Troubleshooting

Read me first

This device provides mobile communication and media services using Samsung's latest standards and technological expertise. This user manual and the information available at www.samsung.com contain details about the device's functions and features.

- Please read this manual before using the device to ensure safe and proper use.
- Descriptions are based on the device's default settings.
- Some content may differ from your device depending on the region, service provider, or device's software.
- Content (high quality content) that requires high CPU and RAM usage will affect the overall performance of the device. Apps related to the content may not work properly depending on the device's specifications and the environment that it is used in.
- Samsung is not liable for performance issues caused by apps supplied by providers other than Samsung.
- Samsung is not liable for performance issues or incompatibilities caused by edited registry settings or modified operating system software. Attempting to customise the operating system may cause the device or apps to work improperly.
- Software, sound sources, wallpapers, images, and other media provided with this device are licensed for limited use. Extracting and using these materials for commercial or other purposes is an infringement of copyright laws. Users are entirely responsible for illegal use of media.
- You may incur additional charges for data services, such as messaging, uploading and downloading, auto-syncing, or using location services. To avoid additional charges, select an appropriate data tariff plan. For details, contact your service provider.
- Default apps that come with the device are subject to updates and may no longer be supported without prior notice. If you have questions about an app provided with the device, contact a Samsung Service Centre. For user-installed apps, contact service providers.
- Modifying the device's operating system or installing softwares from unofficial sources may result in device malfunctions and data corruption or loss. These actions are violations of your Samsung licence agreement and will void your warranty.
- Depending on the region, you can view the regulatory information on the device. To view the information, tap **Apps** → **Settings** → **About device** → **Regulatory information**.

Caution: situations that could cause damage to your device or other equipment

Note: notes, usage tips, or additional information

Getting started

Device layout

- Do not cover the antenna area with your hands or other objects. This may cause connectivity problems or drain the battery.
- Do not use a screen protector. This causes sensor malfunctions.

Maintaining water and dust resistance

The device may be damaged if water or dust enters the device. Follow these tips carefully to prevent damage to the device and to maintain the water- and dust-resistant performance of the device.

- Do not immerse the device in water deeper than 1 m and keep it submerged for more than 30 minutes.
- Ensure that the back and multipurpose jack covers are tightly closed. Otherwise, they may not provide protection from water and dust.
- Do not immerse the device in water for extended periods.
- Do not expose the device to **water moving with force**, such as water running from a tap, ocean waves, or waterfalls.
- Do not open the device's covers when the device is in water or in very humid places, such as swimming pools or bathrooms.
- Do not open the back cover using wet hands or when the device is wet.
- **The rubber seal fitted to the back cover** is an important component of the device. Take care when opening and closing the back cover to avoid damaging the rubber seal. Also, ensure that the rubber seal is free from debris, such as sand or dust to prevent damage to the device.
- Do not detach or remove the multipurpose jack cover from the device.
- **If the device is exposed to freshwater, dry it thoroughly with a clean, soft cloth. If the device is exposed to any liquid other than freshwater, rinse the device with freshwater immediately and dry it thoroughly with a clean, soft cloth. Failure to rinse the device in freshwater and dry it as instructed may cause the device to suffer from operability or cosmetic issues.**
- The back and multipurpose jack covers may be loosened **if the device is dropped or receives an impact**. Ensure that all the covers are properly aligned and tightly closed.

- **If the device has been immersed in water or the microphone or the speaker is wet,** sound may not be heard clearly during a call. Ensure that the microphone or the speaker is clean and dry by wiping it with a dry cloth.
- The water-resistant design of the device causes it to vibrate slightly in certain conditions. Vibrations in these conditions, such as when the volume level is high are normal and do not affect the device's performance.
- The touch screen and other features may not work properly **if the device is used in water or in other liquids.**
- **Your device has been tested in a controlled environment and certified to be water- and dust-resistant in specific situations (meets requirements of classification IP67 as described by the international standard IEC 60529 - Degrees of Protection provided by Enclosures [IP Code]; test conditions: 15 - 35 °C, 86 - 106 kPa, 1 metre, 30 minutes).** Despite this classification, your device is not impervious to water damage in any situation.

Buttons

Button	Function
 Power	• Press and hold to turn the device on or off. • Press to lock or unlock the device. The device goes into lock mode when the touch screen turns off.
 Recent apps	• Tap to open the list of recent apps. • Tap and hold to access additional options for the current screen.
 Home	• Press to unlock the device. The device goes into lock mode when the touch screen turns off. • Press to return to the Home screen. • Press twice to launch S Voice. • Press and hold to launch Google.
 Back	• Tap to return to the previous screen.

Button	Function
 Volume	• Press to adjust the device volume.

Package contents

Check the product box for the following items:

- Device
- Battery
- Quick start guide

- The items supplied with the device and any available accessories may vary depending on the region or service provider.
- The supplied items are designed only for this device and may not be compatible with other devices.
- Appearances and specifications are subject to change without prior notice.
- You can purchase additional accessories from your local Samsung retailer. Make sure they are compatible with the device before purchase.
- Use only Samsung-approved accessories. Some accessories, such as docking devices, may not have the same water- and dust-resistance certification.
- Availability of all accessories is subject to change depending entirely on manufacturing companies. For more information about available accessories, refer to the Samsung website.

Installing the SIM or USIM card and battery

Insert the SIM or USIM card provided by the mobile telephone service provider, and the included battery.

- Only microSIM cards work with the device.
- Some LTE services may not be available depending on the service provider. For details about service availability, contact your service provider.

1 Remove the back cover.

Be careful not to damage your fingernails when you remove the back cover.

Do not bend or twist the back cover excessively. Doing so may damage the cover.

- 2 ► Single SIM models:** Insert the SIM or USIM card with the gold-coloured contacts facing downwards.

- Dual SIM models:** Insert the SIM or USIM card with the gold-coloured contacts facing downwards.

Insert the primary SIM or USIM card into SIM card slot 1 (1) and the secondary SIM or USIM card into SIM card slot 2 (2).

- Do not insert a memory card into the SIM card slot. If a memory card happens to be lodged in the SIM card slot, take the device to a Samsung Service Centre to remove the memory card.
- Use caution not to lose or let others use the SIM or USIM card. Samsung is not responsible for any damages or inconveniences caused by lost or stolen cards.

3 Insert the battery.

4 Replace the back cover.

- Ensure that the back cover is closed tightly.
- Use only Samsung-approved back covers and accessories with the device.

Removing the SIM or USIM card and battery

- 1 Remove the back cover.
- 2 Pull out the battery.

- 3 ► **Single SIM models:** Press the SIM or USIM card with your finger, and then pull it out.

- **Dual SIM models:** Press the SIM or USIM card with your finger, and then pull it out.

Using dual SIM or USIM cards (dual SIM models)

If you insert two SIM or USIM cards, you can have two phone numbers or service providers for a single device.

Activating SIM or USIM cards

On the Home screen, tap **Apps** → **Settings** → **SIM card manager**. Drag one or both of the switches for the SIM or USIM cards to the right.

If both cards are activated, you can receive calls and messages on each card. However, if you are on a call using one card, the other card cannot be used to receive new calls.

Changing the display name and icon of SIM or USIM cards

On the Home screen, tap **Apps** → **Settings** → **SIM card manager**. Select a SIM or USIM card and tap **Register name** or **Select icon**. Set a display name and icon for each card.

Switching between cards

When two SIM or USIM cards are activated, card selection icons appear on the dashboard of the notifications panel. Open the notifications panel and then select a card.

Charging the battery

Use the charger to charge the battery before using it for the first time. A computer can be also used to charge the device by connecting them via the USB cable.

Use only Samsung-approved chargers, batteries, and cables. Unapproved chargers or cables can cause the battery to explode or damage the device.

- When the battery power is low, the battery icon appears empty.
- If the battery is completely discharged, the device cannot be turned on immediately when the charger is connected. Allow a depleted battery to charge for a few minutes before turning on the device.
- If you use multiple apps at once, network apps, or apps that need a connection to another device, the battery will drain quickly. To avoid disconnecting from the network or losing power during a data transfer, always use these apps after fully charging the battery.

- 1 Connect the USB cable to the USB power adaptor.
- 2 Open the multipurpose jack cover.
- 3 When using a USB cable, plug the USB cable into the right side of the multipurpose jack as shown in the image below.

- Connecting the charger improperly may cause serious damage to the device. Any damage caused by misuse is not covered by the warranty.
- Ensure that the back cover and the multipurpose jack cover are closed tightly to prevent water and dust entering the device. Open or loose covers may allow water and dust to enter the device and cause damage.
- Be careful not to damage or detach the multipurpose jack cover. A damaged or missing cover can result in water damage to the device.

4 Plug the USB power adaptor into an electric socket.

- The device can be used while it is charging, but it may take longer to fully charge the battery.
- If the device receives an unstable power supply while charging, the touch screen may not function. If this happens, unplug the charger from the device.
- While charging, the device may heat up. This is normal and should not affect the device's lifespan or performance. If the battery gets hotter than usual, the charger may stop charging.
- If the device is not charging properly, take the device and the charger to a Samsung Service Centre.

5 After fully charging, disconnect the device from the charger. First unplug the charger from the device, and then unplug it from the electric socket.

Do not remove the battery before removing the charger. This may damage the device.

To save energy, unplug the charger when not in use. The charger does not have a power switch, so you must unplug the charger from the electric socket when not in use to avoid wasting power. The charger should remain close to the electric socket and easily accessible while charging.

6 Close the multipurpose jack cover.

Ensure that the multipurpose jack cover is closed tightly.

Reducing the battery consumption

Your device provides options that help you save battery power. By customising these options and deactivating features in the background, you can use the device longer between charges:

- When you are not using the device, switch to sleep mode by pressing the Power button.
- Close unnecessary apps with the task manager.
- Deactivate the Bluetooth feature.
- Deactivate the Wi-Fi feature.
- Deactivate auto-syncing of apps.
- Decrease the backlight time.
- Decrease the brightness of the display.

Inserting a memory card

Your device accepts memory cards with maximum capacities of 128 GB. Depending on the memory card manufacturer and type, some memory cards may not be compatible with your device.

- Some memory cards may not be fully compatible with the device. Using an incompatible card may damage the device or the memory card, or corrupt the data stored in it.

- Use caution to insert the memory card right-side up.

- The device supports the FAT and the exFAT file systems for memory cards. When inserting a card formatted in a different file system, the device asks to reformat the memory card.
- Frequent writing and erasing of data shortens the lifespan of memory cards.
- When inserting a memory card into the device, the memory card's file directory appears in the **My Files** → **SD card** folder.

1 Remove the back cover.

2 Insert a memory card with the gold-coloured contacts facing downwards.

3 Replace the back cover.

Removing the memory card

Before removing the memory card, first unmount it for safe removal. On the Home screen, tap **Apps** → **Settings** → **Storage** → **SD card** → **Unmount**.

- 1 Remove the back cover.
- 2 Pull out the memory card.
- 3 Replace the back cover.

Do not remove the memory card while the device is transferring or accessing information. Doing so can cause data to be lost or corrupted or damage to the memory card or device. Samsung is not responsible for losses that result from the misuse of damaged memory cards, including the loss of data.

Formatting the memory card

A memory card formatted on a computer may not be compatible with the device. Format the memory card on the device.

On the Home screen, tap **Apps** → **Settings** → **Storage** → **SD card** → **Format** → **FORMAT**.

Before formatting the memory card, remember to make backup copies of all important data stored on the device. The manufacturer's warranty does not cover loss of data resulting from user actions.

Turning the device on and off

When turning on the device for the first time, follow the on-screen instructions to set up your device.

Press and hold the Power button for a few seconds to turn on the device.

To turn off the device, press and hold the Power button, and then tap **Power off**.

Follow all posted warnings and directions from authorised personnel in areas where the use of wireless devices is restricted, such as aeroplanes and hospitals.

Holding the device

Do not cover the antenna area with your hands or other objects. This may cause connectivity problems or drain the battery.

Locking and unlocking the device

Pressing the Power button turns off the screen and puts the device into lock mode. The device automatically gets locked if it is not used for a specified period.

To unlock the device, press the Power button or the Home button and flick your finger in any direction within the unlock screen area.

You can change the unlock code to unlock the device. Refer to [Changing the screen lock method](#) for details.

Basics

Using the touch screen

- Do not allow the touch screen to come into contact with other electrical devices. Electrostatic discharges can cause the touch screen to malfunction.
- To avoid damaging the touch screen, do not tap it with anything sharp or apply excessive pressure to it with your fingertips.

- The device may not recognise touch inputs close to the edges of the screen, which are outside of the touch input area.
- Leaving the touch screen idle for extended periods may result in afterimages (screen burn-in) or ghosting. Turn off the touch screen when you do not use the device.
- It is recommended to use fingers when you use the touch screen.

Tapping

To open an app, to select a menu item, to press an on-screen button, or to enter a character using the keyboard on the screen, tap it with a finger.

Tapping and holding

Tap and hold an item for more than 2 seconds to access available options.

Dragging

To move an icon or thumbnail, tap and hold it and drag it to the target position.

Double-tapping

Double-tap on a webpage or image to zoom in a part. Double-tap again to return.

Flicking

Flick left or right on the Home screen or the Apps screen to see another panel. Flick up or down to scroll through a webpage or a list, such as contacts.

Spreading and pinching

Spread two fingers apart on a webpage, map, or image to zoom in a part. Pinch to zoom out.

Indicator icons

The icons displayed on the status bar provide information about the status of the device. The icons listed in the table below are most common.

The status bar may not appear at the top of the screen in some apps. To display the status bar, drag down from the top of the screen.

Icon	Meaning
	No signal
	Signal strength
	Currently accessing SIM or USIM card (dual SIM models)
	Roaming (outside of normal service area)
	GPRS network connected
	EDGE network connected
	UMTS network connected
	HSDPA network connected
	HSPA+ network connected
	LTE network connected (for models that support LTE service)
	Wi-Fi connected
	Bluetooth feature activated
	GPS activated
	Call in progress
	Missed call
	Air browse feature activated
	Smart stay or smart pause feature activated
	Synced with the web
	Connected to computer
	No SIM or USIM card
	New text or multimedia message

Icon	Meaning
	Alarm activated
	Mute mode activated
	Vibration mode activated
	Flight mode activated
	Error occurred or caution required
	Battery power level

Notifications and quick setting panels

Using the notifications panel

When you receive new notifications, such as messages or missed calls, indicator icons appear on the status bar. To see more information about the icons, open the notifications panel and view the details.

To open the notifications panel, drag the status bar downwards.

To close the notifications panel, swipe upwards on the screen.

You can use the following functions on the notifications panel.

► **Single SIM models:**

► **Dual SIM models:**

Using the quick setting panel

A number of quick setting buttons are available on the notifications panel. To view or access more quick setting buttons, open the quick setting panel. When you open the quick setting panel, you can activate or deactivate various features or configure settings.

To open the quick setting panel, drag the status bar downwards with two fingers.

To close the quick setting panel, swipe upwards on the screen.

To rearrange quick setting buttons on the notifications panel, tap , tap and hold an item, and then drag the item to another location.

Home and Apps screens

Home screen

The Home screen is the starting point to access all of the device's features. It displays widgets, shortcuts to apps, and more. Widgets are small apps that launch specific app functions to provide information and convenient access on your Home screen.

The Home screen can have multiple panels. To view other panels, scroll left or right. To customise the Home screen, refer to [Managing the Home and Apps screens](#) for details.

Home screen options

Tap and hold an empty area, or pinch your fingers together on the Home screen to access the options available on the Home screen.

Flipboard Briefing

Use this feature to view the latest articles in various categories. You can get up to date on news that interests you using this feature.

- 1 On the Home screen, tap  or swipe to the right to open **BRIEFING**.
- 2 Tap **START READING** when launching this feature for the first time.
- 3 Swipe upwards to browse articles in each news category.

To deactivate **Flipboard Briefing**, tap and hold an empty area on the Home screen. Then, tap **Home screen settings** and deselect **Flipboard Briefing**.

Apps screen

The Apps screen displays icons for all apps, including any new apps installed.

On the Home screen, tap **Apps** to open the Apps screen. To view other panels, scroll left or right, or select a screen indicator at the bottom of the screen. To customise the Apps screen, refer to [Managing the Home and Apps screens](#) for details.

Opening apps

On the Home screen or the Apps screen, select an app icon to open it.

To open the list of recently-used apps, tap  and select an app icon to open.

Closing an app

Tap  → , and then tap **END** next to an app to close it. To close all running apps, tap **END ALL**. Alternatively, tap  → .

Installing or uninstalling apps

Samsung GALAXY Apps

Use this app to purchase and download dedicated Samsung apps.

Tap **Galaxy Apps** on the Apps screen.

This app may not be available depending on the region or service provider.

Installing apps

Browse apps by category or tap **SEARCH** to search for a keyword.

Select an app to view information about it. To download free apps, tap **INSTALL**. To purchase and download apps where charges apply, tap the button that shows the app's price.

By default, the device automatically updates any installed app when a new version is available. To change the default setting or to update apps manually, tap **MORE** → **Settings** → **Auto update apps**, and then select an option.

Play Store

Use this app to purchase and download apps and games that are able to run on the device. Tap **Play Store** on the Apps screen.

This app may not be available depending on the region or service provider.

Installing apps

Browse apps by category or search for a keyword.

Select an app to view information about it. To download free apps, tap **INSTALL**. To purchase and download apps where charges apply, tap the price and follow the on-screen instructions.

By default, the device automatically updates any installed app when a new version is available. To change the default setting or to update apps manually, tap **≡** → **Settings** → **Auto-update apps**, and then select an option.

Downloading suggested apps

You can view and download dedicated Galaxy device apps.

On the Home screen, tap the **GALAXY Essentials** widget or the **GALAXY Gifts** widget, and then tap  next to an app.

Managing apps

Uninstalling or disabling apps

To disable default apps, on the Apps screen, tap **⋮** → **Uninstall/disable apps**.  appears on apps that you can disable. Select an app and tap **DISABLE**.

To uninstall downloaded apps, on the Apps screen, tap **⋮** → **Downloaded apps** → **⋮** → **Uninstall**. Alternatively, on the Apps screen, tap **Settings** → **Application manager**, select an app, and then tap **UNINSTALL**.

Enabling apps

On the Apps screen, tap **Show disabled apps**, select apps, and then tap **DONE**.

Alternatively, on the Apps screen, tap **Settings** → **Application manager** → **All apps** → **Disabled**, select an app, and then tap **ENABLE**.

- Hiding apps: Hide apps in the Apps screen only. You can continue to use hidden apps.
- Disabling apps: Disable selected default apps that cannot be uninstalled from the device. You cannot use disabled apps.
- Uninstalling apps: Uninstall downloaded apps.

Entering text

A keyboard appears automatically when you enter text to send messages, create memos, and more.

Text entry is not supported in some languages. To enter text, you must change the input language to one of the supported languages.

Setting input languages

Tap **⚙️** → **Select input languages**, and then select the languages to use. If you select two or more languages, you can change the languages by sliding the space key left or right.

Changing the keyboard layout

Tap , select a language under **Input languages**, and then select a keyboard layout to use.

On **3x4 keyboard**, a key has three or four characters. To enter a character, tap repeatedly the key corresponding to the character.

Using additional keyboard functions

Tap and hold  to use the following functions. Other icons may appear instead of the  icon depending on the last function that was used.

-  : Enter text by voice.

Ensure that the Wi-Fi or mobile network is connected before using this feature. You may incur additional charges when using this feature via the mobile network.

-  : Add an item from the clipboard.
-  : Set options for the keyboard.
-  : Enter emoticons.
-  : Switch to the floating keyboard. You can move the keyboard to another location by dragging the tab.

Copying and pasting

- 1 Tap and hold over text.
- 2 Drag  or  to select the desired text, or tap **Select all** to select all text.
- 3 Tap **Copy** or **Cut**. The selected text is copied to the clipboard.
- 4 Place the cursor where the text is to be inserted and tap  → **Paste**. To paste text that you have previously copied, tap  → **Clipboard** and select the text.

Using the power saving feature

Power saving mode

Save battery power by limiting the device's functions.

On the Apps screen, tap **Settings** → **Power saving** → **Power saving mode**, and then drag the **Power saving mode** switch to the right. Alternatively, open the quick setting panel and tap **Power saving** to activate it.

Ultra power saving mode

Use this mode to extend the device's battery power. In ultra power saving mode the device performs the following:

- Displays colours on the screen as grey tones.
- Restricts the available apps to essential and selected apps only.
- Deactivates the mobile data connection when the screen turns off.
- Deactivates the Wi-Fi and Bluetooth features.

On the Apps screen, tap **Settings** → **Power saving** → **Ultra power saving mode**, and drag the **Ultra power saving mode** switch to the right. Alternatively, open the quick setting panel and tap **U. power saving** to activate it.

To add an app on the Home screen, tap ⊕ and select an app.

To remove an app from the Home screen, tap ⋮ → **Remove**, select an app with ⊖, and then tap **OK**.

To change network connectivity settings and more, tap ⋮ → **Settings**.

To deactivate the ultra power saving feature, tap ⋮ → **Disable Ultra power saving mode**.

The estimated maximum standby time shows the time remaining before the battery power runs out if the device is not used. Standby time may vary depending on your device settings and operating conditions.

Accessing help information

To access help information for an app while you are using the app, tap ⋮ → **Help**.

To access help information to learn how to use the device and apps, on the Apps screen, tap **Settings** → **Help**.

- Some apps may not support this feature.
- Ensure that the Wi-Fi or mobile network is connected before using this feature. You may incur additional charges when using this feature via the mobile network.

Personalising

Switching to easy mode

Easy mode provides an easier user experience by using a simpler layout and bigger icons on the Home screen. You can access the most popular apps and frequently-used settings, and add shortcuts to your favourite contacts.

On the Apps screen, tap **Settings** → **Easy mode** → **Easy mode**, select apps to apply simpler layout, and then tap **DONE**.

To return to standard mode, on the Home screen, tap **Easy settings** → **Easy mode** → **Standard mode** → **DONE**.

Managing shortcuts

To add a shortcut to an app to the Home screen, scroll left, tap , and then select an app.

To add a shortcut to a contact on the Home screen, scroll right, tap .

To delete a shortcut from the Home screen, tap  → **Edit**, select an app or contact with .

Managing the Home and Apps screens

Managing the Home screen

Adding items

Tap and hold an app or a folder from the Apps screen, and then drag it to the Home screen.

To add widgets, on the Home screen, tap and hold an empty area, tap **Widgets**, tap and hold a widget, and then drag it to the Home screen.

Moving and removing an item

Tap and hold an item on the Home screen, and then drag it to a new location.

To move the item to another panel, drag it to the side of the screen.

You can also move frequently-used apps to the shortcuts area at the bottom of the Home screen.

To remove an item, tap and hold the item. Then, drag it to **Remove** that appears at the top of the screen.

Creating a folder

- 1 On the Home screen, tap and hold an app, and then drag it to **Create folder** that appears at the top of the screen.
- 2 Enter a folder name.
- 3 Tap , select the apps to move to the folder, and then tap **DONE**.

Managing panels

On the Home screen, tap and hold an empty area to add, move, or remove a panel.

To add a panel, scroll left to the last panel, and then tap .

To move a panel, tap and hold a panel preview, and then drag it to a new location.

To remove a panel, tap and hold a panel preview, and then drag it to **Remove** at the top of the screen.

To set a panel as the main Home screen, tap .

Managing the Apps screen

Hiding apps

Hide apps that you do not want to see on the Apps screen.

On the Apps screen, tap  → **Hide apps**, select apps, and then tap **DONE**.

To display hidden apps, tap  → **Show hidden apps**, select apps, and then tap **DONE**.

Moving items

On the Apps screen, tap  → **Edit**. Tap and hold an item and drag it to a new location.

To move the item to another panel, drag it to the side of the screen.

To move an item to a new panel, drag it to **Create page** that appears at the top of the screen.

Creating folders

- 1 On the Apps screen, tap  → **Create folder**. Alternatively, tap  → **Edit**, tap and hold an app, and then drag it to **Create folder** that appears at the top of the screen.
- 2 Enter a folder name.
- 3 Tap , select the apps to move to the folder, and then tap **DONE**.

Changing the screen lock method

You can change the way that you lock the screen to prevent others accessing your personal information.

On the Apps screen, tap **Settings** → **Lock screen** → **Screen lock**, and then select a screen lock method. The device requires an unlock code whenever unlocking it.

If the unlock code is forgotten, take the device to a Samsung Service Centre to reset it.

Pattern

Draw a pattern by connecting four dots or more, and then draw the pattern again to verify it. Set a backup PIN to unlock the screen when you forget the pattern.

Fingerprint

Register your fingerprints to unlock the screen. Refer to [Finger Scanner](#) for details.

PIN

A PIN consists of numbers only. Enter at least four numbers, and then enter the password again to verify it.

Password

A password consists of characters and numbers. Enter at least four characters including numbers and symbols, and then enter the password again to verify it.

Setting wallpaper

Set an image or photo stored on the device as wallpaper for the Home screen or the locked screen.

- 1 On the Apps screen, tap **Settings** → **Wallpaper**. Alternatively, on the Home screen, tap and hold an empty area, and then tap **Wallpapers**.
- 2 Select a screen to change or apply wallpaper to.
- 3 Scroll left or right and select from images displayed at the bottom of the screen.
To select photos taken by the device's camera or other images, tap **From Gallery**.
- 4 Tap **SET AS WALLPAPER** or **DONE**.

Changing ringtones

Change ringtones for incoming calls and notifications.

On the Apps screen, tap **Settings** → **Sounds and notifications**.

► **Single SIM models:** To set a ringtone for incoming calls, tap **Ringtones**, select a ringtone, and then tap **OK**. To use a song stored on the device or in your account as a ringtone, tap **ADD**.

To set a ringtone for notifications, tap **Notification ringtone**, select a ringtone, and then tap **OK**.

► **Dual SIM models:** To set a ringtone for incoming calls, tap **Ringtone** → a SIM or USIM card → **Ringtones**, select a ringtone, and then tap **OK**. To use a song stored on the device or in your account as a ringtone, tap **ADD**.

To set a ringtone for notifications, tap **Ringtone** → a SIM or USIM card → **Notifications**, select a ringtone, and then tap **OK**.

Setting up accounts

Adding accounts

Some apps used on your device require a registered account. Create accounts to have the best experience with your device.

On the Apps screen, tap **Settings** → **Accounts** → **Add account** and select an account service. Then, follow the on-screen instructions to complete the account setup.

To sync content with your accounts, select an account and tick items to sync.

Removing accounts

On the Apps screen, tap **Settings** → **Accounts**, select an account, and then tap **⋮** → **Remove account**.

Moving contacts from other devices to your device

Moving contacts using Samsung Smart Switch

You can transfer contacts of the previous device to a new device via Smart Switch (for mobiles and computers). Visit www.samsung.com/smartswitch for more information.

Samsung Smart Switch is not supported on some devices or computers.

Using Smart Switch Mobile

Use this app to transfer contacts from your previous iPhone or Android device to your new device. You can download the app from **Galaxy Apps** or **Play Store**.

- 1 On your device, tap **Smart Switch**.
- 2 On your device, select an option depending on the previous device type and follow the on-screen instructions.

If the previous device is an Android device, ensure that the Smart Switch Mobile app is installed on the device. Refer to the help for more information.

Using Smart Switch with computers

Use this feature to import a backup of your contacts (from selected manufacturer's mobile devices) from a computer to your device. You can download the app from www.samsung.com/smartswitch.

- 1 Back up contacts from a previous device to the computer. For details, contact the device's manufacturer.
- 2 On the computer, launch Smart Switch.
- 3 Connect your current device to the computer using the USB cable.
- 4 On the computer, click the manufacturer of the previous device and follow the on-screen instructions to transfer contacts to your device.

Moving contacts using Samsung Kies

Import a backup of your contacts from your computer via Samsung Kies to restore contacts on your device. You can also back up contacts to the computer via Samsung Kies. Refer to [Connecting with Samsung Kies](#) for details.

Network connectivity

Connecting to a mobile network

Connect the device to a mobile network to use the Internet when a Wi-Fi network is not available.

► **Single SIM models:** On the Apps screen, tap **Settings** → **Data usage**, and then tick **Mobile data**. Alternatively, open the quick setting panel and tap **Mobile data** to activate it.

► **Dual SIM models:** On the Apps screen, tap **Settings** → **Data usage** → a SIM or USIM card, and then tick **Mobile data**. Alternatively, open the quick setting panel and tap **Mobile data** to activate it.

Connecting to a Wi-Fi network

Connect the device to a Wi-Fi network to use the Internet or share media files with other devices. Refer to [Wi-Fi](#) for additional options.

- Your device uses a non-harmonised frequency and is intended for use in all European countries. The WLAN can be operated in the EU without restriction indoors, but cannot be operated outdoors.
- Turn off Wi-Fi to save the battery when not in use.

- 1 On the Apps screen, tap **Settings** → **Wi-Fi**. Alternatively, open the quick setting panel and tap and hold **Wi-Fi**.
- 2 Drag the **Wi-Fi** switch to the right.
- 3 Select a network from the list of detected Wi-Fi networks. Networks that require a password appear with a lock icon.
- 4 Tap **CONNECT**. After the device connects to a Wi-Fi network, the device will automatically connect to it any time it is available.

Adding Wi-Fi networks

If the desired network does not appear in the networks list, tap **Add Wi-Fi network** at the bottom of the networks list. Enter the network name in **Network SSID**, select the security type and enter the password if it is not an open network, and then tap **CONNECT**.

Forgetting Wi-Fi networks

Any network that has ever been used, including the current network, can be forgotten so the device will not automatically connect to it. Select the network in the networks list and tap **FORGET**.

Using Download booster

Use this feature to download large files faster via Wi-Fi and mobile networks simultaneously. Before using this feature, ensure that the mobile data connection and Wi-Fi features are activated. A stronger Wi-Fi signal will provide a faster download speed.

On the Apps screen, tap **Settings** → **Download booster**, and then drag the **Download booster** switch to the right. Alternatively, open the quick setting panel and tap **Download booster** to activate it.

- This feature may not be supported by some devices.
- You may incur additional charges when downloading files via a mobile network.
- When you download large files, the device may heat up. If the device exceeds a set temperature, the feature will turn off.
- If network signals are unstable, the speed and performance of this feature may be affected.
- If the Wi-Fi and mobile network connections have significantly different data transfer speeds, the device may use only the fastest connection.
- This feature supports Hypertext Transmission Protocol (HTTP) 1.1 and Hypertext Transmission Protocol Secure (HTTPS). The feature cannot be used with other protocols, such as FTP.

Using Smart network switch

Use this feature to maintain a stable network connection when you browse webpages, download content, and more. Before using this feature, ensure that the mobile data connection and Wi-Fi features are activated.

You may incur additional charges when using this feature via a mobile network.

On the Apps screen, tap **Settings** → **Wi-Fi**, and then tick **Smart network switch**. The device automatically switches from a Wi-Fi network to a mobile network when the current Wi-Fi network is weak or unstable. When the Wi-Fi network signal becomes strong, the device switches from the mobile network back to the Wi-Fi network.

Tethering devices and using mobile hotspots

About tethering and mobile hotspots

Use this feature to share the device's mobile data connection with computers and other devices if an Internet connection is unavailable. Connections can be made via the Wi-Fi feature, USB, or the Bluetooth feature.

You may incur additional charges when using this feature.

Using the mobile hotspot

Use your device as a mobile hotspot to share your device's mobile data connection with other devices.

Before using this feature

- Ensure that the Wi-Fi feature is deactivated.
- Ensure that the device's mobile data connection is activated.

- 1 On the Apps screen, tap **Settings** → **Tethering and Mobile hotspot** → **Mobile hotspot**.
- 2 Drag the **Mobile hotspot** switch to the right.
 -  appears on the status bar. Other devices can find your device on the Wi-Fi networks list.
 - To set a password for the hotspot, tap  → **Configure hotspot** and select the level of security. Then, enter a password and tap **SAVE**.
- 3 On the other device's screen, search for and select your device from the Wi-Fi networks list.
- 4 On the connected device, use the device's mobile data connection to access the Internet.

Using USB tethering

Share the device's mobile data connection with a computer via a USB cable.

- 1 On the Apps screen, tap **Settings** → **Tethering and Mobile hotspot**.
- 2 Connect your device to the computer via the USB cable.
- 3 Tick **USB tethering**.
 appears on the status bar when the two devices are connected.
- 4 On the computer, use your device's mobile data connection.

Using Bluetooth tethering

Share the device's mobile data connection with connected computers and other devices via Bluetooth.

Before using this feature

- Ensure that your device is paired with the other device via Bluetooth. Refer to [Bluetooth](#) for details.
- Ensure that the computer that you connect to supports the Bluetooth feature.

- 1 On your device, on the Apps screen, tap **Settings** → **Tethering and Mobile hotspot**.
- 2 Tick **Bluetooth tethering**.
- 3 On the connected device, open the Bluetooth settings screen, tap  → **Internet access**.
 appears on the status bar when the two devices are connected.
- 4 On the connected device, use the device's mobile data connection to access the Internet.

The connection methods may vary depending on the connected devices.

Motions & usability features

Control motions

Excessive shaking or impact to the device may result in unintended inputs. Control motions properly.

Air browse

On the Apps screen, tap **Settings** → **Motions and gestures** → **Air browse**, and then drag the **Air browse** switch to the right.

Scroll through pages or lists by moving your hand over the sensor in the direction you want to scroll.

Direct call

On the Apps screen, tap **Settings** → **Motions and gestures** → **Direct call**, and then drag the **Direct call** switch to the right.

While viewing call, message, or contact details, pick up and hold the device to your ear to make a call.

Smart alert

On the Apps screen, tap **Settings** → **Motions and gestures** → **Smart alert**, and then drag the **Smart alert** switch to the right.

When you pick up the device after it has been idle for some time or when the screen has turned off, it vibrates if you have missed calls or new messages.

Mute/pause

On the Apps screen, tap **Settings** → **Motions and gestures** → **Mute/pause**, and then drag the **Mute/pause** switch to the right.

Placing palm on screen

Cover the screen with a palm to mute incoming calls or alarms, or to pause media playback.

Turning device over

Turn the device over to mute incoming calls or alarms, or to pause media playback.

Smart pause

Playback pauses automatically when you look away from the screen. It resumes when you look at the screen again.

Palm swipe to capture

On the Apps screen, tap **Settings** → **Motions and gestures** → **Palm swipe to capture**, and then drag the **Palm swipe to capture** switch to the right.

Place the side of your hand on the screen and sweep it across the screen from the right to the left or vice versa to capture a screenshot. The image is saved in the **Gallery** → **≡** → **Album** → **Screenshots** folder.

It is not possible to capture a screenshot while using some apps.

Air view

Use this feature to perform various functions while your finger is hovering over the screen. Point at the screen to preview content or view information in a pop-up window.

On the Apps screen, tap **Settings** → **Air view**, and then drag the **Air view** switch to the right.

Multi window

About Multi window

Use this feature to run two apps on the screen at the same time. You can use this feature to view emails or use the Internet while you play a video simultaneously.

Launching Multi window

- 1 On the Apps screen, tap **Settings** → **Multi window**, and then drag the **Multi window** switch to the right. Alternatively, open the quick setting panel and tap **Multi window** to activate it.
- 2 Tap and hold  to open the Multi window tray.

- 3 Tap and hold an app icon and drag it from the tray to the screen. Then, drag another app icon to a new location on the screen.

App icons marked with  can be launched in separate windows on the screen at the same time.

Creating a Multi window combination

Use this feature to save the combination of the currently-running Multi window apps.

- 1 Launch two apps in a split screen Multi window.
- 2 Open the Multi window tray and tap  → **Create**.

The currently-running Multi window combination is added to the Multi window tray.

Adjusting the window size

Drag the circle between the app windows up or down to adjust the size of the windows.

Using Multi window options

When you use Multi window apps, select the app window and a blue frame will appear around it. Tap the circle between app windows to access the following options:

-  : Switch locations between Multi window apps.

- : Drag and drop text or copied images from one window to another. Tap and hold an item in the selected window and drag it to a location in another window.

Some apps may not support this feature.

- : Maximise the window.
- : Close the app.

Rearranging apps on the Multi window tray

You can rearrange the apps on the Multi window tray.

- 1 On the Apps screen, tap **Settings** → **Multi window**, and then drag the **Multi window** switch to the right. Alternatively, open the quick setting panel and tap **Multi window** to activate it.
- 2 Open the Multi window tray and tap  → **Edit**.
The device displays the available apps that you can use on the Multi window tray.

3 Tap and hold an app and drag it to the Multi window tray.

4 Tap **Done**.

Toolbox

You can easily launch various apps from the toolbox icon while using other apps.

On the Apps screen, tap **Settings** → **Toolbox**, and then drag the **Toolbox** switch to the right. Alternatively, open the quick setting panel and tap **Toolbox** to activate it.  appears on the screen.

To launch an app, tap  and select an app.

To move the toolbox icon, tap  and drag it to another location.

To change the apps that are in the toolbox, tap and hold , and then drag it to **Edit**.

To hide the toolbox icon, tap and hold , and then drag it to **Remove**.

One-handed operation

You can switch to one-handed operation mode to conveniently operate the device with one hand.

On the Apps screen, tap **Settings** → **One-handed operation**, and then drag the **One-handed operation** switch to the right.

To switch to one-handed operation mode, hold the device in one hand. Then, quickly drag your thumb from the edge of the screen to the centre of the screen and back again.

Managing shortcuts to contacts or apps

You can manage shortcuts to contacts or apps by opening the side menu.

- 1 Tap  or  to open the side menu.
- 2 Tap  at the bottom of the side menu.
- 3 Tap and hold a contact's image or an app, and then drag it to the side menu.
To delete a shortcut to a contact's image or an app, tap .
- 4 Tap .

Increasing touch screen sensitivity

Use this feature to operate the screen while wearing gloves.

On the Apps screen, tap **Settings** → **Display**, and then tick **Increase touch sensitivity**.

Alternatively, open the quick setting panel and tap **Touch sensitivity** to activate it.

- Use leather gloves for better recognition while touching the screen. Other types of material may not be recognised.
- For best results, tap the screen firmly while wearing gloves.
- The screen may not respond if you are wearing gloves when using the device through the S view window screen.

Phone

Making calls

Tap **Phone** on the Apps screen.

► **Single SIM models:** Tap **Keypad**, enter a phone number, and then tap  to make a voice call, or tap  to make a video call. You can also make calls to phone numbers listed in **Logs**, **Favourites**, and **Contacts**.

► **Dual SIM models:** Tap **Keypad**, enter a phone number, and then tap  or  to make a voice call, or tap  to make a video call. You can also make calls to phone numbers listed in **Logs**, **Favourites**, and **Contacts**.

Making calls from call logs or contact lists

Tap **Logs** or **Contacts**, and then drag a contact or a phone number to the right to make a call.

To deactivate the call by dragging an icon to the right feature, tap **⋮** → **Settings** → **Contacts**, and then deselect **Swipe to call or message**.

Making calls from the favourites list

You can easily call contacts that you communicate with frequently by adding them to the favourite contacts list.

To add contacts to the favourites list, tap **Contacts**, select a contact, and then tap **★**.

To make a call to a favourite contact, tap **Favourites** and select a contact.

Number prediction

Tap **Keypad**.

When entering numbers on the keypad, automatic predictions appear. Select one of these to make a call.

Speed dial numbers

Tap **Keypad**.

For speed dial numbers, tap and hold the corresponding digit.

To assign a contact to a speed dial number, tap and hold an available speed dial number on the keypad, tap **OK**, and then select a contact. Or, tap **Contacts** → ⋮ → **Speed dial**, select a number, and then select a contact.

Making an international call

Tap **Keypad**.

► **Single SIM models:** Tap and hold **0** until the + sign appears. Enter the country code, area code, and phone number, and then tap .

To block outgoing international calls, tap ⋮ → **Settings** → **Call** → **More settings** → **Call barring**. Then, select a call type and tick **International calls**.

► **Dual SIM models:** Tap and hold **0** until the + sign appears. Enter the country code, area code, and phone number, and then tap  or .

To block outgoing international calls, tap ⋮ → **Settings** → **Call** → **More settings** → a SIM or USIM card → **Call barring**. Then, select a call type and tick **International calls**.

Receiving calls

Answering a call

When a call comes in, drag  outside the large circle.

If a call notification pop-up window appears while you are using an app, tap **ANSWER** in the pop-up window.

If the call waiting service is activated, another call can be made. When the second call is answered, the first call is put on hold.

Rejecting a call

When a call comes in, drag  outside the large circle.

If a call notification pop-up window appears while you are using an app, tap **REJECT** in the pop-up window.

To send a message when rejecting an incoming call, drag the reject message bar upwards.

To create various rejection messages, on the Apps screen, tap **Phone** →  → **Settings** → **Call** → **Call rejection** → **Rejection messages** → .

Automatically rejecting calls from unwanted numbers

- 1 Tap **Phone** on the Apps screen.
- 2 Tap  → **Settings** → **Call** → **Call rejection** → **Auto reject mode** → **Auto reject numbers**.
- 3 Tap **Auto reject list** → , enter a number, and then assign a category.
- 4 Tap **SAVE**.

Missed calls

If a call is missed,  appears on the status bar. Open the notifications panel to view the list of missed calls. Alternatively, on the Apps screen, tap **Phone** → **Logs** to view missed calls.

During a call

During a voice call

The following actions are available:

-  : Increase the volume.
- **Add call:** Dial a second call.
- **Keypad:** Open the keypad.
- **End call:** End the current call.
- **Speaker:** Activate or deactivate the speakerphone. When using the speakerphone, speak into the microphone at the top of the device and keep the device away from your ears.
- **Mute:** Turn off the microphone so that the other party cannot hear you.
- **Bluetooth:** Switch to a Bluetooth headset if it is connected to the device.

During a video call

Video calling with dual camera mode will be provided for up to 3 minutes. After 3 minutes the device will turn off the rear camera for optimal performance.

Tap the screen to use the following options:

- **Switch:** Switch between the front and rear camera.
- **Mute:** Turn off the microphone so that the other party cannot hear you.
- **End call:** End the current call.

Contacts

Adding contacts

Moving contacts from other devices

You can move contacts from other devices to your device. Refer to [Moving contacts from other devices to your device](#) for details.

Creating contacts manually

- 1 On the Apps screen, tap **Contacts** → **Contacts**.
- 2 Tap **+** and enter contact information.
- 3 Tap **SAVE**.

To add a phone number to the contacts list from the keypad, tap **Keypad**, enter the number, and then tap **Add to Contacts**.

Managing contacts

Editing a contact

- 1 On the Apps screen, tap **Contacts** → **Contacts**.
- 2 Select a contact to edit and tap .
- 3 Edit the contact information or tap **ADD ANOTHER FIELD** to add more contact information.
- 4 Tap **SAVE**.

Deleting a contact

Select a contact to delete, tap  → **Delete**.

Sharing a contact

Select a contact to share, tap  → **Share name card**, and then select a sharing method.

Searching for contacts

On the Apps screen, tap **Contacts** → **Contacts**.

Use one of the following search methods:

- Scroll up or down the contacts list.
- Drag a finger along the index at the right side of the contacts list to scroll through it quickly.
- Tap the search field at the top of the contacts list and enter search criteria.

Once a contact is selected, take one of the following actions:

-  : Add to favourite contacts.
-  /  : Make a voice or video call.
-  : Compose a message.
-  : Compose an email.

Messages & email

Messages

Sending messages

Send text messages (SMS) or multimedia messages (MMS).

You may incur additional charges for sending or receiving messages while you are outside your home service area.

- 1 Tap **Messages** on the Apps screen.
- 2 Tap
- 3 Add recipients and enter a message.
 - **Single SIM models:**

► Dual SIM models:

4 ► **Single SIM models:** Tap to send the message.

► **Dual SIM models:** Tap or to send the message.

Sending scheduled messages

While composing a message, tap → **Schedule message**. Set a time and date and tap **SET**.

- If the device is turned off at the scheduled time, is not connected to the network, or the network is unstable, the message will not be sent.
- This feature is based on the time and date set on the device. The time and date may be incorrect if you move across time zones and the network does not update the information.

Adding contacts to the priority list

Set contacts that you communicate with frequently as priority contacts. Send them messages by selecting a contact icon from above the messages list.

Tap **Tap to add priority senders**. → **INBOX** or **CONTACTS**, select contacts to add, and then tap **DONE**. To add more contacts, tap .

To remove contacts from the priority list, tap and hold a contact, and then tap → **DONE**.

Viewing incoming messages

Incoming messages are grouped into message threads by contact. Select a contact to view the person's messages.

You may incur additional charges for sending or receiving messages while you are outside your home service area.

Email

Setting up email accounts

Tap **Email** on the Apps screen.

Set up an email account when opening **Email** for the first time.

Enter the email address and password. Tap **NEXT** for a private email account, such as Google Mail, or tap **MANUAL SETUP** for a company email account. After that, follow the on-screen instructions to complete the setup.

To set up another email account, tap  → **MANAGE ACCOUNTS** → .

Sending messages

Tap **Email** on the Apps screen.

Tap  at the bottom of the screen. Enter recipients, subject, and message, and then tap .

Tap  to add a recipient from the contacts list.

Tap  to attach images, videos, and others.

Tap  to insert images, events, and others into the message.

Sending scheduled messages

While composing a message, tap  → **Schedule email**. Tick **Schedule email**, set a time and date, and then tap **DONE**.

- If the device is turned off at the scheduled time, is not connected to the network, or the network is unstable, the message will not be sent.
- This feature is based on the time and date set on the device. The time and date may be incorrect if you move across time zones and the network does not update the information.

Reading messages

Tap **Email** on the Apps screen.

Tap , select an email account to use, and new messages are retrieved. To manually retrieve new messages, tap .

Tap a message to read.

Gmail

Use this app to quickly and directly access the Google Mail service.

Tap **Gmail** on the Apps screen.

- This app may not be available depending on the region or service provider.
- This app may be labelled differently depending on the region or service provider.

Camera

Taking photos or videos

About taking photos or videos

Use this app to take photos or videos.

Use **Gallery** to view photos and videos taken with the device's camera. Refer to [Viewing content on the device](#) for details.

Camera etiquette

- Do not take photos or videos of other people without their permission.
- Do not take photos or videos where legally prohibited.
- Do not take photos or videos in places where you may violate other people's privacy.

- The camera automatically shuts off when unused.
- Make sure that the lens is clean. Otherwise, the device may not work properly in some modes that require high resolutions.
- The front camera lens is suitable for taking wide-angle photos. Minor distortion may occur in wide-angle photos and does not indicate device performance problems.

1 Tap **Camera** on the Apps screen.

2 Tap the image on the preview screen where the camera should focus.

3 Tap to take a photo or to take a video.

- To change the focus while taking a video, tap where you want to focus. To focus on the centre of the screen, tap .
- To capture an image from the video while recording, tap .

Viewing photos or videos

You can view photos or videos immediately after taking them by opening the preview thumbnail on the camera screen.

Tap the preview thumbnail at the bottom right of the screen.

Using the HDR (Rich tone) effect

Take photos with rich colours and reproduce details even in bright and dark areas.

On the Apps screen, tap **Camera** → , and then take a photo.

Without effect

With effect

Using selective focus mode

Use the out-of-focus effect to blur the background and make your subject stand out.

Without effect

With effect

Before using this mode

- It is recommended that you position subjects between 10-50 cm from the device. Place subjects that you want to focus on close to the device.
- When taking photos, ensure there is sufficient distance between the subject and the background. The distance should be more than twice the distance between the device and the subject.
- The quality of photos taken by the device may be affected in the following situations:
 - Photos of subjects that are moving.
 - Photos that are taken when the device is moving.
 - Indoor photos, low-light conditions, or if there is strong light behind a subject.
 - Photos using a background that cannot be distinguished from the subject, such as shadows or plain-coloured walls.

- 1 Tap **Camera** on the Apps screen.
- 2 Tap  at the left side of the screen.
If  does not appear, tap  → **Selective focus** to activate it.
- 3 Tap the image on the preview screen where the camera should focus.
- 4 Tap  to take a photo.
- 5 Tap the preview thumbnail at the bottom right of the screen to edit the photo.
- 6 Tap  and select one of the following:
 - **Near focus:** Make the subject stand out and blur the background around the subject.
 - **Far focus:** Blur the subject and make the background stand out around the subject.
 - **Pan focus:** Make the subject and its background stand out.
- 7 Tap .

Launching Camera on the locked screen

To quickly take photos of special moments, launch **Camera** on the locked screen.

- 1 On the locked screen, drag  outside the large circle.
- 2 Tap the image on the preview screen where the camera should focus.
- 3 Tap  to take a photo or  to take a video.

Using the shooting mode

Several photo effects are available.

On the Apps screen, tap **Camera** → **MODE**.

- **Auto:** Use this to allow the camera to evaluate the surroundings and determine the ideal mode for the photo.
- **Beauty face:** Take a photo with lightened faces for gentler images.
- **Panorama:** Take a photo composed of many photos strung together. The device identifies the photo with  in **Gallery**.

To get the best shot, follow these tips:

- Move the camera slowly in one direction.
- Keep the camera's viewfinder within the guide frame.
- Avoid taking photos of a subject in front of unrecognisable backgrounds, such as empty skies or plain walls.
- **Virtual tour:** Take photos of a space by moving the device and shooting from different angles to create a stereoscopic image. The device identifies the photo with  in **Gallery**.
- **Shot & more:** Take a series of photos and apply various effects to them. The device identifies the photos with  in **Gallery**.

- **Dual Camera:** Take landscape photos or videos with the rear or the front camera. The image captured by the front camera appears in an inset window in the image taken by the rear camera, or vice versa.
- **Manage modes:** Select the shooting modes to appear on the mode selection screen.
- **Download:** Download more shooting modes from **Galaxy Apps**.

Using shot & more mode

About shot & more mode

Use this mode to take a series of photos and modify them by applying various effects using the shooting modes.

The zoom function is not available while taking photos in this mode.

- 1 Tap **Camera** on the Apps screen.
- 2 Tap **MODE** → **Shot & more**.
- 3 Tap .
The device takes a series of photos and displays the available shooting modes.
- 4 Select a shooting mode and apply an effect to the photos.
 - **Best photo:** Take a series of photos and save the best one. To view other photos in the series, scroll left or right. The device recommends the best photo and identifies it with .

- **Best face:** Take multiple group shots at the same time and combine them to create the best possible image. Tap the yellow frame on each face and choose the best individual pose for each subject from the poses that appear at the bottom of the screen. Then, merge the images into a single photo. The device recommends the best photo and identifies it with 👑.
- **Drama shot:** Take a series of photos and combine them to create an image that shows motion trails.
- **Eraser:** Erase moving objects in the background. Tap ➖ to erase moving objects. Tap ➕ to restore the original photo.
- **Panning shot:** Apply an effect to the subject's background that makes the subject appear to be moving fast. Tap **Objects** to select a subject. Tap **Motion blur** to change the angle of blurring to apply to the background. Tap ● and draw a circle with your finger around the large circle to adjust the angle of blurring. To adjust the level of background blurring, drag the screen to the left or the right.

5 Tap 📁.

Drama shot

1 Tap **Camera** on the Apps screen.

2 Tap **MODE** → **Shot & more**.

3 Tap 📷.

The device takes a series of photos and displays available effects.

4 When you are finished taking photos, tap **Drama shot**.

5 Select more photos that have motion trails you want to use at the bottom of the screen.

To edit the motion trails of selected photos, tap ✎ and select a photo.

Tap 🖌 to display subject's motion trails or tap 🗑 to erase the motion trails. Edit the photo as desired and tap **DONE**.

6 Tap  to save.

To get the best shot, follow these tips. The device may not take photos properly in other shooting conditions.

- Hold the camera steady and remain still while taking photos.
- Take photos of a subject that is moving in one direction.
- Take photos with backgrounds that are free of moving objects.
- Avoid taking photos of a subject and background with similar colours.

Using dual camera mode

When you take a landscape photo with the rear camera, the photo or video captured by the front camera appears in an inset window, or vice versa. Use this feature to take a beautiful landscape photo and a self-portrait simultaneously.

On the Apps screen, tap **Camera** → **MODE** → **Dual Camera** to switch to dual camera mode. Tap  to take a photo or tap  to take a video.

- You can record videos in dual camera mode for up to 5 minutes in Full HD and up to 10 minutes in HD or VGA.
- While taking videos in this mode, sound is recorded by the internal microphone.

Using virtual tour mode

About virtual tour mode

Use this shooting mode to take photos in a space by moving forwards, or rotating left or right. Photos of the space are taken from different angles. You can view the photos in a slideshow and simulate actually moving through the space.

- 1 Tap **Camera** on the Apps screen.
- 2 Tap **MODE** → **Virtual tour**.
- 3 Move with the device to position the dot inside the large circle in the centre of the preview screen. The device detects when you stop and starts to take photos from that position in the space.

- 4 Move slowly forwards, or rotate left or right while taking photos. Whenever the dot is inside the large circle, the device takes a photo automatically.

- 5 Move with the device slowly in the direction of the arrow. When the dot is in the centre of the large circle, the device starts taking photos. Repeat this action to take more photos.

To see a preview of the photo, tap > at the bottom left of the screen. The direction where images were taken is displayed on each preview thumbnail.

To delete the last photo that was taken, tap **Undo**.

- 6 To finish, tap .

Viewing photos

View a series of photos taken from different locations and directions.

- 1 On the Apps screen, tap **Gallery**.
- 2 Select an image with the  icon on the image thumbnail.
- 3 Tap .

The device displays the photos in a slideshow.

Drag to view the photo from other locations and directions.

Start or pause the slideshow.

Display movement paths.

Applying filter effects

Use the filter effects to take unique photos or videos.

- 1 Tap **Camera** on the Apps screen.
- 2 Tap **⚙️** → **Effects**, and then select an effect to apply.
To download more effects, tap **Download**.
To change the order of effects or hide effects from the list, tap **Manage effects**.

Using the zoom feature

Zoom in and out the screen when taking photos or videos.

Spread two fingers apart on the screen to zoom in, and pinch to zoom out.

The zoom in/out effect is available when using the zoom feature while shooting video.

Using remote viewfinder mode

Use your device as a viewfinder for another device. You can control the other device remotely to take photos or videos from a distance. Your device displays the same image that is displayed on the connected device.

- 1 Tap **Camera** on the Apps screen.
- 2 Tap  → **Remote viewfinder**.
- 3 Tap **EASILY CONNECT VIA NFC** or **WI-FI DIRECT SETTINGS** to connect to another device.
 - **EASILY CONNECT VIA NFC:** Activate the NFC feature on both devices.
 - **WI-FI DIRECT SETTINGS:** Activate the Wi-Fi Direct feature on both devices.
- 4 Tap the image on the preview screen where the device should focus.
- 5 Tap  to take the photo displayed on the connected device's viewfinder.

Ensure that the device you want to connect to supports the remote viewfinder mode.

Changing Camera settings

Reorganising camera shortcuts

- 1 On the Apps screen, tap **Camera** → ⚙️.
- 2 Tap and hold an item and drag it to a slot at the left of the screen.
You can reorganise camera shortcuts for fast and easy access on the preview screen.

Configuring settings

On the Apps screen, tap **Camera** → ⚙️. Not all of the following options are available in both still camera and video camera modes. The available options vary depending on the mode used.

Gallery

Viewing content on the device

1 Tap **Gallery** on the Apps screen.

2 Select an image.

- Selecting multiple images:

When you tap and hold an image, ✓ appears on the image. Then, tap images to select more.

- Selecting all images:

When you tap and hold an image, ✓ appears on the image. Then, tap **1 selected**.

3 Select an option.

Viewing content stored on other devices

You can view content stored on other devices if the devices are registered with Samsung Link. Sign in to your Samsung account to view a list of other devices that have content available to view. Ensure that the registered devices are turned on and connected to a Wi-Fi or mobile network. Visit link.samsung.com for more information.

You may incur additional charges when you access content stored on other devices via the mobile network. To avoid additional charges, use the Wi-Fi feature.

Tap , select a device under **Registered devices**, and then select content.

Modifying content on the device

Using studio mode

While viewing images or videos, you can use the editing features in studio mode to edit the content.

On the Apps screen, tap **Gallery** → **⋮** → **Studio**.

- **Photo studio:** Edit images by applying various effects.
- **Collage studio:** Combine several images together to create a collage.
- **Shot & more:** Apply various effects to the images you have taken.
- **Video clip studio:** Edit or create videos with multiple images.
- **Video trimmer:** Trim video segments.

Editing images

- 1 Tap **Gallery** on the Apps screen.
- 2 Tap **⋮** → **Studio** → **Photo studio**, and then select an image.
- 3 Edit the image by applying various effects.

4 Tap **DONE** → .

5 Select a save option and tap **SAVE**.

The edited photo is saved in the **Studio** folder. To open the folder, tap **Gallery** →  → **Album** → **Studio**.

Editing videos

1 Tap **Gallery** on the Apps screen.

2 Tap  → **Studio** → **Video clip studio**.

3 Select videos to edit and tap **DONE**.

You can also select images to create a video.

4 Edit the video by applying various effects.

5 Tap .

6 Select a save option and tap **SAVE**.

The edited video is saved in the **Studio** folder. To open the folder, tap **Gallery** →  → **Album** → **Studio**.

Internet & SNS

Internet

Browsing webpages

- 1 Tap **Internet** on the Apps screen.
- 2 Tap the address field. To change the search engine, tap the search engine icon next to the web address field.
- 3 Enter the web address or a keyword, and then tap **Go**. To search the web by voice, tap . To view the toolbars, drag your finger downwards slightly on the screen.

Chrome

Use this app to search for information and browse webpages.

Tap **Chrome** on the Apps screen.

This app may not be available depending on the region or service provider.

Tap the address field, enter the web address or a keyword, and then tap **Go**.

Hangouts

Use this app to chat and socialise with your friends individually or in groups.

Tap **Hangouts** on the Apps screen.

This app may not be available depending on the region or service provider.

Select a friend from the friends list or enter data to search and select a friend from the results to start chatting.

S Health

About S Health

Use this app to set your calorie intake and calorie burning levels based on your physical statistics. You can use it to record the actual calories you eat and burn. Also, the app recommends exercises and provides health tips to help you maintain a balanced-lifestyle.

Tap **S Health** on the Apps screen.

Starting S Health

When running this app for the first time, read and agree to the terms and conditions, and then set up a user profile.

- 1 Tap **S Health** on the Apps screen.
- 2 Follow the on-screen instructions to complete the setup.

Using S Health

You can view the key information from S Health menus and trackers to monitor your wellness and fitness.

Tap **S Health** on the Apps screen.

Access additional options.

Measuring steps taken

The device counts the number of steps you have taken and measures the distance travelled. It also measures the calories you have burnt using a sensor.

On the S Health main screen, tap **Steps**.

The device measures your step count, distance travelled, and burnt calories, and displays them in real-time.

The measurements are saved.

View the logs of your daily steps.

- You may experience a brief delay while the Steps monitors your steps and displays your step count.
- If you use the Steps monitor while travelling by car or train, vibration may affect your step count.

Using the additional menus

You can download and install various apps that are compatible with this app.

- 1 Tap **MORE** → **Partner apps**.
- 2 Select an app.
- 3 Follow the on-screen instructions and install the app.

- The personal information collected by S Health may be stored on the device for informative purposes only. Samsung does not receive, store, nor transmit your personal information. (But if you sign in to your Samsung account from S Health, your data may be saved on the server for data backup purposes.) Personal information may be stored until the completion of such purposes. You can delete personal data stored by S Health by using the Reset data option in the Settings menu or by uninstalling the app. Resetting the data will delete all information stored in the server. To delete any data you have shared with social networks or transferred to storage devices, you must delete them separately.
- You assume full responsibility for the inappropriate use of data shared on social networks or transmitted to others. Use caution when sharing your personal data with others.
- To secure your personal information, on the S Health main screen, tap **MORE** → **Settings** → **Password**, and then set a password.
- If the device is connected to measuring devices, verify the communication protocol to confirm proper operation. If you use a wireless connection, such as Bluetooth or ANT+, the device may be affected by electronic interference from other devices. Avoid using the device near other devices that transmit radio waves.
- The content used in the S Health app may vary depending on the software version of the app. The services provided with the app are subject to change or the cancellation of support without prior notice.

Voice features

S Voice

About S Voice

Use this app to command the device by voice to perform various features.

Tap **S Voice** on the Apps screen. Alternatively, press the Home button twice.

To deactivate the access by pressing the Home button, tap **⋮** → **Settings**, and then deselect **Open via the home key**.

This app may not be available depending on the region or service provider.

Setting the language

Tap **⋮** → **Settings** → **Language**, and then select a language.

The selected language is applied to **S Voice** only, not to the device's display language.

Using S Voice

When you launch **S Voice**, the device starts voice recognition and the microphone icon turns blue.

Say a voice command.

If the device recognises the command, the device will perform the corresponding action.

Tips for better voice recognition:

- Speak clearly.
- Speak in quiet places.
- Do not use offensive or slang words.
- Avoid speaking in dialectal accents.

The device may not recognise your commands or may perform unwanted commands depending on your surroundings or how you speak.

Waking up S Voice in standby mode

If S Voice is not used for a certain period, it automatically switches to standby mode.

Tap the microphone icon or say “Hi Galaxy” to the device to resume voice recognition.

Changing the wake-up command

You can change the wake-up command from “Hi Galaxy”. The wake-up command is used to launch **S Voice** when the device is in standby mode.

Tap  → **Settings** → **Voice wake-up** → **Set wake-up command**.

Disabling voice feedback

Tap  → **Disable Voice feedback**. The device stops providing voice feedback when you say commands.

Correcting unwanted voice commands

You can edit the voice commands if the device does not recognise them correctly.

To correct a voice command, tap the last speech bubble that contains your spoken text and edit the text with the keyboard.

Voice Recorder

Recording voice memos

Tap **Voice Recorder** on the Apps screen.

Tap  to start recording. Speak into the microphone. Tap  to pause recording. To cancel recording, tap . Tap  to finish recording.

While recording a voice memo, tap  to insert a bookmark.

To set the device to remove background noise, tap  → **Settings**, and then tick **Noise reduction**.

Saving files with contextual tags

Add contextual tags, such as locations and dates, to filenames when saving voice memos.

Tap  → **Settings**, and then tick **Contextual filename**. The device adds the recording date to a filename. To add the location where a voice memo is recorded, tap  → **Settings**, and then tick **Location tags**.

Playing voice memos

Tap **Voice Recorder** on the Apps screen.

Tap  and select a voice memo to play.

- : Trim the voice memo.
- : Set a portion of the voice memo for looped play.
- **x1.0**: Adjust the playback speed.
- : Skip a silent portion in the voice memo.
- : Insert bookmarks on the voice memo.
-  / : Pause or resume playback.
-  / : Skip to the previous or next voice memo.

Using the bookmarks list

You can mark specific points in a voice memo with bookmarks. Each bookmark is marked with a bookmark icon on the voice memo.

To view the bookmark details while a voice memo is playing, tap  → **Bookmarks**. Select a bookmark from the bookmark list to play the voice memo from that position.

Managing voice memos

On the Apps screen, tap **Voice Recorder** → .

Tap  to search for voice memos.

Tap  to delete voice memos.

Renaming voice memos

Tap and hold the voice memo, tap  → **Rename**, enter the name for the voice memo, and then tap **RENAME**.

Managing categories

Tap  → **Edit categories** → , enter a category name, select a colour, and then tap **DONE**.

To change or assign voice memo categories, in the list of voice memos, tap and hold the voice memo. Then, tap  → **Change category**, and then select the category.

To filter voice memos by category, tap  → **Filter by category**, and then select the category.

Voice Search

Use this app to search webpages by speaking.

Tap **Voice Search** on the Apps screen.

This app may not be available depending on the region or service provider.

Say a keyword or phrase when **Listening...** appears on the screen.

Car mode

About car mode

Use this mode to control the device while you are driving. You can listen to messages and music by using voice commands and without touching the device.

Open the quick setting panel and tap **Car mode** to activate it.

Do not look at the screen or perform functions with your hands while driving.

- Navigation maps, your current location, and other navigational data may differ from actual location information. You should always pay attention to road conditions, traffic, and any other factors that may affect your driving. Follow all safety warnings and regulations while driving.
- You may incur additional charges when using the navigation feature.
- This app may not be available depending on the region or service provider.
- This mode is not supported in some languages.

Before using this mode

- Ensure that the vehicle that you connect your device to supports the Bluetooth feature.
- Ensure that the Bluetooth feature of your device and the vehicle is activated when you register the vehicle to the device.

Starting car mode

When running this app for the first time, follow the on-screen instructions to complete the setup.

- 1 Open the quick setting panel and tap **Car mode** to activate it.
- 2 When the car mode screen appears, tap **NEXT**.
- 3 Read and agree to the terms and conditions, and then tap **NEXT**.
- 4 Read the warning content and tap **NEXT**.
- 5 Tap **YES** to connect your device and a vehicle via Bluetooth.
When the device cannot search for the vehicle, on the device, tap **SEARCH FROM MOBILE DEVICE** and register the vehicle manually.
- 6 When you finish registration, tap **NEXT**.
- 7 Read the on-screen instructions and tap **START**.
When you finish the setup, the car mode main screen appears.

Registering a vehicle

When you register a vehicle to your device, you can listen to voice feedback from the device via the car's speakers. You can also set the device to activate car mode automatically when it connects to the vehicle, and more.

- 1 Tap  → **Settings** → **My cars** → **Add car**.
 - 2 Follow the on-screen instructions to connect the device and the vehicle.
If the vehicle cannot detect your device, tap **SEARCH FROM MOBILE DEVICE** to search for the vehicle on your device.
- 
 - Before registering your vehicle, start the vehicle and turn on the radio.
 - While you are registering a vehicle to the device, place the device near the vehicle.

Activating car mode automatically

You can set the device to activate car mode when the device and a vehicle are connected via Bluetooth.

When you finish registering the vehicle, tap  → **Settings** → **My cars**, and then tick **Auto Open via Bluetooth**.

Adding shortcuts to frequently-visited places

Save shortcuts to frequently-visited places to easily search for routes.

1 Tap  → **Settings** → **Registered Places**.

2 Tap **Home**, **Work**, or **Car**.

To add new places, tap , enter a place name, set a location recognition method, and then tap **DONE**.

3 Tap **Select method** and select a location recognition method, such as maps, Wi-Fi, or Bluetooth.

4 Tap **DONE**.

Using car mode menus

Open the quick setting panel and tap **Car mode** to activate it.

When the car mode main screen appears, say “Hi, Galaxy,” or tap the upper part of the screen, and say a voice command. Alternatively, you can use menus on the screen by tapping them.

- If car mode is running in the background, you can use a voice command to wake up car mode. This feature is not available if the device is already set to launch **Google** by saying “OK Google”. To deactivate wake-up voice command, on the Apps screen, tap **Settings** → **Language and input** → **Google voice typing** → “Ok Google” detection.
- “Ok Google” detection may not be available depending on the region or service provider.

Using the navigation feature

Open the quick setting panel and tap **Car mode** to activate it.

Navigating to a preset destination

The device navigates you to the preset destination. Before using this feature, save shortcuts to frequently-visited places to easily search for routes. Refer to [Adding shortcuts to frequently-visited places](#) for details.

- 1 On the car mode main screen, say "Hi Galaxy" or tap the upper part of the screen.
- 2 Say "**Navigation**" and the name of the preset destination using a voice command. Alternatively, tap **Navigation** and select a preset destination, such as **Home**, **Work**, or **My Place**.

Navigating to a destination

Select a location precisely by tapping and holding your finger on the map. Or, use a voice command to navigate to a destination.

- 1 On the car mode main screen, say “Hi Galaxy” or tap the upper part of the screen.
- 2 Say “**Navigation**” or tap **Navigation**.
- 3 Say a keyword or the address for the location using a voice command. Alternatively, tap **Map** and enter a keyword or the address for the location.
To search for a location, tap the search field.
- 4 Say “**Route**” or tap **Route**.

Multimedia

Music

Playing music

Tap **Music** on the Apps screen.

Select a music category, and then select a song to play.

Playing music stored on other devices

Search for music that is stored on other devices and play it on your device.

Tap **Music** on the Apps screen.

Accessing music on a registered device

Tap **DEVICES** and select a device in **Registered devices** to access and play music. You can play the song on the devices that are registered to Samsung link. Visit link.samsung.com for more information. Ensure that the registered devices are turned on and connected to a Wi-Fi or mobile network.

You may incur additional charges when you access content stored on other devices via the mobile network. To avoid additional charges, use the Wi-Fi feature.

Accessing music on a nearby device

Tap **DEVICES** and select a device in **Nearby devices** to access and play music. You can play the song on the devices with content sharing feature activated.

To activate the feature, on the Apps screen, tap **Settings** → **Nearby devices**, and then drag the **Nearby devices** switch to the right. Refer to [Nearby devices](#) for more settings.

Video

Playing videos

Tap **Video** on the Apps screen.

Select a video to play.

To customise the control panel location during playback, tap **⋮** → **Settings**, tick **Mini controller**, and then tap **CLOSE**. Then, tap **◀** or **▶** to move the control panel to either side of the screen.

This feature is available only in landscape orientation.

Playing videos stored on other devices

Search for videos that are stored on other devices and play them on your device.

Tap **Video** on the Apps screen.

Accessing a video on a registered device

Tap **DEVICES** and select a device in **Registered devices** to access and play the video. You can play the video on the devices that are registered to Samsung link. Visit link.samsung.com for more information. Ensure that the registered devices are turned on and connected to a Wi-Fi or mobile network.

You may incur additional charges when you access content stored on other devices via the mobile network. To avoid additional charges, use the Wi-Fi feature.

Accessing a video on a nearby device

Tap **DEVICES** and select a device in **Nearby devices** to access and play the video. You can play the video on devices that have the content sharing feature activated.

To activate the content sharing feature, on the Apps screen, tap **Settings** → **Nearby devices**, and then drag the **Nearby devices** switch to the right. Refer to [Nearby devices](#) for more settings.

YouTube

Use this app to watch videos from the YouTube website.

Tap **YouTube** on the Apps screen.

This app may not be available depending on the region or service provider.

Flipboard

Use this app to access your personalised magazines.

Tap **Flipboard** on the Apps screen.

This app may not be available depending on the region or service provider.

To start your Flipboard, flick up on the greeting page, and select news topics.

Select a cover story or a topic, flick through the Flipboard pages, and then select an article to read.

Google+

Use this app to stay connected with people via Google's social network service.

Tap **Google+** on the Apps screen.

This app may not be available depending on the region or service provider.

Tap **Home** to change the category, and then scroll up or down to view posts from your circles.

Photos

Use this app to manage photos, albums, and videos that you have saved on the device and uploaded to **Google+**.

Tap **Photos** on the Apps screen.

This app may not be available depending on the region or service provider.

Play Games

Use this app to download and play games.

Tap **Play Games** on the Apps screen.

This app may not be available depending on the region or service provider.

Play Music

Use this app to listen to music from the device or stream music from the Google cloud service.

Tap **Play Music** on the Apps screen.

This app may not be available depending on the region or service provider.

Play Newsstand

Use this app to read the latest news articles.

Tap **Play Newsstand** on the Apps screen.

This app may not be available depending on the region or service provider.

Security

Finger Scanner

For better fingerprint recognition

When you scan your fingerprints on the device, be aware of the following conditions that may affect the feature's performance:

- The Home button contains a fingerprint recognition sensor. Ensure that the Home button is not scratched or damaged by metal objects, such as coins, keys, and necklaces.
- The screen protector supplied with the device may cause the fingerprint recognition sensor to malfunction. Remove the screen protector to improve fingerprint sensitivity.
- Ensure that the fingerprint recognition area and your fingers are clean and dry.
- The device may not recognise fingerprints that are affected by wrinkles or scars.
- The device may not recognise fingerprints from small or thin fingers.
- To improve recognition performance, register fingerprints of the hand used most often to perform tasks on the device.
- Do not drag your finger too quickly or slowly. Drag your finger at a moderate speed to allow the device to recognise it.
- In dry environments, static electricity can build up in the device. Avoid using this feature in dry environments or before using the feature, discharge static electricity by touching a metal object.

Registering fingerprints

- 1 On the Apps screen, tap **Settings** → **Finger Scanner** → **Fingerprint manager**.
- 2 Read the on-screen information and tap **OK**.
- 3 Place your finger on the fingerprint area at the bottom centre of the screen.
- 4 Tap and hold the screen in the fingerprint area, and then drag your finger downwards over the Home button.

Repeat this action using the same finger until the fingerprint is registered.

If you bend your finger or use a fingertip, the device may not recognise your fingerprints.

- 5 Tap **DONE** to finish scanning your fingerprint. Or, tap **REGISTER** to register an additional fingerprint.
- 6 When a screen appears requesting to register a backup password, enter the backup password, and then tap **CONTINUE**.
- 7 Enter the backup password again to verify it, and then tap **OK**.
You can use the backup password instead of scanning your fingerprints.
- 8 When a fingerprint lock pop-up window appears, tap **OK**. You can use your fingerprints to unlock the screen.

Managing registered fingerprints

You can delete or rename your registered fingerprints.

On the Apps screen, tap **Settings** → **Finger Scanner** → **Fingerprint manager**.

To delete fingerprints, tap  → **Deregister**, select fingerprints, and then tap **DONE** → **OK**.

To rename a fingerprint, tap  → **Select**, select a fingerprint, tap , and then enter a new name, and then tap **OK**.

Changing the alternative password

You can change the password that you use as an alternative to scanning your fingerprints.

- 1 On the Apps screen, tap **Settings** → **Finger Scanner** → **Change backup password**.
- 2 Enter the backup password.
- 3 Enter a new password and tap **CONTINUE**.
- 4 Enter the password again and tap **OK**.

Unlocking the screen with fingerprints

You can unlock the screen with the registered fingerprints.

On the Apps screen, tap **Settings** → **Finger Scanner** → **Screen lock** → **Fingerprint**.

Alternatively, on the Apps screen, tap **Settings** → **Lock screen** → **Screen lock** → **Fingerprint**.

Verifying the Samsung account password

Use fingerprints to verify your Samsung account password. You can use a fingerprint instead of entering your password, for example, when you purchase content from **Galaxy Apps**.

On the Apps screen, tap **Settings** → **Finger Scanner** → **Verify Samsung account**, and then drag the **Verify Samsung account** switch to the right.

Using fingerprints for purchases via PayPal

You can make purchases by scanning your fingerprints.

This feature may not be available depending on the region or service provider.

- 1 On the Apps screen, tap **Settings** → **Finger Scanner** → **Pay with PayPal**.
- 2 Tick **FIDO Ready™ support** and **PayPal**, and then tap **INSTALL**.
- 3 When the installation is complete, tap **LINK PAYPAL ACCOUNT**.
- 4 Follow the on-screen instructions to sign in to the PayPal website and register your fingerprints.

Private mode

About private mode

Use this mode to prevent others from using or accessing specific content, such as images and documents, stored on the device. You can save content to a specific location and deactivate private mode to hide items securely.

Hiding content

- 1 On the Apps screen, tap **Settings** → **Private mode**, and then drag the **Private mode** switch to the right. Alternatively, open the quick setting panel and tap **Private mode** to activate it.
When you activate private mode for the first time, set an unlock code and a backup PIN.
- 2 Enter the private mode unlock code.
When this mode is activated,  appears at the top of the screen.

- 3 To select items to hide, tap and hold an item in the list, tick items to select, and then tap **→ Move to Private**.

Items that are moved to private mode appear with  on them.

- 4 When you have selected the items to hide, on the Apps screen, tap **Settings → Private mode**, and then drag the **Private mode** switch to the left. Alternatively, open the quick setting panel and tap **Private mode** to deactivate it.

The selected items will disappear from the screen.

Ensure that all files are saved or moved properly before deactivating private mode.

Viewing hidden content

You can only view hidden items when private mode is activated.

- 1 On the Apps screen, tap **Settings → Private mode**, and then drag the **Private mode** switch to the right. Alternatively, open the quick setting panel and deactivate **Private mode**.
- 2 Enter the private mode unlock code.
- 3 On the Apps screen, tap **My Files → Private**.

All items moved in private mode appear on the screen.

Safety

Emergency mode

About emergency mode

Use this mode to extend the device's standby time when you are in an emergency situation. When this mode is activated, the screen's brightness decreases and battery consumption is reduced by restricting some features. You can also turn on the flash, sound alarms, and send your location information to others in a message.

Activating emergency mode

Press and hold the Power button, and then tap **Emergency mode**. Alternatively, on the Apps screen, tap **Settings** → **Safety assistance** → **Emergency mode**, and then drag the **Emergency mode** switch to the right.

You may incur additional charges for sending messages or using the mobile network.

The estimated maximum standby time shows the time remaining before the battery power runs out if the device is not used. Standby time may vary depending on your device settings and operating conditions.

Deactivating emergency mode

To deactivate emergency mode, press and hold the Power button, and then tap **Emergency mode**. Alternatively, tap **⋮** → **Disable Emergency mode**. Emergency mode is deactivated.

Sending help messages

About sending help messages

You can preset contacts to send a message to in an emergency. Send messages to your primary contacts by quickly pressing the Power button three times.

On the Apps screen, tap **Settings** → **Safety assistance**.

Some features may not be available depending on the region or service provider.

Adding primary contacts

- 1 On the Apps screen, tap **Settings** → **Safety assistance**.
- 2 Tap **Manage primary contacts** → **Create primary contact**.
- 3 Tap **Create contact** and enter contact information or tap **Select from contacts** to add an existing contact as a primary contact.

Setting help messages

On the Apps screen, tap **Settings** → **Safety assistance** → **Send help messages**, drag the **Send help messages** switch to the right, and then select content to include in help messages.

Sending help messages

In an emergency situation, quickly press the Power button three times. The device sends messages to your primary contacts. The messages include your location information.

You may incur additional charges for sending messages or using the mobile network.

Severe weather notification (Geo News)

About severe weather notification (Geo News)

Use this feature to receive notifications about severe weather conditions close to your current location.

- The feature identifies your location and provides you with information about disasters if they occur in your area. The information provided may differ depending on the service provider in your current location.

To view information about severe weather conditions and the regions and languages that the information is available in, visit www.samsung.com/geonews.

- You may incur additional charges if you receive notifications from a weather forecasting service while you are roaming.

Receiving notifications

On the Apps screen, tap **Settings** → **Safety assistance** → **Geo News**, and then drag the **Geo News** switch to the right.

Pop-up notifications

Tick **Geo News notification pop-ups**.

The device displays the notification in a pop-up window. You can make an emergency call or send emergency messages to preset contacts from the pop-up window.

Using the geo news widget

You can view your current location and information about disasters in your region in the **Geo News** widget.

On the Home screen, scroll left and tap the **Geo News** widget.

Access additional options.

Current location

Disaster information for your current location.

Utilities

S Finder

Use this app to search for content on the device and via the Internet. You can apply various filters and view the search history.

Open the notifications panel and tap **S Finder**.

Searching for content

Tap the search field and enter a keyword, or tap  and say a keyword.

To get more refined results, tap **Filter**.

Managing the search history

To delete the history, tap  next to an item.

S Planner

Starting S Planner

Use this app to manage events and tasks.

Tap **S Planner** on the Apps screen.

Creating events or tasks

- 1 Tap **S Planner** on the Apps screen.
- 2 Tap **+**. Alternatively, select a date with no events or tasks in it and tap the date again. If the date already has saved events or tasks in it, tap the date and tap **+**.

3 Select either event or task and enter details.

- **Add event:** Set a start and end date for an event. You can set an optional repeat setting.
- **Add task:** Add a task to do on a specific date. You can set an optional priority setting.

4 Tap **SAVE** to save the event or task.

Syncing events and tasks with your accounts

Tap **S Planner** on the Apps screen.

To sync events and tasks with your accounts, tap **⋮** → **Sync now**.

To add accounts to sync with, tap **⋮** → **Calendars** → **Add account**. Then, select an account to sync with and sign in. When an account is added, a green circle is displayed next to the account name.

To change an account's syncing option, on the Apps screen, tap **Settings** → **Accounts**, and then select an account service.

Deleting events or tasks

Tap **S Planner** on the Apps screen.

To delete events or tasks, tap  → **Delete**, select the events or tasks, and then tap **DONE** → **DELETE**.

To delete an event or task while viewing it, tap  → **DELETE**.

To mark tasks as completed, tap a date that has tasks in it and tick completed tasks.

Sharing events or tasks

Tap **S Planner** on the Apps screen.

To share an event or task while viewing it, tap  and then select a sharing method.

Calculator

Use this app for simple or complex calculations.

Tap **Calculator** on the Apps screen.

Rotate the device to landscape orientation to display the scientific calculator. If **Screen rotation** is disabled, tap  → **Scientific calculator**.

To see the calculation history, tap  to hide the keypad.

To clear the history, tap  → **CLEAR HISTORY**.

Clock

Alarm

On the Apps screen, tap **Clock** → **Alarm**.

Setting alarms

Tap **+** in the alarms list, set an alarm time, select the days on which the alarm will repeat, set other various alarm options, and then tap **DONE**. To activate or deactivate alarms, tap  next to the alarm in the alarms list.

- **Snooze:** Set an interval and the number of times for the alarm to repeat after the preset time.
- **Smart alarm:** Set a time and tone for the smart alarm. A smart alarm starts at a low volume a few minutes before a preset alarm is scheduled to sound. The volume of the smart alarm increases gradually until you turn it off or the preset alarm sounds.

Stopping alarms

Drag **X** outside the large circle to stop an alarm. Drag **ZZ** outside the large circle to repeat the alarm after a specified length of time.

Deleting alarms

Tap  → **Delete**, select alarms, and then tap **DONE**.

World clock

On the Apps screen, tap **Clock** → **World clock**.

Creating clocks

Tap **+** and enter a city name or select a city from the cities list.

To apply summer time, tap and hold a clock, and then tap .

Deleting clocks

Tap  → **Delete**, select clocks, and then tap **DONE**.

Stopwatch

On the Apps screen, tap **Clock** → **Stopwatch**.

Tap **START** to time an event. Tap **LAP** to record lap times.

Tap **STOP** to stop timing. To clear lap times, tap **RESET**.

Timer

On the Apps screen, tap **Clock** → **Timer**.

Set the duration, and then tap **START**.

Drag **X** outside the large circle when the timer goes off.

Drive

Use this app to access files stored in your Google Drive storage service. You can store all your files in one place, access them from anywhere, and share them with others.

Tap **Drive** on the Apps screen.

This app may not be available depending on the region or service provider.

Dropbox

Use this app to save and share files with others via the Dropbox cloud storage. When you save files to Dropbox, your device automatically syncs with the web server and any other devices that have Dropbox installed.

This app may not be available depending on the region or service provider.

- 1 Tap **Dropbox** on the Apps screen.
- 2 Sign in to your Dropbox account. If you do not have it, create a Dropbox account.

3 Tap **TURN ON CAMERA UPLOAD**.

The device uploads photos taken with the device's camera to Dropbox. To upload videos, drag the **Include videos** switch to the right.

To upload photos or videos manually, tap **SKIP**.

4 Tap to use the following functions:

- **Files:** Upload or open files. Tap  to upload files.
- **Photos:** View the uploaded photos or videos. Tap  to share or delete files, or create albums.
- **Offline files:** View photos and videos while you are offline.
- **Notifications:** View notifications.

Google

Use this app to search the Internet. You can also use it to search for apps and app content saved on the device or memory card.

Tap **Google** on the Apps screen.

This app may not be available depending on the region or service provider.

Kids Mode

Use this widget to provide a fun and safe environment for children by restricting children's access to certain apps or content.

Before you use this widget, you need to download and install it. On the Home screen, tap **Kids Mode** → **INSTALL**. When it is installed, the widget appears on the Home and App screens.

To start kids mode, tap **Kids Mode** on the Home or Apps screen.

When you launch this widget for the first time, set PIN. Then, follow the on-screen instructions.

If the **Kids Mode** widget is accidentally uninstalled, you can reinstall it. On the Home screen, tap and hold an empty area, tap **Widgets**, tap and hold the **Kids Mode** widget. Drag the widget to the Home screen and tap **Kids Mode** to reinstall it.

Kids mode home screen

The Home screen is the starting point to access all of apps in kids mode.

Use this app to take photos or videos.

Use this app to view saved images, drawings, voice recordings, and media files that you allow your child to access.

Parental control

Use this feature to set restrictions for kids mode to control access to content and apps. You can change kids mode settings, usage time limits, and more.

On the Home screen, tap and enter the PIN.

To exit parental control, press the Home button.

- **Daily playtime limit:** Set a time limit to manage your children's usage.
- **Contacts:** Allow your children to access specific contacts.
- **Apps:** View and add apps that are allowed to be used in kids mode.
- **Media:** Allow your children to access certain images and videos saved on the device.
- **Kids Store:** Download apps for kids from **Galaxy Apps**.

Magnifier

Use this widget to magnify text or objects with the rear camera.

To add it to the Home screen, on the Home screen, tap and hold an empty area, tap **Widgets**, tap and hold the **Magnifier** widget, and then drag it to the Home screen.

Tap the **Magnifier** widget on the Home screen.

Tap **+** or **–** to adjust the magnification.

To focus on the centre of the screen, tap . You can also adjust the focus manually by tapping where you want to focus.

To turn on the flash to view text or objects in dark conditions, tap .

To take a photo of text or objects, tap .

Maps

Use this app to pinpoint the location of the device, search for places, or get directions.

Tap **Maps** on the Apps screen.

This app may not be available depending on the region or service provider.

Searching for locations

Search for locations by entering an address or a keyword. Once the location is found, select a location to view the detailed information. Refer to the help for more information.

Getting directions for a destination

Tap  to set starting and ending locations, and then select a travel method. The device shows the routes to get to the destination.

Memo

Use this app to record important information to save and view at a later date.

Tap **Memo** on the Apps screen.

Adding and managing categories

Create categories to sort and manage your memos.

On the memos list, tap  → **MANAGE CATEGORIES**.

To add a new category, tap , enter a category name, and then tap **OK**.

To delete a category, tap  next to the category.

To rename a category, tap and hold a category name, enter a new name for the category, and then tap **RENAME**.

To change the category order, tap  next to a category and drag it up or down to another position.

Composing memos

Tap **+** on the memos list and enter a memo. While composing a memo, use the following options:

- : Create or set a category.
- : Insert images.
- : Make a voice recording to insert.

To save the memo, tap **SAVE**.

To edit a memo, tap a memo, and then tap the content of the memo.

Searching for memos

Tap **Q** on the memos list and enter a keyword to search for memos that include the keyword.

Deleting memos

Tap **:** → **Delete**, select memos, and then tap **DONE**.

To delete the memo while viewing it, tap **:** → **Delete**.

My Files

About My Files

Use this app to access all kinds of files stored in the device, including images, videos, songs, and sound clips.

Tap **My Files** on the Apps screen.

Viewing files

Tap **My Files** on the Apps screen.

Select a folder to open it. To go up a level in the directory, tap **←**. To return to the My Files main screen, tap **⬆**.

Searching for files or folders

Tap **My Files** on the Apps screen.

Tap **Q**, and then enter search criteria to search for.

Viewing storage information

Tap **My Files** on the Apps screen.

Tap **⋮** → **Storage usage** to view memory information for your device and memory card.

Adding FTP server shortcuts to the device

Add an FTP server shortcut to the shortcuts area.

Tap **My Files** on the Apps screen.

Tap **⋮** → **Add FTP server**, enter details such as server address, user name, and password, and then tap **DONE**.

Connecting with other devices

NFC

About NFC

Your device allows you to read near field communication (NFC) tags that contain information about products. You can also use this feature to make payments and buy tickets for transportation or events after downloading the required apps.

The battery contains a built-in NFC antenna. Handle the battery carefully to avoid damaging the NFC antenna.

Before using this feature

- Check the location of the NFC antennas on your device and the other device.
- Ensure that the NFC feature is activated on your device and the devices you want to connect to.
- Ensure that the device's screen is unlocked. Otherwise, the device will not read NFC tags or receive data.

Using the NFC feature

Use the NFC feature to send images or contacts to other devices, and read product information from NFC tags.

On the Apps screen, tap **Settings** → **NFC**, and then drag the **NFC** switch to the right.

Place the NFC antenna area on the back of your device near an NFC tag. The information from the tag will appear.

Making a purchase with the NFC feature

Before you can use the NFC feature to make payments, you must register for the mobile payment service. To register or get details about the service, contact your service provider.

On the Apps screen, tap **Settings** → **NFC**, and then drag the **NFC** switch to the right.

Touch the NFC antenna area on the back of your device to the NFC card reader.

To set the default payment app, tap **Tap and pay** and select an app.

The payment services list may not include all available payment apps.

Sending data

Use the Android Beam feature to send data, such as webpages and contacts, to NFC-enabled devices.

- 1 On the Apps screen, tap **Settings** → **NFC**, and then drag the **NFC** switch to the right.
- 2 Tap **Android Beam** and drag the **Android Beam** switch to the right.
- 3 Select an item and touch the other device's NFC antenna to your device's NFC antenna.
- 4 When **Touch to beam** appears on the screen, tap your device's screen to send the item.

Bluetooth

About Bluetooth

Bluetooth creates a direct wireless connection between two devices over short distances. Use Bluetooth to exchange data or media files with other devices.

- Samsung is not responsible for the loss, interception, or misuse of data sent or received via the Bluetooth feature.
- Always ensure that you share and receive data with devices that are trusted and properly secured. If there are obstacles between the devices, the operating distance may be reduced.
- Some devices, especially those that are not tested or approved by the Bluetooth SIG, may be incompatible with your device.
- Do not use the Bluetooth feature for illegal purposes (for example, pirating copies of files or illegally tapping communications for commercial purposes).
Samsung is not responsible for the repercussion of illegal use of the Bluetooth feature.

Before using this feature

- Ensure that the Bluetooth feature is activated on your device and the devices you want to connect to.
- Ensure that both devices are set as visible to other Bluetooth devices.

Pairing with other Bluetooth devices

- 1 On the Apps screen, tap **Settings** → **Bluetooth**, drag the **Bluetooth** switch to the right, and then tap **SCAN**. Detected devices are listed.
To set the device as visible to other devices, tap the device name.
- 2 Select a device to pair with.
If your device has paired with the device before, tap the device name without confirming the auto-generated passkey.
- 3 Accept the Bluetooth authorisation request on both devices to confirm.

Sending and receiving data

Many apps support data transfer via Bluetooth. You can share data, such as contacts or media files, with other Bluetooth devices. The following actions are an example of sending an image to another device.

Sending an image

- 1 On the Apps screen, tap **Gallery**.
- 2 Select an image.
- 3 Tap  → **Bluetooth**, and then select a device to pair with.
If the device you want to pair with is not on the list, request that the device turns on its visibility option. Or, set your device as visible to other devices.
- 4 Accept the Bluetooth authorisation request on the other device.

Receiving an image

When another device sends you an image, accept the Bluetooth authorisation request. The received image is saved in the **Gallery** → **Download** folder.

Unpairing Bluetooth devices

- 1 On the Apps screen, tap **Settings** → **Bluetooth**.
The device displays the paired devices on the list.
- 2 Tap  next to the device's name to unpair.
- 3 Tap **Unpair**.

S Beam

Use this feature to send data, such as videos, images, and documents.

Before using this feature

- Ensure that the NFC feature or Wi-Fi Direct is activated on your device and the devices you want to send files to.

Sending data

- 1 On the Apps screen, tap **Settings** → **NFC**, and then drag the **NFC** switch to the right.
- 2 Tap **S Beam** and drag the **S Beam** switch to the right.
- 3 Select a file and touch the other device's NFC antenna to your device's NFC antenna.

4 When **Touch to beam** appears on the screen, tap your device's screen to send the file.

- Do not send copyright-protected data via S Beam. Doing so may violate copyright laws. Samsung is not responsible for any liabilities caused by the illegal use of copyrighted data.
- If both devices try to send data simultaneously, the file transfer may fail.

Quick connect

About Quick connect

Use this feature to easily search and connect to nearby devices.

- Connection methods may vary depending on the type of connected devices or the shared content.
- Device name may vary depending on the Bluetooth devices to pair with. For example, the device name can be shown as BT MAC.

Before using this feature

- Ensure that devices to be connected support the Quick connect feature and that their screens are turned on.
- Ensure that Wi-Fi Direct or the Bluetooth feature is activated on devices that do not support the Quick connect feature.

Connecting to other devices

- 1 Open the notifications panel and tap **Quick connect**.
When the panel opens, the Wi-Fi and Bluetooth features are activated automatically and the device searches for nearby devices.
- 2 Select a device to connect to.
The next steps may vary depending on the connected device. Follow the on-screen instructions to complete the connection between the devices.
To allow nearby devices to search for your device and connect to it, tap **MORE** → **Set device visibility** → **Device visibility**, and then select an option.

Re-searching for devices

If the desired device does not appear in the list, search for the device.
Tap **REFRESH** and select the device from the list of detected devices.

Sharing content

Share content with the connected devices.

- 1 Open the notifications panel and tap **Quick connect**.
- 2 Select a device from the list of detected devices.
- 3 Select a media category.
- 4 Select the content to share and tap **DONE**.
Your device sends the content to the connected device.

Peel Smart Remote

About Peel Smart Remote

Use this app to connect to a TV and use the device as a remote control. You can search for and select TV programmes and control channels with your device.

Tap **Peel Smart Remote** on the Apps screen.

Before using this app

- Ensure that you connect the device to a network.
- Ensure that the device's infrared port is facing the TV.

Connecting to a TV

- 1 Tap **Peel Smart Remote** on the Apps screen.
- 2 Select a region and select the broadcast service.
The available TV programmes appear.

Using the device as a remote control

You can turn the TV on or off, browse channels, or adjust the volume level on the TV using the device as a remote control.

- 1 On the device, tap .
- 2 Ensure that your TV is turned off and tap **YES, MY TV IS OFF**.
- 3 Select the TV brand.
- 4 Ensure that the device's infrared port is facing the TV and tap **BUTTON 1**. Then, tap **YES** if the device turns on the TV.

If the device does not turn on the TV, tap **NO**, and then repeat this until the TV recognises the signal.

- 5 Select a channel source.

Watching TV using the device

Select a TV programme from the list of available programmes to watch on the connected TV.

- 1 Tap **ON NOW**, **ON LATER**, or **STREAMING**.
- 2 Select a TV programme and tap **WATCH ON**.
The selected programme will be shown on the connected TV.
- 3 Tap  to change channels or adjust the volume.
The remote control panel appears on the screen.

Setting programme reminders

- 1 Select a TV programme to watch.
- 2 Tap **REMIND ME**.
The alarm goes off at the preset time.

Screen Mirroring

About Screen Mirroring

Use this feature to connect your device to a large screen with an AllShare Cast dongle or HomeSync and then share your contents. You can also use this feature with other devices that support the Wi-Fi Miracast feature.

- This feature may not be available depending on the region or service provider.
- Miracast-enabled devices that do not support High-bandwidth Digital Content Protection (HDCP 2.X) may not be compatible with this feature.
- Some files may be buffered during playback, depending on the network connection.
- To save energy, deactivate this feature when not in use.
- If you specify a Wi-Fi frequency, AllShare Cast dongles or HomeSync may not be discovered or connected.
- If you play videos or games on a TV, select an appropriate TV mode to get the best experience.

Before using this feature

- Ensure that the screen mirroring-enabled device is connected to the TV using an HDMI cable.
- Ensure that the TV is turned on.

Viewing content on a TV

Before you connect a TV to your device, connect the TV and the screen mirroring-enabled device. To set up the connection, refer to the device's user manual. The following actions are an example of viewing content on a TV connected via an AllShare Cast dongle.

- 1 On the TV, select a connection mode, such as HDMI mode, to connect an external device.
- 2 On the Apps screen, tap **Settings** → **Screen Mirroring**.
The detected devices are listed.
- 3 Select a device to connect to.
Your device's screen appears on the TV screen.
If you connect the device for the first time, tap and hold the dongle's name on the list and enter the PIN shown on the TV screen.
- 4 Open or play a file, and then control the display with the keys on your device.

Stopping viewing the content

On the Apps screen, tap **Settings** → **Screen Mirroring**.

Using the mobile printing feature

Connect the device to a printer to print images or documents.

Some printers may not be compatible with the device.

Before using this feature

- Ensure that the Wi-Fi feature or Wi-Fi Direct is activated on your device and the printer.

Connecting to a printer

On the Apps screen, tap **Settings** → **Printing**, select a printer type, and then drag the switch at the top right of the screen to the right. The device searches for printers that are connected to the same Wi-Fi network as your device. Select a printer to use as the default printer.

To add printers manually, tap **:** → **Add printer** → **ADD PRINTER**, enter details, and then tap **OK**.

To change printing settings, tap **:** → **Settings**.

Printing content

While viewing content, such as images or documents, tap **:** → **Print**, and then select a printer.

Device & data manager

Upgrading the device

The device can be upgraded to the latest software.

Upgrading over the air

The device can be directly upgraded to the latest software by the firmware over-the-air (FOTA) service.

On the Apps screen, tap **Settings** → **About device** → **Download updates manually**.

Upgrading with Samsung Kies

Download the latest Samsung Kies from the Samsung website. Launch Samsung Kies and connect the device to the computer. Samsung Kies automatically recognises the device and shows available updates in a dialogue box, if any. Click the Update button in the dialogue box to start upgrading. Refer to the Samsung Kies help for details on how to upgrade.

- Do not turn off the computer or disconnect the USB cable while the device is upgrading.
- While upgrading the device, do not connect other media devices to the computer. Doing so may interfere with the update process.

Transferring files between the device and a computer

Move audio, video, image, or other types of files from the device to the computer, or vice versa.

- Do not disconnect the USB cable from the device when you are transferring files. Doing so may cause data loss or device damage.
- Do not disconnect the device from the computer when you play files saved in the device on the connected computer. After you finish playing the file, disconnect the device from the computer.
- The devices may not connect properly if they are connected via a USB hub. Directly connect the device to the computer's USB port.

Connecting as a media device

- 1 Connect the device to the computer using the USB cable.
- 2 Open the notifications panel, and then tap **USB for file transfer** → **Transferring media files**.

Tap **Transferring images** if your computer does not support Media Transfer Protocol (MTP) or not have any appropriate driver installed.

- 3 Transfer files between your device and the computer.

Connecting with Samsung Kies

Samsung Kies is a computer app that manages media contents and personal information with Samsung devices. Download the latest Samsung Kies from the Samsung website.

- 1 Connect the device to the computer using the USB cable.
Samsung Kies launches on the computer automatically. If Samsung Kies does not launch, double-click the Samsung Kies icon on the computer.
- 2 Transfer files between your device and the computer.
Refer to the Samsung Kies help for more information.

Backing up and restoring data

Keep your personal information, app data, and settings safe on your device. You can back up your sensitive information to a backup account and access it later.

Using a Google account

- 1 Tap **Settings** on the Apps screen.
- 2 Tap **Backup and reset** → **Back up my data**, and then drag the **Back up my data** switch to the right.
- 3 Tap **Backup account** and select an account as the backup account.

To restore data, you must sign in to your Google account via the setup wizard. You can launch and open the setup wizard by performing a factory data reset on the device. If you do not sign in to your Google account via the setup wizard, you cannot restore the backup data.

Using a Samsung account

- 1 On the Apps screen, tap **Settings** → **Accounts** → **Add account** → **Samsung account**, and then sign into your Samsung account.
- 2 Tap **Settings** on the Apps screen.
- 3 Tap **Cloud** → **Backup**, select the items to back up, and then tap **BACK UP NOW**.
To restore data, tap **Restore**, select the items to restore, and then tap **RESTORE NOW**.

Performing a data reset

Delete all settings and data on the device. Before performing a factory data reset, ensure you back up all important data stored on the device. Refer to [Backing up and restoring data](#) for details.

- 1 Tap **Settings** on the Apps screen.
- 2 Tap **Backup and reset** → **Factory data reset**.
- 3 Tap **RESET DEVICE** → **ERASE EVERYTHING**.
The device automatically restarts.

Settings

About Settings

Use this app to configure the device, set app options, and add accounts.

Tap **Settings** on the Apps screen.

To search for settings by entering keywords, tap **Q**.

Supported features may differ or be labelled differently depending on whether your device is a single or dual SIM model.

Quick settings

View the list of your favourite settings options.

To edit the list of favourite settings options, tap **:** → **Edit quick settings**, select a settings option, and then tap **DONE**.

Network connections

Wi-Fi

Activate the Wi-Fi feature to connect to a Wi-Fi network and access the Internet or other network devices.

On the Settings screen, tap **Wi-Fi**, and then drag the **Wi-Fi** switch to the right.

You can maintain a stable network connection by automatically selecting either the Wi-Fi or mobile network to use the strongest signal. To automatically switch between networks, tick **Smart network switch**.

Setting Wi-Fi sleep policy

Tap  → **Advanced** → **Keep Wi-Fi on during sleep**.

When the screen is turned off, the device automatically turns off Wi-Fi connections. When this happens, the device automatically accesses mobile networks if it is set to use them. This may incur data transfer fees. To avoid additional charges, set this option to **Always**.

Setting Network notification

The device can detect open Wi-Fi networks and display an icon on the status bar to notify when available.

Tap  → **Advanced** and tick **Network notification** to activate this feature.

Wi-Fi Direct

Wi-Fi Direct connects devices directly via a Wi-Fi network without requiring an access point.

Tap  → **Wi-Fi Direct**.

Download booster

Set the device to download files via both Wi-Fi and mobile networks at the same time.

On the Settings screen, tap **Download booster**, and then drag the **Download booster** switch to the right.

- This feature may not be supported by some devices.
- You may incur additional charges when downloading files via the mobile network.

Bluetooth

Activate the Bluetooth feature to exchange information over short distances.

On the Settings screen, tap **Bluetooth**, and then drag the **Bluetooth** switch to the right.

Tethering and Mobile hotspot

Use the device as a mobile hotspot to share the device's mobile data connection with other devices. Refer to [Tethering devices and using mobile hotspots](#) for details.

On the Settings screen, tap **Tethering and Mobile hotspot**.

- **Mobile hotspot:** Use the mobile hotspot to share the device's mobile data connection with computers or other devices through the Wi-Fi network. You can use this feature when the network connection is not available.
- **USB tethering:** Use USB tethering to share the device's mobile data connection with a computer via USB. When connected to a computer, the device is used as a wireless modem for the computer.
- **Bluetooth tethering:** Use Bluetooth tethering to share the device's mobile data connection with computers or other devices via Bluetooth.

Flight mode

This disables all wireless functions on your device. You can use only non-network services.

On the Settings screen, tap **Flight mode**.

Data usage

Keep track of your data usage amount and customise the settings for the limitation.

On the Settings screen, tap **Data usage**.

- **Mobile data:** Set the device to use data connections on any mobile network.

To use more options, tap .

- **Restrict background data:** Set the device to disable sync in the background while using a mobile network.
- **Show Wi-Fi usage:** Set the device to show your data usage via Wi-Fi.
- **Mobile hotspots:** Select mobile hotspots to prevent apps that are running in the background from using them.
- **Mobile networks:** Configure your mobile network settings.

Location

Change settings for location information permissions.

On the Settings screen, tap **Location**, and then drag the **Location** switch to the right.

- **Mode:** Select a method to collect your location data.
- **Improve accuracy:** Set the device to improve location accuracy using Wi-Fi and Bluetooth features.
- **Recent location requests:** View which apps request your current location information and their battery usage.
- **Location services:** View the location services your device is using.
- **My places:** Set up profiles that will be used for specific locations when you use GPS, Wi-Fi, or Bluetooth features to find your current location.

SIM card manager (dual SIM models)

Activate your SIM or USIM cards and customise the SIM card settings.

On the Settings screen, tap **SIM card manager**, and then drag one or both of the switches for the SIM or USIM cards to the right.

- **Voice call:** Select a SIM or USIM card for voice calls.
- **Video call:** Select a SIM or USIM card for video calls.
- **Data service network:** Select a SIM or USIM card for data service.
- **Dual SIM always on:** Set the device to allow incoming calls from the other SIM or USIM card during a call.

When this feature is enabled, you may incur additional charges for call forwarding depending on the region or service provider.

More networks

Customise settings to control networks.

On the Settings screen, tap **More networks**.

Nearby device scanning

Search for the devices connected via Wi-Fi Direct, Bluetooth, and more.

Mobile networks

- **Mobile data:** Set the device to use data connections on any mobile network.
- **Data roaming:** Set the device to use data connections when you are roaming.
- **Access Point Names:** Set up access point names (APNs).
- **Network mode** (single SIM models): Select a network type.
Network mode SIM 1 / Network mode SIM 2 (dual SIM models): Select a network type.
- **Network operators:** Search for available networks and select a network for roaming.

VPN

Set up and connect to virtual private networks (VPNs).

Connect and share

NFC

Activate the NFC feature to read or write NFC tags that contain information.

On the Settings screen, tap **NFC**, and then drag the **NFC** switch to the right.

- **Android Beam:** Turn on the Android Beam feature to send data, such as webpages and contacts, to NFC-enabled devices.
- **S Beam:** Activate the S Beam feature to send data, such as videos, images, and documents, to devices that support NFC and Wi-Fi Direct.
- **Tap and pay:** Set the default payment app for mobile payments.

The payment services list may not include all available payment apps.

Nearby devices

Change settings for sharing content when you connect the device to nearby devices.

On the Settings screen, tap **Nearby devices**, and then drag the **Nearby devices** switch to the right.

- **Device name:** View the media server name for your device.
- **Content to share:** Set the device to share your content with other devices.
- **Allowed devices:** View the list of devices that can access your device.
- **Denied devices:** View the list of devices that are blocked from accessing your device.
- **Download to:** Select a memory location for saving media files.
- **Receive files from other devices:** Set the device to accept uploads from other devices.

Printing

Configure settings for printer plug-ins installed on the device. You can search for available printers or add one manually to print files via Wi-Fi or cloud services.

On the Settings screen, tap **Printing**.

Screen Mirroring

Activate the screen mirroring feature and share your display with others.

On the Settings screen, tap **Screen Mirroring**.

Sound and display

Sounds and notifications

Change settings for various sounds on the device.

On the Settings screen, tap **Sounds and notifications**.

- **Ringtone:** Adjust the volume level for call ringtones.
- **Media:** Adjust the volume level for music and videos.

- **Notifications:** Adjust the volume level for notifications.
- **System:** Adjust the volume level for system sounds.
- **Sound mode:** Set the device to use sound mode or silent mode.
- **Vibration intensity:** Adjust the force of the vibration notification.
- **Vibrate when ringing:** Set the device to vibrate and play a ringtone for incoming calls.
- **Ringtones** (single SIM models): Add or select a ringtone for incoming calls.
- **Ringtone** (dual SIM models):
 - **Ringtones:** Add or select a ringtone for incoming calls.
 - **Notifications:** Select a ringtone for events, such as incoming messages and missed calls.
- **Vibrations:** Select a vibration pattern.
- **Notification ringtone** (single SIM models): Select a ringtone for events, such as incoming messages.
- **Other sounds:** Configure additional sounds settings.
- **Do not disturb:** Set the device to mute incoming call and notification sounds, except for allowed exceptions.
- **Notifications on lock screen:** Set whether or not to show the content of notifications on the locked screen.
- **App notifications:** Change the notification settings for each app.
- **Notification access:** Select apps to display their all notifications on the notifications panel.

Display

Change the settings for the display.

On the Settings screen, tap **Display**.

- **Brightness:** Set the brightness of the display.
- **Font:**
 - **Font style:** Change the font type for display text.
 - **Font size:** Change the font size.

- **Screen rotation:** Set the content to rotate automatically when the device is turned.
 - **Smart rotation:** Set the interface not to rotate according to the orientation of your face.
- **Smart stay:** Set the device to prevent the display backlight from turning off while you are looking at the display.
- **Screen timeout:** Set the length of time the device waits before turning off the display's backlight.
- **Screen mode:**
 - **Adapt Display:** Use this mode for optimising the display according to the display settings.
 - **Dynamic:** Use this mode to make the display tone more vivid.
 - **Standard:** Use this mode for normal surroundings.
 - **Professional photo:** Use this mode to make the display tone look like real colours.
 - **Cinema:** Use this mode for dim surroundings, such as in a dark room.
- **Auto adjust screen tone:** Set the device to save power by adjusting the brightness of the display.
- **Daydream:** Set the device to launch a screensaver when your device is charging.
- **LED indicator:**
 - **Charging:** Set the device to turn on the notification light while you are charging the battery.
 - **Low battery:** Set the device to turn on the notification light when the battery is low.
 - **Notifications:** Set the device to turn on the notification light when you have missed calls, messages, or notifications.
 - **Voice recording:** Set the device to turn on the notification light when you record voice memos.
- **Touch key light duration:** Set the duration that the Recent apps and Back buttons' backlight remains on.
- **Increase touch sensitivity:** Set the device to allow use of the touch screen with gloves on.

Depending on the type of material you wear while touching the device, some commands may not be recognised.

Wallpaper

Select a background image for the Home screen or the locked screen.

On the Settings screen, tap **Wallpaper**.

Lock screen

Change settings for the locked screen.

On the Settings screen, tap **Lock screen**.

- **Screen lock:** Activate the screen lock feature. The following options may vary depending on the screen lock feature selected.
- **Dual clock:** Set the device to show the dual clock.
- **Clock size:** Change the size of the clock.
- **Show date:** Set the device to show the date with the clock.
- **Camera shortcut:** Set the device to show the camera shortcut on the locked screen.
- **Owner information:** Enter your information that is shown with the clock.
- **Unlock effect:** Select an effect that you see when you unlock the screen.
- **Additional information:** Set the device to display information on the locked screen to display weather or step counts when you use the walking mate in **S Health**.
- **Help text:** Set the device to show the help text on the locked screen.

Multi window

Set the device to use Multi window.

On the Settings screen, tap **Multi window**, and then drag the **Multi window** switch to the right.

- **Open in multi window view:** Set the device to activate the Multi window feature when you open files from **My Files** or **Video**. Also, the device activates this feature when you view attachments in messages.

Notification panel

Customise the items that appear on the notifications panel.

On the Settings screen, tap **Notification panel**.

- **Brightness adjustment:** Set the device to display the brightness adjustment bar on the notifications panel.
- **Recommended apps:** Set the device to display a list of recommended apps on the notifications panel based on your actions, such as connecting a headset to the device.
- **Set quick setting buttons:** Rearrange the quick setting buttons displayed on the notifications panel.

Toolbox

Set the device to use the toolbox.

On the Settings screen, tap **Toolbox**, and then drag the **Toolbox** switch to the right.

View the apps list to display in the toolbox. To edit the apps list, tap **EDIT**.

One-handed operation

Activate one-handed operation mode for your convenience when using the device with one hand.

On the Settings screen, tap **One-handed operation**, and then drag the **One-handed operation** switch to the right.

Personalisation

Easy mode

Set the device to easy mode.

On the Settings screen, tap **Easy mode**.

- **Standard mode:** Set the device to standard mode.
- **Easy mode:** Set the device to easy mode.
- **Easy applications:** Select apps to apply simpler layouts.

Accessibility

You can use this feature to access settings to improve accessibility to the device. Refer to [Accessibility](#) for details.

On the Settings screen, tap **Accessibility**.

Private mode

Set the device to prevent others from accessing your personal content by activating private mode.

On the Settings screen, tap **Private mode**, and then drag the **Private mode** switch to the right.

- **Private mode access type:** Set or change the unlock method to activate private mode.
- **Auto disable:** Set the device to exit private mode automatically when the screen turns off.

Finger Scanner

Register your fingerprint to the device to secure the device or sign in to your Samsung account.

On the Settings screen, tap **Finger Scanner**.

- **Fingerprint manager:** Register or delete fingerprint information.
- **Change backup password:** Change the alternative password to use if the device does not recognise the fingerprint.
- **Screen lock:** Set an unlock method and an alternative password.
- **Web sign-in:** Set the device to sign in to webpages.
- **Verify Samsung account:** Set the device to verify your Samsung account with fingerprints.
- **Pay with PayPal:** Set the device to verify your PayPal account and to authorise purchases using your fingerprints.

This feature may not be available depending on the region or service provider.

Motion

Motions and gestures

Activate the motion recognition feature and change the settings that control motion recognition on your device.

On the Settings screen, tap **Motions and gestures**.

- **Air browse:** Move your hand to the left or right across the sensor to browse images, webpages, or songs.
- **Direct call:** Set the device to make a voice call by picking up and holding the device near your ear while viewing call, message, or contact details.
- **Smart alert:** Set the device to alert you if you have missed calls or new messages when you pick up the device.

- **Mute/pause:** Set the device to mute incoming calls or alarms, or to pause media playback by using palm motions or looking away from the screen.
- **Palm swipe to capture:** Set the device to capture an image of the screen when you sweep your hand to the left or right across the screen.

Air view

Preview content or view information in a pop-up window by pointing at an item with your finger.

On the Settings screen, tap **Air view**, and then drag the **Air view** switch to the right.

User and backup

Accounts

Add email or SNS accounts.

On the Settings screen, tap **Accounts**.

Cloud

Change settings for syncing data or files with your Samsung account or Dropbox cloud storage.

On the Settings screen, tap **Cloud**.

Backup and reset

Change the settings for managing settings and data.

On the Settings screen, tap **Backup and reset**.

- **Back up my data:** Set the device to back up settings and app data to the Google server.
- **Backup account:** Set up or edit your Google backup account.
- **Automatic restore:** Set the device to restore settings and app data when the apps are reinstalled on the device.

- **Reset network settings:** Return the network connection settings to the factory default settings.
- **Factory data reset:** Reset settings to the factory default values and delete all data.

System

Language and input

Change the settings for text input. Some options may not be available depending on the selected language.

On the Settings screen, tap **Language and input**.

Language

Select a display language for all menus and apps.

Default

Select a default keyboard type for text input.

Samsung keyboard

Change the Samsung keyboard settings.

The available options may vary depending on the region or service provider.

- **English(UK):** Select a default keyboard layout.
- **Select input languages:** Select languages for text input.
- **Predictive text:** Activate predictive text mode to predict words based on your input and show word suggestions. You can also customise the word prediction settings.

- **Auto replace:** Set the device to correct misspelled and incomplete words by tapping the space bar or punctuation mark.
- **My hot keys:** Set number shortcuts to frequently-used text. You can tap and hold a number key to insert the preset text.
- **Auto capitalise:** Set the device to automatically capitalise the first character after a final punctuation mark, such as a full stop, question mark, or exclamation mark.
- **Auto spacing:** Set the device to automatically insert a space between words.
- **Auto punctuate:** Set the device to insert a full stop when you double-tap the space bar.
- **Keyboard swipe:**
 - **None:** Set the device to deactivate the keyboard swipe feature.
 - **Continuous input:** Set the device to enter text by sweeping on the keyboard.
 - **Cursor control:** Enable the smart keyboard navigation feature to move the cursor by scrolling the keyboard.
- **Sound:** Set the device to sound when a key is touched.
- **Vibration:** Set the device to vibrate when a key is touched.
- **Character preview:** Set the device to display a large image of each character tapped.
- **Reset settings:** Reset Samsung keyboard settings.

Google voice typing

Change the voice input settings.

- **Language:** Select input languages for text input.
- **“OK Google” detection:** Set the device to begin voice recognition when you say the wake-up command while using the search app.

This feature may not be available depending on the region or service provider.

- **Now on Tap:** Set the device to use Google search in a pop-up window.

This feature may not be available depending on the region or service provider.

- **Hands-free:** Allow your device to perform voice searches via a headset.

This feature may not be available depending on the region or service provider.

- **Speech output:** Set the device to provide voice feedback to alert you to the current action.
- **Offline speech recognition:** Download and install language data for offline voice input.
- **Block offensive words:** Set the device to prevent the device from recognising offensive words in voice inputs.
- **Bluetooth headset:** Set the device to record your voice with a Bluetooth headset.

Text-to-speech options

- **Preferred TTS engine:** Select a speech synthesis engine. To change the settings for speech synthesis engines, tap .
- **Speech rate:** Select a speed for the text-to-speech feature.
- **Listen to an example:** Listen to the spoken text for an example.
- **Default language status:** View the status of the default language for the text-to-speech feature.

Notification readout

Set the device to read aloud notifications when you have incoming calls, messages, or events.

Pointer speed

Adjust the pointer speed for the mouse or trackpad connected to your device.

Date and time

Access and alter the following settings to control how the device displays the time and date.

On the Settings screen, tap **Date and time**.

If the battery remains fully discharged or removed from the device, the time and date is reset.

- **Automatic date and time:** Automatically update the time and date when moving across time zones.
- **Set date:** Set the current date manually.
- **Set time:** Set the current time manually.
- **Automatic time zone:** Set the device to receive time zone information from the network when you move across time zones.
- **Select time zone:** Set the home time zone.
- **Use 24-hour format:** Display time in 24-hour format.

Safety assistance

Activate emergency mode and set primary contacts and messages. Refer to [Emergency mode](#) for details.

On the Settings screen, tap **Safety assistance**.

- **Emergency mode:** Set the device to activate emergency mode and reduce battery consumption by using basic functions, such as calling.
- **Geo News:** Set the device to receive notifications for severe weather conditions.
- **Send help messages:** Set the device to send help messages by pressing the Power button three times.
 - **Send pictures:** Set the device to send photos taken by the front and rear cameras with the help message.

This feature may not be available depending on the region or service provider.

- **Send sound recording:** Set the device to record sound and send it along with the message to the recipients.
- **Manage primary contacts:** Select or edit the recipients for help messages.

Accessories

Change the accessory settings.

On the Settings screen, tap **Accessories**.

- **Audio output:** Select a sound output format to use when connecting your device to HDMI devices. Some devices may not support the surround sound setting.

Battery

View the amount of battery power consumed by your device.

On the Settings screen, tap **Battery**.

- **BATTERY USAGE:** View the amount of battery power consumed by your device.
- **App power saving:** Save battery power by optimising the battery usage for each app.
- **Percentage on status bar:** Set the device to display the remaining battery life.

Power saving

Activate power-saving mode and change the settings for power-saving mode. Refer to [Using the power saving feature](#) for details.

On the Settings screen, tap **Power saving**.

- **Power saving mode:** Activate power-saving mode and change the settings for power-saving mode.
- **Ultra power saving mode:** Extend standby time and reduce battery consumption by displaying a simpler layout and allowing limited access to an app.

The estimated maximum standby time shows the time remaining before the battery power runs out if the device is not used. Standby time may vary depending on your device settings and operating conditions.

Storage

View memory information for your device and memory card, or format a memory card.

On the Settings screen, tap **Storage**.

Formatting a memory card permanently deletes all data from it.

The actual available capacity of the internal memory is less than the specified capacity because the operating system and default apps occupy part of the memory. The available capacity may change when you upgrade the device.

Security

Change settings for securing the device and the SIM or USIM card.

On the Settings screen, tap **Security**.

- **Device administrators:** View device administrators installed on the device. You can allow device administrators to apply new policies to the device.
- **Unknown sources:** Set the device to allow the installation of apps from unknown sources.
- **Protect encrypted data:** Set a password to encrypt data saved on the device. You must enter the password each time you turn on the device.

Charge the battery before enabling this setting because it may take more than an hour to encrypt your data.

- **Encrypt external SD card:** Set the device to encrypt files on a memory card.

If you reset your device to the factory defaults with this setting enabled, the device will not be able to read your encrypted files. Disable this setting before resetting the device.

- **Remote controls:** Set the device to allow control of your lost or stolen device remotely via the Internet. To use this feature, you must sign in to your Samsung account.
- **SIM change alert:** Activate or deactivate the Find my mobile feature which helps locate the device when lost or stolen.

- **Go to website:** Access the Find my mobile website (findmymobile.samsung.com). You can track and control your lost or stolen device on the Find my mobile website.
- **Reactivation lock:** Set the device to require your Samsung account after the device has been reset to prevent others from reactivating the device.
- **Set up SIM card lock:**
 - **Lock SIM card:** Activate or deactivate the PIN lock feature to require the PIN before using the device.
 - **Change SIM PIN:** Change the PIN used to access SIM or USIM data.
- **Make passwords visible:** Set the device to display passwords as they are entered.
- **Security policy updates:** Set the device to check and download security updates.
- **Send security reports:** Set the device to send the updated security reports to Samsung automatically.
- **Storage type:** Set a storage type for credential files.
- **Trusted credentials:** Use certificates and credentials to ensure secure use of various apps.
- **Install from device storage:** Install encrypted certificates stored on the USB storage.
- **Clear credentials:** Erase the credential contents from the device and reset the password.
- **Trust agents:** View the trust agents installed on the device.
- **Pin windows:** Set the device to pin the selected app on the screen.
- **Apps with access to usage data:** View which app can access your device's usage history.
- **Smart Lock:** Set the device to bypass the lock screen when trusted devices or locations have been detected.
- **Do not disturb permission:** View the apps that can disable the Do not disturb feature.

Help

Access help information to learn how to use the device and apps or configure important settings.

On the Settings screen, tap **Help**.

About device

Access device information, edit the device name, or update device software.

On the Settings screen, tap **About device**.

Applications

Application manager

View and manage the apps on your device.

On the Settings screen, tap **Application manager**.

Default applications

Select a default setting for using apps.

On the Settings screen, tap **Default applications**.

Accessibility

Accessibility

Accessibility menus are special features for those with certain physical disabilities, such as poor eyesight or hearing impairment. You can use the following features:

- TalkBack
- Changing the font size
- Magnifying the screen
- Notification reminders
- Reversing the display colours
- Colour adjustment
- Turning off all sounds
- Flash notification
- Adjusting the sound balance
- Mono audio mode
- Customising caption settings
- Baby monitor
- Assistive menus
- Air gesture feature
- Setting tap and hold delay options
- Interaction control mode
- Changing the method for answering or ending calls
- Single tap mode
- Configuring accessibility settings

To use accessibility menus, on the Apps screen, tap **Settings** → **Accessibility**.

Using the Home button to open accessibility menus

You can access the following accessibility menus by pressing the Home button three times quickly.

- Accessibility
- TalkBack
- Negative colours
- Interaction control

On the Apps screen, tap **Settings** → **Accessibility** → **Direct access**, and then drag the **Direct access** switch to the right. Then, select an accessibility menu to open when you press the Home button three times quickly.

If you select more than one menu, the device displays a pop-up window asking which menu to use each time you press the Home button three times quickly. To enable **Interaction control** on the accessibility menus, activate the feature. On the Apps screen, tap **Settings** → **Accessibility** → **Dexterity and interaction** → **Interaction control**, and then drag the **Interaction control** switch to the right.

TalkBack

Activating or deactivating TalkBack

When you activate TalkBack, the device reads aloud the text on the screen or selected features. This feature is useful if you cannot see or have difficulty viewing the screen.

- 1 On the Apps screen, tap **Settings** → **Accessibility** → **Vision** → **TalkBack**.
- 2 Drag the **TalkBack** switch to the right.
To deactivate TalkBack, drag the **TalkBack** switch to the left.
- 3 Tap **OK**.

When you activate TalkBack, the device provides voice feedback and reads aloud the features you select. Also, the device provides voice feedback when the screen turns off, when you have new notifications, and more.

When you activate **Explore by touch** while using TalkBack, the device reads selected items aloud. Firstly, the device reads aloud items on the screen when you tap them. Then, the device will perform the function or open the app if you tap anywhere on the screen twice quickly. If **Explore by touch** is deactivated, the device cannot perform various features that require finger gestures.

To activate **Explore by touch**, on the Apps screen, tap **Settings** → **Accessibility** → **Vision** → **TalkBack** → **SETTINGS**, and then tick **Explore by touch**.

Some features are not available while you are using TalkBack.

Controlling the screen with finger gestures

You can use various finger gestures to control the screen while you are using TalkBack. If **Explore by touch** is deactivated, the device cannot perform some of the features that require finger gestures.

To activate **Explore by touch**, on the Apps screen, tap **Settings** → **Accessibility** → **Vision** → **TalkBack** → **SETTINGS**, and then tick **Explore by touch**.

- Exploring the screen: Place a finger on the screen and move your finger to explore the screen. Select and hold on an item and the device reads aloud the item. When you release your finger, the item under your finger is selected.
- Selecting items: Tap an item to select it. Or, select and hold on an item while exploring the screen, and then release your finger.
- Opening the selected item: While selected items are read aloud, when you hear the item you want, release your finger from the item. Then, tap anywhere on the screen twice quickly.
- Selecting the previous item: Scroll quickly upwards or to the left on the screen with one finger.

- Selecting the next item: Scroll quickly downwards or to the right on the screen with one finger.
- Scrolling the lists: Scroll the screen upwards or downwards with two fingers.
- Returning to the previous page: Scroll the screen to the right with two fingers.
- Moving to the next page: Scroll the screen to the left with two fingers.
- Unlocking the screen: Scroll the screen in any direction within the locked screen area with two fingers.
- Opening notifications panel: Drag the top of the screen downwards with two fingers.
- Opening quick setting panel: Drag the top of the screen downwards with three fingers.

You can configure finger gesture settings for TalkBack in **Manage gestures**. Refer to [Configuring finger gesture settings](#) for details.

Configuring finger gesture settings

When you use TalkBack, you can perform actions using finger gestures. You can perform actions such as, returning to the previous screen, opening the Home screen, and more. Configure finger gestures before using them.

Configuring settings for shortcut gestures

Use this feature to configure eight shortcut gestures. You can configure gestures such as, dragging your finger upwards and then to the right without releasing it, and more. You can change shortcut gestures or assign features to empty shortcuts.

On the Apps screen, tap **Settings** → **Accessibility** → **Vision** → **TalkBack** → **SETTINGS** → **Manage gestures**. Select a gesture, and then assign a feature to it.

The following features are available:

- **Previous item:** Move to the previous item.
- **Next item:** Move to the next item.
- **Focus first item on screen:** Move to the first item on the screen. In text selection mode, move the cursor to the beginning of the text.
- **Focus last item on screen:** Move to the last item on the screen. In text selection mode, move the cursor to the end of the text.

- **Scroll back:** Scroll down the list. In text selection mode, copy the selected text.
- **Scroll forward:** Scroll up the list. In text selection mode, select all text.
- **Previous granularity:** Move to the previous reading unit.
- **Next granularity:** Move to the next reading unit.
- **Back button:** Return to the previous screen.
- **Home button:** Open the Home screen.
- **Overview button:** Open the list of recently-used apps.
- **Open notifications:** Open the notifications panel.
- **Open global context menu:** Open the global contextual menu. Tap and hold the screen to open the circular global contextual menu. You can use features, such as **Quick navigation**, **Read from top**, **Spell last utterance**, and **Read from next item**. Then, explore menus by drawing a circle with your finger without releasing it. When you find the menu you want, release your finger from the menu to select it.

Tap **Pause feedback** at the top left of the screen to pause voice feedback.

Tap **TalkBack Settings** at the top right of the screen to access the TalkBack settings. Refer to [Configuring settings for TalkBack](#) for details.
- **Open local context menu:** Open the local contextual menu. You can select a unit for reading text on the screen. When you use this feature while entering text, contextual menus, such as the cursor control menu, are available. Tap and hold the screen to open the circular contextual menu. Then, explore menus by drawing a circle with your finger without releasing it. When you find the menu you want, release your finger from the menu to select it.
- **Read from top:** Read items aloud from the first item to the last item in order.
- **Read from next item:** Read items aloud starting from the item next to the selected item in order.

Changing reading units

When you use TalkBack, you can listen to the text on the screen. You can drag your finger up, down, left, or right to select the text you want. By default, the device reads text aloud in the selected area. Or, you can set the device to read text in other reading units, such as lines or paragraphs.

Changing reading units by using the local contextual menu

- 1 Select some text to read.
- 2 Drag your finger upwards, and then to the right without releasing it to open the local contextual menu.
- 3 Tap and hold the screen and draw a circle with your finger to explore menus. Then, release your finger when you hear the reading unit you want.

To change the shortcut gesture to open the local contextual menu, refer to [Configuring settings for shortcut gestures](#).

Pausing TalkBack

Open the global contextual menu by dragging your finger downwards and then to the right on the screen without releasing it. When you select **Pause feedback** at the top left of the screen, TalkBack pauses.

When TalkBack is paused, you can resume it by turning on the screen or other methods. To change the method for resuming TalkBack, on the Apps screen, tap **Settings** → **Accessibility** → **Vision** → **TalkBack** → **SETTINGS** → **Resume from suspend**. Then, select an option.

To change the shortcut gesture to open the global contextual menu, refer to [Configuring settings for shortcut gestures](#).

Using the quick navigation feature

With the quick navigation feature, you can access menus by drawing a circle on the screen without scrolling up or down to select an item.

Open the global contextual menu by dragging your finger downwards and then to the right on the screen without releasing it. Tap and hold the screen and draw a circle around the menu with your finger to explore the menus. Then, release your finger when you hear **Quick navigation**. Tap the screen again and draw a circle around the menu with your finger to explore the menus. Then, release your finger when you hear the menu you want.

Adding and managing image labels

You can assign labels to images on the screen. The device reads aloud the labels when the images are selected. Add labels to unlabelled images by using the local contextual menu.

Open the local contextual menu by dragging your finger upwards and then to the right on the screen without releasing it. Tap and hold the screen and draw a circle around the menu with your finger to explore the menus. When you hear the add label menu, release your finger to add labels.

To view the labels, on the Apps screen, tap **Settings** → **Accessibility** → **Vision** → **TalkBack** → **SETTINGS** → **Manage customised labels**.

Configuring settings for TalkBack

Configure settings for TalkBack for your convenience.

On the Apps screen, tap **Settings** → **Accessibility** → **Vision** → **TalkBack** → **SETTINGS**.

Alternatively, open the global contextual menu by dragging your finger downwards and then to the right on the screen without releasing it. Then, drag your finger to the top right of the screen and release it when you hear **TalkBack Settings**.

- **Speech volume:** Adjust the volume level for voice feedback.

Voice feedback volume can vary depending on the media volume. To adjust the media volume, press the Volume button up or down while listening to voice feedback. Or, on the Apps screen, tap **Settings** → **Sounds and notifications**, and then drag the volume adjustment bar for the media content to the left or right.

- **Use pitch changes:** Set the device to read aloud text at a low pitch when it is entered using a keyboard.
- **Keyboard echo:** Set the device to read aloud text or symbols entered using a keyboard. You can also set the type of keyboard to apply this feature to.
- **Speak when screen is off:** Set the device to provide voice feedback when the screen is turned off.
- **Use proximity sensor:** Set the device to pause voice feedback when you place your hand over the sensor at the top of the device. To resume voice feedback, tap the screen.
- **Shake to start continuous reading:** Set the device to read aloud the text displayed on the screen when you shake the device. You can select from various shaking speeds.
- **Speak caller ID:** Set the device to read the caller's name aloud when you have an incoming call.
- **Vibration feedback:** Set the device to vibrate when you explore the screen.
- **Sound feedback:** Set the device to emit a sound when you control the screen, such as scrolling the screen, and more.
- **Focus speech audio:** Set the device to turn the media volume down when the device reads an item aloud.
- **Sound volume:** Adjust the volume that sound is played when you touch the screen to control it. This feature is available when **Sound feedback** is selected.
- **Explore by touch:** Set the device to read aloud the items under your finger. For example, when you tap **Apps** on the Home screen with your finger, the device reads out "**Applications**". To select **Apps**, release your finger from it and tap anywhere on the screen twice quickly. You can move to the page you want by scrolling the screen left or right with two fingers. To learn about controlling the screen using the explore by touch feature, refer to [Controlling the screen with finger gestures](#) for details.
- **Automatically scroll lists:** Set the device to automatically scroll through the rest of the list not displayed on the screen and read the items aloud.
- **Single-tap selection:** Set the device to open the selected item by tapping it once.
- **Show Context Menu as list:** Set the device to show the contextual menu as a list or circle.

- **Launch “Explore by touch” tutorial:** View the tutorial about using the Explore by touch feature.
- **Manage gestures:** Assign actions to perform using finger gestures. Refer to [Configuring finger gesture settings](#) for details.
- **Manage customised labels:** View the labels you added.
- **Manage keyboard shortcuts:** Set keyboard shortcuts to perform specific actions.
- **Talkback suspend and resume shortcut:** Set the device to suspend and resume TalkBack by pressing and holding the Volume buttons up and down simultaneously.
- **Dim screen when TalkBack is enabled:** Set the device to dim the screen while using TalkBack.
- **Open TalkBack at the Play Store:** Launch **Play Store** to check for updates.
- **Terms of Service:** View the TalkBack terms of service.
- **Privacy Policy:** View the TalkBack privacy policy.
- **Resume from suspend:** Select a method to resume voice feedback.
- **Developer settings:** Set options for app development.

Using the device with the screen turned off

Set the device to turn the screen off at all times to keep the content on your screen private. The screen does not turn on when you press external buttons or tap the screen. Also, currently-activated features do not turn off.

On the Apps screen, tap **Settings** → **Accessibility** → **Vision**, and then tick **Dark screen**. You can activate or deactivate this feature by pressing the Power button twice.

Using the rapid key input feature

Set the device to enter a character when you release your finger from the character on the keyboard. You can use this feature to enter characters instead of releasing your finger and double-tapping on the screen.

On the Apps screen, tap **Settings** → **Accessibility** → **Vision**, and then tick **Rapid key input**.

Reading passwords aloud

Set the device to read the password aloud when you enter the password while TalkBack is activated. Use this feature to make sure that you are entering the right password.

On the Apps screen, tap **Settings** → **Accessibility** → **Vision**, and then tick **Speak passwords**.

Setting text-to-speech features

Change the settings for text-to-speech features used when TalkBack is activated, such as languages, speed, and more.

On the Apps screen, tap **Settings** → **Accessibility** → **Vision** → **Text-to-speech options**, and then use the following functions:

- **Samsung text-to-speech engine / Google Text-to-speech engine:** Select an engine for the text-to-speech feature.
- **Speech rate:** Select a speed for the text-to-speech feature.
- **Listen to an example:** Listen to the spoken text for an example. If the device cannot read examples aloud, tap  → **Install voice data** to download and install voice data for the text-to-speech feature.
- **Default language status:** View the status of the current language set for the text-to-speech feature.

Entering text using the keyboard

To display the keyboard, tap the text input field, and then tap anywhere on the screen twice quickly.

When you touch the keyboard with your finger, the device reads aloud the character buttons under your finger. When you hear the character you want, release your finger from the screen to select it. The character is entered and the device reads the text aloud.

If **Rapid key input** is not activated, release your finger from the character you want, and then tap anywhere on the screen twice quickly. To activate the rapid input feature, on the Apps screen, tap **Settings** → **Accessibility** → **Vision**, and then tick **Rapid key input**.

Entering additional characters

Tap and hold a button on the keyboard. If additional characters are available via the button, a pop-up window appears above the keyboard showing the characters. To select a character, drag your finger on the screen until you hear the character you want, and then release it.

Changing keyboard input language

To add input languages, on the Apps screen, tap **Settings** → **Language and input**. Then, tap **Samsung keyboard** → **Select input languages**, and then select languages.

To change the keyboard input language while entering text, double-tap .

Editing text

Use the local contextual menu to move the cursor or copy and paste text.

Open the local contextual menu by dragging your finger upwards and then to the right on the screen without releasing it. Tap and hold the screen and draw a circle around the menu with your finger to explore the menu. Then, release your finger when you hear **Change granularity**. Tap the screen again and draw a circle around the menu to explore the menus. Then release your finger when you hear the reading unit you want.

When you edit text, set the reading unit to either word or character for your convenience. In selection mode, the device selects text according to the reading unit you selected.

Drag your finger up, down, left, or right to listen to the text. When the text you want to edit is read aloud, use the following actions:

- Deleting text: Tap the delete button on the keyboard.
- Selecting text using selection mode: Activate selection mode to select and listen to the text. To activate selection mode, open the local contextual menu and select **Cursor control** → **Start selection mode**. Scroll to the left or right to listen to the text before or next to the currently-selected text. To deactivate selection mode, open the local contextual menu and select **Cursor control** → **End selection mode**.
- Selecting entire text: Open the local contextual menu and select **Cursor control** → **Select all**. All text in the document will be selected.

- Copying or cropping text: Select text using the local contextual menu. Then, open the local contextual menu and select **Cursor control**. Select **Copy** to copy the selected text or select **Cut** to cut the selected text. The selected text is copied to the clipboard.
- Pasting text: Place the cursor at the point where the text should be inserted, open the local contextual menu, and then select **Cursor control** → **Paste**.

Entering text by voice

You can enter text by voice. To display the keyboard, tap the text input field, and then tap anywhere on the screen twice quickly.

When you tap and hold , the device displays a pop-up window showing the keyboard options. Drag your finger on the screen without releasing it. When  is selected, release your finger. Then, say the words that you want to enter in the text field. The spoken words appear as text on the screen and the device reads them aloud.

To enter additional text, select the microphone button and say the words.

Changing the font size

Use this feature to change the font size. The device provides various font sizes to make the device more convenient for visually impaired users. Setting the font size to **Huge** may not be available in some apps.

On the Apps screen, tap **Settings** → **Accessibility** → **Vision** → **Font size**.

Magnifying the screen

Use this feature to magnify the screen and to zoom in on a specific area.

On the Apps screen, tap **Settings** → **Accessibility** → **Vision** → **Magnification gestures**, and then drag the **Magnification gestures** switch to the right.

- Zooming in and out: Tap the screen three times quickly to zoom in on a specific area. Tap the screen three times quickly again to return.
- Exploring the screen by scrolling: Use two fingers to scroll through the magnified screen.
- Adjusting zoom ratio: Tap the screen with two fingers on the magnified screen. Then, spread two fingers apart or pinch them together to adjust the ratio.

- Keyboards on the screen cannot be magnified.
- When this feature is activated, the performance of some apps, such as **Phone** and **Calculator**, may be affected.

Setting notification reminders

Use this feature to alert you to notifications that you have not checked at the interval.

On the Apps screen, tap **Settings** → **Accessibility** → **Vision** → **Notification reminder**, and then drag the **Notification reminder** switch to the right.

To set an interval between alerts, tap **Reminder interval**.

Reversing the display colours

Use this feature to improve screen visibility and to help users recognise text on the screen more easily. When this feature is activated, the device displays a negative image that reverses the colours on the screen. Reversing the colours increases the contrast between black and white.

On the Apps screen, tap **Settings** → **Accessibility** → **Vision**, and then tick **Negative colours**.

Colour adjustment

Use this feature to adjust how colours are displayed on the screen if you have difficulty in distinguishing colours. The device changes the colours into more recognisable colours.

- 1 On the Apps screen, tap **Settings** → **Accessibility** → **Vision** → **Colour adjustment**.
- 2 Drag the switch to the right.
- 3 Tap **START**.
- 4 Arrange the colour tiles in order of similarity, starting from the base colour.
- 5 When you are finished adjusting the colours, tap **DONE**.
If you can distinguish the colours, no more adjustment is required.
- 6 If the colours cannot be distinguished, tap **Camera** or **Image**.
- 7 Drag the colour adjustment bar to the left or right and tap **DONE**.
To readjust the colour, tap **RESET**.

Setting flash notification

Set the flash to blink when you have incoming calls, new messages, or notifications.

On the Apps screen, tap **Settings** → **Accessibility** → **Hearing**, and then tick **Flash notification**.

Turning off all sounds

Set the device to mute all device sounds, such as media sounds, including the caller's voice during a call.

On the Apps screen, tap **Settings** → **Accessibility** → **Hearing**, and then tick **Turn off all sounds**.

Customising caption settings

Samsung caption

On the Apps screen, tap **Settings** → **Accessibility** → **Hearing** → **Samsung subtitles (CC)**, and then drag the **Samsung subtitles (CC)** switch to the right.

Use the following options:

- **Alignment:** Change the position of the caption.
- **Font:** Change the font type.
- **Font size:** Change the font size.
- **Edge:** Change the edge of the subtitle text.
- **Font:** Adjust the transparency and change the colour of the text.
- **Background:** Adjust the transparency and change the colour of the caption box background.
- **Caption window:** Adjust the transparency and change the colour of the caption window.

Google caption

On the Apps screen, tap **Settings** → **Accessibility** → **Hearing** → **Google subtitles (CC)**, and then drag the **Google subtitles (CC)** switch to the right.

Use the following options:

- **Language:** Select a display language for the caption.
- **Text size:** Change the font size.
- **Caption style:** Change the caption style.

Adjusting the sound balance

Set the device to adjust the sound balance when using a dual headset.

To adjust the sound balance, connect a dual headset to the device. On the Apps screen, tap **Settings** → **Accessibility** → **Hearing** → **Sound balance**. Drag the adjustment bar to the left or right and adjust the sound balance, and then tap **OK**.

Using mono audio

Set the device to enable mono sound when you listen to audio with one earbud. You can use this mode if you have hearing impairments or in situations when a single earbud is more convenient.

On the Apps screen, tap **Settings** → **Accessibility** → **Hearing**, and then tick **Mono audio**.

Using baby crying detector

Set the device to detect a baby crying and alerts you by vibrating.

On the Apps screen, tap **Settings** → **Accessibility** → **Hearing** → **Baby crying detector**, and then drag the **Baby crying detector** switch to the right.

Tap ► to activate the sound detection feature. When the device detects sounds, it vibrates. To set the flash blinks for detecting sound, tap ⋮ → **Settings**, and then tick **Flash notification**.

Using the assistive menus

Displaying the assistive shortcut icon

Set the device to display the assistive shortcut icon. You can use the icon to access apps, features, and settings by tapping assistive menus in the icon. Control the device by tapping the assistive menus in the icon without exploring the screen. When this feature is launched, **Single tap mode** is activated.

- 1 On the Apps screen, tap **Settings** → **Accessibility** → **Dexterity and interaction** → **Assistant menu**.
- 2 Drag the switch to the right.
The assistive shortcut icon appears at the bottom right of the screen.
- 3 Tap **Dominant hand** to move the assistive shortcut icon to a convenient location.

Accessing assistive menus

The assistive shortcut icon appears as a floating icon to provide easy access to the assistive menus from any screen.

When you tap the assistive shortcut icon, the icon expands slightly and the assistive menus appear on the icon. Tap the up or down arrow to move to other panels or scroll the screen up or down to select other menus.

Using the cursor

On the assistive menu, tap **Cursor**. A cursor and a touch area where the cursor can be controlled are displayed on the screen. You can control the screen using small finger movements on the touch area. Drag your finger on the touch area to move the cursor. Also, tap the screen to select items under the cursor.

Use the following options:

-  / : Select an item or scroll left or right on the screen.
-  / : Scroll up or down the screen.
- : Move the touch area to another location.
- : Close the touch area.

To change the cursor settings, on the Apps screen, tap **Settings** → **Accessibility** → **Dexterity and interaction** → **Assistant menu**, drag the switch to the right, and then use options under **Touchpad and cursor settings**.

Using enhanced assistive menus

Set the device to display enhanced assistive menus for selected apps. For example, when you launch **Messages**, searching and composing functions appear on the assistive menu.

On the Apps screen, tap **Settings** → **Accessibility** → **Dexterity and interaction** → **Assistant menu** → **Assistant plus**, drag the switch to the right, and then select apps.

Editing the assistive menus

You can use this feature to edit menus in the assistive shortcut icon.

On the Apps screen, tap **Settings** → **Accessibility** → **Dexterity and interaction** → **Assistant menu**, drag the switch to the right, and then tap **Edit**. To add or delete menus, tap  or .

Turning on the screen with the air gesture feature

Use the air gesture feature to turn on the screen by moving your hand above the sensor at the top of the device. You can turn on the screen without pressing a button. When you use this feature, place the device on a flat surface or hold the device securely to prevent it from moving.

On the Apps screen, tap **Settings** → **Accessibility** → **Dexterity and interaction** → **Air wake up**, and then drag the **Air wake up** switch to the right.

Setting tap and hold delay options

Set the recognition time for tapping and holding the screen.

On the Apps screen, tap **Settings** → **Accessibility** → **Dexterity and interaction** → **Tap and hold delay**, and then select an option.

Using interaction control mode

Activate interaction control mode to restrict the device's reaction to inputs while using apps. Use this mode when you want to allow others only limited access and control of your media or data.

- 1 On the Apps screen, tap **Settings** → **Accessibility** → **Dexterity and interaction** → **Interaction control**.
- 2 Drag the **Interaction control** switch to the right.
- 3 Press and hold the Home button and the Volume button down simultaneously while using an app.

4 Adjust the size of the frame or draw a line around an area that you want to restrict.

5 Tap **DONE**.

The device displays the restricted area. If you tap the screen or press buttons, such as the Home button, they will not work in this area.

To deactivate interaction control mode, press and hold the Home button and the Volume button down simultaneously.

Answering or ending calls

Set the method for answering or ending calls.

On the Apps screen, tap **Settings** → **Accessibility** → **Answering and ending calls**.

Use the following options:

- **Pressing the Home key:** Set the device to answer a call when you press the Home button.
- **Using voice commands:** Set the device to answer a call with voice commands.
- **Waving hand over device:** When a call comes in, move your hand to the left, and then to the right across the sensor to answer the call.
- **Pressing the Power key:** Set the device to end a call when you press the Power button.

Using single tap mode

Set the device to control incoming calls or notifications by tapping the button instead of dragging it. When an alarm sounds or a call comes in, tap the button to stop the alarm or answer the call instead of dragging the button.

On the Apps screen, tap **Settings** → **Accessibility**, and then tick **Single tap mode**.

Configuring accessibility settings

Saving accessibility settings in a file

Export the current accessibility settings in a file.

On the Apps screen, tap **Settings** → **Accessibility** → **Manage accessibility** → **Import/Export**, and then select an export option. The accessibility settings file is saved to the selected storage location.

Importing an accessibility settings file

Import an accessibility settings file and update the current settings.

On the Apps screen, tap **Settings** → **Accessibility** → **Manage accessibility** → **Import/Export**, and then select an import option. Select a file to import and tap **DONE** → **IMPORT**. The accessibility settings will be updated according to the imported file.

Sharing accessibility settings files

Share accessibility settings files with others via email, Wi-Fi Direct, Bluetooth, and more.

On the Apps screen, tap **Settings** → **Accessibility** → **Manage accessibility** → **Share via**. Then, select accessibility files and tap **DONE**. Select a sharing method and follow the on-screen instructions to share the files.

Viewing accessibility services

View accessibility services installed on the device.

On the Apps screen, tap **Settings** → **Accessibility**, and view the list of accessibility services available in **Services**.

Using other useful features

- Using S Voice: You can use **S Voice** to perform various functions using voice commands. Launch **S Voice** and make calls, send messages, and view tasks. Refer to [S Voice](#) for details.
- Searching by voice: Use voice commands to search for webpage content. Use this feature when you are on the move and cannot use your hands to enter text. Refer to [Voice Search](#) for details.
- Using notifications panel: Drag the status bar downwards to open the notifications panel. You can view missed calls, new messages, adjust screen brightness, and more. Refer to [Notifications and quick setting panels](#) for details.
- Switching to easy mode: Easy mode uses a simpler layout and large icons to provide an easy user experience. You can add frequently-used apps or shortcuts to the Home screen for easier access. Refer to [Switching to easy mode](#) for details.
- Using control motions: Control the device with palm motions or gestures. Refer to [Control motions](#) for details.
- Using the finger scanner: Register your fingerprints to the device to unlock the screen or verify the Samsung account password. Refer to [Finger Scanner](#) for details.
- Using car mode: Control the device to perform various functions by voice commands while driving. You can receive incoming calls, view messages, and listen to music without touching the device. Refer to [Car mode](#) for details.
- Using voice recorder: Record or play voice memos. Refer to [Voice Recorder](#) for details.

Troubleshooting

Before contacting a Samsung Service Centre, please attempt the following solutions. Some situations may not apply to your device.

When you turn on your device or while you are using the device, it prompts you to enter one of the following codes:

- Password: When the device lock feature is enabled, you must enter the password you set for the device.
- PIN: When using the device for the first time or when the PIN requirement is enabled, you must enter the PIN supplied with the SIM or USIM card. You can disable this feature by using the Lock SIM card menu.
- PUK: Your SIM or USIM card is blocked, usually as a result of entering your PIN incorrectly several times. You must enter the PUK supplied by your service provider.
- PIN2: When you access a menu requiring the PIN2, you must enter the PIN2 supplied with the SIM or USIM card. For details, contact your service provider.

Your device displays network or service error messages

- When you are in areas with weak signals or poor reception, you may lose reception. Move to another area and try again. While moving, error messages may appear repeatedly.
- You cannot access some options without a subscription. Contact your service provider for more details.

Your device does not turn on

- When the battery is completely discharged, your device will not turn on. Charge the battery completely before turning on the device.
- The battery may not be inserted properly. Insert the battery again.
- Wipe both gold-coloured contacts and insert the battery again.

The touch screen responds slowly or improperly

- If you attach a protective cover or optional accessories to the touch screen, the touch screen may not function properly.
- If you are wearing gloves, if your hands are not clean while touching the touch screen, or if you tap the screen with sharp objects or your fingertips, the touch screen may malfunction.
- The touch screen may malfunction in humid conditions or when exposed to water.
- Restart your device to clear any temporary software bugs.
- Ensure that your device software is upgraded to the latest version.
- If the touch screen is scratched or damaged, visit a Samsung Service Centre.

Your device freezes or has fatal errors

If your device freezes or hangs, you may need to close apps or reinsert the battery and turn on the device to regain functionality. If your device is frozen and unresponsive, press and hold the Power button and the Volume button down simultaneously for more than 7 seconds to restart it.

If this does not solve the problem, perform a factory data reset. On the Apps screen, tap **Settings** → **Backup and reset** → **Factory data reset** → **RESET DEVICE** → **ERASE EVERYTHING**. Before performing the factory data reset, remember to make backup copies of all important data stored on the device.

If the problem is still not resolved, contact a Samsung Service Centre.

Calls are not connected

- Ensure that you have accessed the right cellular network.
- Ensure that you have not set call barring for the phone number you are dialling.
- Ensure that you have not set call barring for the incoming phone number.

Others cannot hear you speaking on a call

- Ensure that you are not covering the built-in microphone.
- Ensure that the microphone is close to your mouth.
- If using a headset, ensure that it is properly connected.

Sound echoes during a call

Adjust the volume by pressing the Volume button or move to another area.

A cellular network or the Internet is often disconnected or audio quality is poor

- Ensure that you are not blocking the device's internal antenna.
- When you are in areas with weak signals or poor reception, you may lose reception. You may have connectivity problems due to issues with the service provider's base station. Move to another area and try again.
- When using the device while moving, wireless network services may be disabled due to issues with the service provider's network.

The battery icon is empty

Your battery is low. Recharge or replace the battery.

The battery does not charge properly (For Samsung-approved chargers)

- Ensure that the charger is connected properly.
- If the battery terminals are dirty, the battery may not charge properly or the device may turn off. Wipe both gold-coloured contacts and try charging the battery again.
- The batteries in some devices are not user-replaceable. To have the battery replaced, visit a Samsung Service Centre.

The battery depletes faster than when first purchased

- When you expose the battery to very cold or very hot temperatures, the useful charge may be reduced.
- Battery consumption increases when you use messaging features or some apps, such as games or the Internet.
- The battery is consumable and the useful charge will get shorter over time.

Your device is hot to the touch

When you use apps that require more power or use apps on your device for an extended period of time, your device may feel hot to the touch. This is normal and should not affect your device's lifespan or performance.

Error messages appear when launching the camera

Your device must have sufficient available memory and battery power to operate the camera app. If you receive error messages when launching the camera, try the following:

- Charge the battery or replace it with a battery that is fully charged.
- Free some memory by transferring files to a computer or deleting files from your device.
- Restart the device. If you are still having trouble with the camera app after trying these tips, contact a Samsung Service Centre.

Photo quality is poorer than the preview

- The quality of your photos may vary, depending on the surroundings and the photography techniques you use.
- If you take photos in dark areas, at night, or indoors, image noise may occur or images may be out of focus.

Error messages appear when opening multimedia files

If you receive error messages or multimedia files do not play when you open them on your device, try the following:

- Free some memory by transferring files to a computer or deleting files from your device.
- Ensure that the music file is not Digital Rights Management (DRM)-protected. If the file is DRM-protected, ensure that you have the appropriate licence or key to play the file.
- Ensure that the file formats are supported by the device. If a file format is not supported, such as DivX or AC3, install an app that supports it. To confirm the file formats that your device supports, visit www.samsung.com.

- Your device supports photos and videos captured with the device. Photos and videos captured by other devices may not work properly.
- Your device supports multimedia files that are authorised by your network service provider or providers of additional services. Some content circulated on the Internet, such as ringtones, videos, or wallpapers, may not work properly.

Another Bluetooth device is not located

- Ensure that the Bluetooth wireless feature is activated on your device.
- Ensure that the Bluetooth wireless feature is activated on the device you wish to connect to.
- Ensure that your device and the other Bluetooth device are within the maximum Bluetooth range (10 m).

If the tips above do not solve the problem, contact a Samsung Service Centre.

A connection is not established when you connect the device to a computer

- Ensure that the USB cable you are using is compatible with your device.
- Ensure that you have the proper driver installed and updated on your computer.
- If you are a Windows XP user, ensure that you have Windows XP Service Pack 3 or higher installed on your computer.
- Ensure that you have Samsung Kies or Windows Media Player 10 or higher installed on your computer.

Your device cannot find your current location

GPS signals may be obstructed in some locations, such as indoors. Set the device to use Wi-Fi or a mobile network to find your current location in these situations.

Data stored on the device has been lost

Always make backup copies of all important data stored on the device. Otherwise, you cannot restore data if it is corrupted or lost. Samsung is not responsible for the loss of data stored on the device.

A small gap appears around the outside of the device case

- This gap is a necessary manufacturing feature and some minor rocking or vibration of parts may occur.
- Over time, friction between parts may cause this gap to expand slightly.
