Section 1: Getting Started

Topics Covered

- Activating Your Phone
 - Switching the Phone On or Off
 - Setting Up Your Voice Mail
-

This section explains how to start using your phone by first configuring your hardware, activating your service, and then setting up your voice mail.

Activating Your Phone

When you subscribe to a cellular network, you are provided with a plug-in SIM card loaded with your subscription details, such as your PIN, available optional services, and many others features.

Installing the SIM Card

Important!: The plug-in SIM card and its contacts information can be easily damaged by scratching or bending, so be careful when handling, inserting, or removing the card. Keep all SIM cards out of reach of small children.

If necessary, switch off the phone by holding down the  key until the power-off image displays.

1. Remove the battery cover by sliding the battery cover in the direction of the arrow.

2. Carefully lift the battery cover away from the bottom of the phone.
3. Lift up and remove the battery.

4. Carefully slide the SIM card under the metal bracket and into the SIM card socket until the card locks into place. Make sure that the card's gold contacts face into the phone and that the upper-left angled corner of the card is positioned as shown below.

Note: If the card is not inserted correctly, the phone does not detect the SIM card. Remove the battery and re-orient the card back into the slot.

5. Replace the battery:
 - (1) Slide the battery back into the compartment so that the tabs on the end align with the slots at the bottom of the phone.
 - (2) Press the battery down until it clicks into place.

Activating Your Phone

Reinstall the battery cover by sliding it back onto the phone until you hear it securely click. Make sure the battery is properly installed before switching on the phone.

Charging a Battery

Your phone is powered by a rechargeable Li-ion battery. A travel adapter, which is used for charging the battery, is included with your phone. Use only approved batteries and chargers. Ask your local Samsung dealer for further details.

You can use the phone while the battery is charging, but doing so requires additional charging time.

Note: You must fully charge the battery before using your phone for the first time. A discharged battery recharges fully in approximately 4 hours.

1. With the battery installed, temporarily remove the plastic cover on the right side of the phone and plug in the travel adapter's connector into the jack.

Important!: Verify that the handset battery is installed prior to connecting the travel adapter. If the battery is not installed and the travel adapter is connected the handset continuously power cycles and prevents proper operation.

2. Plug the adapter's power plug into a standard AC wall outlet.

Note: The previous illustration displays the **incorrect** method for connecting the charger. If attempted, damage to the accessory port occurs therefore voiding the phone's warranty.

3. When charging is finished, unplug the adapter's power plug from the AC wall outlet and then disconnect the travel adapter's connector from the phone.

4. Resecure the plastic cover over the interface jack on the phone.

Warning!: Failure to unplug the travel adapter before you remove the battery, can cause damage to the phone.

Low Battery Indicator

When the battery is weak and only a few minutes of talk time remain; a warning tone sounds and the “Battery low” message repeats at regular intervals on the display. In this condition, your phone conserves its remaining battery power, not by turning off the backlight, but by entering the dimming mode.

When the battery level becomes too low, the phone automatically turns off.

Switching the Phone On or Off

1. Press and hold the  key until the phone switches on.
2. If the phone asks you to enter the phone password, use the keypad to enter this password and press either the **OK** soft key or the  key.

Note: For more information, refer to “Change password” on page 116.

3. If the phone asks for a PIN, use the keypad to enter the PIN and press either the **OK** soft key or the  key. For further details, see “PIN check” on page 115.

The phone searches for your network and after finding it, the term “T-Mobile” displays on the upper left half of your screen. Now you can make or receive calls.

Note: The display language is preset to Automatic at the factory. To change the language, use the **Language** menu. For more information, refer to “Language” on page 102.

4. When you wish to switch off the phone, press and hold the  key until the power-off image displays.

Setting Up Your Voice Mail

For new users, follow the instructions below to set up voice mail:

1. In Idle mode, press and hold the  key on the keypad.
You may be prompted to enter a password.
2. Follow the tutorial to create a password, a greeting, and your name.

Note: These steps may be different depending on your network.

Accessing Your Voice Mail

You can press and hold the  key on the keypad or use the phone's menu to access your voice mail. To access voice mail using the menu:

1. In Idle mode, press the **Menu** soft key.
2. Highlight **Messages** and press the **Select** soft key or the  key.
3. Highlight **Voice mail** and press the **Select** soft key or the  key.
4. Highlight **Call voice mail** and press the **Select** soft key or the  key. Your phone dials the specified voice mail number.
5. When connected, follow the voice prompts from the voice mail center.

Changing the Voice Mail Number

Your SIM card gives you the default service number of the voice mail center. However, should you need to change the number, use the following procedures:

1. In Idle mode, press the **Menu** soft key to access the Menu mode.
2. Highlight **Messages** and press the **Select** soft key or the  key.
3. Highlight **Voice mail** and press the **Select** soft key or the  key.
4. Highlight **Voice server number** and press the **Select** soft key or the  key.
5. Highlight **Voice mail** and press the **Options** soft key.
6. Highlight **Edit** and press the **Select** soft key or the  key. Or, you may highlight **Delete** to delete the number.
7. Edit the name if desired, and then press the **Down** Navigation key to edit the number.
8. Press the **Options** soft key, highlight the **Save** option, and press the **Select** soft key or the  key.
9. Press the  key to return to Idle mode.

Section 2: Understanding Your Phone

Topics Covered

- Features of Your Phone
 - Open View of Your Phone
 - Keys
 - Back View of Your Phone
 - Closed View of Your Phone
 - Display
 - Backlight
-

This section outlines some key features of your phone. It also displays the screen and the icons that display when the phone is in use.

Features of Your Phone

Your phone is lightweight, easy-to-use and offers many significant features. The following list outlines a few of the features included in your phone.

- 1.3 Megapixel Camera with 4x Digital Zoom
- Bluetooth® Wireless Technology
- User friendly, menu driven access to features and options
- Instant Messaging capability
- Sound/Image media capability
- Fun & Apps feature provides files, sounds, images, videos, music, games, Music Player, camera, voice recognition, and image editor.
- Organizer feature provides alarms, calendar, tasks, notes, calculator, tip calculator, world time, synchronization, unit conversion, timer and Stopwatch.

Open View of Your Phone

The following illustrations show the main elements of your phone:

Keys

The following list correlates to the illustrations.

1. **Earpiece** allows you to hear the other caller and the different ring tones or sounds offered by your phone.
2. **Left Soft key** allows you to select soft key actions or menu items corresponding to the bottom left line on the display screen.
3. **Volume keys** allow you to adjust the Ring volume in standby mode (with the phone open) or adjust the Speaker volume during a call. When receiving an incoming call, if you press the volume key, you can mute the ring tone. If you press and hold the volume key, you can reject the call.
4. **t-zone key** in Idle mode, acts as a t-zone shortcut key.
5. **Send key** allows you to make or answer a call. In Idle mode, recalls the last number dialed or received when held down.
6. **Voice mail key** allows you to quickly access your voice mail. Press and hold this key for two seconds to automatically dial your voice mail's phone number.

Keys

7. **Alphanumeric keys** allow you to enter numbers, letters, and some special characters.
8. **Special Function keys** allow you activate unique features while in Idle mode. In Idle mode, if you press and hold the # key, you can turn on the Silent Mode.
9. **Microphone** is used during phone calls and allows other callers to hear you clearly when you are speaking to them. It is also used in making voice note recordings.
10. **Cancel/Clear key** deletes characters from the display. In Menu mode, this key returns you to the previous menu level.
11. **Power On/Off (Exit) key** ends a call. Press and hold this key for two seconds to turn your phone on or off. While in the Menu mode, it returns the phone to Idle mode and then cancels your input.
12. **Shortcut key** opens the application switch window which allows you to select from a group of different applications without having to exit from the currently active application.
13. **OK (Select) key** allows you to accept the choices offered when navigating through a menu.
14. **Right Soft key** allows you to select soft key actions or menu items corresponding to the bottom right line on the display screen. It also provides quick access to your Phonebook.
15. **Navigation key** scrolls through the phone's menu options and acts as a shortcut key from standby mode.
In Menu mode, scrolls through the phone's menus and Phonebook.
In Idle mode:
 - **Down key:** allows you to directly access your Contact list.
 - **Up key:** allows you to directly access the Call records.
 - **Left key:** allows you to directly access Text messaging (New message).
 - **Right key:** allows you to directly access Voice note.

Tip: When entering text, use the **Left** or **Right** Navigation key to mark the position of the cursor.

16. **Display** shows all the information needed to operate your phone, such as the received signal strength, phone battery level, and time.

Back View of Your Phone

The following illustration shows the back, open view of the phone.

1. **Camera lens** allows you to aim and shoot a picture using the camera.
2. **Mirror** allows you to center the camera lens for self portraits.

Closed View of Your Phone

The following illustrations show the external elements of your phone

1. **External speaker** allows you to hear the different ring tones or sounds offered by your phone.
2. **Volume keys** allow you to adjust the Ring volume in standby mode (with the phone open) or adjust the Speaker volume during a call. When receiving an incoming call, if you press the volume key, you can mute the ring tone. If you press and hold the volume key, you can reject the call.
3. **External display** shows the received signal strength, phone battery level, and the time.

Display

4. **Power/Accessory Interface connector** allows you to connect a power cable or optional accessories, such as a USB/data cable or a hands-free headset for convenient, hands-free conversations.
5. **Camera key** allows you to take pictures when you are in camera mode. Launches the camera with a press.

Display

Your phone's display screen provides a wealth of information about your phone's status and options. The display has three areas:

Icons

This list identifies the symbols you'll see on your phone's display screen:

-  Shows the received signal strength. The greater the number of bars, the stronger the signal.
-  Shows the level of your battery. The more bars you see, the more power remains.
-  Displays when a call is in progress.
-  Displays when the phone is not receiving a signal or is in Airplane mode.
-  Displays when Bluetooth wireless technology is active.
-  Displays when Silent Mode is active.
-  Displays when you missed a call.

Displays when a new text message is received.

Displays when a new voice mail is received.

Displays when a new picture message is received.

Displays when you set an alarm to ring at a specified time.
For more details, see "*Alarm*" on page 89.

Displays when the Call Forwarding feature is active. For more details, see "*Call forwarding*" on page 113.

Displays while you are connecting to the Internet.

Displays while your phone is synchronizing data with the network.

Backlight

A backlight illuminates the internal display and the keypad. When you press any key, the backlight comes on. It goes off when no keys are pressed within a given period of time, depending on the setting within the **Backlight** menu. The display turns off after one minute to conserve battery power.

The **On** setting is how long the keypad backlight is on. The **Dim** option is how much longer after the keypad backlight goes off that the display remains lit.

To specify the length of time the backlight is active, access the **Backlight** menu:

1. In Idle mode, press the **Menu** soft key to access the Menu mode.
2. Using the Navigation keys, scroll to the **Settings** icon. Press the **Select** soft key or the **OK** key to enter the menu.
3. Highlight the **Display settings** option and press the **Select** soft key or the **OK** key.
4. Highlight the **Backlight** option and press the **Select** soft key or the **OK** key.
5. Highlight the **On** option. Use the **Left** or **Right** Navigation key to select the time the backlight is on. You may choose between **15 sec**, **30 sec**, **1 min**, **3 min**, or **10 min**.

Backlight

6. Press the **Down** key to take you to the **Dim** option. Use the **Left** or **Right** Navigation key to select the time the Dimming mode is on. You may choose between **Off**, **15 sec**, **30 sec**, **1min**, or **3 min**.
7. Press the **Save** soft key to retain your new settings.

Display

Your phone has a display on the front of the phone. The display indicates when you receive an incoming call or message and also displays any alarms for the specified time. The backlight turns on and the corresponding icon displays on the screen.

The display shows the current time on a digital clock.

Section 3: Call Functions

Topics Covered

- Making a Call
 - Adjusting the Call Volume
 - Answering a Call
 - Call Records
 - Silent Mode
 - Selecting Functions and Options
-

This section describes how to make or answer a call. It also explains the features and functionality associated with making or answering a call. For more information on Ringtones see "*Ring tone*" on page 109. For more information on Call Forwarding see "*Call forwarding*" on page 113.

Making a Call

When the idle screen displays, enter the number you wish to dial and press the  key.

Note: When you activate the **Auto redial** option in the Extra settings menu, the phone automatically redials up to 10 times when the person does not answer the call or is already on the phone, provided your call is not sent to voice mail. For more information, refer to "*Extra settings*" on page 103.

Making an International Call

1. Press and hold the  key. The + character displays.
2. Enter the country code, area code, and phone number.
3. Press the  key to make the call.

Correcting the Number

1. To clear the last digit displayed, press the  key.
2. To clear any other digit in the number, press the **Left** or **Right** Navigation key until the cursor is immediately to the right of the digit to clear and then press the  key. You can also enter a missing digit.
3. To clear the entire display, press and hold the  key.

Ending a Call

- ▶ Briefly press the  key when you want to end your call.

Redialing the Last Number

The phone stores the numbers of the calls you've dialed, received, or missed if the caller is identified.

To recall any of these numbers:

1. If you typed characters on the display, press the  key to return to Idle mode.
2. Press the  key to display a list of the most recent numbers used in the order you dialed or received them.
3. Use the **Up** and **Down** Navigation keys to scroll through the numbers and highlight the number you want.
4. To view details of the number, press the  key.

Before you dial the number, you may also press the **Options** soft key to display the following options:

- **Details:** Displays the caller information, date and time of the call.
- **Call back:** Places a call back to the number.
- **Send message:** Allows you to send a Text message, Picture message, or Voice note to the number.
- **Save to Phonebook:** Stores the number in your Phone memory.
- **Delete:** Allows you to delete the selected number or All call records.
- **Add to block list:** Adds the selected number to the blocked calls list.

5. To dial the number, press the  key.

Making a Call from the Phonebook

You can store regularly used phone numbers into the phone's memory (Phonebook).

Once you store a number in the Phonebook, you can press only a few key to dial the stored number. By using the Speed Dial feature you can also assign your most frequently-used numbers to number keys.

For further details about the Phonebook feature, see "*Understanding Your Phonebook*" on page 59.

Adjusting the Call Volume

During a call, use the Volume keys on the left side of the phone, to adjust the speaker volume.

- ▶ Press the  key to increase the volume level and the  key to decrease the level.
In Idle mode, you can also adjust the ring volume using these keys.

Important!: For safety information related to Call Volume, see "*Responsible Listening*" on page 141.

Answering a Call

When somebody calls you, the phone rings and displays the incoming call image.

The caller's phone number, or name if stored in Phonebook, displays.

1. Press the  key or the **Accept** soft key to answer the incoming call.
If the **Anykey answer** option in the **Extra Settings** menu is activated, you can press any key to answer a call except for the  key and the **Reject** soft key.

Note: To reject an incoming call, press the **Reject** soft key or  key.

2. Press the  key to end the call.

Note: You can answer a call while using the Phonebook or menu features. After ending the call, the phone returns to the function screen you were previously using.

Call Records

All incoming, outgoing and missed calls are listed in the Call Records. You can also view **Call time** records.

1. In Idle mode, press the **Menu** soft key to access the Menu mode.
2. Using the Navigation keys, scroll to the **Call records** icon and press the **Select** soft key or the  key to enter the menu.

Note: While in Idle mode, press the  key to access the incoming, outgoing, and missing call records.

The following Call Record options are available:

All calls

This menu lets you view the 90 most recent calls you received, dialed, and missed.

The name or number, if already stored in your Phonebook, displays with the number of occurrences for each number.

Note: At any time while you are in Call Records, you may use the **Left** or **Right** Navigation keys to scroll between **All calls**, **Missed calls**, **Incoming calls**, and **Outgoing calls**.

Missed calls

This menu lets you view the 30 most recent calls you received, but did not answer.

The name and number, if already stored in your Phonebook, displays with the number of occurrences for each number.

Viewing Missed Calls

When you are unable to answer a call for any reason, you can find out who is calling you, if this service is available, so that you can call the person back.

The number of calls you missed displays on the idle screen immediately after a call is missed.

To view a missed call immediately:

1. If the display is off, press the volume key to turn the display on.
2. Press the **View** soft key.

The number corresponding to the most recently missed call displays, if available.

3. To scroll through the missed calls, press the **Up** or **Down** Navigation key.
4. To call the number displayed, press the  key.
5. Press the **Options** soft key for the following options:
 - **Details:** Displays details of the missed call including name, number, dates and times of the calls.
 - **Call back:** Places a call back to the number.
 - **Send message:** Allows you to send a Text message, Picture message, or Voice note back to the missed number.
 - **Save to Phonebook:** Stores the number in your Phone memory.
 - **Delete:** Allows you to delete the selected number or delete all call records.
 - **Add to block list:** Adds the selected number to the blocked calls list.

Note: You can press the  key at any time to exit the **Missed Call** feature.

Incoming calls

This menu lets you view the 30 most recent calls you received.

The name and number, if already stored in your Phonebook, is then displayed with the number of occurrences for each number.

Outgoing calls

This menu lets you view the 30 most recent calls you dialed.

The name and number, if already stored in your Phonebook, is then displayed with the number of occurrences for each number.

Delete all

This menu allows you to delete all of the records in each call record separately, or you can delete all of your call records at one time.

1. Highlight the type of calls you want to delete and press the **OK** key to make a check mark.

Note: Selecting the **All calls** check box automatically selects all the entries in the **Delete all** menu.

2. Press the **Delete** soft key to delete the calls.
3. When a confirmation message displays, press the **Yes** soft key or **OK** key to confirm.

Call time

This menu lets you view the time log for calls both made and received.

Note: The actual time invoiced by T-Mobile may differ from times displayed due to network features and service plan.

The following time logs are available:

- **Last call time:** shows the length of your last call.
- **Total outgoing:** shows the total length of all calls made since the timer was last reset.
- **Total incoming:** shows the total length of all calls received since the timer was last reset.
- **Life time is:** shows the total length of time for both incoming and outgoing calls. The length of call time must be at least 1 minute to increment this field. You cannot clear this information.

Note: To change this password, see "*Change password*" on page 116.

Silent Mode

Silent Mode is convenient when you wish to stop the phone from making any noise, (in a theater for example).

In Idle mode, press and hold the  key until the “Silent Mode Activated” message and the Silent Mode icon () display. In Silent Mode, instead of sounds, your phone vibrates.

To exit and reactivate the previous sound settings, press and hold the  key again until the “Silent Mode Deactivated” message displays. The Silent Mode icon () no longer displays.

Selecting Functions and Options

Your phone offers a set of customizable functions. These functions are arranged in menus and sub-menus, and accessed using the two soft keys. Each menu and sub-menu allows you to view and alter the settings of a particular function.

Soft Keys

The roles of the soft keys vary depending on the function you are currently using. The labels on the bottom line of the display just above each key indicate their current role.

Selecting Options

To view the various functions and options available, you must select the one you want by:

1. Press the appropriate soft key.
2. To select the function displayed or the option highlighted, press the **Select** soft key or the  key.
3. To view the next function or highlight the next option on a list, press the **Down** Navigation key.
4. To move back to the previous function or option on a list, press the **Up** key.
5. To move back up one level in the menu structure, press the **Back** soft key.
6. To exit the menu structure without changing the settings, press the  key.

In some functions, you are asked for a password or PIN. Enter the correct code and press the **OK** soft key or the  key.

When you access a list of options, your phone highlights the currently active option. If, however, there are only two options, such as **On/Off** or **Enable/Disable**, your phone highlights the option that is not currently active, so that you can select it.

Options During a Call

Your phone provides a number of control functions that are available for use during a call.

Switching off the Microphone (Mute)

You can temporarily switch your phone's microphone off, so that the other person cannot hear you.

Example: You wish to say something to a person in the room but do not want the person on the phone to hear you.

To switch the microphone off temporarily:

- ▶ Press the **Options** soft key. Select the **Mute** option and press the **Select** soft key or the  key. The other person can no longer hear you. The Mute icon () displays at the bottom left of the screen.

To switch the microphone back on:

- ▶ Press the **Options** soft key. Select the **Unmute** option and press the **Select** soft key or the  key. The other person can hear you again.

Putting a Call on Hold

You can place the current call on hold whenever you want. If your network supports this service, you can also make another call while a call is in progress.

To place a call on hold:

1. Press the **Options** soft key, highlight the **Hold** option, then press the **Select** soft key or the **OK** key.
2. Press the **Resume** soft key to reactivate the call.

To make a new call while a call is in progress:

1. Enter the new phone number that you wish to dial or look it up in the Contact list.

2. Press the  key to dial the second call.

The first call is then automatically put on hold.

- Or -

1. Press the **Options** soft key, select **Hold**, and press the **OK** key. This places the currently active call on hold and allows to make a new call.
2. Make the second call in the normal way.

When there is an active call and a call on hold, you may switch between the two calls by placing the current held call to active and then placing the other call on hold.

To switch between the two calls:

1. Press the **Options** soft key, select **Swap**, and press the **OK** key. The current active call is placed on hold and the call on hold is then reactivated so that you can continue conversing with that person.
2. Press the  key when you are finished or want to end the call.

Using the Speakerphone

While on a call, you can use your Speakerphone by following these steps:

1. Press the **Spkr on** soft key.
2. To turn the Speakerphone off, press the **Spkr off** soft key.

Important!: For safety information related to speakerphone use, see "Responsible Listening" on page 141.

Muting or Sending Key Tones

These options allow you to turn the key tones off or on. If the **Keypad tone** option is Off, your phone does not transmit the DTMF (Dual Tone Multi-Frequency) tones of the keys, which then allows you to press keys without hearing annoying key tones during a call.

Note: To communicate with answering machines or computerized telephone systems, the **Send DTMF** option must be selected.

Searching for a Number in Phonebook

You can search for a number in Phonebook during a call.

1. Press the **Options** soft key.
2. Press the **Down** Navigation key to highlight **Phonebook** and press the **OK** key.
3. Press the **Down** Navigation key to highlight the **Contact list** option and press the **Select** soft key or the **OK** key.

With the Phonebook entries then listed:

4. Enter the name that you wish to find in the textbox located above the entries. If you enter the first few letters of the name, the Phonebook entries are listed starting with the first entry matching your input.
Or, use the **Up** or **Down** Navigation key to highlight the contact that you desire.
5. To view the highlighted entry, press the **Options** soft key.
6. Highlight the **View** option and press the **Select** soft key or the **OK** key. The Contact information displays.

For further details about the Phonebook feature, see *"Finding a Phonebook Entry"* on page 60.

Call Waiting

The **Call waiting** option must be set to **Activate** before you can answer an incoming call while another call is in progress. For more information, refer to "*Call waiting*" on page 114.

You are then notified of an incoming call with a call waiting tone.

To answer a new call while another call is in progress:

1. Press either the **Accept** soft key or the  key to answer the incoming call. The first call is automatically put on hold.
2. To switch between the two calls, press the **Options** soft key, highlight **Swap** and press the **Select** soft key or the  key.
3. To end a call on hold, press the **Options** soft key and select the **End held call** option. Then press the **Select** soft key or the  key.
4. To end the current/remaining call, press the  key.

Making a Multi-Party Call

A multi-party call is a network service that allows up to six people to take part simultaneously in a multi-party or conference call.

For further details about subscribing to this service, contact T-Mobile customer service.

Setting up a Multi-Party Call

1. Call the first participant in the normal way.
2. Press the **Options** soft key and select the **New call** option.
3. Call the second participant in the normal way. The first call is automatically placed on hold.
4. To join the first participant to this multi-party call, press the **Options** soft key and select **Join**. Press the **Select** soft key or the  key.

Note: These first two calls are then grouped together on screen and displayed with an adjacent number corresponding to the order in which the calls were made.

5. Press the **Options** soft key and then select the **New call** option to add a new person to a second multi-party call group.

6. Press the **Options** soft key or the  key. Select the **Join** option and press the **Select** soft key or the  key.

Note: There are a maximum of two callers that can be joined to a single multi-party line. Additional callers would participate in a new Multiparty session which can be held in conjunction with the previous multiparty call. Each of these multi-party calls can then be placed on hold or swapped.

Having a Private Conversation With One Participant

When there are two participants in a multi-party session, it might be necessary to place one of those participants on hold so that a private conversation can be held with a single caller. While you are in a multi-party call:

1. Press the **Options** soft key and choose the **Split** option. Press the **Select** soft key or the  key.
The short list of call participants then displays with the first caller selected.
2. Press the **Up** or **Down** Navigation key to highlight the person with which you want to talk privately, and press the **Select** soft key or the  key.

Note: You can now talk privately to that person while the other participants can continue to converse with each other. If there is only one other participant, that person is then placed on hold.

3. To return to the multi-party call, press the **Options** soft key and select **Join**. Press the **Select** soft key or the  key. All of the multi-party call participants can now hear each other again.

Dropping One Participant

1. Press the **Options** soft key and choose the **Split** option. Press the **Select** soft key or the  key. The short list of call participants displays.
2. Highlight the person you want to keep and press the **Select** soft key or the  key.
3. Press the **Options** soft key and highlight **Remove**. Press the **Select** soft key or the  key. The remaining participant on hold is highlighted.
4. Press the **Select** soft key or the  key to drop the selected participant. This option allows you to continue talking to the other participants.
5. When you want to end the multi-party call, press the  key.

Section 4: Menu Navigation

Topics Covered

- Menu Navigation
 - Menu Outline
-

This section explains the menu navigation for your phone. It also includes an outline of all the available menus associated with your phone.

Menu Navigation

You can tailor the phone's range of functions to your needs using menus and sub-menus. Menus and sub-menus can be accessed by scrolling using the Navigation keys or by using the shortcuts.

Accessing a Menu Function by Scrolling

1. In Idle mode, press the **Menu** soft key to access the Menu mode.
2. Scroll using the Navigation keys to reach a main menu (for example: **Settings**). Press the **Select** soft key or the  key to enter the menu.
3. If the menu contains sub-menus, (for example, **Security**), after highlighting the sub menu, press the **Select** soft key or the  key to access it.
If the menu you selected contains further options, repeat this step.
4. To scroll through the menus, press the **Up** or **Down** Navigation keys.
5. To confirm the chosen setting, press the **Select** soft key, or the  key.
6. To return to the previous menu level, press the **Back** soft key, or the  key.
7. To exit the menu without changing the settings, press the  key.

Using Shortcuts

The menu items, such as menus, sub-menus, and options, are numbered and can be accessed quickly by using their shortcut numbers. For the main menus, press the corresponding number keys (1 to 0) to access any one of the shortcuts.

Example: Accessing the **Security** menu.

1. Press the **Menu** soft key.
2. Press the  key for **Settings**.
3. Press the  key for **Security**.

Section 5: Entering Text

Topics Covered

- Changing the Text Input Mode
 - Using T9 Mode
 - Using Number Mode
 - Using Symbol Mode
 - Using ABC Mode
-

This section outlines how to select the desired text input mode when entering characters into your phone. This section also describes how to use the T9 predictive text system to reduce the number of key strokes associated with entering text.

Changing the Text Input Mode

When using your phone, you often need to enter text, such as when storing a name in your Phonebook, creating your personal greeting or scheduling events on your calendar. You can enter alphanumeric characters by using your phone's keypad.

Your phone has the following text input modes:

- **T9 mode:** this mode allows you to enter words with only one keystroke per letter. Each key on the keypad has more than one letter; for example, you press  to enter J, or K. However, the T9 mode automatically compares the series of keystrokes you make with an internal linguistic dictionary to determine the most likely word, thus requiring fewer keystrokes than the traditional ABC mode.
- **ABC mode:** this mode allows you to enter letters by pressing the key labeled with the corresponding letter.
- **Number mode:** this mode allows you to enter numbers.
- **Symbol mode:** this mode allows you to enter symbols, such as punctuation marks.

Note: When you are in a field where you can enter characters, the text input mode indicator displays at the bottom right of the screen.

Example: Writing a text message.

1. Press the **Right** soft key () to change the text input mode.

Note: Each time you press the **Right** soft key (), a different Text input mode indicator displays in the lower right corner of your display.

The following options are available:

 : T9 mode

 : Number mode

 : Symbol mode

 : ABC mode

2. Enter text in the text message box using the selected text input mode when the Text input mode indicator that you desire displays.

Using T9 Mode

T9 is a predictive text input mode that allows you to key in any character using single keystrokes. This text input mode is based on a built-in dictionary.

To enter a word in T9 mode:

1. When you are in T9 mode, press any one of the letter keys to enter a word. Press each key only once for each letter.

Example: To enter "Hello" in T9 mode, press the 5, 1, L, L, and 0 keys.

The word that you type displays on the screen. The word may change with each consecutive key that you press.

2. Enter the whole word before editing or deleting the keystrokes.
3. Press the  key to insert a space and begin entering the next word.

To enter periods, hyphens, apostrophes, and other special characters press the

key then press the key that contains the associated symbol.

To shift case in T9 mode:

- Press the  key.
- There are 3 cases: Initial capital, Capital lock, and Lower case.

Tip: You can move the cursor by using the Navigation keys.

To delete characters:

- ▶ Press the  key. Press and hold the  key to clear the display.

Using Number Mode

The Number mode enables you to enter numbers into a text message.

- ▶ Press the keys corresponding to the digits you want to enter.

Using Symbol Mode

Symbol mode enables you to insert symbols and punctuation marks into text. To display a list of symbols press the Right navigation key until the symbols display on the screen.

1. To select a symbol, press the corresponding number key.
2. To display more symbols, press the Navigation keys.
3. To clear the symbol(s), press the  key. When the input field is empty, this key returns the display to the previous mode.
4. To insert the symbol(s) into your message, press the **OK** soft key or the  key.

Using ABC Mode

To use ABC mode, use the letter keys to enter your text.

1. Press the key labeled with the letter you want:
 - Once for the first letter
 - Twice for the second letter
 - And so on
2. Select the other letters in the same way.
 - To enter periods, hyphens, apostrophes, and other special characters press the  key then press the key that contains the associated symbol.
 - To shift case in ABC mode, use the  key. There are 3 cases: Initial capital, Capital lock, and Lower case.

Note: You can move the cursor by using the Navigation keys.

To delete letters:

- ▶ Press the  key. Press and hold the  key to clear the display.

Note: The cursor moves to the right when you press a different key. When entering the same letter twice or a different letter on the same key, just wait for a few seconds for the cursor to automatically move to the right, and then select the next letter.

Keys

By default, the first letter of an entry is capitalized and all consecutive letters are kept in lowercase (unless the  key is used). After a character is entered, the cursor automatically advances to the next space after two seconds or when you enter a character on a different key.

Characters scroll in the following order (lowercase characters shown in parentheses):

 Q W ! q w !	 Z X z x (switches to Symbol mode when held)
 E R 1 e r 1	 C V 7 c v 7
 T Y 2 t y 2	 B N 8 b n 8
 U I 3 u i 3	 M 9 m 9
 O P . o p .	 Delete
 A S ? a s ?	 Alt (when pressed before typing it inserts a number)
 D F 4 d f 4	 * (press and hold to insert an asterisk)
 G H 5 g h 5	 0 (inserts a space) (Alt+0 inserts the number 0)
 J K 6 j k 6	 # (press and hold) (shifts case in ABC mode)
 L , I ,	 Enter

This section describes how to send or receive different types of messages. It also explains the features and functionality associated with messaging.

Types of Messages

Your phone provides the following message types:

- Text Messages
- E-mail Messages
- Picture Messages
- Voice Note
- Voice Mail
- Broadcast Messages (SIM Dependent)
- Instant Messaging

Text Messages

Short Message Service (SMS) allows you to send and receive short text messages to and from other mobile phones. In addition, your phone supports the Enhanced Messaging Service (EMS), which enables you to include simple graphics, melodies, and animated images in your messages. To use this feature, you must subscribe to T-Mobile's message service.

The Message icon () displays when you receive a new text message. When the memory is full, the message icon flashes on your phone and you cannot receive any new messages. You must delete a message before you can receive additional messages.

- Use the **Delete** option in each message box to erase obsolete messages.

Create new

In this menu, you can write and send a text message.

The handset restarts after setup.

Sending Options

This option allows you to configure your sending options such as **Priority**, **Add signature** check box, **Edit name**, **Edit telephone number** and **Edit note for e-mail**.

Account Settings

This option allows you to modify your e-mail account settings.

Note: Account settings vary depending on your e-mail account.

Picture Messages

This menu allows you to use the Multimedia Message Service (MMS).

Picture Messaging is a messaging service that provides delivery of personal picture messages from phone to phone or from phone to e-mail.

In addition to the familiar text content available via traditional text messages, picture messages can contain images, graphics, voice, and audio clips.

Picture Messages

A Picture Messaging message is a multimedia presentation contained in a single file. It is not a text file with attachments.

You must first retrieve a picture message from T-Mobile's voice mail server before you can view the message. The  displays in your Inbox list to indicate any not yet retrieved Picture messages. The Message icon () displays once you successfully retrieve a new picture message from the voice mail server.

Using the Picture Messaging feature, your phone can receive and send messages that contain multimedia files, such as photos, sounds and images that you downloaded from the Internet and voice notes you recorded. This function is available only if it is supported by your service provider. Only phones that offer picture messaging features can receive and display picture messages.

Create new

This menu allows you to create a new picture message and then send it to one or more destinations.

Creating and Sending a Picture Message

1. In Idle mode, press the **Menu** soft key to access the Menu mode.
2. Using the Navigation keys, scroll to the **Messages** icon and press the **Select** soft key or the **OK** key to enter the menu.

This section explains how to use and manage your Phonebook.

Using Contacts List

Use the following procedures to store a new contact to your Phone.

Storing a Number in the Phone's Memory

The default storage location for saving phone numbers to your phonebook is your phone's built-in memory. The first time you use the Phonebook feature your phone prompts with the following "Would you like to store a copy of your contacts on My.T-Mobile.com so you can view and manage your contacts online?" Responding with Yes copies the information stored on your SIM card to your phone's memory and then synchronizes with T-Mobile's network. After the initial use of this feature, additional, new contact information stores directly to the phone's memory and synchronizes with T-Mobile's network during predetermined, timed intervals.

Note: For more information, refer to "*Synchronization*" on page 96.

1. In Idle mode, press the **Ph.Book** soft key.
2. Scroll to **Add new contact** by pressing the **Up** or **Down** Navigation key and press the **Select** soft key or the  key.

Finding a Phonebook Entry

3. Enter a first name in the **First Name** text box. Press the **Down** key to tab to the next text box.

For further details about how to enter characters, see *"Using ABC Mode"* on page 38.

4. Enter a last name in the **Last Name** text box.
5. Highlight a number Type by pressing the **Up** or **Down** Navigation key, then enter a number in the text box.

The following types are available:

- **Mobile**: assigns the number to the Mobile entry.
- **Home**: assigns the number entered to the Home entry.
- **Office**: assigns the number entered to the Work entry.
- **Fax**: assigns the number entered to the Fax entry.
- **Other**: allows you to enter more detailed information for the entry.
- **E-mail**: allows you to enter the e-mail address for the contact.
- **Picture ID**: allows you to add a Picture ID assigned to the contact.
- **Ringtone**: allows you to assign a Ringtone by choosing from one of the following locations: Default melodies, Voice list, Sounds, Music or Do not assign (no ringtone assigned to entry).
- **Group**: allows you to assign this contact to a group.
- **Notes**: allows you to enter additional information about the contact. Up to 50 characters are allowed.

6. Press the **Options** soft key and highlight the **Save** option and press the **Select** soft key or the **OK** key. The number saves to your selected destination and the new contact information displays.

7. Press the  key to return to Idle mode.

3. Highlight **Voice recognition** and press the **Select** soft key or the  key.
4. At the voice prompt, say a command.

Note: A list of voice commands briefly displays.

Voice Recognition Commands

- **Call:** dials a name from your contact list, or dials a number, even if the number is not stored in the contact list. For more information, refer to "*Contacts List Voice Activation*" on page 84.
- **Send Text:** displays the Create Text Message screen. For more information, refer to "*Creating a Simple Text Message*" on page 41.
- **Lookup:** allows you use a voice command to locate and display contact information stored in the Contacts list. For more information, refer to "*Finding a Phonebook Entry*" on page 60.
- **Go to:** accesses the Voice Memo, Calendar, and Contacts List features of your phone. (See 'Voice Memo' on page 38, 'Calendar' on page 126, and 'Your Contacts List' on page 53 for more information.)
- **Check:** Lets you check your phone's status (that is, network coverage, signal strength, and battery in the same report), network coverage, signal strength, battery, and phone number.

Voice recognition

Speak clearly when giving your command. If, after a few seconds, the handset does not recognize your command, a voice prompt asks you to repeat the command. If the software does not recognize your command the following message displays “Sorry, no match found,” and voice recognition turns off.

Important!: You must end your current VoiceSignal call before you can make another call.

Voice Recognition Tips

- Wait for the tone before you speak.
- Speak clearly and at a normal volume.

Contacts List Voice Activation

On startup VoiceSignal reads your Contacts list and voice-activates all the names. When you have add or change contacts, VoiceSignal automatically reloads and voice-activates the list when you add or modify a contact.

Voice Recognition Settings

Choice lists

VoiceSignal uses choice lists when a name or number is not clearly recognized. The software displays three choices and prompts you to select a choice.

You can modify the way VoiceSignal uses the choice lists in the settings. Each time VoiceSignal activates you can choose to view the choice list even if there is only one choice. Additionally, you can choose never to view a choice list, even if there are multiple choices. When the name or number you speak is not recognized, the

Automatic setting displays the choice list.

Choice list options

1. In Idle mode, press the **Menu** soft key to access Menu mode.
2. Select **Fun & Apps** and press the **Select** soft key or the **OK** key.
3. Highlight **Voice recognition** and press the **Select** soft key or the **OK** key.

4. At the voice prompt, press the **Settings** soft key and select one of the following:

Show caller information

By turning this option **On**, when you miss an incoming call, information such as the caller name displays on your screen when your missed calls are listed.

Bluetooth

About Bluetooth

Bluetooth is a short-range wireless communications technology capable of exchanging information over a distance of about 30 feet without requiring a physical connection.

Unlike infrared, you don't need to line up the devices to beam information with Bluetooth. If the devices are within a range of one another, you can exchange information between them, even if they are located in different rooms.

The following Bluetooth options are available:

Turn Bluetooth On/Off

This option allows you to turn Bluetooth **On** or **Off**.

- ▶ Make a selection and press the **Select** soft key or the **OK** key.

My devices

This option allows you to search for new Bluetooth devices.

- ▶ Highlight the **Search new device** option and press the **Select** soft key or the **OK** key.

The phone searches for available devices.

My visibility

When the Bluetooth Visibility is turned on, your phone is wirelessly transmitting its phone name and status. This can be useful if you are attempting to connect additional Bluetooth devices. Allowing your phone to promote its visibility can pose a security risk and incite unauthorized connection. This feature should be paired with a Bluetooth security option.

- ▶ Highlight the option (On/Off) and Select (Left) soft key or the **OK** key.

My phone name

When your phone's Bluetooth visibility is turned On, it identifies itself using the name entered into this text field. This name can be altered by selecting the pre-existing text and selecting a new text string in its place. This feature should be paired with a Bluetooth security option.

1. Press the  key to erase the previous name.

Sound settings

2. Use the phone's keypad to enter a new name. The default input entry method is Abc, where the initial character is Uppercase and each consecutive character in that same word is left as lowercase text.
3. Press the **Save** soft key or the **OK** key to save the new name.

Security modes

When the Bluetooth Visibility is turned on, your phone is wirelessly transmitting its phone name and status. This transmission can pose a security risk and incite unauthorized connection to your phone. It is recommended that you activate your phone's Bluetooth security.

1. Highlight the option (On/Off) and press the **Select** soft key or the **OK** key.

Features

Actually, the Bluetooth specification is a protocol that describes how the short-range wireless technology works, whereas individual profiles describe the services supported by individual devices. Profiles reduce the chance that different devices integrate.

The following Service profiles are available:

- **Headset:** the remote Bluetooth headset enables both incoming and outgoing calls.
- **Handsfree:** the remote Bluetooth car kit enables both incoming and outgoing calls.
- **Bluetooth stereo headset:** used to make calls and listen to music through the Bluetooth stereo headset.
- **File transfer:** used to transfer files to and from Bluetooth devices.
- **Object push:** used to exchange personal data (namecards, Phonebook contacts, etc.) with Bluetooth devices.
- **Basic printing:** used to print images, text messages, personal data such as namecards and appointments, etc. through a remote Bluetooth printer.
- **Dial-up networking:** used to provide Internet access for Bluetooth devices through the phone's modem.
- **Serial port:** used to connect to other Bluetooth devices through a virtual serial port.

Help

This option takes you to the T-Mobile Help menu in t-zones.

Sound settings

You can customize various sound settings.

Incoming call

Note: When downloading **Mega Tones®** or **HiFi Ringers™**, charges may apply.

Browse MegaTones

Using the **Browse MegaTones** option on the sounds list, you can quickly access the T-Mobile website and download new sounds by using the t-zone browser.

- ▶ Press the **Connect** soft key to purchase additional sound files.

Browse HiFi Ringers

Using the **Browse HiFi Ringers** option on the sounds list, you can quickly access the T-Mobile website and use the t-zone browser to download new HiFi Ringers.

- ▶ Press the **Connect** soft key to purchase additional ringtones.

Ring tone

This menu allows you to select a ring melody.

1. Highlight **Ring tone** and press the **OK** key.
2. Use the **Up** or **Down** key to highlight a ring tone or press the **Left** or **Right** Navigation key to select a file from either the **Default Melodies**, **Voice list**, **Downloaded sounds**, or **music** folders.
3. Press the **Select** soft key.

Volume

This menu allows you to adjust the ring volume to one of 7 levels.

- ▶ Use the **Right** or **Left** Navigation key to increase or decrease the volume.

Alert type

This menu allows you to specify how you are to be informed of incoming calls.

- ▶ Use the **Right** or **Left** Navigation key to select a Alert type.

The following options are available:

- **Melody**: the phone rings using the ring melody selected in the Ringtone menu.
- **Vibration**: the phone vibrates but does not ring.
- **Melody and vibration**: the phone plays the melody and vibrates simultaneously.
- **Vibration then melody**: the phone vibrates 3 times and then starts ringing.
- **Melody then vibration**: the phone plays the melody and then vibrates.

Keypad tone

This menu allows you to select the key tone and volume that the phone sounds when you press a key.

1. Use the **Left** or **Right** Navigation keys to make your selections.
2. Select **Off** to turn the sound off.
3. Scroll to **Volume** and press the **Left** or **Right** Navigation keys to adjust the volume.

This menu allows you to select the melody that the phone sounds when it is switched on and off.

- To turn the sound on select **Tone 1** or **Tone 2**. Select **Off** to turn the sound off.

Slide tone

This menu allows you to choose from four tones, or **Off** when sliding the phone open.

Silent mode

This menu allows you to select whether or not your phone vibrates while in silent mode. You may choose between **Vibration** and **Mute**.

Extra tones

You can customize additional tones for the phone.

1. Press the **OK** key to turn a selected tone **On**. A check mark displays in front of the option. Press the **Save** soft key to save the setting.
2. Press the **OK** key twice to turn a selected tone **Off**. The check mark no longer displays in front of the option. Press the **Save** soft key to save the setting.

The following options are available:

- **Indicative tone:** generates a tone whenever a pop-up window displays on the screen.
- **Minute minder:** sets whether or not the phone beeps every minute during an outgoing call to keep you informed of the length of your call.
- **Connection tone:** sets whether or not the phone beeps when your call is connected to the system.
- **Alerts on call:** sets whether or not you receive tones when a message arrives while you are on a call.

Synchronization

The first time you access the synchronization feature the handset prompts with the following message:

Synchronization complete! Phone will automatically sync on every phonebook edit you make.

To change sync settings go to, Settings > Synchronization. To manage your contacts, go to: "t-mobile.com".

This feature allows you to back up (synchronize) Contact information, Schedules, and Events stored on your phone with your T-Mobile account on the network. Each time you edit contact information your phone automatically synchronizes with the web Address Book.

Important!: Synchronization is a free service offered to T-Mobile customers.

Data to Sync

This feature allows you to synchronize your Contacts, Calendar events, and Task list with your T-Mobile account on the network.

1. In Idle mode, press the **Menu** soft key.
2. Scroll to **Organizer** and press the **Select** soft key or the **OK** key.
3. Highlight **Synchronization** by pressing the **Up** or **Down** Navigation key and press the **Select** soft key or the **OK** key.
4. Highlight **Data to Sync** and press the **Select** soft key or the **OK** key.
5. Highlight the type of data to synchronize (Contacts, Calendar or Task) and press the **OK** soft key to display a check mark next to the item to synchronize.
6. Press the **Save** soft key.

Synchronization

7. Select the **Sync now** option and press the **Select** soft key or the  key.
8. When the “Synchronization will start?” message displays, press the **Continue** soft key.
9. Press the  key to return to the Idle mode.

Sync now

Once you establish the information you want to synchronize, this feature allows you to synchronize with the T-Mobile network.

1. In Idle mode, press the **Menu** soft key.
2. Scroll to **Organizer** and press the **Select** soft key or the  key.
3. Highlight **Synchronization** by pressing the **Up** or **Down** Navigation key and press the **Select** soft key or the  key.
4. Highlight **Sync now** and press the **Select** soft key or the  key.
The information synchronizes with the T-Mobile network and a confirmation dialog displays when finished.
5. Press the  key to return to Idle mode.

Viewing the synchronization log

This feature creates a log of the synchronization activity for viewing.

1. In Idle mode, press the **Menu** soft key.
2. Scroll to **Organizer** and press the **Select** soft key or the  key.
3. Highlight **Synchronization** by pressing the **Up** or **Down** Navigation key and press the **Select** soft key or the  key.
4. Highlight **View log** and press the **Select** soft key or the  key.
5. The screen default displays the all sync log information.
6. Press the **Back** soft key when you are finished viewing the log.
7. Press the  key to return to Idle mode.

About sync

This feature displays information about how the synchronization feature works and provides a URL for more specific synchronization information.

Press the More Info soft key to launch the t-zones synchronization information.

Note: Your t-zones feature must be activated by T-Mobile for this feature to work.

Network services

Call forwarding

This network service enables incoming calls to be re-routed to a secondary, pre-specified number.

Example: Forwarding business calls to a colleague while on holiday.

To set your call forwarding options:

1. Select the **Call forwarding** option and then press the **Select** soft key or the **OK** key.
2. Select a call forwarding option by pressing the **Up** or **Down** Navigation key and then press the **Select** soft key or the **OK** key.

The following options are available:

- **Forward always:** all calls are forwarded until this feature is cancelled.
 - **Busy:** calls are forwarded when you are already on another call.
 - **No reply:** calls are forwarded when you do not answer the phone.
 - **Unreachable:** calls are forwarded when you are not in an area covered by T-Mobile or when your phone is switched off.
 - **Cancel all:** all call forwarding options are canceled.
3. Select the type of forwarded calls, **Voice calls** or **Data calls**, by pressing the **Up** or **Down** Navigation key to select the appropriate field, and then press the **Select** soft key or the **OK** key.
The current status displays. If the option was already set, the number to which the calls are forwarded displays.
 4. To activate call forwarding, select **Activate** by using the **Left** or **Right** Navigation key. The **Forward to** field then becomes available to input the number.

5. Enter the number to which the calls are to be forwarded in the **Forward to** text box and press the **Select** soft key or the **OK** key.
To enter an international code, press and hold the  key until the **+** sign displays.
The phone sends your settings to the network and the network's acknowledgement displays.
6. Select **Deactivate** by using the **Left** or **Right** Navigation key to deactivate call forwarding.

Call barring (SIM Card Dependent)

Call Barring allows you to restrict specific types of incoming and outgoing calls on your phone. This is useful if you allow someone to use your phone for a short period of time.

Call waiting

This network service informs you when someone is trying to reach you during another call.

You can specify individual call waiting options for voice calls and/or data calls.

To set your call waiting options:

1. Select the type of calls, **Voice calls** or **Data calls**, to which the call waiting option is to be applied by pressing the **Up** or **Down** Navigation key.
The screen informs you whether call waiting is activated or deactivated.
2. Press the **Select** soft key or the **OK** key to access the call's status menu.
3. Highlight **Deactivate** or **Activate** and press the **Select** soft key or the **OK** key.
Call waiting activates or deactivates for the selected call type.
4. Select the **Cancel all** option to deactivate Call waiting on all voice and data calls.

Network selection

The Network Selection feature enables you to automatically or manually select the network used when roaming outside of your home area.

Note: You can select a network other than your home network only if there is a valid roaming agreement between the two.

To change the Network Selection mode:

1. Highlight the **Search now** option and press the **Select** soft key or the **OK** key.
2. Press the **Up** or **Down** Navigation key until the network you want highlights and then press the **Select** soft key or the **OK** key.

The phone scans for that network and, if available, you are connected.

To change your Default setup:

1. Highlight the **Default setup** option and press the **Select** soft key or the **OK** key.
2. Highlight either the **Automatic** or **Manual** option and press the **Select** soft key or the **OK** key.
 - If you select **Automatic**, you connect to the first available network when roaming.
 - If you select **Manual**, the phone begins searching for available networks. Press the **Up** or **Down** Navigation key until the network you want is highlighted and then press the **Select** soft key or the **OK** key. The phone then scans the selected network to see if you can be connected, and if a connection is possible, you are connected.

Caller ID

You can prevent your phone number displaying on the phone of the person you called.

Note: Some networks do not allow you to change this setting.

The following options are available:

- **Default:** the default setting provided by the network is used.
- **Hide number:** your number does not display on the other person's phone.
- **Send number:** your number is sent each time you make a call.

Security

The Security feature enables you to restrict the use of your phone by others and to restrict the types of calls.

Various codes and passwords are used to protect the features of your phone.

PIN check

When the PIN Check feature is enabled, you must enter your PIN each time you switch on the phone. Consequently, any person who does not have your PIN cannot use your phone without your approval.

Note: Before enabling or disabling the PIN Check feature, you must enter your PIN.

The following options are available:

- **Disable:** the phone connects directly to the network when you switch it on.
- **Enable:** you must enter the PIN each time the phone is switched on.

Change PIN

This feature allows you to change your current PIN, provided that the PIN check feature is enabled. You must enter the current PIN before you can specify a new one.

Once you enter a new PIN, you are asked to confirm the PIN number by re-entering it.

Phone lock

When the Phone lock feature is enabled, the phone is locked and you must enter the 4- to 8-digit phone password each time the phone is switched on. Once the correct password is entered, you can use the phone until you switch it off.

The following options are available:

- **Disable:** you are not asked to enter the phone password when you switch on the phone.
- **Enable:** you are required to enter the phone password when you switch on the phone.

Change password

The Change password feature allows you to change your current phone password to a new one. You must enter the current password before you can specify a new one.

Once you enter a new password, you are asked to confirm the change by entering the password again.

Note: If you change your password, be sure to record it and keep it in a safe place. If you forget your password, contact your Service Provider for assistance.

Lock application

With this feature you can lock your applications which provide access to information such as call records, phonebook, messages, images, and sounds. Once you lock the contents, you must enter the phone's password to access the associated menus.

1. Press the **Up** or **Down** Navigation key to select an item to lock
2. Press the **OK** key to place a check mark on the selected item.
 - To lock all of the contents, select **All**.
3. Highlight the previously selected item and press the **OK** key to remove a check mark.
4. Press the **Save** soft key to lock the marked items.
5. Enter a password and press the **OK** soft key or the **OK** key.

Note: To change the password, see "*Change password*" on page 116.

FDN mode

FDN (Fixed Dial Number) mode, if supported by your SIM card, allows you to restrict your outgoing calls to a limited set of phone numbers.

The following options are available:

- **Disable:** you can call any number.
- **Enable:** you can only call phone numbers stored in Phonebook. You must enter your PIN2. You can obtain your PIN2 from T-Mobile's customer service.

Change PIN2

The Change PIN2 feature allows you to change your current PIN2 to a new one. You must first enter the current PIN2 (obtained from T-Mobile) before you can specify a new one. Once you enter a new PIN2, you are asked to re-enter the new PIN2 to as confirmation.

Note: Not all SIM cards have a PIN2. This menu does not display if your SIM card does not have the PIN2 feature.

Software update

The Software Update feature enables you to connect to the network through the handset and upload any new phone software.

1. When the Idle mode displays, press the **Menu** soft key.
2. Select **Settings** and press the **Select** soft key or the **OK** key.
3. Select **Software update** and press the **Select** soft key or the **OK** key.
4. Press the **OK** key to continue the update process and follow the on screen instructions.

Memory status

You can check the amount used or available memory for Shared memory, Messages, Files, Calendar, Phonebook and Notes.

The screen displays the total amount of used and free space. You can view the space occupied by each message box. You can also view how many names and numbers are stored in the Phonebook, as well as the phone memory. The capacity of both memories also displays.

Reset settings

From this menu you can reset your phone and sound settings to the default settings.

The following options are available:

- **All:** Phone, Display, Sound and WLAN (Wireless Local Area Network) settings are returned to default values.
- **Phone settings:** only phone settings are returned to default values.
- **Display settings:** only display settings are returned to default values.
- **Sound settings:** only sound settings are returned to default values.

To reset your settings:

1. Highlight one of the options and press the **OK** key to place a check mark next to the option.
2. Press the **Reset** soft key.
3. You are prompted with **Reset settings?**. Press the **Yes** soft key.
4. Enter the 4- to 8-digit password and press the **OK** soft key or the **OK** key. You receive a **reset** confirmation message.

To change this password, see *"Change password"* on page 116.

Photo Settings

- **Size:** allows you to set the image size to either: 1280x1024, 1024x768, 800x600, 640x480, 320x240, 176x220, or 176x144. The selected image size displays on the capture screen.
- **Viewfinder mode:** allows you to set the view finder to Full screen, Full screen & Indicator, Full screen & Guideline, Actual screen.
- **Scene program:** allows you to set the camera options to record normal or night scene.
- **Metering exposure:** allows you to set the metering to Matrix, Center-weighted, or Spot.
- **White balance:** allows you to set this option from the following choices: Auto, Daylight, Incandescent, Fluorescent, or Cloudy.
- **ISO:** allows you to set the ISO (film speed) for Automatic, 100, 200, or 400.

Setup Options

- **Shutter sound:** allows you to select from three shutter sounds (Shutter 1, Shutter 2 or Shutter 3).
- **Zoom sound:** allows you to turn zoom sound On or Off.
- **Brightness sound:** allows you to turn brightness sound On or Off.
- **Default name:** allows you to change the default name assigned to your photo.

Camera Shortcuts

You can change options using your keypad in capture mode. The following short cuts are available:

 takes the photograph.

 displays the camera Capture mode.

 **Up** volume zooms in and **Down** volume zooms out.

 **Up** and **Down** navigation keys zoom in and out.

 **Left** and **Right** navigation keys adjust the image brightness.

 toggles between camera and video mode.

 allows you to set the image size.

Record video

-  allows you to assign what sequence is followed when a photograph is taken (single shot, multi-shot or mosaic)
-  allows you to change the color tone or apply special effects to the photo.
-  allows you to adjust the white balance.
-  allows you to select a custom frame border for your photo.
-  sets the delay timer for 3, 5 or 10 seconds.
-  sets the ISO film speed.
-  navigates to the Photos folder.
-  1 press-displays the camera icons, 2-presses displays the guidelines, 3-presses displays the desktop view, 4-presses displays a full page view.

Record video

Tip: When shooting video in direct sunlight or in bright conditions, it is recommended that you provide your subject with sufficient light by putting the light source behind you.

1. In Idle mode, press the **Menu** soft key to access Menu mode.
2. Using the Navigation keys, scroll to the **Fun & Apps** icon. Press the **Select** soft key or the **OK** key to enter the menu.
3. Highlight **Camera** and press the **Select** soft key or the **OK** key.
4. Press the **Options** soft key and select **Record video** then press the **Select**  soft key or the **OK** key.
5. Before filming the video, press the **Option**  soft key to access camcorder options.
6. Adjust the image by aiming the camera at the subject.
7. Press the **OK** key to begin shooting video.

8. Press the **Pause** soft key to stop the recording.
- or-
9. Press the **OK** key to stop the recording and save the video file to your Videos folder.
10. Once the file saves, press the **OK** key to play back your video for review.

Camcorder Options

1. Press the  key to access the camcorder options.
 - **Take picture:** toggles from video to camera mode.
 - **Effects:** sets a custom color tone for your video. Choose from the following Effects Mode.
 - Options include: No effects, Black & White, Negative, Sepia, Emboss, Sketch and Aqua.
 - **Timer:** sets a time delay before the camcorder begins to shoot video.
 - Off
 - 3 seconds
 - 5 seconds
 - 10 seconds
 - **Go to Videos:** accesses the list of videos stored within the Video folder. Press the **Options**  soft key to view the following options for these clips:
 - **Play:** plays the video clip.
 - **Send via:** attaches the multimedia file to a message, e-mail, or sends it to a Bluetooth device.
 - **Delete:** deletes either Selected or Multiple multimedia videos.
 - **Move to memory card:** moves either a Selected or Multiple videos to the Memory card.
 - **Copy to memory card:** copies the Selected or Multiple videos and then sends it to the Memory card.

Note: the Move and Copy features are available when a memory card is inserted.

- **Rename:** renames either Selected or Multiple videos.
- **Display mode:** displays the videos in either Line view or Thumbnail view.
- **Bluetooth visibility:** enables Selected or Multiple videos visibility to Bluetooth devices.
- **Lock/Unlock:** locks the video file to prevent deletion or unlocks it to allow deletion.
- **Properties:** displays the properties of the current video such as Name, Date, Format, Resolution, Size, Length, Quality, and Lock/Unlock.

Record video

- **Camcorder Settings:** customizes your camcorder settings. Choose from the following options:
 - **Recording Mode:** sets the maximum allowable recording time. Choose Limit for message, Limit for e-mails, or Normal.
 - **Size:** sets the video size. Choose QCIF (176 x 144) or QQVGA(160 x 120), Sub-QCIF (128 x 96).
 - **Audio Record:** allows you to choose whether to use audio in your video. Choose between **On** or **Off** (microphone is muted).
 - **White balance:** sets the white balance for the camcorder. Choose Automatic, Daylight, Incandescent, Fluorescent or Cloudy.
 - **Zoom sound:** turns the Zoom sound Off or On.
 - **Brightness sound:** turns the Brightness sound Off or On.
 - **Default name:** allows you to alter the default name for videos.
 - **Camcorder Shortcuts:** displays the shortcut keys associated when using the camcorder.
2. Press the **Back** soft key to return to the picture viewer.
 3. You can use the keypad to quickly change the camera options using the camera shortcut keys.

Note: For more information about Camera Shortcut Keys see "*Camcorder Shortcuts*" on page 126.

Camcorder Shortcuts

Shortcut keys allow you to change options using your keypad, Navigation keys, and Volume key in capture mode. The following options are available.

 shoots video.

Up volume zooms in and **Down** volume zooms out.

Up and **Down** navigation keys zoom in or out.

Left and **Right** navigation keys adjust the image brightness.

switches the handset between camcorder and camera mode.

changes the video size.

changes the recording mode.

changes the effects used on the video.

allows you to adjust the white balance.

within the camcorder mode, this toggles the microphone On/Off (mute).

sets a time delay (Off, 3, 5, or 10 seconds).

navigates to the My video clips folder.

Photos

1. In Idle mode, press the **Menu** soft key to access Menu mode.
2. Using the Navigation keys, scroll to the **Fun & Apps** icon. Press the **Select** soft key or the **OK** key to enter the menu.
3. Highlight **Camera** and press the **Select** soft key or the **OK** key.
4. Select **Photos** and press the **Select** soft key or the **OK** key.
When you access this menu, your phone displays the photos in Line view, which shows them as small images. Use the Navigation keys to scroll through the photos.
5. To view the photos on the full screen, press the **OK** key. To go back to Line view, press the **Back** soft key or the **⏮** key.
6. Press the **Options** soft key to use the following options:
 - **Send to My Album:** allows you to send your photos to My Album.
 - **Send via:** sends the photo via Picture message, E-mail message or to a Bluetooth device.
 - **Set as:** allows you to set the photo as your Caller ID or Wallpaper.
 - **Default destination:** allows you to Remove or Change where your photos are sent after you take them.
 - **Edit image:** allows you to add effects to the selected photo or add a frame, emoticon or clip art to the photo.
 - **Delete:** allows you to delete the selected or multiple photos.
 - **Move to memory card:** allows you to move the Selected or Multiple photos to the Memory card.

Videos

- **Copy to memory card:** allows you to copy the Selected or Multiple photos to the Memory card.
- **Rename:** allows you to rename the photo.
- **Slide show:** allows you to see all of your photos in a slide show presentation. Choose from 1 or 3 seconds intervals.
- **Bluetooth visibility:** enables or disables Bluetooth visibility.
- **Print via Bluetooth:** allows you to send the selected photo to a Bluetooth enabled device.
- **Lock/Unlock:** allows you to protect the photo from deletion or allows you to unlock it for deletion.
- **Properties:** shows the properties of the photo, such as the file name, file date, file format, image resolution, file size, and lock/unlock.

Deleting a Photo

You can delete photos one by one or all at one time.

1. From the **Photos** menu, highlight the photo you want to delete. Press the **Options** soft key and select **Delete**.
2. Press the **Select** soft key then press the **Right** Navigation key.
3. Select **Selected** or **Multiple** and press the **Select** soft key or the  key.
4. Press the **Yes** soft key to confirm the deletion.
5. Press the  key when you are finished.

Videos

In this menu, you can view a list of videos downloaded from the web server or received in multimedia messages. You can select a video clip from your Videos folder by scrolling to the video you want to view, highlighting a video and pressing the **Options** soft key to choose from the following options:

- **Play:** plays the selected video.
- **Send via:** sends the video via Picture message or to a Bluetooth device.
- **Delete:** deletes the selected video or all downloaded videos.
- **Move to memory card:** allows you to move the Selected or Multiple videos to the Memory card.
- **Copy to memory card:** allows you to copy the Selected or Multiple videos to the Memory card.
- **Rename:** changes the name of the video.
- **Display mode:** allows you to view the pictures in **Line view** or **Thumbnail view**.
- **Bluetooth Visibility:** turns Bluetooth Visibility on or off for Selected or Multiple videos.

- **Lock/Unlock:** locks the video to protect it from deletion or unlocks it to allow deletion.
- **Properties:** displays the video name, date, format, resolution, date, length, quality, and lock/unlock.

My Album

My Album is a private online picture album that you can use to store and share pictures, videos, voice messages, and text.

Use the following procedures to access **My Album**.

Note: When accessing My Album, charges may apply. The feature is not activated until you send your first image to the remote My Album location.

1. In Idle mode, press the **Menu** soft key to access Menu mode.
2. Using the Navigation keys, scroll to the **Fun & Apps** icon. Press the **Select** soft key or the **OK** key to enter the menu.
3. Highlight **Camera** and press the **Select** soft key or the **OK** key.
4. Select **My Album** and press the **Select** soft key or the **OK** key. The t-zones browser is then launched and the T-Mobile Web page displays.
5. Scroll down to the **My Album** link and press the **Select** soft key or the **OK** key.
6. Select the **My Albums Menu** link and press the **Select** soft key or the **OK** key.
7. Photos sent to this folder are stored in the **Inbox Album**. Press the **Select** soft key to view the photos.
8. Press the  key to exit t-zones and return to the Idle screen.

My Journal

Make notes in My Journal, your online diary and Weblog. Keep it private to store your personal memories, or send e-mail invitations to ask people to view and comment on your album. Contact T-Mobile customer service for more information.

Note: Charges may apply when accessing My Journal. Contact your T-Mobile service representative.

1. In Idle mode, press the **Menu** soft key to access Menu mode.
2. Using the Navigation keys, scroll to the **Fun & Apps** icon. Press the **Select** soft key or the **OK** key to enter the menu.
3. Highlight **Camera** and press the **Select** soft key or the **OK** key.
4. Select **My Journal** and press the **Select** soft key or the **OK** key. The t-zones browser is then launched and the T-Mobile Web page displays.

Health and Safety Information

Exposure to Radio Frequency (RF) Signals

Certification Information (SAR)

Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the exposure limits for radio frequency (RF) energy set by the Federal Communications Commission (FCC) of the U.S. government.

Health and Safety Information

These FCC exposure limits are derived from the recommendations of two expert organizations, the National Council on Radiation Protection and Measurement (NCRP) and the Institute of Electrical and Electronics Engineers (IEEE). In both cases, the recommendations were developed by scientific and engineering experts drawn from industry, government, and academia after extensive reviews of the scientific literature related to the biological effects of RF energy.

The exposure limit set by the FCC for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate (SAR). The SAR is a measure of the rate of absorption of RF energy by the human body expressed in units of watts per kilogram (W/kg). The FCC requires wireless phones to comply with a safety limit of 1.6 watts per kilogram (1.6 W/kg). The FCC exposure limit incorporates a substantial margin of safety to give additional protection to the public and to account for any variations in measurements.

SAR tests are conducted using standard operating positions accepted by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output.

Before a new model phone is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the exposure limit established by the FCC. Tests for each model phone are performed in positions and locations (e.g. at the ear and worn on the body) as required by the FCC. For body worn operation, this phone has been tested and meets FCC RF exposure guidelines when used with an accessory that contains no metal and that positions the handset a minimum of 1.5 cm from the body. Use of other accessories may not ensure compliance with FCC RF exposure guidelines.

The FCC has granted an Equipment Authorization for this mobile phone with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. The maximum SAR values for this model phone as reported to the FCC are:

- Head: 0.841 W/Kg.
- Body-worn: 0.576 W/Kg.

SAR information on this and other model phones can be viewed on-line at <http://www.fcc.gov/oet/ea>. To find information that pertains to a particular model phone, this site uses the phone FCC ID number which is usually printed somewhere on the case of the phone.

Sometimes it may be necessary to remove the battery pack to find the number. Once you have the FCC ID number for a particular phone, follow the instructions on the website and it should provide values for typical or maximum SAR for a particular phone. Additional product specific SAR information can also be obtained at www.fcc.gov/cgb/sar.

Samsung Mobile Products and Recycling

Samsung cares for the environment and encourages its customers to recycle Samsung mobile phones and genuine Samsung accessories.

Go to: <http://www.samsungwireless.com/recycling.asp> for more information.

UL Certified Travel Adapter

The Travel Adapter for this phone has met applicable UL safety requirements. Please adhere to the following safety instructions per UL guidelines.

FAILURE TO FOLLOW THE INSTRUCTIONS OUTLINED MAY LEAD TO SERIOUS PERSONAL INJURY AND POSSIBLE PROPERTY DAMAGE

IMPORTANT SAFETY INSTRUCTIONS - SAVE THESE INSTRUCTIONS.

DANGER - TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, CAREFULLY FOLLOW THESE INSTRUCTIONS.

FOR CONNECTION TO A SUPPLY NOT IN NORTH AMERICA, USE AN ATTACHMENT PLUG ADAPTOR OF THE PROPER CONFIGURATION FOR THE POWER OUTLET. THIS POWER UNIT IS INTENDED TO BE CORRECTLY ORIENTATED IN A VERTICAL OR HORIZONTAL OR FLOOR MOUNT POSITION.

Consumer Information on Wireless Phones

The U.S. Food and Drug Administration (FDA) has published a series of Questions and Answers for consumers relating to radio frequency (RF) exposure from wireless phones. The FDA publication includes the following information:

What kinds of phones are the subject of this update?

The term wireless phone refers here to hand-held wireless phones with built-in antennas, often called "cell," "mobile," or "PCS" phones. These types of wireless phones can expose the user to measurable radio frequency energy (RF) because of the short distance between the phone and the user's head. These RF exposures are limited by Federal Communications Commission safety guidelines that were developed with the advice of FDA and other federal health and safety agencies.

When the phone is located at greater distances from the user, the exposure to RF is drastically lower because a person's RF exposure decreases rapidly with increasing distance from the source. The so-called "cordless phones," which have a base unit connected to the telephone wiring in a house, typically operate at far lower power levels, and thus produce RF exposures well within the FCC's compliance limits.

Do wireless phones pose a health hazard?

The available scientific evidence does not show that any health problems are associated with using wireless phones. There is no proof, however, that wireless phones are absolutely safe. Wireless phones emit low levels of radio frequency energy (RF) in the microwave range while being used. They also emit very low levels of RF when in the stand-by mode. Whereas high levels of RF can produce health effects (by heating tissue), exposure to low level RF that does not produce heating effects causes no known adverse health effects. Many studies of low level RF exposures have not found any biological effects. Some studies have suggested that some biological effects may occur, but such findings have not been confirmed by additional research. In some cases, other researchers have had difficulty in reproducing those studies, or in determining the reasons for inconsistent results.

What is FDA's role concerning the safety of wireless phones?

Under the law, FDA does not review the safety of radiation-emitting consumer products such as wireless phones before they can be sold, as it does with new drugs or medical devices. However, the agency has authority to take action if wireless phones are shown to emit radio frequency energy (RF) at a level that is hazardous to the user. In such a case, FDA could require the manufacturers of wireless phones to notify users of the health hazard and to repair, replace or recall the phones so that the hazard no longer exists.

Although the existing scientific data do not justify FDA regulatory actions, FDA has urged the wireless phone industry to take a number of steps, including the following:

- Support needed research into possible biological effects of RF of the type emitted by wireless phones;
- Design wireless phones in a way that minimizes any RF exposure to the user that is not necessary for device function; and
- Cooperate in providing users of wireless phones with the best possible information on possible effects of wireless phone use on human health.

FDA belongs to an interagency working group of the federal agencies that have responsibility for different aspects of RF safety to ensure coordinated efforts at the federal level. The following agencies belong to this working group:

- National Institute for Occupational Safety and Health
- Environmental Protection Agency
- Federal Communications Commission
- Occupational Safety and Health Administration
- National Telecommunications and Information Administration

The National Institutes of Health participates in some interagency working group activities, as well.

FDA shares regulatory responsibilities for wireless phones with the Federal Communications Commission (FCC). All phones that are sold in the United States must comply with FCC safety guidelines that limit RF exposure. FCC relies on FDA and other health agencies for safety questions about wireless phones.

FCC also regulates the base stations that the wireless phone networks rely upon. While these base stations operate at higher power than do the wireless phones themselves, the RF exposures that people get from these base stations are typically thousands of times lower than those they can get from wireless phones. Base stations are thus not the primary subject of the safety questions discussed in this document.

What are the results of the research done already?

The research done thus far has produced conflicting results, and many studies have suffered from flaws in their research methods. Animal experiments investigating the effects of radio frequency energy (RF) exposures characteristic of wireless phones have yielded conflicting results that often cannot be repeated in other laboratories. A few animal studies, however, have suggested that low levels of RF could accelerate the development of cancer in laboratory animals. However, many of the studies that showed increased tumor development used animals that had been genetically engineered or treated with cancer-causing chemicals so as to be pre-disposed to develop cancer in absence of RF exposure. Other studies exposed the animals to RF for up to 22 hours per day. These conditions are not similar to the conditions under which people use wireless phones, so we don't know with certainty what the results of such studies mean for human health.

Three large epidemiology studies have been published since December 2000. Between them, the studies investigated any possible association between the use of wireless phones and primary brain cancer, glioma, meningioma, or acoustic neuroma, tumors of the brain or salivary gland, leukemia, or other cancers. None of the studies demonstrated the existence of any harmful health effects from wireless phones RF exposures. However, none of the studies can answer questions about long-term exposures, since the average period of phone use in these studies was around three years.

What research is needed to decide whether RF exposure from wireless phones poses a health risk?

A combination of laboratory studies and epidemiological studies of people actually using wireless phones would provide some of the data that are needed. Lifetime animal exposure studies could be completed in a few years. However, very large numbers of animals would be needed to provide reliable proof of a cancer promoting effect if one exists. Epidemiological studies can provide data that is directly applicable to human populations, but ten or more years' follow-up may be needed to provide answers about some health effects, such as cancer. This is because the interval between the time of exposure to a cancer-causing agent and the time tumors develop - if they do - may be many, many years. The interpretation of epidemiological studies is hampered by difficulties in measuring actual RF exposure during day-to-day use of wireless phones. Many factors affect this measurement, such as the angle at which the phone is held, or which model of phone is used.

What is FDA doing to find out more about the possible health effects of wireless phone RF?

FDA is working with the U.S. National Toxicology Program and with groups of investigators around the world to ensure that high priority animal studies are conducted to address important questions about the effects of exposure to radio frequency energy (RF).

FDA has been a leading participant in the World Health Organization international Electromagnetic Fields (EMF) Project since its inception in 1996. An influential result of this work has been the development of a detailed agenda of research needs that has driven the establishment of new research programs around the world. The Project has also helped develop a series of public information documents on EMF issues.

FDA and Cellular Telecommunications & Internet Association (CTIA) have a formal Cooperative Research and Development Agreement (CRADA) to do research on wireless phone safety. FDA provides the scientific oversight, obtaining input from experts in government, industry, and academic organizations. CTIA-funded research is conducted through contracts to independent investigators. The initial research will include both laboratory studies and studies of wireless phone users. The CRADA will also include a broad assessment of additional research needs in the context of the latest research developments around the world.

What steps can I take to reduce my exposure to radio frequency energy from my wireless phone?

If there is a risk from these products - and at this point we do not know that there is - it is probably very small. But if you are concerned about avoiding even potential risks, you can take a few simple steps to minimize your exposure to radio frequency energy (RF). Since time is a key factor in how much exposure a person receives, reducing the amount of time spent using a wireless phone will reduce RF exposure.

- If you must conduct extended conversations by wireless phone every day, you could place more distance between your body and the source of the RF, since the exposure level drops off dramatically with distance. For example, you could use a headset and carry the wireless phone away from your body or use a wireless phone connected to a remote antenna.

Again, the scientific data do not demonstrate that wireless phones are harmful. But if you are concerned about the RF exposure from these products, you can use measures like those described above to reduce your RF exposure from wireless phone use.

What about children using wireless phones?

The scientific evidence does not show a danger to users of wireless phones, including children and teenagers. If you want to take steps to lower exposure to radio frequency energy (RF), the measures described above would apply to children and teenagers using wireless phones. Reducing the time of wireless phone use and increasing the distance between the user and the RF source will reduce RF exposure.

Some groups sponsored by other national governments have advised that children be discouraged from using wireless phones at all. For example, the government in the United Kingdom distributed leaflets containing such a recommendation in December 2000. They noted that no evidence exists that using a wireless phone causes brain tumors or other ill effects. Their recommendation to limit wireless phone use by children was strictly precautionary; it was not based on scientific evidence that any health hazard exists.

Do hands-free kits for wireless phones reduce risks from exposure to RF emissions?

Since there are no known risks from exposure to RF emissions from wireless phones, there is no reason to believe that hands-free kits reduce risks. Hands-free kits can be used with wireless phones for convenience and comfort. These systems reduce the absorption of RF energy in the head because the phone, which is the source of the RF emissions, will not be placed against the head. On the other hand, if the phone is mounted against the waist or other part of the body during use, then that part of the body will absorb more RF energy. Wireless phones marketed in the U.S. are required to meet safety requirements regardless of whether they are used against the head or against the body. Either configuration should result in compliance with the safety limit.

Do wireless phone accessories that claim to shield the head from RF radiation work?

Since there are no known risks from exposure to RF emissions from wireless phones, there is no reason to believe that accessories that claim to shield the head from those emissions reduce risks. Some products that claim to shield the user from RF absorption use special phone cases, while others involve nothing more than a metallic accessory attached to the phone. Studies have shown that these products generally do not work as advertised. Unlike "hand-free" kits, these so-called "shields" may interfere with proper operation of the phone. The phone may be forced to boost its power to compensate, leading to an increase in RF absorption.

In February 2002, the Federal Trade Commission (FTC) charged two companies that sold devices that claimed to protect wireless phone users from radiation with making false and unsubstantiated claims. According to FTC, these defendants lacked a reasonable basis to substantiate their claim.

What about wireless phone interference with medical equipment?

Radio frequency energy (RF) from wireless phones can interact with some electronic devices. For this reason, FDA helped develop a detailed test method to measure electromagnetic interference (EMI) of implanted cardiac pacemakers and defibrillators from wireless telephones. This test method is now part of a standard sponsored by the Association for the Advancement of Medical Instrumentation (AAMI). The final draft, a joint effort by FDA, medical device manufacturers, and many other groups, was completed in late 2000. This standard will allow manufacturers to ensure that cardiac pacemakers and defibrillators are safe from wireless phone EMI. FDA has tested wireless phones and helped develop a voluntary standard sponsored by the Institute of Electrical and Electronic Engineers (IEEE). This standard specifies test methods and performance requirements for hearing aids and wireless phones so that no interference occurs when a person uses a compatible phone and a compatible hearing aid at the same time. This standard was approved by the IEEE in 2000.

FDA continues to monitor the use of wireless phones for possible interactions with other medical devices. Should harmful interference be found to occur, FDA will conduct testing to assess the interference and work to resolve the problem.

Road Safety

Your wireless phone gives you the powerful ability to communicate by voice, almost anywhere, anytime. But an important responsibility accompanies the benefits of wireless phones, one that every user must uphold.

When driving a car, driving is your first responsibility. When using your wireless phone behind the wheel of a car, practice good common sense and remember the following tips:

1. Get to know your wireless phone and its features, such as speed dial and redial. If available, these features help you to place your call without taking your attention off the road.
2. When available, use a hands-free device. If possible, add an additional layer of convenience and safety to your wireless phone with one of the many hands free accessories available today.
3. Position your wireless phone within easy reach. Be able to access your wireless phone without removing your eyes from the road. If you get an incoming call at an inconvenient time, let your voice mail answer it for you.
4. Let the person you are speaking with know you are driving; if necessary, suspend the call in heavy traffic or hazardous weather conditions. Rain, sleet, snow, ice and even heavy traffic can be hazardous.
5. Do not take notes or look up phone numbers while driving. Jotting down a "to do" list or flipping through your address book takes attention away from your primary responsibility, driving safely.
6. Dial sensibly and assess the traffic; if possible, place calls when you are not moving or before pulling into traffic. Try to plan calls when your car will be stationary. If you need to make a call while moving, dial only a few numbers, check the road and your mirrors, then continue.

7. Do not engage in stressful or emotional conversations that may be distracting. Make people you are talking with aware you are driving and suspend conversations that have the potential to divert your attention from the road.
8. Use your wireless phone to call for help. Dial 9-1-1 or other local emergency number in the case of fire, traffic accident or medical emergencies. Remember, it is a free call on your wireless phone!
9. Use your wireless phone to help others in emergencies. If you see an auto accident, crime in progress or other serious emergency where lives are in danger, call 9-1-1 or other local emergency number, as you would want others to do for you.
10. Call roadside assistance or a special non-emergency wireless assistance number when necessary. If you see a broken-down vehicle posing no serious hazard, a broken traffic signal, a minor traffic accident where no one appears injured, or a vehicle you know to be stolen, call roadside assistance or other special non-emergency number.

"The wireless industry reminds you to use your phone safely when driving."

Responsible Listening

Caution!: Avoid potential hearing loss.

Damage to hearing occurs when a person is exposed to loud sounds over time. The risk of hearing loss increases as sound is played louder and for longer durations. Prolonged exposure to loud sounds (including music) is the most common cause of preventable hearing loss. Some scientific research suggests that using portable audio devices, such as portable music players and cellular telephones, at high volume settings for long durations may lead to permanent noise-induced hearing loss. This includes the use of headphones (including headsets, earbuds, and Bluetooth or other wireless devices). Exposure to very loud sound has also been associated in some studies with tinnitus (a ringing in the ear), hypersensitivity to sound and distorted hearing.

Responsible Listening

Individual susceptibility to noise-induced hearing loss and potential hearing problem varies. Additionally, the amount of sound produced by a portable audio device varies depending on the nature of the sound, the device settings, and the headphones that are used. As a result, there is no single volume setting that is appropriate for everyone or for every combination of sound, settings and equipment.

You should follow some commonsense recommendations when using any portable audio device:

- Set the volume in a quiet environment and select the lowest volume at which you can hear adequately.
- When using headphones, turn the volume down if you cannot hear the people speaking near you or if the person sitting next to you can hear what you are listening to.
- Do not turn the volume up to block out noisy surroundings. If you choose to listen to your portable device in a noisy environment, you noise-cancelling headphones to block out background environmental noise. By blocking background environment noise, noise cancelling headphones should allow you to hear the music at lower volumes than when using earbuds.
- Limit the amount of time you listen. As the volume increases, less time is required before your hearing could be affected.
- Avoid using headphones after exposure to extremely loud noises, such as rock concerts, that might cause temporary hearing loss. Temporary hearing loss might cause unsafe volumes to sound normal.
- Do not listen at any volume that causes you discomfort. If you experience ringing in your ears, hear muffled speech or experience any temporary hearing difficulty after listening to your portable audio device, discontinue use and consult your doctor.

Operating Environment

Remember to follow any special regulations in force in any area and always switch your phone off whenever it is forbidden to use it, or when it may cause interference or danger. When connecting the phone or any accessory to another device, read its user's guide for detailed safety instructions. Do not connect incompatible products.

As with other mobile radio transmitting equipment, users are advised that for the satisfactory operation of the equipment and for the safety of personnel, it is recommended that the equipment should only be used in the normal operating position (held to your ear with the antenna pointing over your shoulder if you are using an external antenna).

Using Your Phone Near Other Electronic Devices

Most modern electronic equipment is shielded from radio frequency (RF) signals. However, certain electronic equipment may not be shielded against the RF signals from your wireless phone. Consult the manufacturer to discuss alternatives.

Implantable Medical Devices

A minimum separation of six (6) inches should be maintained between a handheld wireless phone and an implantable medical device, such as a pacemaker or implantable cardioverter defibrillator, to avoid potential interference with the device.

Persons who have such devices:

- Should ALWAYS keep the phone more than six (6) inches from their implantable medical device when the phone is turned ON;
- Should not carry the phone in a breast pocket;
- Should use the ear opposite the implantable medical device to minimize the potential for interference;
- Should turn the phone OFF immediately if there is any reason to suspect that interference is taking place.
- Should read and follow the directions from the manufacturer of your implantable medical device. If you have any questions about using your wireless phone with such a device, consult your health care provider.

For more information see, <http://www.fcc.gov/oet/rfsafety/rf-faqs.html>

Hearing Aid Compatibility with Mobile Phones

When some mobile phones are used near some hearing devices (hearing aids and cochlear implants), users may detect a buzzing, humming, or whining noise. Some hearing devices are more immune than others to this interference noise, and phones also vary in the amount of interference they generate.

The wireless telephone industry has developed ratings for some of their mobile phones, to assist hearing device users in finding phones that may be compatible with their hearing devices. Not all phones have been rated. Phones that are rated have the rating on their box or a label on the box.

The ratings are not guarantees. Results will vary depending on the user's hearing device and hearing loss. If your hearing device happens to be vulnerable to interference, you may not be able to use a rated phone successfully. Trying out the phone with your hearing device is the best way to evaluate it for your personal needs.

M-Ratings: Phones rated M3 or M4 meet FCC requirements and are likely to generate less interference to hearing devices than phones that are not labeled. M4 is the better/higher of the two ratings.

T-Ratings: Phones rated T3 or T4 meet FCC requirements and are likely to be more usable with a hearing device's telecoil ("T Switch" or "Telephone Switch") than unrated phones. T4 is the better/higher of the two ratings. (Note that not all hearing devices have telecoils in them.)

Hearing devices may also be measured for immunity to this type of interference. Your hearing device manufacturer or hearing health professional may help you find results for your hearing device. The more immune your hearing aid is, the less likely you are to experience interference noise from mobile phones.

Other Medical Devices

If you use any other personal medical devices, consult the manufacturer of your device to determine if it is adequately shielded from external RF energy. Your physician may be able to assist you in obtaining this information. Switch your phone off in health care facilities when any regulations posted in these areas instruct you to do so. Hospitals or health care facilities may be using equipment that could be sensitive to external RF energy.

Vehicles

RF signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles. Check with the manufacturer or its representative regarding your vehicle. You should also consult the manufacturer of any equipment that has been added to your vehicle.

Posted Facilities

Switch your phone off in any facility where posted notices require you to do so.

Potentially Explosive Environments

Switch your phone off when in any area with a potentially explosive atmosphere and obey all signs and instructions. Sparks in such areas could cause an explosion or fire resulting in bodily injury or even death.

Users are advised to switch the phone off while at a refueling point (service station). Users are reminded of the need to observe restrictions on the use of radio equipment in fuel depots (fuel storage and distribution areas), chemical plants or where blasting operations are in progress.

Emergency Calls

Areas with a potentially explosive atmosphere are often but not always clearly marked. They include below deck on boats, chemical transfer or storage facilities, vehicles using liquefied petroleum gas (such as propane or butane), areas where the air contains chemicals or particles, such as grain, dust or metal powders, and any other area where you would normally be advised to turn off your vehicle engine.

Emergency Calls

This phone, like any wireless phone, operates using radio signals, wireless and landline networks as well as user-programmed functions, which cannot guarantee connection in all conditions. Therefore, you should never rely solely on any wireless phone for essential communications (medical emergencies, for example).

Remember, to make or receive any calls the phone must be switched on and in a service area with adequate signal strength. Emergency calls may not be possible on all wireless phone networks or when certain network services and/or phone features are in use. Check with local service providers.

To make an emergency call:

1. If the phone is not on, switch it on.
2. Key in the emergency number for your present location (for example, 911 or other official emergency number). Emergency numbers vary by location.
3. Press the  key.

If certain features are in use (call barring, for example), you may first need to deactivate those features before you can make an emergency call. Consult this document and your local cellular service provider.

When making an emergency call, remember to give all the necessary information as accurately as possible. Remember that your phone may be the only means of communication at the scene of an accident; do not cut off the call until given permission to do so.

Restricting Children's access to your Phone

Your phone is not a toy. Children should not be allowed to play with it because they could hurt themselves and others, damage the phone or make calls that increase your phone bill.

FCC Notice and Cautions

FCC Notice

The phone may cause TV or radio interference if used in close proximity to receiving equipment. The FCC can require you to stop using the phone if such interference cannot be eliminated.

Vehicles using liquefied petroleum gas (such as propane or butane) must comply with the National Fire Protection Standard (NFPA-58). For a copy of this standard, contact the National Fire Protection Association, One Batterymarch Park, Quincy, MA 02269, Attn: Publication Sales Division.

Cautions

Any changes or modifications to your phone not expressly approved in this document could void your warranty for this equipment, and void your authority to operate this equipment. Only use approved batteries, antennas and chargers. The use of any unauthorized accessories may be dangerous and void the phone warranty if said accessories cause damage or a defect to the phone.

Although your phone is quite sturdy, it is a complex piece of equipment and can be broken. Avoid dropping, hitting, bending or sitting on it.

Other Important Safety Information

- Only qualified personnel should service the phone or install the phone in a vehicle. Faulty installation or service may be dangerous and may invalidate any warranty applicable to the device.
- Check regularly that all wireless phone equipment in your vehicle is mounted and operating properly.
- Do not store or carry flammable liquids, gases or explosive materials in the same compartment as the phone, its parts or accessories.
- For vehicles equipped with an air bag, remember that an air bag inflates with great force. Do not place objects, including both installed or portable wireless equipment in the area over the air bag or in the air bag deployment area. If wireless equipment is improperly installed and the air bag inflates, serious injury could result.
- Switch your phone off before boarding an aircraft. The use of wireless phone in aircraft is illegal and may be dangerous to the aircraft's operation.
- Failure to observe these instructions may lead to the suspension or denial of telephone services to the offender, or legal action, or both.

Product Performance

Getting the Most Out of Your Signal Reception

The quality of each call you make or receive depends on the signal strength in your area. Your phone informs you of the current signal strength by displaying a number of bars next to the signal strength icon. The more bars displayed, the stronger the signal.

If you're inside a building, being near a window may give you better reception.

Understanding the Power Save Feature

If your phone is unable to find a signal after searching, a Power Save feature is automatically activated. If your phone is active, it periodically rechecks service availability or you can check it yourself by pressing any key.

Anytime the Power Save feature is activated, a message displays on the screen. When a signal is found, your phone returns to standby mode.

Understanding How Your Phone Operates

Your phone is basically a radio transmitter and receiver. When it's turned on, it receives and transmits radio frequency (RF) signals. When you use your phone, the system handling your call controls the power level. This power can range from 0.006 watts to 0.2 watts in digital mode.

Maintaining Your Phone's Peak Performance

For the best care of your phone, only authorized personnel should service your phone and accessories. Faulty service may void the warranty.

There are several simple guidelines to operating your phone properly and maintaining safe, satisfactory service.

- If your phone is equipped with an external antenna, hold the phone with the antenna raised, fully-extended and over your shoulder.
- Do not hold, bend or twist the phone's antenna, if applicable.
- Do not use the phone if the antenna is damaged.
- If your phone is equipped with an internal antenna, obstructing the internal antenna could inhibit call performance.
- Speak directly into the phone's receiver.
- Avoid exposing your phone and accessories to rain or liquid spills. If your phone does get wet, immediately turn the power off and remove the battery. If it is inoperable, call Customer Care for service.

Availability of Various Features/Ring Tones

Many services and features are network dependent and may require additional subscription and/or usage charges. Not all features are available for purchase or use in all areas. Downloadable Ring Tones may be available at an additional cost. Other conditions and restrictions may apply. See your service provider for additional information.

Battery Standby and Talk Time

Standby and talk times will vary depending on phone usage patterns and conditions. Battery power consumption depends on factors such as network configuration, signal strength, operating temperature, features selected, frequency of calls, and voice, data, and other application usage patterns.

Battery Precautions

- Avoid dropping the cell phone. Dropping it, especially on a hard surface, can potentially cause damage to the phone and battery. If you suspect damage to the phone or battery, take it to a service center for inspection.
 - Never use any charger or battery that is damaged in any way.
 - Do not modify or remanufacture the battery as this could result in serious safety hazards.
 - If you use the phone near the network's base station, it uses less power; talk and standby time are greatly affected by the signal strength on the cellular network and the parameters set by the network operator.
 - Follow battery usage, storage and charging guidelines found in the user's guide.
 - Battery charging time depends on the remaining battery charge and the type of battery and charger used. The battery can be charged and discharged hundreds of times, but it will gradually wear out. When the operation time (talk time and standby time) is noticeably shorter than normal, it is time to buy a new battery.
 - If left unused, a fully charged battery will discharge itself over time.
 - Use only Samsung-approved batteries and recharge your battery only with Samsung-approved chargers. When a charger is not in use, disconnect it from the power source. Do not leave the battery connected to a charger for more than a week, since overcharging may shorten its life.
 - Do not use incompatible cell phone batteries and chargers. Some Web sites and second-hand dealers, not associated with reputable manufacturers and carriers, might be selling incompatible or even counterfeit batteries and chargers.
- Consumers should purchase manufacturer or carrier recommended products and

Battery Precautions

accessories. If unsure about whether a replacement battery or charger is compatible, contact the manufacturer of the battery or charger.

- Misuse or use of incompatible phones, batteries, and charging devices could result in damage to the equipment and a possible risk of fire, explosion, leakage, or other serious hazard.
- Extreme temperatures will affect the charging capacity of your battery: it may require cooling or warming first.
- Do not leave the battery in hot or cold places, such as in a car in summer or winter conditions, as you will reduce the capacity and lifetime of the battery. Always try to keep the battery at room temperature. A phone with a hot or cold battery may temporarily not work, even when the battery is fully charged. Li-ion batteries are particularly affected by temperatures below 0 °C (32 °F).
- Do not place the phone in areas that may get very hot, such as on or near a cooking surface, cooking appliance, iron, or radiator.
- Do not get your phone or battery wet. Even though they will dry and appear to operate normally, the circuitry could slowly corrode and pose a safety hazard.
- Do not short-circuit the battery. Accidental short-circuiting can occur when a metallic object (coin, clip or pen) causes a direct connection between the + and - terminals of the battery (metal strips on the battery), for example when you carry a spare battery in a pocket or bag. Short-circuiting the terminals may damage the battery or the object causing the short-circuiting.
- Do not permit a battery out of the phone to come in contact with metal objects, such as coins, keys or jewelry.
- Do not crush, puncture or put a high degree of pressure on the battery as this can cause an internal short-circuit, resulting in overheating.
- Dispose of used batteries in accordance with local regulations. In some areas, the disposal of batteries in household or business trash may be prohibited. For safe disposal options for Li-Ion batteries, contact your nearest Samsung authorized service center. Always recycle. Do not dispose of batteries in a fire.

Care and Maintenance

Your phone is a product of superior design and craftsmanship and should be treated with care. The suggestions below will help you fulfill any warranty obligations and allow you to enjoy this product for many years.

- Keep the phone and all its parts and accessories out of the reach of small children.
- Keep the phone dry. Precipitation, humidity and liquids contain minerals that will corrode electronic circuits.
- Do not use the phone with a wet hand. Doing so may cause an electric shock to you or damage to the phone.
- Do not use or store the phone in dusty, dirty areas, as its moving parts may be damaged.
- Do not store the phone in hot areas. High temperatures can shorten the life of electronic devices, damage batteries, and warp or melt certain plastics.
- Do not store the phone in cold areas. When the phone warms up to its normal operating temperature, moisture can form inside the phone, which may damage the phone's electronic circuit boards.
- Do not drop, knock or shake the phone. Rough handling can break internal circuit boards.
- Do not use harsh chemicals, cleaning solvents or strong detergents to clean the phone. Wipe it with a soft cloth slightly dampened in a mild soap-and-water solution.
- Do not paint the phone. Paint can clog the device's moving parts and prevent proper operation.
- Do not put the phone in or on heating devices, such as a microwave oven, a stove or a radiator. The phone may explode when overheated.
- If your phone is equipped with an external antenna, use only the supplied or an approved replacement antenna. Unauthorized antennas or modified accessories may damage the phone and violate regulations governing radio devices.
- If the phone, battery, charger or any accessory is not working properly, take it to your nearest qualified service facility. The personnel there will assist you, and if necessary, arrange for service.

Section 14: Warranty Information

Topics Covered

- Standard Limited Warranty

Standard Limited Warranty

What is Covered and For How Long? SAMSUNG

TELECOMMUNICATIONS AMERICA, LLC ("SAMSUNG") warrants to the original purchaser ("Purchaser") that SAMSUNG's Phones and accessories ("Products") are free from defects in material and workmanship under normal use and service for the period commencing upon the date of purchase and continuing for the following specified period of time after that date:

Phone	1 Year
Batteries	1 Year
Leather Case/ Pouch	90 Days
Holster	90 Days
Other Phone Accessories	1 Year

What is Not Covered? This Limited Warranty is conditioned upon proper use of Product by Purchaser. This Limited Warranty does not cover: (a) defects or damage resulting from accident, misuse, abuse, neglect, unusual physical, electrical or electromechanical stress, or modification of any part of Product, including antenna, or cosmetic damage; (b) equipment that has the serial number removed or made illegible; (c) any plastic surfaces or other externally exposed parts that are scratched or damaged due to normal use; (d) malfunctions resulting from the use of Product in conjunction with accessories, products, or ancillary/peripheral equipment not furnished or approved by SAMSUNG; (e) defects or damage from improper testing, operation, maintenance, installation, or adjustment; (f) installation, maintenance, and service of Product, or (g) Product used or purchased outside the United States or Canada.

This Limited Warranty covers batteries only if battery capacity falls below 80% of rated capacity or the battery leaks, and this Limited Warranty does not cover any battery if (i) the battery has been charged by a battery charger not specified or approved by SAMSUNG for charging the battery, (ii) any of the seals on the battery are broken or show evidence of tampering, or (iii) the battery has been used in equipment other than the SAMSUNG phone for which it is specified.

What are SAMSUNG's Obligations? During the applicable warranty period, SAMSUNG will repair or replace, at SAMSUNG's sole option, without charge to Purchaser, any defective component part of Product. To obtain service under this Limited Warranty, Purchaser must return Product to an authorized phone service facility in an adequate container for shipping, accompanied by Purchaser's sales receipt or comparable substitute proof of sale showing the date of purchase, the serial number of Product and the sellers' name and address. To obtain assistance on where to deliver the Product, call Samsung Customer Care at 1-888-987-4357. Upon receipt, SAMSUNG will promptly repair or replace the defective Product. SAMSUNG may, at SAMSUNG's sole option, use rebuilt, reconditioned, or new parts or components when repairing any Product or replace Product with a rebuilt, reconditioned or new Product. Repaired/replaced leather cases, pouches and holsters will be warranted for a period of ninety (90) days. All other repaired/replaced Product will be warranted for a period equal to the remainder of the original Limited Warranty on the original Product or for 90 days, whichever is longer. All replaced parts, components, boards and equipment shall become the property of SAMSUNG. If SAMSUNG determines that any Product is not covered by this Limited Warranty, Purchaser must pay all parts, shipping, and labor charges for the repair or return of such Product.

WHAT ARE THE LIMITS ON SAMSUNG'S WARRANTY/LIABILITY? EXCEPT AS SET FORTH IN THE EXPRESS WARRANTY CONTAINED HEREIN, PURCHASER TAKES THE PRODUCT "AS IS," AND SAMSUNG MAKES NO WARRANTY OR REPRESENTATION AND THERE ARE NO CONDITIONS, EXPRESS OR IMPLIED, STATUTORY OR OTHERWISE, OF ANY KIND WHATSOEVER WITH RESPECT TO THE PRODUCT, INCLUDING BUT NOT LIMITED TO:

- THE MERCHANTABILITY OF THE PRODUCT OR ITS FITNESS FOR ANY PARTICULAR PURPOSE OR USE;
- WARRANTIES OF TITLE OR NON-INFRINGEMENT;
- DESIGN, CONDITION, QUALITY, OR PERFORMANCE OF THE PRODUCT;

Standard Limited Warranty

- THE WORKMANSHIP OF THE PRODUCT OR THE COMPONENTS CONTAINED THEREIN; OR
- COMPLIANCE OF THE PRODUCT WITH THE REQUIREMENTS OF ANY LAW, RULE, SPECIFICATION OR CONTRACT PERTAINING THERETO.

NOTHING CONTAINED IN THE INSTRUCTION MANUAL SHALL BE CONSTRUED TO CREATE AN EXPRESS WARRANTY OF ANY KIND WHATSOEVER WITH RESPECT TO THE PRODUCT. ALL IMPLIED WARRANTIES AND CONDITIONS THAT MAY ARISE BY OPERATION OF LAW, INCLUDING IF APPLICABLE THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE HEREBY LIMITED TO THE SAME DURATION OF TIME AS THE EXPRESS WRITTEN WARRANTY STATED HEREIN. SOME STATES/PROVINCES DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS, SO THE ABOVE LIMITATION MAY NOT APPLY TO YOU. IN ADDITION, SAMSUNG SHALL NOT BE LIABLE FOR ANY DAMAGES OF ANY KIND RESULTING FROM THE PURCHASE, USE, OR MISUSE OF, OR INABILITY TO USE THE PRODUCT OR ARISING DIRECTLY OR INDIRECTLY FROM THE USE OR LOSS OF USE OF THE PRODUCT OR FROM THE BREACH OF THE EXPRESS WARRANTY, INCLUDING INCIDENTAL, SPECIAL, CONSEQUENTIAL OR SIMILAR DAMAGES, OR LOSS OF ANTICIPATED PROFITS OR BENEFITS, OR FOR DAMAGES ARISING FROM ANY TORT (INCLUDING NEGLIGENCE OR GROSS NEGLIGENCE) OR FAULT COMMITTED BY SAMSUNG, ITS AGENTS OR EMPLOYEES, OR FOR ANY BREACH OF CONTRACT OR FOR ANY CLAIM BROUGHT AGAINST PURCHASER BY ANY OTHER PARTY. SOME STATES/PROVINCES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATION OR EXCLUSION MAY NOT APPLY TO YOU. THIS WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS, AND YOU MAY ALSO HAVE OTHER RIGHTS, WHICH VARY FROM STATE TO STATE/PROVINCE TO PROVINCE. THIS LIMITED WARRANTY SHALL NOT EXTEND TO ANYONE OTHER THAN THE ORIGINAL PURCHASER OF THIS PRODUCT AND STATES PURCHASER'S EXCLUSIVE REMEDY. IF ANY PORTION OF THIS LIMITED WARRANTY IS HELD ILLEGAL OR UNENFORCEABLE BY REASON OF ANY LAW, SUCH PARTIAL ILLEGALITY OR UNENFORCEABILITY SHALL NOT AFFECT THE ENFORCEABILITY FOR THE REMAINDER OF THIS LIMITED WARRANTY WHICH PURCHASER ACKNOWLEDGES IS AND WILL ALWAYS BE CONSTRUED TO BE LIMITED BY ITS TERMS OR AS LIMITED AS THE LAW PERMITS. THE PARTIES UNDERSTAND THAT THE PURCHASER MAY USE THIRD-PARTY SOFTWARE OR EQUIPMENT IN CONJUNCTION WITH THE PRODUCT. SAMSUNG MAKES NO WARRANTIES OR REPRESENTATIONS AND THERE ARE NO CONDITIONS, EXPRESS OR IMPLIED, STATUTORY OR OTHERWISE, AS TO THE QUALITY, CAPABILITIES, OPERATIONS, PERFORMANCE OR SUITABILITY OF ANY THIRDPARTY SOFTWARE OR EQUIPMENT, WHETHER SUCH THIRD-PARTY SOFTWARE

OR EQUIPMENT IS INCLUDED WITH THE PRODUCT DISTRIBUTED BY SAMSUNG OR OTHERWISE, INCLUDING THE ABILITY TO INTEGRATE ANY SUCH SOFTWARE OR EQUIPMENT WITH THE PRODUCT. THE QUALITY, CAPABILITIES, OPERATIONS, PERFORMANCE AND SUITABILITY OF ANY SUCH THIRD-PARTY SOFTWARE OR EQUIPMENT LIE SOLELY WITH THE PURCHASER AND THE DIRECT VENDOR, OWNER OR SUPPLIER OF SUCH THIRD-PARTY SOFTWARE OR EQUIPMENT, AS THE CASE MAY BE.

This Limited Warranty allocates risk of Product failure between Purchaser and SAMSUNG, and SAMSUNG's Product pricing reflects this allocation of risk and the limitations of liability contained in this Limited Warranty. The agents, employees, distributors, and dealers of SAMSUNG are not authorized to make modifications to this Limited Warranty, or make additional warranties binding on SAMSUNG. Accordingly, additional statements such as dealer advertising or presentation, whether oral or written, do not constitute warranties by SAMSUNG and should not be relied upon.

Precautions for Transfer and Disposal

If data stored on this device is deleted or reformatted using the standard methods, the data only appears to be removed on a superficial level, and it may be possible for someone to retrieve and reuse the data by means of special software.

To avoid unintended information leaks and other problems of this sort, it is recommended that the device be returned to Samsung's Customer Care Center for an Extended File System (EFS) Clear which will eliminate all user memory and return all settings to default settings. Please contact the **Samsung Customer Care Center** for details.

Important!: Please provide warranty information (proof of purchase) to Samsung's Customer Care Center in order to provide this service at no charge. If the warranty has expired on the device, charges may apply.
