for places of interest, you must enable the use of wireless networks or GPS satellites.

1. Press  →  and then tap  (**Settings**) → **Location and security**.
2. Tap **Use wireless networks** to enable location information using the wireless network.

Enabling the GPS Satellites

1. Press  →  and then tap  (**Settings**) → **Location and security**.
2. Tap **Use GPS satellites** enable the GPS satellite.

Screen Unlock Pattern Settings

To secure data and limit phone access, you can set the phone to require a screen unlock pattern each time you turn on the device, or every time the phone wakes up from sleep mode (when the screen automatically turns off).

Setting an Unlock Pattern

Creating a screen unlock pattern increases security on the phone.

1. Press  →  and then tap  (**Settings**) → **Location and security**.
2. Tap **Set screen lock** → **Pattern**.

3. Read the instructions then tap **Next**.
4. Review the animated procedure for drawing a pattern and tap **Next** when you are ready to draw a pattern.
5. Draw your pattern by touching the first on-screen point. Then, **without removing your finger from the screen, drag your finger over adjacent points until the gray trace line overlaps each point** and they are highlighted by a green circle.
6. When you have connected at least four dots in a vertical, horizontal or diagonal direction, lift your finger from the screen and tap **Continue**.
7. Confirm the new pattern by redrawing it and then tapping **Confirm**. The Unlock pattern is set.

Changing the Screen Lock Pattern

This feature allows you to change the previously stored unlock pattern and update it if necessary. This process is similar to changing your password from time to time.

1. Press  →  and then tap  (**Settings**) → **Location and security**.
2. Tap **Change screen lock**.
3. Retrace your current pattern on the screen.

4. Tap **Pattern** and repeat steps 3 - 7 from the previous section.

Using Visible a Pattern

When enabled, this feature displays the unlock pattern as you draw it with your finger.

PIN Lock and Unlock

1. Press  →  and then tap  (**Settings**) → **Location and security**.
2. Tap **Set screen lock**.
3. Tap **PIN**.
4. Enter a PIN number using the numeric keypad and touch **Continue** to confirm the password.
5. Confirm the PIN by re-entering it and tap **OK** to confirm.

Your phone now requires you to enter this PIN number in order to unlock the phone.

Password Lock and Unlock

1. Press  →  and then tap  (**Settings**) → **Location and security**.
2. Tap **Set screen lock**.
3. Tap **Password**.

4. Enter a password using the keypad and tap **Continue** to confirm the password.
5. Re-enter the password and tap **OK** to confirm.

Setting up SIM Card Lock

Prevent another user from using your SIM card to make unauthorized calls or from accessing information stored on your SIM card by protecting the information using a PIN code.

1. Press  →  and then tap  (**Settings**) → **Location and security**.
2. Tap **Set up SIM card lock**.
3. Tap **Lock SIM card**, enter your SIM PIN code, then touch **OK**.

Note: You must activate Lock SIM card before you can change your SIM PIN code.

To change an existing SIM Card PIN:

1. Tap **Change SIM PIN**.
2. Enter the old SIM PIN code and tap **OK**.
3. Enter the new SIM PIN code and tap **OK**.
4. Re-type the new SIM PIN code and tap **OK**.

Passwords

When you create a phone password you can also configure the phone to display the password as you type it instead of using an asterisk (*).

1. Press  →  and then tap  (**Settings**) → **Location and security**.
2. Tap **Visible passwords** to activate this feature.

Device Administration

Activating this feature allows a Google Apps administrator to enforce security policies and remotely wipe phones that are lost or stolen.

1. Press  →  and then tap  (**Settings**) → **Location and security**.
2. Tap **Select device administrators** to configure the setting.
3. Select an administrator and follow the prompts.

Credential Storage

This option allows certain applications to access secure certificates and other credentials. Certificates and credentials can be installed to the SD card and password protected.

1. Press  →  and then tap  (**Settings**) → **Location and security**.

2. Tap **Use secure credentials** to activate this feature. A check mark displayed next to the feature indicates secure credentials is active.
3. Tap **Install from SD card** to install encrypted certificates from the memory (SD) card.
4. Tap **Set password** to set or change the credential storage password.
5. Tap **Clear storage** to clear the storage (SD card or phone memory) of all contents and reset the credentials password.

Applications

Unknown Sources

This feature must be enabled in order to download applications from locations other than the Android Market.

1. Press  →  and then tap  (**Settings**) → **Applications**.
2. Tap **Unknown sources** to activate this feature.

Note: If you are notified that you can not download a Market application because it comes from an “Unknown source”, enabling this option corrects this issue.

Quick Launch

Allows you to set keyboard shortcuts to launch assigned applications.

1. Press  →  and then tap  (**Settings**) → **Applications**.
2. Tap **Quick launch** to activate this feature.
3. Tap an onscreen letter from the list.
4. Select an available application. This changes the selected hotkey to now launch the new application.

Managing Applications

This feature allows you to manage your phone’s applications.

You can also view the amount of memory or resources used as well as the remaining memory and resources for each of the applications on your phone, and clear the data, cache, or defaults.

- Press  →  and then tap  (**Settings**) → **Applications** → **Manage applications**.

Clearing Application Cache and Data

1. Press  →  and then tap  (**Settings**) → **Applications** → **Manage applications**.
2. Tap the **Downloaded** tab and select your desired application.

3. Tap **Clear data** or **Clear cache**.

Uninstalling Third-party Applications

Important!: You must have downloaded applications installed to use this feature.

1. Press  →  and then tap  (**Settings**) → **Applications** → **Manage applications**.
2. Tap the **Downloaded** tab and select your desired application.
3. Tap **Uninstall**.
4. At the prompt, tap **OK** to uninstall the application.

Moving Third-party Applications to your SD Card

Your phone's built in memory can be augmented by using a microSD card to store additional data. When the phone's built-in memory capacity is reached, it is possible to move some applications to the internal microSD card. Freeing up memory space on the phone can help avoid sluggish performance when the phone has to work harder to manage memory resources.

Important!: Not all downloaded applications are capable of being moved from phone to card.

1. Press  →  and then tap  (**Settings**) → **Applications** → **Manage applications**.

2. Tap the **Downloaded** tab and select your desired application.
3. Tap **Move to SD card**.

Once the application has been moved to the microSD card, this button now reads "Move to phone".

Running Services

The Running services option allows you to view and control all currently running services.

1. Press  →  and then tap  (**Settings**) → **Applications** → **Running services**

The screen displays all the processes that are running.

2. Tap a process to open the Stop service? screen, where you can tap Stop to force the process to stop running.

When you stop the process the service or application will no longer run until you start it again.

Important!: Stopping a process might have undesirable consequences on the application.

Android Development

This phone can be used for Android development. You can write applications using the Android SDK and install them on this device, then run the applications using the hardware, system, and network. This feature allows you to configure the device for development.

- Press  →  and then tap  (**Settings**) → **Applications** → **Development**.

Important!: These features are used for development purposes only.

USB Debugging

This feature is used for development purposes only.

Stay awake

This feature is used to set the screen to never go into sleep mode while the phone is charging.

Allow Mock Locations

This feature is used for development purposes only.

It allows the entry of “mock” GPS coordinates in order to test GPS applications.

Accounts and Synchronization

Your phone provides the ability to synchronize data from a variety of different sources or sites, including Google, a Corporate Microsoft Exchange Email Server, and social sites such as Facebook, Twitter, and MySpace. Corporate and Google accounts provide the ability to synchronize Calendar events and Contacts.

To enable the auto-sync feature:

1. Press  →  and then tap  (**Settings**) → **Accounts and sync**.
2. Tap **Background data**. A green checkmark indicates the feature is enabled. This lets applications sync, send, and receive data at any time.
3. Tap **Auto-sync**. A green checkmark indicates the feature is enabled. This allows automatic synchronization of data between your phone and external sites or servers.
 - The three main components are Contacts, Email, and Calendar Events. Before these can be synchronized, they must be added to the managed accounts list.

Synchronizing a Google Account

By default, there are no accounts managed by the device. These must be manually added.

To manage an existing Google account:

1. Press  →  and then tap  (**Settings**) → **Accounts and sync**.
2. Tap **Add account** → **Google**.
3. Tap **Next** → **Sign in**.

Note: If you do not already have a Google account, tap **Create** and follow the on-screen prompts to create your new account.

4. Touch the **Username** (@gmail.com) and **Password** fields and enter your information.
5. Tap **Sign in**. Your phone then communicates with the Google servers to confirm your information. Your existing Gmail account then appears within the **Manage accounts** area of the screen.
 - Any changes or updates to your Gmail account are then automatically updated to your device.

To configure the Google management settings:

1. Press  →  and then tap  (**Settings**) → **Accounts and sync**.
2. Tap  within the Google account field to reveal the account's synchronization settings screen.

3. Tap the parameters you wish to synchronize (**Sync Contacts**, **Sync Gmail**, or **Sync Calendar**). A green checkmark indicates the feature is enabled.
4. Press  to return to the previous screen. For more information, refer to “*Synchronizing Contacts*” on page 77.

Synchronizing Your Corporate Account

By default, there are no Corporate Calendar events managed by the device. These must be manually added.

Note: Once a corporate email account is created, it is automatically added as a managed account.

Use the following procedure to configure your phone to synchronize with a corporate email account.

1. From the Home screen, tap  (**Applications**) → **Settings** → **Accounts and sync**.
– or –
Press  →  and then tap  (**Settings**) → **Accounts and sync**.
2. Locate the email account containing the events you wish to synchronize.

3. Tap  within the adjacent account field to reveal the account's synchronization settings screen.
4. Toggle the check mark adjacent to either the Sync Contacts or Sync Calendar fields to manually sync the account.

Privacy Settings

Set data backup and restore configurations, or reset the phone to erase all personal data.

- Press  →  and then tap  (**Settings**) → **Privacy**.

Backup and Restore

The phone can be configured to back up your current settings, application data and settings.

1. Press  →  and then tap  (**Settings**) → **Privacy**.
2. Tap **Back up my data** to create a backup of your current phone settings and applications.
3. Tap **Automatic restore** to assist in the re-installation of a previously installed application (including preferences and data).

Factory Data Reset

From this menu you can reset your phone and sound settings to the factory default settings.

1. Press  →  and then tap  (**Settings**) → **Privacy**. (You will see a disclaimer.)
2. Touch **Factory data reset** → **Reset phone**.
3. If necessary, enter your password and touch **Erase everything**.

The phone resets to the factory default settings automatically and when finished displays the Home screen.

SD Card & Phone Storage

From this menu you can view the phone's available memory space, the total and available space on an inserted memory card, and mount or unmount the SD card.

For more information about mounting or unmounting the SD card, see *"Using the SD Card"* on page 39.

To view the memory allocation for your external SD card:

- Press  →  and then tap  (**Settings**) → **SD card and phone storage**. The available memory displays under the Total space and Available space headings.

Search Settings

You can use your phone's search preferences to configure some aspects of Google Internet search (for example, whether it makes suggestions below the Quick Search Box as you type), and what phone features you want to include in searches.

1. Press  →  and then tap  (**Search**).
2. Press  → **Search settings**.
3. Tap any of the following search parameters to alter the settings:
 - **Google search** opens a screen where you can set your Google search preferences.
 - **Show web suggestions**: includes search matches from Google's online search engine.
 - **Use My Location**: uses your My Location information for Google search results and services.
 - **Search history**: determines whether you also wish to included personalized search history results in the list of matches.
 - **Manage search history**: helps to manage the personalized search history associated with your current registered Google account.
 - **Searchable items**: opens a screen where you can choose the phone applications included in device searches: **Internet**, **Apps**, **Contacts**, **Memo**, **Messaging**, **Music**, or **Voice Search**.
 - **Clear shortcuts**: erases the history for recently selected search results.

Locale and Text Settings

This setting allows you to configure the language in which to display the menus and keyboard. You can also set on-screen keyboard options.

- Press  →  and then tap  (**Settings**) → **Locale and text**.

Language Settings

To set the language that the menus and keyboard display on the phone:

1. Press  →  and then tap  (**Settings**) → **Locale and text** → **Select locale**.
2. Select a language from the list.

On-screen Keypad

This feature, when active, allows you to use either the on-screen or slide-out QWERTY keyboard to enter text and configure your text input method.

When deactivated, this feature forces you to use only the slide-out QWERTY keypad. While deactivated, you are not presented with an on-screen keypad for use and you can not change the text input method on-screen.

1. Press  →  and then tap  (**Settings**) → **Locale and text**.
2. Tap **On-screen keypad** to activate or deactivate the feature (green check mark indicates that it is active).

Select Input Method

There are two on-screen input methods available: Swype and Samsung keypad.

1. Press  →  and then tap  (**Settings**) → **Locale and text** → **Select input method**.
2. Select an input method.

Swype Settings

For more information, refer to “*SWYPE Settings*” on page 56.

1. Press  →  and then tap  (**Settings**) → **Locale and text** → **Swype**.
2. Tap one of the following Swype preferences to activate the setting:
 - **Language**: allows you to select the current text input language. Default language is US English.
 - **Word prediction**: uses a built-in word database to predict words while entering text in Swype.

- **Audio feedback**: turns off sounds generated by the Swype application.
- **Enable tip indicator**: turns on an on-screen flashing indicator that provides helpful user information.

Swype Advanced settings

Advanced settings allow access to Swype operation parameters.

- **Auto-spacing**: automatically inserts a space between words. When you finish a word, just lift your finger and start the next word.
- **Auto-capitalization**: automatically capitalizes the first letter of a sentence.
- **Show complete trace**: determines whether or not to display the complete Swype trace path on-screen.
- **Word choice window**: sets the amount of times the word choice selection window displays on screen. Move the slider between Never or Always and tap **OK**.
- **Speed vs. accuracy**: sets how quickly Swype responds to on-screen input. Move the slider between Fast Response (speed) or Error Tolerant (accuracy) and tap **OK**.

Swype Help settings

Help settings provide access to Swype help operation parameters.

- **Swype help**: displays the on-screen Swype User Manual.
- **Tutorial**: provides an on-screen tutorial that shows you how to input text faster in Swype input mode.

About

Provides information about the current Swype application version.

Samsung Keypad Settings

For more information, refer to “Using the Samsung Keypad” on page 60.

1. Press  →  and then tap  (**Settings**) → **Locale and text** → **Samsung keypad**.
2. Tap **Keypad types** and select a text input method:
 - Qwerty Keypad
 - 3x4 Keypad
 - Handwriting box 1
 - Handwriting box 2
3. Tap **Writing language** and select a language.
4. Tap **XT9** to use XT9 Predictive text method. For more information, refer to “Text Input Methods” on page 55. For XT9 advance settings, see “XT9” on page 160.
5. Tap the **Keypad sweeping** field if you want to sweep the keypad to change from ABC to ?123 mode. For more information, refer to “Text Input Methods” on page 55.

6. Tap the **Auto-capitalization** field to automatically capitalize the first letter of a sentence.
7. Tap **Handwriting settings** to set the Recognition time and view details of the handwriting application.
8. Tap **Voice input** to activate the Voice input feature. This is an experimental feature that uses Google’s networked speech recognition application.
9. Tap **Auto-full stop** to automatically insert a full stop by tapping the space bar twice.
10. Tap the **Tutorial** field to view a short tutorial on use of the Samsung keyboard.

XT9

The following XT9 settings are available when the XT9 field is selected.

1. Tap the **XT9** field to select XT9 (predictive text) mode, then tap **XT9**.
2. Tap the **Word completion** field to enable word completion. Your phone predicts how to complete the word typed.

3. Tap the **Word completion point** field then touch **2 letters**, **3 letters**, **4 letters**, or the **5 letters** radio button. Word completion begins after 2 or more (depending on your selection).
4. Tap the **Spell correction** field. This option corrects typographical errors by selecting from a list of possible words that reflect the characters of the keys you touched as well as the characters of nearby keys.
5. Tap the **Next word prediction** field to enable word prediction.
6. Tap the **Auto-append** field to automatically add predictions.
7. Tap the **Auto-substitution** field to automatically replace words that you are typing. This option assists with correcting misspelled words.
8. Tap the **Regional correction** field. This option sets the device to automatically correct mistyped words according to normal spelling for your region.
9. Tap the **Recapture** field. This option sets the device to re-display the word suggestion list when you select the wrong word from the list.

10. To add a new word to the T9 dictionary:
Tap the **XT9 my words** field, then press  and then tap **Add**. Enter the new word in the **Register to XT9 my words** field, then tap **Done**.
11. Tap **XT9 auto-substitution** to add words to substitute (for example youve becomes you've). A list of substitutions displays.
12. If you do not see the substitution you want, press  and then tap **Add**, then input the Shortcut word and Substitution word.
13. Tap **Done**.

Device Keyboard Settings

For more information, refer to “*Entering Text Using the QWERTY Keyboard*” on page 64.

1. Press  →  and then tap  (**Settings**) → **Locale and text** → **Device keyboard**.
2. Tap **Auto-replace** to automatically correct mistyped words.
3. Tap **Auto-cap** to automatically capitalize the first letter in a sentence.

4. Tap **Auto-punctuate** to automatically punctuate within a sentence by pressing the space key twice.

Accessibility Settings

Lets you enable and disable downloaded accessibility applications that aid in navigating your Android device, such as TalkBack (uses synthesized speech to describe the results of actions), KickBack (provides haptic feedback for actions), and SoundBack (plays sounds for various actions). Also lets you enable use of the power key to end calls.

Enabling Accessibility Applications

Note: Accessibility applications are not provided with the phone; they must be downloaded from Android Market.

1. Press  →  and then tap  (**Settings**) → **Accessibility**.
2. Tap **Accessibility** to enable the use of accessibility applications (indicated by green check mark).

Power key

To allow use of the power key to end calls:

1. Press  →  and then tap  (**Settings**) → **Accessibility**.

2. Select **The power key ends calls** field to activate this feature (indicated by green check mark).

Date and Time

This menu allows you to change the time and date displayed.

1. Press  →  and then tap  (**Settings**) → **Date and time**.
2. Tap **Automatic** to allow automatic setting of the date and time (indicated by green check mark) or disable automatic setting.

If automatic date and time setting has been deactivated, manually adjust the settings as required:

3. Tap **Set date** and use the plus and minus icons to set the **Month**, **Day**, and **Year** then touch **Set**.
4. Tap **Select time zone**, then touch a time zone.
5. Tap **Set time** and use the plus and minus icons to set **Hour** and **Minute**. Touch **PM** or **AM** to toggle the setting, then tap **Set**.
 - To display the time in 24-hour format, tap **Use 24-hour format**. If this is not enabled, the phone automatically uses a 12-hour format.
6. Tap **Select date format** and touch the required date format.

About Phone

This menu contains phone status information, battery use information, legal information, and other phone information such as the model number, Android version, baseband version, kernel version, and software build number.

To access phone information:

► Press  →  and then tap  (**Settings**) → **About phone**. The following information displays:

- **Status:** displays the battery status, phone number for this device, the network connection, signal strength, mobile network type, service state, roaming status, mobile network state, IMEI number, IMEI SV, Wi-Fi MAC address, Bluetooth address, and Up time.
- **Battery use:** displays the percentage of battery use by various applications and services.
- **Legal information:** This option provides links to the applicable Open source licenses and Google legal information for this phone. This information clearly provides copyright and distribution legal information and facts as well as Google Terms of Service, Terms of Service for Android-powered Phones, and much more pertinent information as a reference.
- **Model number:** displays the phone's model number.
- **Android version:** displays the firmware version loaded on this handset.
- **Baseband version:** displays the baseband version loaded on this handset.

- **Kernel version:** displays the kernel version loaded on this handset.
- **Build number:** displays the software, build number.

Note: Firmware, baseband, kernel and build numbers may be required by a service representative when troubleshooting service problems or when selecting the appropriate updates for the handset.

Section 13: Health and Safety Information

Safety Warnings

Keep phone from children and pets

Keep your phone and all accessories out of the reach of small children or animals. Small parts may cause choking or serious injury if swallowed. Children could also damage the phone, dial 911 by mistake or make calls that increase your phone bill.

Protect your hearing

Excessive exposure to sound at high volume can cause hearing damage. Always turn the volume down before plugging in the earphones and use only the minimum volume setting necessary to hear your conversation or music.

Install mobile devices and equipment with caution

Ensure that any mobile devices or related equipment installed in your vehicle are securely mounted. Avoid placing your phone and accessories near or in an air bag deployment area. Improperly installed wireless equipment can cause serious injury when air bags inflate rapidly.

Handle and dispose of batteries and chargers with care

Use only Samsung-approved batteries and chargers specifically designed for your phone. Incompatible batteries and chargers can cause serious injuries or damage to your phone.

Never dispose of batteries or phones in a fire. Follow all local regulations when disposing used batteries or phones.

Never place batteries or phones on or in heating devices, such as microwave ovens, stoves, or radiators. Batteries may explode when overheated.

Never crush or puncture the battery. Avoid exposing the battery to high external pressure, which can lead to an internal short circuit and overheating.

Avoid interference with pacemakers

Maintain a minimum of 15 cm (6 inches) between mobile phones and pacemakers to avoid potential interference, as recommended by manufacturers and the independent research group, Wireless Technology Research. If you have any reason to suspect that your phone is interfering with a pacemaker or other medical device, turn off the phone immediately and contact the manufacturer of the pacemaker or medical device for guidance.

Turn off the phone in potentially explosive environments

Do not use your phone at refuelling points (service stations) or near fuels or chemicals. Turn off your phone whenever directed by warning signs or instructions. Your phone could cause explosions or fire in and around fuel or chemical storage and transfer areas or blasting areas. Do not store or carry flammable liquids, gases, or explosive materials in the same compartment as the phone, its parts, or accessories.

Turn off the phone in thunderstorms

Do not use your phone during a thunderstorm. Your phone may malfunction and your risk of electric shock is increased.

Warning regarding display

The display on your handset is made of glass or acrylic and can break if your handset is dropped or if it receives significant impact. Do not use if screen is broken or cracked as this could cause injury.

Safety Precautions

Drive safely at all times

Avoid using your phone while driving and obey all regulations that restrict the use of mobile phones while driving. Use hands-free accessories to increase your safety when possible.

Follow all safety warnings and regulations

Comply with any regulations that restrict the use of a mobile phone in a certain area.

Use only Samsung-approved accessories

Using incompatible accessories may damage your phone or cause injury.

Turn off the phone near medical equipment

Your phone can interfere with medical equipment in hospitals or health care facilities. Follow all regulations, posted warnings, and directions from medical personnel.

Turn off the phone or disable the wireless functions when in an aircraft

Your phone can cause interference with aircraft equipment. Follow all airline regulations and turn off your phone or switch to a mode that disables the wireless functions when directed by airline personnel.

Avoid interference with other electronic devices

Your phone emits radio frequency (RF) signals that may interfere with unshielded or improperly shielded electronic equipment, such as pacemakers, hearing aids, medical devices, and other electronic devices in homes or vehicles. Consult the

manufacturers of your electronic devices to solve any interference problems you experience.

Protect batteries and chargers from damage

- Avoid exposing batteries to very cold or very hot temperatures (below 0 °C/32 °F or above 45 °C/113 °F). Extreme temperatures can reduce the charging capacity and life of your batteries.
- Prevent batteries from contacting metal objects, as this can create a connection between the + and - terminals of your batteries and lead to temporary or permanent battery damage.
- Never use a damaged charger or battery.

Handle your phone carefully and sensibly

- Do not disassemble your phone due to a risk of electric shock.
- Do not allow your phone to get wet—liquids can cause serious damage and will change the colour of the label that indicates water damage inside the phone. Do not handle your phone with wet hands. Water damage to your phone can void your manufacturer's warranty.
- Avoid using or storing your phone in dusty, dirty areas to prevent damage to moving parts.
- Your phone is a complex electronic device—protect it from impacts and rough handling to avoid serious damage.
- Do not paint your phone, as paint can clog moving parts and prevent proper operation.

- Your phone may be damaged by exposure to magnetic fields. Do not use carrying cases or accessories with magnetic closures or allow your phone to come in contact with magnetic fields for extended periods of time.

Reduce the risk of repetitive motion injuries

While using your phone, hold it with a relaxed grip, press the keys lightly, use special features that reduce the number of keys you have to press (such as templates and predictive text), and take frequent breaks.

Warranty Disclaimer: Proper use of a touch screen handset

If your handset has a touchscreen display, please note that a touchscreen responds best to a light touch from the pad of your finger or a non-metallic stylus. Using excessive force or a metallic object when pressing on the touchscreen may damage the tempered glass surface and void the warranty. For more information, please refer to “Warranty Information” on page 161.

UL Certified Travel Adapter

The Travel Adapter for this phone has met applicable UL safety requirements. Please adhere to the following safety instructions per UL guidelines.

FAILURE TO FOLLOW THE INSTRUCTIONS OUTLINED MAY LEAD TO SERIOUS PERSONAL INJURY AND POSSIBLE PROPERTY DAMAGE.

IMPORTANT SAFETY INSTRUCTIONS - SAVE THESE INSTRUCTIONS.

DANGER - TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, CAREFULLY FOLLOW THESE INSTRUCTIONS.

FOR CONNECTION TO A SUPPLY NOT IN NORTH AMERICA, USE AN ATTACHMENT PLUG ADAPTOR OF THE PROPER CONFIGURATION FOR THE POWER OUTLET. THIS POWER UNIT IS INTENDED TO BE CORRECTLY ORIENTATED IN A VERTICAL OR HORIZONTAL OR FLOOR MOUNT POSITION.

Important usage information

Signal Strength

The quality of each call you make or receive depends on the signal strength in your area. Your phone informs you of the current signal strength by displaying a number of bars next to the signal strength icon. The more bars displayed, the stronger the signal. If you're inside a building, being near a window may give you better reception.

Understanding How Your Phone Operates

Your phone is basically a radio transmitter and receiver. When it's turned on, it receives and transmits radio frequency (RF) signals. When you use your phone, the system handling your call controls the power level.

Allow only qualified personnel to service your phone

Allowing unqualified personnel to service your phone may result in damage to your phone and will void your warranty.

Ensure maximum battery and charger life

- Avoid charging batteries for more than a week, as overcharging may shorten battery life.
- Over time, unused batteries will discharge and must be recharged before use.
- Disconnect chargers from power sources when not in use.
- Use batteries only for their intended purpose.

Handle SIM and memory cards with care

- Do not remove a card while the phone is transferring or accessing information, as this could result in loss of data and/or damage to the card or phone.
- Protect cards from strong shocks, static electricity, and electrical noise from other devices.
- Frequent writing and erasing will shorten the life span of memory cards.

- Do not touch gold-coloured contacts or terminals with your fingers or metal objects. If dirty, wipe the card with a soft cloth.

Ensure access to emergency services

Emergency calls from your phone may not be possible in some areas or circumstances. Before travelling in remote or undeveloped areas, plan an alternate method of contacting emergency services personnel.

Correct disposal of this product

The product and its electronic accessories (e.g., charger, headset, USB cable) should not be disposed of with other household waste at the end of their working life. To prevent possible harm to the environment or human health from uncontrolled waste disposal, please separate these items from other types of waste and recycle them responsibly to promote the sustainable reuse of material resources.

Correct disposal of batteries in this product

The batteries in this product should not be disposed of with other household waste at the end of their working life.

Where marked, the chemical symbols Hg, Cd or Pb indicate that the battery contains mercury, cadmium or lead above reference levels. If batteries are not properly disposed of, these substances can cause harm to human health or the environment.

To protect natural resources and to promote material reuse, please separate batteries from other types of waste and recycle them through your local, free battery return system.

This phone is compliant with RoHS.

Radio frequency safety

The design of your phone complies with updated NCRP standards described below. In 1991-92, the Institute of Electrical and Electronics Engineers (IEEE) and the American National Standards Institute (ANSI) joined in updating ANSI's 1982 standard for safety levels with respect to human exposure to RF signals. More than 120 scientists, engineers and physicians from universities, government health agencies and industries developed this updated standard after reviewing the available body of research. In 1993, the Federal Communications Commission (FCC) adopted this updated standard in a regulation. In August 1996, the FCC adopted hybrid standard consisting of the existing ANSI/IEEE standard and the guidelines published by the National Council of Radiation Protection and Measurements (NCRP).

Acknowledging special precautions and Industry Canada notice

This equipment has been tested and found to comply with the limits of a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation; if this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient / relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult your dealer or an experienced radio/TV technician for help.

Specific Absorption Rates (SAR)

The SAR is a value that corresponds to the relative amount of RF energy absorbed in the head of a user of a wireless handset.

The SAR value of a phone is the result of an extensive testing, measuring and calculation process. It does not represent how much RF the phone emits. All phone models are tested at their highest value in strict laboratory settings. But when in operation, the SAR of a phone can be substantially less than the level reported to the FCC. This is because of a variety of factors including its proximity to a base station antenna, phone design and other factors. What is important to remember is that each phone meets strict federal guidelines. Variations in SARs do not represent a variation in safety.

All phones must meet the federal standard, which incorporates a substantial margin of safety. SAR values at or below the federal standard of 1.6 W/kg are considered safe for use by the public.

Maximum measured SAR values for the T589 are:

- GSM 850: Head 0.086 W/kg, Body-worn 0.372 W/kg
- GSM 1900: Head 0.200 W/kg, Body-worn 0.416 W/kg
- WCDMA 850: Head 0.121 W/kg, Body-worn 0.541 W/kg
- WCDMA 1900: Head 0.355 W/kg, Body-worn 0.821 W/kg
- WLAN: Head 0.045 W/kg, Body-worn 0.100 W/kg

Section 14: Warranty Information

Standard Limited Warranty

What is Covered and For How Long? SAMSUNG ELECTRONICS CANADA INC. (SAMSUNG) warrants to the original purchaser (“Purchaser”) that SAMSUNG’s Phones and accessories (“Products”) are free from defects in material and workmanship under normal use and service for the period commencing upon the date of purchase and continuing for the following specified period of time after that date:

Phone	1 Year
Batteries	1 Year
Leather Case	90 Days
Holster	90 Days
Other Phone Accessories	1 Year

What is Not Covered? This Limited Warranty is conditioned upon proper use of Product by Purchaser. This Limited Warranty does not cover: (a) defects or damage resulting from accident, misuse, abnormal use, abnormal conditions, improper storage, exposure to moisture or dampness, neglect, unusual physical, electrical or electromechanical stress, or defects in appearance, cosmetic, decorative or structural items, including framing, and any non-operative parts unless caused by SAMSUNG; (b) defects or damage resulting from excessive force or use

of a metallic object when pressing on a touch screen; (c) equipment that has the serial number or the enhancement data code removed, defaced, damaged, altered or made illegible; (d) any plastic surfaces or other externally exposed parts that are scratched or damaged due to normal use; (e) malfunctions resulting from the use of Product in conjunction or connection with accessories, products, or ancillary/peripheral equipment not furnished or approved by SAMSUNG; (f) defects or damage from improper testing, operation, maintenance, installation, service, or adjustment not furnished or approved by SAMSUNG; (g) defects or damage from external causes such as collision with an object, or from fire, flooding, sand, dirt, windstorm, lightning, earthquake, or from exposure to weather conditions, or battery leakage, theft, blown fuse, or improper use of any electrical source; (h) defects or damage caused by cellular signal reception or transmission, or viruses or other software problems introduced into the Product; (j) any other acts which are not the fault of SAMSUNG; or (i) Product used or purchased outside the United States or Canada.

This Limited Warranty covers batteries only if battery capacity falls below 80% of rated capacity or the battery leaks, and this Limited Warranty does not cover any battery if (i) the battery has been charged by a battery charger not specified or approved by SAMSUNG for charging the battery, (ii) any of the seals on the battery are broken or show evidence of

tampering, or (iii) the battery has been used in equipment other than the SAMSUNG phone for which it is specified.

What are SAMSUNG's Obligations? During the applicable warranty period, SAMSUNG will repair or replace, at SAMSUNG's sole option, without charge to Purchaser, any defective component part of Product. To obtain service under this Limited Warranty, Purchaser must return Product to an authorized phone service facility in an adequate container for shipping, accompanied by Purchaser's sales receipt or comparable substitute proof of sale showing the date of purchase, the serial number of Product and the sellers' name and address. To obtain assistance on where to deliver the Product, call Samsung Customer Care at 1-800-SAMSUNG. Upon receipt, SAMSUNG will promptly repair or replace the defective Product. SAMSUNG may, at SAMSUNG's sole option, use rebuilt, reconditioned, or new parts or components when repairing any Product or replace Product with a rebuilt, reconditioned or new Product. Repaired/replaced leather cases, pouches and holsters will be warranted for a period of ninety (90) days. All other repaired/replaced Product will be warranted for a period equal to the remainder of the original Limited Warranty on the original Product or for 90 days, whichever is longer. All replaced parts, components, boards and equipment shall become the property of SAMSUNG. If SAMSUNG determines that any Product is not covered by this Limited Warranty, Purchaser must

pay all parts, shipping, and labor charges for the repair or return of such Product.

What Are The Limits On Samsung's Warranty/liability? EXCEPT AS SET FORTH IN THE EXPRESS WARRANTY CONTAINED HEREIN, PURCHASER TAKES THE PRODUCT "AS IS," AND SAMSUNG MAKES NO WARRANTY OR REPRESENTATION AND THERE ARE NO CONDITIONS, EXPRESS OR IMPLIED, STATUTORY OR OTHERWISE, OF ANY KIND WHATSOEVER WITH RESPECT TO THE PRODUCT, INCLUDING BUT NOT LIMITED TO:

- THE MERCHANTABILITY OF THE PRODUCT OR ITS FITNESS FOR ANY PARTICULAR PURPOSE OR USE;
- WARRANTIES OF TITLE OR NON-INFRINGEMENT;
- DESIGN, CONDITION, QUALITY, OR PERFORMANCE OF THE PRODUCT;
- THE WORKMANSHIP OF THE PRODUCT OR THE COMPONENTS CONTAINED THEREIN; OR
- COMPLIANCE OF THE PRODUCT WITH THE REQUIREMENTS OF ANY LAW, RULE, SPECIFICATION OR CONTRACT PERTAINING THERETO.

NOTHING CONTAINED IN THE INSTRUCTION MANUAL SHALL BE CONSTRUED TO CREATE AN EXPRESS WARRANTY OF ANY KIND WHATSOEVER WITH RESPECT TO THE PRODUCT. ALL IMPLIED WARRANTIES AND CONDITIONS THAT MAY ARISE BY OPERATION OF LAW, INCLUDING IF APPLICABLE THE IMPLIED WARRANTIES OF

MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE HEREBY LIMITED TO THE SAME DURATION OF TIME AS THE EXPRESS WRITTEN WARRANTY STATED HEREIN. SOME STATES DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS, SO THE ABOVE LIMITATION MAY NOT APPLY TO YOU. IN ADDITION, SAMSUNG SHALL NOT BE LIABLE FOR ANY DAMAGES OF ANY KIND RESULTING FROM THE PURCHASE, USE, OR MISUSE OF, OR INABILITY TO USE THE PRODUCT OR ARISING DIRECTLY OR INDIRECTLY FROM THE USE OR LOSS OF USE OF THE PRODUCT OR FROM THE BREACH OF THE EXPRESS WARRANTY, INCLUDING INCIDENTAL, SPECIAL, CONSEQUENTIAL OR SIMILAR DAMAGES, OR LOSS OF ANTICIPATED PROFITS OR BENEFITS, OR FOR DAMAGES ARISING FROM ANY TORT (INCLUDING NEGLIGENCE OR GROSS NEGLIGENCE) OR FAULT COMMITTED BY SAMSUNG, ITS AGENTS OR EMPLOYEES, OR FOR ANY BREACH OF CONTRACT OR FOR ANY CLAIM BROUGHT AGAINST PURCHASER BY ANY OTHER PARTY. SOME STATES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATION OR EXCLUSION MAY NOT APPLY TO YOU.

THIS WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS, AND YOU MAY ALSO HAVE OTHER RIGHTS, WHICH VARY FROM STATE TO STATE. THIS LIMITED WARRANTY SHALL NOT EXTEND TO ANYONE OTHER THAN THE ORIGINAL PURCHASER OF THIS PRODUCT AND STATES PURCHASER'S EXCLUSIVE REMEDY. F

ANY PORTION OF THIS LIMITED WARRANTY IS HELD ILLEGAL OR UNENFORCEABLE BY REASON OF ANY LAW, SUCH PARTIAL ILLEGALITY OR UNENFORCEABILITY SHALL NOT AFFECT THE ENFORCEABILITY FOR THE REMAINDER OF THIS LIMITED WARRANTY WHICH PURCHASER ACKNOWLEDGES IS AND WILL ALWAYS BE CONSTRUED TO BE LIMITED BY ITS TERMS OR AS LIMITED AS THE LAW PERMITS.

THE PARTIES UNDERSTAND THAT THE PURCHASER MAY USE THIRD-PARTY SOFTWARE OR EQUIPMENT IN CONJUNCTION WITH THE PRODUCT. SAMSUNG MAKES NO WARRANTIES OR REPRESENTATIONS AND THERE ARE NO CONDITIONS, EXPRESS OR IMPLIED, STATUTORY OR OTHERWISE, AS TO THE QUALITY, CAPABILITIES, OPERATIONS, PERFORMANCE OR SUITABILITY OF ANY THIRD-PARTY SOFTWARE OR EQUIPMENT, WHETHER SUCH THIRD-PARTY SOFTWARE OR EQUIPMENT IS INCLUDED WITH THE PRODUCT DISTRIBUTED BY SAMSUNG OR OTHERWISE, INCLUDING THE ABILITY TO INTEGRATE ANY SUCH SOFTWARE OR EQUIPMENT WITH THE PRODUCT. THE QUALITY, CAPABILITIES, OPERATIONS, PERFORMANCE AND SUITABILITY OF ANY SUCH THIRD-PARTY SOFTWARE OR EQUIPMENT LIE SOLELY WITH THE PURCHASER AND THE DIRECT VENDOR, OWNER OR SUPPLIER OF SUCH THIRD-PARTY SOFTWARE OR EQUIPMENT, AS THE CASE MAY BE.

This Limited Warranty allocates risk of Product failure between Purchaser and SAMSUNG, and SAMSUNG's Product pricing reflects this allocation of risk and the limitations of liability contained in this Limited Warranty. The agents, employees, distributors, and dealers of SAMSUNG are not authorized to make modifications to this Limited Warranty, or make additional warranties binding on SAMSUNG. Accordingly, additional statements such as dealer advertising or presentation, whether oral or written, do not constitute warranties by SAMSUNG and should not be relied upon.
